Re: Graniterock Conditional Use Permit Annual Report
City File No. CP00-03-009

Dear Jenny:

Condition 35 of the above referenced use permit requires that Graniterock submit an annual report documenting the status and results of the required mitigation.

Graniterock has been actively pursuing the required sub-permits for this project, and received approval to construct the outfall for the facility just prior to the end of the summer season. The outfall was installed, and a report outlining the project and mitigation efforts in this area is attached. No other work took place on the site in 2004.

In addition, more detailed drawings of the riparian revegetation plan and mitigation monitoring have been required by various agencies, so I have enclosed a complete set of the most recent plans for the site (these are all in conformance with the city approved site plans, just more detailed). For your convenience I have submitted one full size set and two reduced copies.

We are now in the process of obtaining the grading plan and final water district permit required to construct the project. We anticipate completing the riparian setback in January or February, and the remainder of the grading as the weather allows. The site will first be utilized for recycling road materials in early summer, when the construction season begins.

Please contact me if you need additional information (831) 768-2106. Thank you very much.

Sincerely,

GRANITE ROCK COMPANY
