

Here are some quick tips to get you started using the map...

The screenshot shows a web browser displaying the Vision Zero Safety Projects application. The browser address bar shows the URL: <http://csjdotgis.maps.arcgis.com/apps/webappviewer/index.html>. The application title is "Vision Zero Safety Projects" with a "Safety Projects FAQ" link. The map displays various safety projects in San Jose, including pedestrian crossings, bike lanes, and speed radar signs, marked with icons and colored overlays. A "Layer List" panel on the right side of the map shows a list of operational layers with checkboxes for selection. Callout boxes provide instructions on how to use the search bar, interact with map icons, view project timelines, and manage the layer list. A "Vision Zero San Jose" logo is visible in the bottom right corner of the map area.

Search Map By Address Or Location

Learn About Different Types of Safety Devices

View a Timeline of Completed Safety Projects

Select Map Layers, and Expand or Collapse the Layer List For Map Legend

Interact With the Map Icons for More Project Information

View Project Lists In Tabular Format
