RECOMMENDATION

Defer Item 3.4, the Service Efforts and Accomplishments Report 2013-14, until January 2015.

ANALYSIS

The Service Efforts and Accomplishments Report is a very good primer to both the achievements and struggles of our current service delivery model. The report, exists entirely to educate the Council on what is working and what policy or budgetary changes might need to be made to provide for better outcomes, has been heard in January for the last five years. With no reason why this report needs to be heard at the second to last meeting of this Council, it only makes sense for the new Council to have an opportunity to hear a comprehensive review of City services.

The power to create change now rests with the next Council, not this one, and we should allow them the opportunity to take up this item. For that reason, I suggest that this report be deferred to a meeting in January, to be heard by the new Council.
