Re: June 30, 2009 Actuarial Valuations

Dear Members of the Board:

We have provided in the enclosed Exhibit a summary of results for both the pension and health funding valuations. For financial disclosure purposes, we will provide another report for the health plan that complies with the Governmental Accounting Standards Board requirements. That report would be furnished as soon as it becomes available.

We look forward to discussing this Exhibit, and the pension and health funding valuation reports, with you.

Sincerely,

Paul Angelo, FSA, MAAA, EA
Senior Vice President and Actuary

Andy Yeung, ASA, MAAA, EA

Re: June 30, 2009 Retiree Medical and Dental Valuation Results

Dear Members of the Board:

In this report, we have calculated the funding requirements for the 2010/2011 fiscal year based on the membership and financial information available as of June 30, 2009.

Funding Policy

Prior to the 2009/2010 fiscal year, the Board's funding policy was to determine employer and member contribution rates so that the City and the members would share in the funding of the projected retiree medical and dental benefit cashflows for the next 10 fiscal years. For the medical program, the City and the members shared equally in the projected cashflows not covered by current assets. For the dental program, the City paid 75% and the members paid 25% of the unfunded cashflows.

The above policy remains unchanged for determining the employer and member contribution rates for the Fire Department after the 2008/2009 fiscal year. For the Police Department, the 50%/50% and 75%/25% cost sharing between the employer and the members for the medical and dental programs respectively remain unchanged; however, effective with the 2009/2010 fiscal year, the policy for setting the employer and member contributions for the Police Department was amended so that those contribution rates would fully prefund the entire cost of the medical and dental programs after a phase-in period of 5 years. It is our understand that the full prefund rates should include an adjustment to reflect the additional cost associated with partial prefunding during the 5-year phase-in period.

Benefits, Compensation and HR Consulting ATLANTA BOSTON CALGARY CHICAGO CLEVELAND DENVER HARTFORD HOUSTON LOS ANGELES
MINNEAPOLIS NEWORLEANS NEW YORK PHILADELPHIA PHOENIX PRINCETON RALEIGH SAN FRANCISCO TORONTO WASHINGTON, D.C.

Multinational Group of Actuaries and Consultants BARCELONA BRUSSELS DUBLIN GENEVA HAMBURG JOHANNESBURG LONDON MELBOURNE
MEXICO CITY OSLO PARIS

It is our understanding that, for the Police Department, during the 5-year phase-in period the annual increases to the employer and the member contribution rates are limited to 1.35% and 1.25% of payroll, respectively of the rates paid in the previous fiscal year. Also, if the employer and member rates are in excess of 11% and 10% of payroll, respectively during or at the end of the phase-in period, the parties should meet and confer on how to address any retiree healthcare contributions above those two percentages. Such discussions should include alternatives to reduce retiree healthcare costs.

It should also be noted that there is an implicit subsidy paid by the City for the pre-65 retirees because their medical premiums are in the same rating pool as the current active employees. For the purpose of determining the employer and member contribution rates in this report, we have continued to make the assumption that the cost of the implicit subsidy would be paid for entirely by the City on a pay-as-you-go basis and hence not included in the contribution rates in this report.

While there is no requirement to prefund the liabilities associated with the implicit subsidy, the disclosure of such liabilities is required under the Government Accounting Standards Board (GASB) Statements No. 43 and 45. The liabilities for the implicit subsidy together with the other liabilities for the health plan calculated using the GASB assumptions and procedures will be provided in a separate GASB 43/45 report.

Cashflows and Associated Contribution Rates

Funding Methodology

Similar to the methodology used in the last valuations to determine the employer and member contribution rates for the 2009/2010 fiscal year, for the 2010/2011 fiscal year we have developed the contribution rates by first determining the contributions required for funding the cashflows for the next 10 fiscal years.

This method produces the rates for the Fire Department. For the Police Department, we have to add in the incremental rates required to reflect the second year of the 5-year phase-in to fully prefund the entire cost of the medical and dental programs.

Please note both the 10-year cashflow and the full prefunding calculations described above have been carried out on a combined basis with all the members from both the Fire and Police Departments. In order to carry out the calculations based on the separate 10-year cashflows and fully prefunded liabilities of each of the two Departments, we would need to first segregate the current assets for each of the two Departments.

An illustrative calculation to show the effects of an asset split and some of the policy questions that would have to be answered by the Board before splitting the assets were included in the attached letter dated December 19, 2006. We are available to review those issues again with the

Board if requested. Note that it may become necessary to split or track the assets separately or at least in some way enhance the current methodology to give recognition to the additional phase-in contributions made by the employer and the members for the Police Department effective with the 2009/2010 fiscal year.

First Step: 10-Year Cashflows Funding Requirement

Based on the cashflows projected as of June 30, 2009, we have summarized in the attached Exhibit I the contribution rates under the 10-year cashflow policy. This method produces the final contribution rates for the Fire Department and provides one of the two rates required to calculate the final rates for the Police Department as discussed above. Those rates are 3.92% for the City and 3.61% for the Members.

Second Step: 5-Year Phase-in of the Full Prefunding Requirement

For Police employees, we have determined the rates for the second year of the phase-in from the 10-year cash flow methodology to full prefunding, based on the Memorandum of Understanding between The City of San Jose and the San Jose Police Officers' Association (SJPOA), as documented in correspondence from the City to the Retirement System, dated March 23, 2009. The basis for the prefunding is:

- Entry Age Normal funding method,
- 30-year close amortization period for determining the UAAL contribution rate commencing with the 2009/2010 fiscal year,
- Discount rate of 8.00%, used for a fully funded plan,
- No reflection of implicit subsidy in the costs,
- The Medical cost is allocated 50%/50% between the City and Member, and
- The Dental cost is allocated 75%/25% between the City and Member

The attached Exhibit II shows the process used in adjusting the full prefunding rates to the partial phase-in rates.

Calculate the Full Prefunding Rate

In Exhibit II, we show the actuarial accrued liability, the actuarial value of assets, normal cost, amortization of the unfunded actuarial accrued liability, and the development of the full prefunding rate both before and after the adjustment to reflect the additional cost associated with the partial prefunding during the 5-year phase-in period.

Initial Rate Reflecting 40% Phase-In of Full Prefunding

The contribution rates based on full prefunding are then combined with the contribution rates developed in Exhibit I to get a weighted average rate. For the 2010/2011 fiscal year, the full prefunding rate is weighted 40% and the 10-year cashflow rate is weighted 60%. The calculation yields a 6.26% rate for the City and 5.76% rate for Members.

Reflect Caps on Increases In Prior Year Contribution Rates

The 2010/2011 fiscal year rates may not exceed the 2009/2010 fiscal year rates by 1.35% for the City and 1.25% for the Member. The 2009/2010 fiscal year rates, as adopted at the May 7, 2009 Board meeting, are 5.28% for the City and 4.78% for the Member. Therefore, the 2010/2011 rates are limited to 6.63% and 6.03% for the City and the Member, respectively. When we compare the initial phase-in rates against the caps, we find that for the 2010/2011 fiscal year, the caps do not apply.

Final 2010/2011 Rates For Police

The contribution rates, calculated as 40%/60% weighted average of full prefunding and 10-year cashflow bases and also reflecting the caps are 6.26% for the City and 5.76% for the Member.

A summary of the projected rates during the 5-year phase-in period, assuming all the actuarial assumptions included in this letter would be met, is also provided in Exhibit II. There is a reduction in the ultimate cost at the end of the 5-year phase-in of about 1% of payroll relative to the cost estimate that was used in original Police MOU negotiations with the City. The primary reason for the decrease in cost is that the actual medical premiums for the 2009/2010 fiscal year are lower than those used in the original projections. In addition, both the current 2009/2010 fiscal year payroll and the future payroll projected using the higher wage and salary increase assumptions adopted by the Board for the June 30, 2009 experience study have resulted in higher anticipated active payroll which further reduce the cost of the health plan when expressed as a percent of payroll.

The results for the funding valuation is summarized below:

	2009 (% of pay)		
	Fire	Police	Combined
Medical			
City	3.46%	5.51%	4.79%
Member	3.46	5.51	4.79
Total	6.92	11.02	9.58
Dental			
City	0.46%	0.75%	0.65%
Member	0.15	0.25	0.21
Total	0.61	1.00	0.86
Medical and Dental			
City	3.92%	6.26%	5.44%
Member	3.61	5.76	5.00
Total	7.53	12.02	10.44

Projected Compensation is \$255,222,552 as of June 30, 2009.

The results shown in this report have been certified by Andy Yeung, ASA, EA, MAAA and Patrick Twomey, ASA, MAAA. The certifying actuaries are Members of the Society of Actuaries, the American Academy of Actuaries and other professional actuarial organizations and collectively meet their "General Qualification Standards for Statements of Actuarial Opinions" to render the actuarial opinion contained herein.

* Applied to active members eligible for unreduced pension benefits.

Retirement Age and Benefit for Deferred Vested Members: For current deferred vested members, the retirement assumption is age 55. It is assumed that 75% of deferred vested members work for a reciprocal employer.

Future Benefit Accruals: 1.0 year of service per year.

Inclusion of Deferred Vested Members: No deferred vested members are included in the valuation.

Percent Electing Spouse Coverage: 85%

Age of Spouse: Wives are 3 years younger than their husbands.

Future Retiree Medical Enrollment: 95% of future eligible retirees are assumed to elect retiree medical and dental coverage.

EXHIBIT III**Actuarial Assumptions (continued)**

Net Investment Return: 8.00%, net of administration and investment expenses.

Consumer Price Index: Increase of 3.50% per year.

Salary Increases:

Annual Rate of Compensation Increase

Inflation: 3.50% per year;
plus 0.75% real across-the-board salary increase;
plus the following Merit and Promotion increases based
on completed years of service.

Years of Service	Annual Increase
0 - 5	5.50%
6 - 7	2.50
8 +	1.75

Dental Premium: \$94.48 per month for calendar years 2009 and 2010, with the same premium for single or married coverage.

Medicare Part B Premium: \$96.40 per month for calendar year 2009 and calendar year 2010, with an average monthly premium of \$96.40 per month for the 2009-2010 fiscal year.

EXHIBIT III

Actuarial Assumptions (continued)

MEDICAL TRENDS FOR JUNE 30, 2009 VALUATION

Trends to be applied in following fiscal years, to all health plans.

Trend is to be applied to premium for shown fiscal year to calculate next fiscal year's projected premium

First Fiscal Year (July 1, 2009 through June 30, 2010)

PLAN	Blue Shield PPO/POS, Under Age 65	Blue Shield PPO/POS, Age 65 and Over	Kaiser HMO, Under Age 65	Kaiser Senior Advantage	Blue Shield HMO Under Age 65	Blue Shield HMO, Age 65 & Over
Trend to be applied to 2009-2010 Fiscal Year premium	10.89%	10.89%	9.54%	6.92%	9.97%	9.97%

		The fiscal year trend rates are based on the following calendar year trend rates:	
Fiscal Year	Trend (Approximate)	Calendar Year	Trend (applied to calculate following year premium)
2010-2011	8.25%	2010	8.50%

EXHIBIT IV**Summary of Plan**

This exhibit summarizes the major benefit provisions as included in the valuation. To the best of our knowledge, the summary represents the substantive plan as of the measurement date. It is not intended to be, nor should it be interpreted as, a complete statement of all benefit provisions.

Eligibility:	Retired for disability or service from active service with 15 years of service, or receiving a benefit of at least 37.5% of FAS. Also, if a member separates from service after July 5, 1992, with 20 years of service leaving contributions in the retirement plan until the member applies for retirement benefits.
Benefit Types:	
<i>Medical Plan Choices</i>	Kaiser, BlueShield and PacifiCare
<i>Dental Plan</i>	Delta Dental and Enhanced Delta Dental
<i>Medical Premiums</i>	For retirees not eligible for Medicare, the Plan pays the lowest non-Medicare HMO premium rate. For retirees eligible for Medicare, the Plan pays the retiree's HMO premium plus the Medicare Part B premium, subject to the same maximums that apply to non-Medicare retirees. For the 2009-2010 fiscal year, the maximum subsidy is \$464.01 for a single member and \$1,155.33 for member with spouse or domestic partner.
<i>Dental Premiums</i>	The Plan pays the entire premium.
<i>Benefit</i>	<i>The same medical and dental coverage that the City provides an active member.</i>
Active Plan Funding :	
Fire	
(Based on Cash Flow Requirement for the Next Ten Years):	
<i>Employee's Contribution</i>	Contribute 50% of the health premium subsidy and 25% of the dental premium subsidy as determined at each actuarial valuation based on the cash flow requirement for the next ten years.
<i>City's Contribution</i>	Contribute 50% of the health premium subsidy and 75% of the dental premium subsidy as determined at each actuarial valuation based on the cash flow requirement for the next ten years.

EXHIBIT IV

Summary of Plan (continued)

Police

Employee's Contribution

Contribute 50% of the health premium subsidy and 25% of the dental premium subsidy as determined at each actuarial valuation based on a weighted average of:

- The cash flow requirement for the next ten years, and
- The full prefunding requirement based on: 1) 8.00% discount rate, 2) Entry Age Normal Funding Method, 3) 30-year closed amortization of the unfunded actuarial accrued liability.

For the 2010-2011 fiscal year, the contribution rate is based on 40% of the full prefunding rate and 60% of the 10-year cash flow requirement rate.

City's Contribution

Contribute 50% of the health premium subsidy and 75% of the dental premium subsidy as determined at each actuarial valuation based on a weighted average of:

- The cash flow requirement for the next ten years, and
- The full prefunding requirement based on: 1) 8.00% discount rate, 2) Entry Age Normal Funding Method, 3) 30-year closed amortization of the unfunded actuarial accrued liability.

For the 2010-2011 fiscal year, the contribution rate is based on 40% of the full prefunding rate and 60% of the 10-year cash flow requirement rate.

EXHIBIT V**Funding Methodology**

This exhibit summarizes the Plan's funding methods.

**Actuarial Basis for
Partial Prefunding:**

Aggregate Cost Method

Contributions plus current assets would be sufficient to pay benefits over the next 10 years.

**Actuarial Basis for Full Prefunding
(Police Only):***Actuarial cost method*

Entry age normal, level percent of pay

Amortization method

30-year closed (decreasing) amortization period, level percent of pay

Remaining amortization period

29 years used in setting rate for 2010/2011 fiscal year

Actuarial Value of Assets:

In developing the total actuarial value of assets for the pension and health plans, we have adjusted the market value of assets (MVA) by smoothing the market returns that were either below or above the assumed rate of 8.00% over the last five years. In prior valuations, the Board's methodology included an adjustment to the smoothed actuarial value of assets if it fell outside the range of 80% to 120% of the market value of assets (also commonly referred to as the "market value corridor"). The adjustment would be the amount necessary to keep the smoothed actuarial value of assets within the corridor.

At the February 4, 2010 meeting, the Board decided to change the market value corridor (MVA corridor) to a range of 70% to 130% of market value. This change in the corridor was made only for the June 30, 2009 valuation.

For the June 30, 2009 valuation, the preliminary actuarial value of assets before any MVA corridor was calculated at about 132% of the market value of assets. The final actuarial value of assets was limited to 130% of the market value of assets so that an additional loss equal to the difference between 132% and 130% of the market value of assets, or approximately \$45.0 million, was recognized immediately in the June 30, 2009 pension and health plan valuations.

Re: **City of San Jose Police and Fire Department Retirement Plan
Division of Assets Between Police and Fire Members as of June 30, 2005**

Dear Ed:

As we discussed with the Board at the December meeting, attached are illustrative examples of how the June 30, 2005 actuarial value of assets would be divided between police and fire members. In Exhibit 1, we have provided the division of assets for the pension plan and in Exhibit 2, we have provided the division of assets for the medical and dental plans. The methodology follows that described in our letter of November 28, 2006.

We have also included a comparison of the contribution rates before and after the division of assets. For the pension plan, the "after division" contribution rates also reflect a separate valuation of the police and fire member accrued liabilities and normal costs. As you will see, the UAAL contribution rate is unchanged between the before and after scenarios, since that result was the underlying principle in the division of assets methodology. However, the normal cost rate after the division of assets is now slightly higher for the fire members, reflecting the fact that their average entry age is slightly higher than that of the police members.

For the medical and dental plans, the "after division" contribution rates for the police and the fire groups will be the same at the date of the division. However, different contribution rates will emerge in future valuations if there is a difference in the demographic experience for the two groups. Please note that a higher proportion of the total assets for the medical and dental plans has been allocated to the fire members. This is because the ratio of the present value of benefit to the present value of payroll over the 10 year period beginning July 1, 2005 is higher for the fire group than that of the police group, so a larger allocation of assets is necessary to maintain their current rate.

Page 2

Note that the member and City rates for police members are before the police benefit enhancement. In addition, these contribution rates and liability results are based entirely on the Segal pension and medical and dental reconciliations (reference: our letters dated October 4 and November 30). For a small group of members without a police or fire classification (about 0.3% of the total liability for the pension plan), we have allocated their liabilities in proportion to the known liabilities for those with a police or fire classification.

It is our belief that there is no need to allocate the SRBR assets between police and fire members. Recall that the primary reason for dividing the assets between the fire and police is to allow the Board to charge fire and police contribution rates that equitably reflect differences in benefit formula, demographic profile (e.g., age at retirement), etc. between the two groups. Since no contributions are collected from the City or the members to pay for the SRBR benefits, the SRBR assets do not have to be divided to satisfy the rate equity goal.

Furthermore, we understand, based on the following language in the Municipal code, that the SRBR is to provide: "...a greater benefit for those persons who have been in benefit status for a longer period of time and those persons receiving the lowest monthly benefit payments...". Therefore, it would appear that maintaining the equity among the different generations of retirees and beneficiaries is a priority for the System in maintaining the SRBR. Splitting the assets could potentially hinder the Board's ability to achieve this goal.

If you have any questions, please let us know.

Sincerely,

Paul Angelo, FSA, EA, MAAA
Senior Vice President & Actuary
