Coordination: City Attorney's Office and City Manager's Budget Office	Dept. Approval: /s/ Kerrie Romanow
Council District(s): Citywide			CMO Approval:  12/4/23

SUBJECT: AMENDMENT TO THE MASTER CONSULTANT AGREEMENT WITH ENVIRONMENTAL SCIENCE ASSOCIATES FOR ENVIRONMENTAL CONSULTING SERVICES

RECOMMENDATION:

Approve the First Amendment to the Master Consultant Agreement with Environmental Science Associates for environmental consulting services, increasing the amount of compensation by \$1,000,000 for a total agreement not to exceed \$2,000,000.

BASIS FOR RECOMMENDATION:

On November 19, 2019, after a competitive procurement, City Council awarded Environmental Science Associates (ESA) the Master Agreement for Consultant Services for services totaling \$1,000,000. The Environmental Services Department has issued 10 service orders to date, totaling \$798,190 for CEQA and/or permitting support of various Capital Improvement Program and operations and maintenance projects at the San José – Santa Clara Regional Wastewater Facility, including the Legacy Lagoons Cleanup Project, Biosolids Disposition Project, Outfall Channel and Instrumentation Improvements Project, Facility Wide Water Systems Improvements Project, New Headworks Access Road Project, Main Guard Shack Replacement Project, Flood Protection Improvements Project; San José Municipal Water System's Trimble and Agnews Water Production Wells Project; and miscellaneous on-call support services.

With this amendment, ESA will continue its work providing environmental support services for the Flood Protection Improvements Project, as well as providing environmental support for several critical near-term Capital Improvement Program and operations and maintenance projects in Fiscal Year 2023-2024 and Fiscal Year 2024-2025, including the Final Effluent Pump Station Project (Phase 1), Public-Private Partnership Fertilizer Facility Project, and Additional Digester Upgrades Project. ESA's technical expertise provided to these projects is necessary for the City to obtain timely CEQA clearance from the City's Planning, Building, and Code Enforcement Department and any required permits or other approvals from outside regulatory agencies in advance of project approval and construction. ESA's construction support expertise is also necessary for these projects to remain in compliance with any applicable mitigation measures and/or regulatory permit conditions.

Increasing the master agreement's maximum total compensation from \$1,000,000 to \$2,000,000 will allow ESA to continue to provide environmental consulting services without interruption, thereby avoiding potential project delays.

Commission Recommendation/Input: This item is scheduled to be heard at the December 14, 2023 Treatment Plant Advisory Committee meeting. A supplemental memorandum with the Committee's recommendation will be included in the January 9, 2024, City Council amended agenda.

COST AND FUNDING SOURCE:

Services performed by ESA under this agreement will be authorized by service orders. The sources of funding are:

512 – San José-Santa Clara Treatment Plant Capital Fund. (Regional Wastewater Facility Capital projects). Multiple appropriations will be used to execute service orders, depending on which Capital Improvement Program projects are involved.

513 - San José-Santa Clara Treatment Plant Operating Fund. (Regional Wastewater Facility Operating projects).
