

PROJECT: Race Street Sanitary Sewer Improvement Project

General Description: The project was developed due to frequent maintenance activities along the sanitary pipeline on Race Street. The video of the sanitary lines shows several areas of broken pipe, sags and debris.

This project will be removing and replacing approximately 400 feet of 6-inch to 8-inch sanitary sewer mains.

Streets to be Impacted:
Race Street and San Carlos

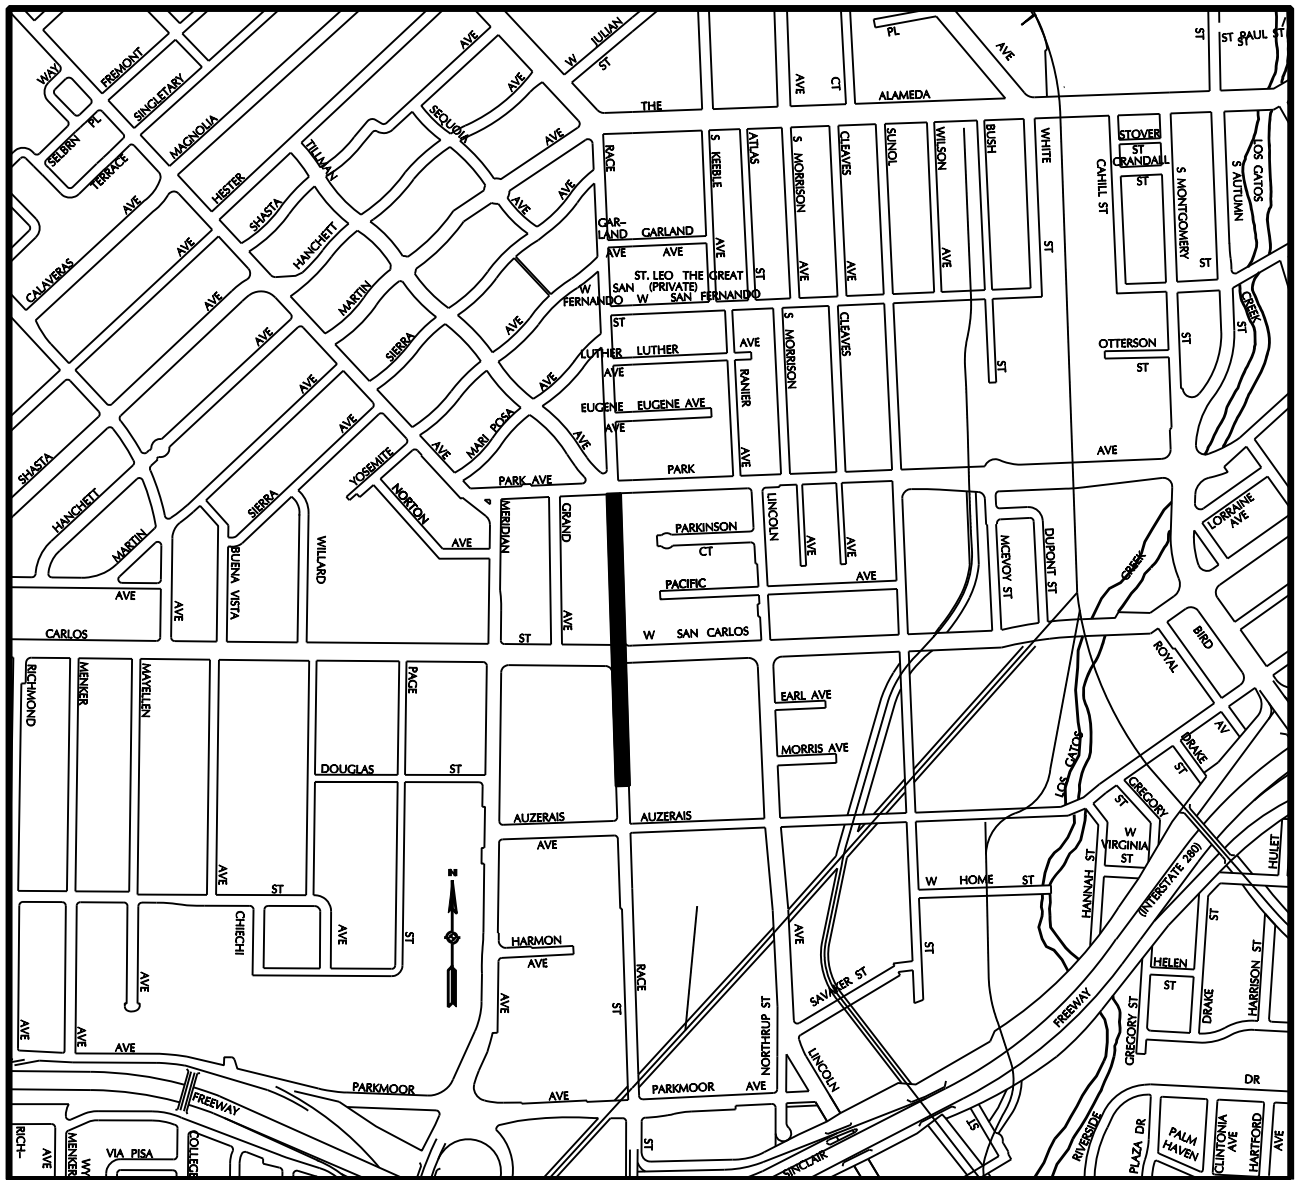

Estimated-Cost: \$150,000

Anticipated-Schedule: May 2011 Start of Construction
June 2011 End of Construction

Note: This project will be implemented by the General Engineering Contract which is an On-call construction contract for routine sewer repair and rehabilitation efforts. The project does not require the typical design – bid – build efforts of traditional project delivery.
