SENT TO COUNCIL: _____

FEB 25 2008

Memorandum by City Manager's Office

TO: HONORABLE MAYOR AND
CITY COUNCIL

FROM: James R. Helmer

SUBJECT: SIDEWALK ACCESSIBILITY
CURB RAMP PROGRAM

DATE: 02-19-08

Approved

Date

2/24/08

INFORMATION

This informational memorandum was prepared to provide a current list of Sidewalk Accessibility Curb Ramp locations that have been requested in each council district, and to provide a schedule of program activities for the 2007-2008 funded curb ramp projects.

Program Summary

The Department of Transportation (DOT) administers the Sidewalk Accessibility Curb Ramp Program by managing the installation and retrofit of curb ramps throughout the City. These curb ramps provide safer and easier pedestrian access to sidewalks, particularly for persons with disabilities, and they comply with current Americans with Disabilities Act (ADA) standards.

DOT utilizes contractual services to install nearly 175 curb ramps each year through the ongoing capital-funded program. Along with these ongoing City-funded projects, the program also assists and coordinates curb ramp installation projects from a variety of other programs and associated one-time funding sources, including Community Development Block Grants (CDBG), Strong Neighborhood Initiative (SNI) projects, Transportation Development Act (TDA) projects, the California Department of Housing and Community Development Grant, street maintenance projects, and various other street-related construction projects.

In 2007-2008, DOT will provide project management and inspection services for approximately 785 curb ramps installations. The cost for each curb ramp varies from project to project due to curb ramp types, existing conditions, needed storm drain modifications, and current construction costs. The following table summarizes the program's various funding sources and activities underway and programmed for 2007-2008.

Funding Source	Amount	Estimated Number of Ramps
CDBG 2007-08	\$600,000	150
Street Resurfacing Accessibility Ramps 2008	\$959,974	315
Citywide Sidewalk Accessibility Ramps 2008	\$700,000	170
State of California Housing Grant	\$600,000	150
Total	\$2,859,974	785

Identifying Locations for New Ramps

There is a backlog of locations throughout the City needing new or retrofitted curb ramps with an estimated cost of \$78 million (\$45 million for new curb ramps where they do not exist and \$33 million to bring existing curb ramps to current ADA standards). Because of the magnitude of the work and the limited availability of funding, DOT staff utilizes a priority approach to select locations for new curb ramps. Installation project priorities are based on the following criteria:

1. Known routes used, and requests by persons with disabilities
2. Known locations in the walking route to school plans and known routes to senior and community centers and around parks
3. Requests from the community through various groups such as the Strong Neighborhood Initiative (SNI) Program, and the City Council offices

In addition, the ADA requires that all curb ramps be installed in conjunction with new development and street modification projects such as street widening, signal installations, and street resurfacing projects. These projects typically fund the installation of curb ramps in all adjacent locations where necessary.

Requests for Ramps

DOT receives requests for approximately 200 new curb ramps annually. These requests are incorporated into the Master Sidewalk Accessibility Ramp Request List and prioritized for installation based on the criteria previously described. Once prioritized, this list is used to guide the selection installation locations as projects are scheduled. This list is constantly updated and re-prioritized as locations are removed following installations, and more locations are added as new requests are received. After the programming of 2007-08 installations, there are approximately 465 curb ramp locations remaining on the Master Sidewalk Accessibility Ramp Request List (see Attachment 1).

Upcoming Projects

The following section describes the curb ramp projects that are proposed for award by City Council over the next 12 months:

ADA Accessibility Ramps for the Resurfacing Project 2008

The *Street Resurfacing Project 2008 Phase 1 & 2* Program is scheduled for the summer of 2008. Part of that projects requirement is to install curb ramps along those streets being resurfaced. This project will install approximately 313 curb ramps along the streets being resurfaced. The anticipated Council award date for this project is February 2008, with construction beginning in March 2008. The specific locations are listed on Attachment 2.

2007-2008 Sidewalk Accessibility Improvements in Low-to-Moderate Income Areas (CDBG)

This \$600,000 project, funded by \$550,000 in Community Development Block Grants funds and \$50,000 in City matching contribution (per CDBG requirements), will install approximately 150 curb ramps identified by the SNI neighborhoods in low-to-moderate income areas of the City. The specific locations are listed on Attachment 3. The anticipated Council award date for this project is March 2008, with construction beginning in March 2008.

Citywide Sidewalk Accessibility Curb Ramps 2008,

This \$700,000 project is funded from the ongoing Traffic Capital Improvement Projects "Sidewalk Accessibility Curb Ramp Program". This project will install approximately 170 ramps throughout the City from the Master Sidewalk Accessibility Ramp Request List. All requests from or known routes used by persons with disabilities (138 priority 1 locations) at the time this project was designed will be constructed by this project. The anticipated award date for this project is March 2008, with construction beginning in May 2008. The specific locations are listed in Attachment 4.

California Housing Grant Project

This \$600,000 project, funded by the California Department of Housing and Community Development, will install approximately 150 curb ramps in SNI Areas and is scheduled for Fall 2008. All locations for this project were prioritized with SNI and community coordination. The specific locations are listed on Attachment 5.

Summary

The Sidewalk Accessibility Curb Ramp Program manages the installation of curb ramps throughout the City, utilizing City funding as well as coordinating with other programs to take advantage of additional funding that may be available. While the City's curb ramp needs are quite large, the program is making progress to reduce the backlog while working to ensure that high priority locations are addressed as efficiently as possible. DOT staff tracks requests and maintains a prioritized list of locations to guide the planning of ramp installations.

HONORABLE MAYOR AND CITY COUNCIL
