LETTER OF TRANSMITTAL

December 21, 2012

Board of Administration City of San José Police and Fire Department Retirement Plan 1737 North 1st Street, Suite 580 San José, California 95112

Dear Members of the Board:

The purpose of this report is to present the June 30, 2012 actuarial valuation of the City of San José Police and Fire Department Retirement Plan ("Plan"). This report is for the use of the Board of Administration and its auditors in preparing financial reports in accordance with applicable laws and accounting requirements.

On June 5, 2012, voters approved Measure B which would make a number of changes to the Plan. We understand that most of the changes will not be implemented until a court rules on their legality, and to date, no implementing ordinances have been adopted by the City. Consequently, the provisions of Measure B are not reflected in this valuation.

The key results of the valuation are shown in the table below.

Summary of Key Valuation Results							
Valuation Date		6/30/2012		6/30/2011			
Discount Rate	,	7.25%		7.50%			
Actuarial Liability (AL)	\$	3,430.3	\$	3,196.0			
Actuarial Value of Assets (AVA)	\$	2,703.5	\$	2,685.7			
Unfunded Actuarial Liability (UAL)	\$	726.8	\$	510.3			
AVA Funded Ratio		78.8%		84.0%			
Market Value of Assets (MVA)	\$	2,578.9	\$	2,627.7			
MVA Funded Ratio		75.2%		82.2%			
Fiscal Year Ending		6/30/2014		6/30/2013			
Aggregate Contribution Rates							
Member							
Normal Cost Rate		11.6%		11.0%			
UAL Rate		0.1%		0.1%			
Total Member Rate		11.7%		11.2%

Board of Retirement December 21, 2012 Page ii

The City contribution rates and amounts shown above are before adjusting for the offset due to the charge to the SRBR. This charge reduces the City's contribution rate for Fiscal Year Ending (FYE) in 2013 by 0.46% and approximately \$0.8 million as of the beginning of the fiscal year, and reduces the City's contribution rate for FYE 2014 by 0.82% and approximately \$1.5 million as of the beginning of the fiscal year.

At its December 2012 meeting, the Board reduced its investment return assumption from the 7.50% that was used in the prior valuation to 7.25%. The reduction in the assumption increased the measure of actuarial liability by approximately \$108 million and the normal cost rate by approximately 2.5% of payroll. More details on the impact of this change and the experience during the year are found in the remainder of the report.

In preparing our report, we relied on information (some oral and some written) supplied by the City of San José Department of Retirement Services. This information includes, but is not limited to, the plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice #23.

We hereby certify that, to the best of our knowledge, this report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

This actuarial valuation report was prepared for the Board of Administration for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. This actuarial valuation report is not intended to benefit any third party, and Cheiron assumes no duty of liability to any such party.

Sincerely, Cheiron

Gene Kalwarski, FSA, FCA, EA, MAAA

Principal Consulting Actuary

William R. Hallmark, ASA, FCA, EA, MAAA

Willie R. Hallank

Consulting Actuary

SECTION I BOARD SUMMARY

The primary purpose of this actuarial valuation is to report, as of the valuation date, on the following:

- The financial condition of the City of San José Police and Fire Department Retirement Plan,
- Past and expected trends in the financial condition of the Plan,
- The Members' and City's contribution rates for the Fiscal Year Ending June 30, 2014, and
- Information required by the Governmental Accounting Standards Board (GASB).

The principal valuation results are summarized in this section, including a brief description of the basis upon which the contributions were determined and an examination of the current financial condition of the Plan. In addition, the key historical trends and projected financial outlook for the Plan are reviewed.

A. Valuation Basis

Member contribution rates are set equal to the sum of:

- A portion (3/11th) of the Entry Age Normal Cost Rate (excluding reciprocity),
- A historical share of the assumed administrative expenses, and
- A portion of the UAL Rate attributable to certain benefit improvements.

The Plan's funding policy sets the City's contribution rates equal to the sum of:

- A portion (8/11th) of the Entry Age Normal Cost Rate (excluding reciprocity),
- The Reciprocity Rate which is the prefunding of the liability for reciprocal benefits with certain other California public pension plans,
- A historical share of the assumed administrative expenses,
- The assumed annual cost of the SRBR, and
- The remaining portion of the UAL Rate.

Beginning with the June 30, 2011 valuation, any changes in methods or assumptions are amortized over a closed 20-year period, and all other portions of the UAL are amortized over a closed 16-year period from the valuation in which they are first recognized.

SECTION I BOARD SUMMARY

B. Current Financial Condition

On the following pages, we summarize the key results of the June 30, 2012 valuation and how they compare to the results from the June 30, 2011 valuation.

1. Membership:

As shown in Table I-1 below, total membership declined 0.6% from 2011 to 2012. Terminated vested membership decreased by 27.2% due to the large number of terminations that happened just before the June 30, 2011 valuation and who subsequently took a refund of contributions. There was also a small reduction in total payroll caused by a decrease in both the number of overall active members and average pay per member.

	Table I-1		
	Total Membership	p '	
Item	June 30, 2012	June 30, 2011	% Change
Active Members			
Police	1,076	1,122	-4.1%
Fire	642	613	4.7%
Total Active Members	1,718	1,735	-1.0%
Terminated Vesteds	166	228	-27.2%
Service Retirees	861	824	4.5%
Disabled Retirees	829	812	2.1%
Beneficiaries	<u>252</u>	249	1.2%
Total Members	3,826	3,848	-0.6%
Active Member Payroll			
Police	\$ 116.5	\$ 121.7	-4.3%
Fire	<u>71.5</u>	69.0	3.6%
Total Payroll	\$ 188.0	\$ 190.7	-1.5%
Average Pay per Active Member			
Police	\$ 108,228	\$ 108,499	-0.2%
Fire	\$ 111,378	\$ 112,546	-1.0%
Total Average Pay	\$ 109,405	\$ 109,929	-0.5%

Total payroll amounts in millions

2. Assets and Liabilities:

Table I-2 on the following page compares the assets, liabilities, UAL, and funding ratios between June 30, 2012 and June 30, 2011. The key results shown in Table I-2 indicate that the total actuarial liability increased by 7.3% and the market value of assets

SECTION I BOARD SUMMARY

decreased by 1.9%. The Plan employs an asset smoothing method which dampens investment market volatility. For this year the smoothed value of assets (called the actuarial value of assets) increased by 0.7%. The ratio of the actuarial value of assets to the market value of assets increased from 102% to 105%, indicating that the deferred losses are greater than the deferred gains. Finally, due to the investment loss and the reduction of the investment return assumption from 7.5% to 7.25%, the overall funding deficit (actuarial value of assets less actuarial liability) increased from \$510.3 million to \$726.8 million, resulting in a decrease in the funding ratio from 84.0% to 78.8%. Based on the market value of assets, the funding ratio decreased from 82.2% to 75.2%.

		able I-2						
Assets and Liabilities								
Item	Jun	e 30, 2012	Jun	e 30, 2011	% Change

Funding Ratio – Actuarial Value)	78.8%		84.0%	-6.2%			

Amounts in millions

3. Contributions:

Table I-3 shows sources for the change in the City contribution rate from the rate that was calculated in the prior report and the rate that was expected to be calculated in this report. The plan experience slightly reduced the City's contribution compared to what had been expected based on the prior valuation, but the change in the investment return assumption increased the contribution by 10 million dollars.

SECTION I BOARD SUMMARY

	Table I-3 Reconciliation of Changes in Contribution Rates and Amounts								
		Member Rate	City Normal Cost	City UAL Rate	City Total Rate		ojected ayroll	Cont	Y City tribution mount
1.	FYE 2013 Contribution	11.2%	33.4%	24.3%	57.7%	\$	190.7	\$	106.1

4.	FYE 2014 Contribution	11.7%	34.7%	35.8%	70.5%	\$	188.0	\$	128.0

Dollar amounts in millions

The contribution rates and amounts shown above are prior to adjustment for the offset in City contribution rates and amounts due to the charge to the SRBR. This charge applies whenever the City's contribution rate increases due to poor investment performance, and it reduces the City's contribution rate for FYE 2013 by 0.46% and approximately \$0.8 million, and reduces the City's contribution rate for FYE 2014 by 0.82% and approximately \$1.5 million. In Section IV of this report, we provide more detail on the development of this contribution rate.

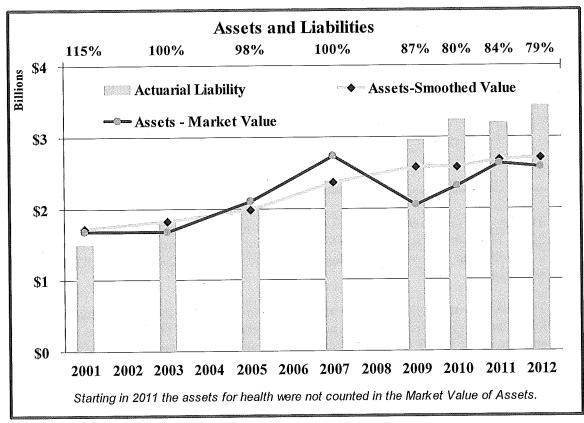

SECTION I BOARD SUMMARY

C. Historical Trends

Despite the fact that most of the attention given to the valuation is with respect to the most recently computed unfunded actuarial liability, funding ratio, and contribution rates, it is important to remember that each valuation is merely a snapshot of the long-term progress of a pension fund. It is more important to judge a current year's valuation result relative to historical trends, as well as trends expected into the future.

The chart below shows the historical trends for assets (both market and smoothed) versus the actuarial liability, and also shows the progress of the funding ratios since 2001. From 2001 to 2012, (with the exceptions of 2007 and 2011), the funding ratio has declined primarily because the plan has experienced lower than expected investment returns and has reduced its assumption of future investment returns.

Assets and Liabilities 2001-2012

	2001	2003	2005	2007	2009	2010	2011	2012
Funded Ratio	114.8%	100.2%	97.8%	99.7%	86.7%	79.8%	84.0%	78.8%
UAL/(Surplus)	\$ (221.1)	\$ (3.1)	\$ 44.3	\$ 6.6	\$ 393.9	\$ 653.8	\$ 510.3	\$ 726.8
\ 1 /				,			Amount	s in millions

SECTION I BOARD SUMMARY

The chart below shows the historical trends for the Plan's contribution rates since the Fiscal Year Ending June 30, 2003. All information shown prior to the Fiscal Year Ending June 30, 2013 was calculated by the prior actuary.

Employer and Member Contribution Rates for FYE 2003 - 2014

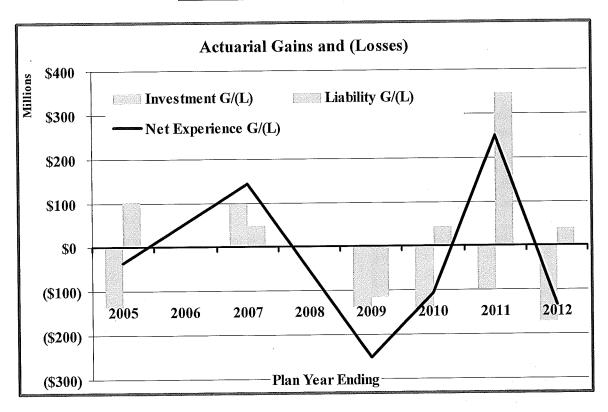

The key information in this chart is the increase in the employer contribution rate since FYE 2010. This increase is largely due to the poor investment earnings during 2008 and 2009, but lower discount rates were also adopted effective for contribution rates in FYE 2012, 2013, and 2014.

The chart on the following page represents the pattern of the Plan's actuarial gains and losses, broken into the investment and liability components. The chart does not include any changes in the Plan's assets and liabilities attributable to changes to methods, procedures or assumptions.

SECTION I BOARD SUMMARY

SJPF Historical Gain/(Loss) 2005-2012

The key insights from this chart are:

- Investment losses (gold bars) in 2005 are partially offset by investment gains from 2006 and 2007. From 2008 to 2012, there were additional investment losses. Since the actuarial value of assets only recognizes a portion of the recent market losses, additional investment losses on the actuarial value of assets are expected next year.
- On the liability side, five of the six valuations showed actuarial gains with 2009 as the only exception. The actuarial gain in 2012 is primarily due to a combination of salary and termination experience offset somewhat by retirement experience.

SECTION I BOARD SUMMARY

D. Projected Financial Trends

The analysis of projected financial trends is an important part of this valuation. In this Section, projections of the June 30, 2012 valuation results are used to illustrate the future outlook for the Plan in terms of benefit security (assets compared to liabilities) and the expected progression of contributions.

In the charts that follow, we project assets and liabilities, the pay down of UAL, and City contributions on two different bases:

- 1) Assuming no gains or losses compared to the assumptions (i.e., 7.25% return for 2012-13 and each and every year that follows along with the assumed transfer to the SRBR in each year), and
- 2) Assuming returns shown in the table below. These are rates of return that vary each year but over the projection period equal on average the assumed 7.25% return. We do this in order to illustrate the impact of volatility because the Plan's returns will never be level each and every year.

FYE	2013	2014	2015	2016	<u>2017</u>	2018	2019	2020	<u>2021</u>	2022
Return	20.0%	8.0%	3.0%	20.0%	-4.0%	18.0%	13.0%	9.0%	-7.0%	16.0%
FYE	2023	<u>2024</u>	2025	<u>2026</u>	2027	<u>2028</u>	<u>2029</u>	2030	2031	<u>2032</u>
Return	9.0%	-8.0%	8.0%	13.0%	16.0%	-8.0%	-16.0%	30.0%	25.0%	-1.0%

Please note that the investment returns shown above were selected solely to illustrate the impact of investment volatility on the pattern of funded status and City contribution rates and amounts. They are not intended to be predictive of actual future contribution rates or funded status or even to represent a realistic pattern of investment returns.

SECTION I BOARD SUMMARY

Projection Set 1: Assets and Liabilities

The chart below shows asset measures (green and orange lines) compared to the actuarial liability (gray bars). At the top of each chart is the progression of funding ratios. The key insight from this chart is the steady projected improvement in funded ratios in the first chart, and how varying investment returns can impact the progression of funding ratios. In addition, even though the varying returns produce the same average return, the funded status at the end of the projection is only 90% compared to 100% with the 7.25% return each year.

Chart 1: Projection of Assets and Liabilities, 7.25% return each year

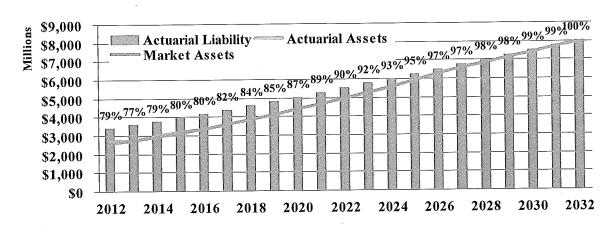

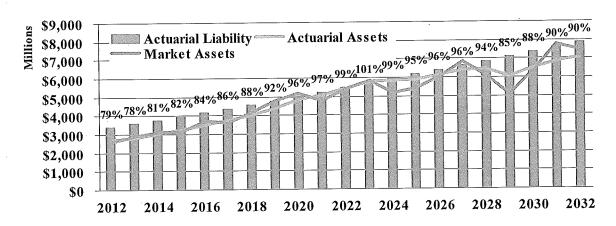

Chart 2: Projection of Assets and Liabilities, varying returns averaging 7.25% over time

SECTION I BOARD SUMMARY

Projection Set 2: Projected Employer Contribution Rate

The chart below shows projected member contribution rates (teal bars) and City contribution rates (gold bars) compared to the similar projection based on the 2011 valuation (red line). City contribution rates are expected to increase over the next several years as the 2008-09 and 2011-12 investment losses are fully recognized. The increase in rates compared to the 2011 valuation are primarily due to the change in the discount rate and the investment losses for 2011-12. The significant decrease in contribution rates and amounts in 2027 and 2028 is due to the completion of the amortization of the actuarial losses and assumption changes recognized in the 2009 and 2010 actuarial valuations.

Chart 1: 7.25% return each year – percentage of pay

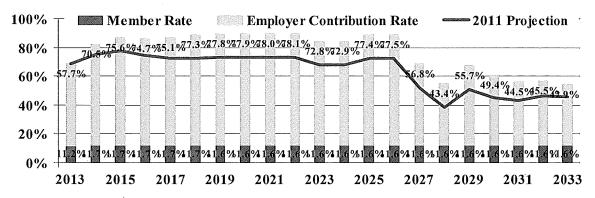

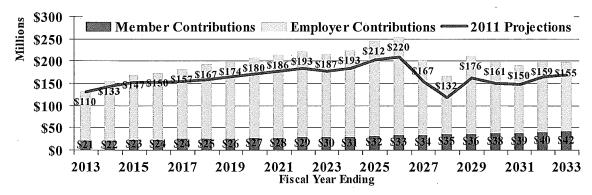

Chart 2: 7.25% return each year – dollar contribution amounts

In the graph above, the City dollar contribution amount for FYE 2013 is the actual City contribution made in July, 2012, adjusted to the middle of the fiscal year with interest plus the actual amount credited back to the general reserve from the SRBR.

SECTION I BOARD SUMMARY

Chart 3: varying returns averaging 7.25% over time – percentage of pay

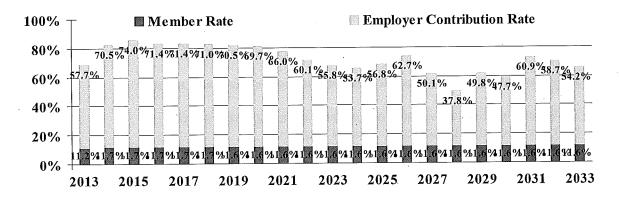

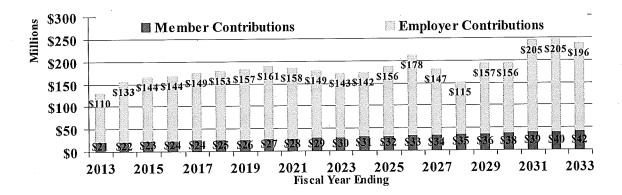

Chart 4: varying returns averaging 7.25% over time - dollar contribution amounts

Charts 3 and 4 illustrate the effect of varying investment returns on the projected contribution rates and amounts. The asset smoothing and amortization methods smooth much of the volatility, but significant contribution volatility remains.

SECTION II ASSETS

The Plan uses and discloses two different asset measurements which are presented in this section of the report: market value and actuarial value of assets. The market value represents, as of the valuation date, the value of the assets if they were liquidated on that date. The actuarial value of assets is a value that smoothes annual investment return performance over multiple years to reduce the impact of short-term investment volatility on City contribution rates.

On the following pages we present detailed information on the Plan's assets:

- A. Statement of changes in the market value of assets during the year,
- B. Development of the actuarial value of assets, and
- C. Statement of changes in the Supplemental Retiree Benefit Reserve.

A. Market Value of Assets

Table II-1 shows sources for the change in the market value of assets.

Table II-1									
Change in Market Value of Assets									
		June 30, 2012		June 30, 2011					
	Retirement	COLA	Total	Total					
Market Value, Beginning of Year	\$ 1,762,248	\$ 865,479	\$ 2,627,728	\$ 2,264,050					
Contributions Member City Total	\$ 13,352 70,960 \$ 84,312	\$ 5,993 50,049 \$ 56,042	\$ 19,345 <u>121,008</u> \$ 140,353	\$ 29,629 77,918 \$ 107,547					
Net Investment Earnings ¹	\$ (22,427)	\$ (11,449)	\$ (33,877)	\$ 393,250					
Benefit Payments Administrative Expenses	\$ 116,543 \$ 2,453	\$ 35,177 \$ 1,102	\$ 151,720 \$ 3,556	\$ 137,120 N/A					
Market Value, End of Year	\$ 1,705,136	\$ 873,793	\$ 2,578,929	\$ 2,627,727					

Amounts in thousands

The net investment earnings represent approximately a -1.3% return on the market value of assets compared to an assumed return of 7.5%.

¹ Gross investment earnings less investment expenses in 2012 and less investment and administrative expenses in 2011.

SECTION II ASSETS

B. Actuarial Value of Assets

To determine on-going contribution amounts, most pension funds use an actuarial value of assets that smoothes year-to-year market value returns in order to reduce the volatility of contribution rates.

The actuarial value of assets is calculated by recognizing the deviation of actual investment returns compared to the expected return (7.50% for 2011-12, 7.75% for 2010-11, 8.00% for prior years) over a five-year period. The dollar amount of the expected return on the market value of assets is determined using the actual contributions and benefit payments during the year. Any difference between this amount and the actual net investment earnings is considered a gain or loss. Table II-2 below shows the gains and losses for the last four years and the portion of each gain or loss that is not recognized in the current actuarial value of assets. These deferred amounts will be recognized in future years.

Table II-2								
Development of Actuarial Value of Assets ¹								
	June 30, 2012							
	Retirement		COLA	Total				
Market Value of Assets	\$1,705,135,747	\$	873,792,861	\$ 2,578,928,608

Prior Year (60% Deferred)	87,792,047		41,708,975	129,501,023				
2 nd Prior Year (40% Deferred)	40,965,743		19,348,397	60,314,140				
3 rd Prior Year (20% Deferred)	(83,922,493)		(39,637,159)	(123,559,652)				
Total	\$ (81,949,774)	\$	(42,660,616)	\$ (124,610,390)				
Preliminary Actuarial Value of Assets	\$ 1,787,085,521	\$	916,453,477	\$ 2,703,538,998				
Minimum Actuarial Value of Assets	\$1,364,108,598	\$	699,034,289	\$ 2,063,142,887				
(80% of Market Value) Maximum Actuarial Value of Assets (120% of Market Value)	\$ 2,046,162,897	\$	1,048,551,433	\$ 3,094,714,330				
Actuarial Value of Assets	\$1,787,085,521	\$	916,453,477	\$ 2,703,538,998				

Excludes health assets.

² Adjusted to reflect immediate recognition of amount outside temporary one year 130% corridor.

SECTION II ASSETS

On the basis of the smoothed actuarial value of assets, the return for the year ending June 30, 2012 was approximately 1.2%, slightly more than the return on the market value of assets. This difference is largely due to the recognition of the deferred gains for 2010 and 2011.

C. Supplemental Retiree Benefit Reserve (SRBR)

The SRBR is a reserve within the Retirement Fund that is used to supplement benefits provided to retirees and beneficiaries under the Plan. As such, the balance in the SRBR is treated both as an asset and as a liability of the Plan.

Each year, ten percent of excess earnings are transferred to the SRBR. However, since the actual return on the actuarial value of assets (1.2%) was less than the expected return (7.5%), there are no excess earnings this year. The existing balance in the SRBR is credited with approximately 1.2% earnings, and because the City's contribution rate for 2011-12 had increased due to poor investment performance, a charge was made to the SRBR transferring approximately \$1.3 million to the regular retirement fund and the COLA fund. Table II-3 below summarizes the changes to the SRBR this year.

Table II-3							
Changes in Supplemental Retiree Benefit Reserve							
	June 30, 2012	June 30, 2011					
SRBR Balance, beginning of year	\$ 33,416,870	\$ 33,343,364					
Charge to SRBR for poor investment earnings Interest credited Excess earnings transferred Benefit distributions	(1,285,087) 383,943 0 0	(1,207,958) 1,281,464 0 0					
SRBR Balance, end of year	\$ 32,515,726	\$ 33,416,870					

The Board is to make annual distributions from the SRBR, but cannot reduce the principal of the SRBR. Normally, these distributions are equal to the regular earnings credited on the SRBR principal. However, these distributions have been suspended, and Measure B which voters approved in June 2012, would eliminate the SRBR if it is implemented. Table II-4 below shows the regular interest credits that have not been distributed, but potentially could be distributed once the suspension expires without reducing the principal in the SRBR.

SECTION II ASSETS

Table II-4						
SRBR Regular Interest Credits Not Yet Distributed						
Fiscal Year	Interest Credit					
2008-09	\$ 296,147					
2009-10	719,742					
2010-11	1,281,464					
2011-12	383,943					
Total	\$ 2,681,296					

When the City's contribution rate increases due to poor investment earnings, there is a charge to the SRBR that partially offsets the City's rate increase. Based upon the June 30, 2011 valuation, the City's contribution rate is offset for 2012-13 by 0.46% of payroll and \$848,379 is transferred from the SRBR to the regular Retirement and COLA reserves. Table II-5 below shows the calculation of the charge to the SRBR and the offset to the City's contribution rate for the 2013-14 fiscal year.

Table II-5						
Calculation of Charge to SRBR for FYE 2014

7. Decrease in City's contribution rate for 2013-14 [(5 x 1.0725^0.5) ÷ 6]	0.82%					

SECTION III LIABILITIES

This section presents detailed information on liabilities for the Plan, including:

- Present value of future benefits,
- Normal cost
- Actuarial liability, and
- Analysis of changes in the unfunded actuarial liability during the year.

A. Present Value of Future Benefits

The present value of future benefits represents the expected amount of money needed today to fully pay off all benefits both earned as of the valuation date and those to be earned in the future by current plan participants under the current plan provisions. Table III-1 below shows the present value of future benefits as of June 30, 2012 and June 30, 2011.

	r	rable III-1						
Present Value of Future Benefits								
	Retirement	June 30, 2012		June 30, 2011

Amounts in thousands

SECTION III LIABILITIES

B. Normal Cost

Under the Entry Age (EA) actuarial cost method, the present value of future benefits for each individual is spread over the individual's expected working career under the Plan as a level percentage of the individual's expected pay. The normal cost rate is determined by taking the value, as of entry age into the Plan, of each member's projected future benefits. This value is then divided by the value, also at entry age, of the each member's expected future salary. The normal cost rate is multiplied by current salary to determine each member's normal cost. The normal cost of the Plan is the sum of the normal costs for each individual in the Plan. The normal cost represents the expected amount of money needed to fund the benefits attributed to the next year of service under the Entry Age actuarial funding method. Table III-2 below shows the EA normal cost as of June 30, 2012 and June 30, 2011.

Table III-2									
	Entry Age Normal Cost								
		June 30, 2012		June 30, 2011					
	Retirement	COLA	Total	<u>Total</u>					
Actives Retirement Termination Death Disability Reciprocity Total Normal Cost Expected payroll for current actives EA Normal Cost Rate	\$ 30,669,311 1,908,781 780,883 19,117,431 112,503 \$ 52,588,909 \$ 179,509,150 29,30%	\$ 12,723,943 323,307 373,962 8,316,954 316,474 \$ 22,054,640 \$ 179,509,150 12,29%	\$ 43,393,254 2,232,088 1,154,845 27,434,385 428,977 \$ 74,643,549 \$ 179,509,150 41.58%	\$ 41,509,870 1,999,140 1,223,522 27,209,441 <u>438,525</u> \$ 72,380,498 \$ 182,035,530 39.76%					

Table III-3 below shows the EA normal cost as of June 30, 2012 separated between Police and Fire members.

Table III-3 Entry Age Normal Cost by Group								
June 30, 2012 Police Fire Total								
Actives Retirement Termination Death Disability Reciprocity Total Actives Expected payroll for current actives EA Normal Cost Rate	\$ \$ \$	29,606,559 1,377,093 692,887 14,155,719 280,270 46,112,528	\$ \$ \$	13,786,695 854,995 461,958 13,278,666 148,707 28,531,021 68,304,306 41,77%	\$ \$ \$	43,393,254 2,232,088 1,154,845 27,434,385 428,977 74,643,549 179,509,150 41.58%		

SECTION III LIABILITIES

In addition to the EA normal cost, administrative expenses and the expected annual cost of the SRBR are added to get the total normal cost. Table III-4 below develops these additions to the EA normal cost rate.

Table III-4						
Administrative Expense and SRBR Normal Cost						
 Assumed administrative expenses for FYE 2014 SRBR normal cost [0.22% of market value of assets] Projected payroll for FYE 2014 Administrative expense and SRBR normal cost rate 	\$ \$ \$	3,000,000 5,875,714 187,958,523				
[(1+2) ÷ 3] 5. EA normal cost rate 6. Total normal cost rate [4+5]		4.72% 41.58% 46.30%				

C. Actuarial Liability

The actuarial liability represents the expected amount of money needed today to pay for benefits attributed to service prior to the valuation date under the EA method. It is the difference between the present value of future benefits and the present value of future normal costs. Table III-5 below shows the actuarial liability as of June 30, 2012 and June 30, 2011.

Table III-5								
Actuarial Liability

Total Actuarial Liability	\$2,111,166	\$1,286,626	\$3,430,308					

Amounts in thousands

The difference between the actuarial liability and the actuarial value of assets is the unfunded actuarial liability.

SECTION III LIABILITIES

D. Analysis of Change in Unfunded Actuarial Liability (UAL)

The UAL of any retirement plan is expected to change at each subsequent valuation for a variety of reasons. In each valuation, we report on those elements of change in the UAL that have particular significance or could potentially affect the long-term financial outlook of a retirement plan. Table III-7 below develops the expected UAL and identifies the primary sources for changes in the UAL since the last valuation.

	Table III-7									
	Development of Experience Gain / (Loss)									
Ite	<u>Item</u> Amount									
1.	Un	funded actuarial liability, June 30, 2011		\$	510,285,510

	h.	Total	\$ (133,327,491)							

SECTION IV CONTRIBUTIONS

In the process of evaluating the financial condition of any pension plan, the actuary analyzes the assets and liabilities to determine what level (if any) of contributions are needed to achieve and maintain an appropriate funded status of a plan. Typically, the actuarial process will use an actuarial funding method that will result in a pattern of contributions that are both stable and predictable.

Under the method employed for the Plan, there are two components to the total contribution: the normal cost and the unfunded actuarial liability contribution. The normal cost rate was developed in Section III. This section develops the UAL contribution rate and divides the contributions between the members and the City.

The UAL is composed of experience gains and losses, assumption changes and plan provision changes. Each component is amortized from the valuation date in which it was first recognized. Table IV-1 below shows the outstanding balance, remaining period and amortization payments for each component of the UAL as of June 30, 2012.

		Tabl	le IV-1

SECTION IV CONTRIBUTIONS

In addition to the UAL payments shown above, members pay 3/11ths of the EA normal cost (excluding reciprocity normal cost) plus their historical share of administrative expenses. Table IV-3 below shows the contribution rates for the 2012-13 and 2013-14 fiscal years for members and the City split between Police and Fire groups. These rates are prior to the reduction of 0.46% for 2012-13 and 0.82% for 2013-14 due to the charge to the SRBR.

SECTION IV CONTRIBUTIONS

Table IV-4 below shows the estimated dollar amounts of the City's contributions assuming contributions are made at the beginning of the fiscal year. These amounts are prior to the reduction of \$848,379 for FYE 2013 and \$1,492,165 for FYE 2014 due to the charge to the SRBR. To the extent the City's contributions are made after the beginning of the fiscal year, the amounts should be increased at the assumed valuation interest rate (7.50% for 2012-13 and 7.25% for 2013-14).

SECTION V ACCOUNTING STATEMENT INFORMATION

Statement No. 25 of the Governmental Accounting Standards Board (GASB) establishes standards for accounting and financial reporting of pension information by public employee retirement systems.

The basic GASB No. 25 disclosure compares the actuarial liability to the actuarial value of assets to determine a funded ratio. The relevant amounts as of June 30, 2011 and June 30, 2012 are presented in Table V-1.

olonia subelica es		Table V-1

2.	Actuarial value of assets	\$ 2,703,538,998	\$ 2,685,721,272	0.7%					
3.	Unfunded actuarial liability	\$ 726,768,546	\$ 510,285,510	42.4%					
4.	Ratio of actuarial value of assets to actuarial liability $(2 \div 1.d)$	78.81%	84.03%	-6.2%					

Tables V-2 through V-5 are exhibits for use in the Plan's Comprehensive Annual Financial Report (CAFR). The Government Finance Officers Association (GFOA) recommends showing at least 6 years of experience in each of these exhibits. Table V-2 shows the Notes to Required Supplementary Information. Table V-3 presents an analysis of financial experience for the valuation year; Table V-4 presents the Solvency Test which shows the portion of actuarial liability covered by assets; and Table V-5 presents the Schedule of Funding Progress.

SECTION V ACCOUNTING STATEMENT INFORMATION

Table V-2

City of San José Police and Fire Department Retirement Plan Notes to Required Supplementary Information

The information presented in the required supplementary schedules to the Financial Section of the CAFR was determined as part of the actuarial valuation at the date indicated. Additional information as of the latest actuarial valuation follows.

Valuation date

June 30, 2012

Actuarial funding method

Entry Age Normal

Amortization method

Level percent of pay, closed, layered

Equivalent single amortization period

14.0 Years

Asset valuation method

5 year smoothing of return

Actuarial assumptions:

Investment rate of return

7.25%

Wage inflation¹ Cost-of-living adjustments²

0.00% for one year and 3.50% thereafter 3.0% per year

The actuarial assumptions used have been recommended by the actuary and adopted by the City of San José Police and Fire Department Plan Board based on the most recent review of plan experience completed in 2011.

The rate of employer contributions is composed of the normal cost and amortization of the unfunded actuarial liability. The normal cost is a level percent of payroll cost which, along with the member contributions, is expected to pay for projected benefits at retirement for each individual plan member. The actuarial liability is that portion of the present value of projected benefits that is not expected to be paid by future employer normal costs or member contributions. The difference between this liability and the assets accumulated as of the same date is the unfunded actuarial liability.

Excludes merit increases.

² Cost-of-living adjustments are fixed at 3.0% by the play provision and do not fluctuate with actual inflation.

SECTION V ACCOUNTING STATEMENT INFORMATION

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions

1. Investment Return Assumption

Assets are assumed to earn 7.25% net of investment expenses.

2. Salary Increase Rate

Wage inflation component is assumed to be 0.00% for FYE 2014, and 3.50% thereafter.

In addition, the following merit component is added based on an individual member's years of service:

Table B-1 Salary Merit Increases						
Years of Service	Merit/ Longevity					
0 .	8.00%					
1	7.25					
2	6.50					
3	5.75					
4	5.00					
5	4.50					
6	4.00					
7	3.50					
8	3.00					
9	2.50					
10+	2.25					

3. Family Composition

Percentage married is shown in the following Table B-2. Women are assumed to be three years younger than men.

	Table B-2 Percentage Married
Gender	Percentage
Males Females	85% 85%

CHEIRON

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

4. Rates of Termination

Sample rates of termination are shown in the following Table B-3.

Table B-3 Rates of Termination						
Service Termination						
0	6.00%					
1	2.50					
2	1.50					
3-4	1.00					
5-10	0.75					
11+ 0.40						

^{*} Termination rates do not apply once a member is eligible for retirement

75% of terminating employees are assumed to subsequently work for a reciprocal employer and receive 3.5% pay increases per year.

5. Rates of Disability

Sample disability rates of active participants are provided in Table B-4.

Rates	Table B-4 s of Disability at Selected	Ages
Age	Police	Fire
25	0.09%	0.09%
30	0.13	0.13
35	0.20	0.20
40	0.31	0.31
45	0.51	0.51
50	2.14	2.25
55	9.08	8.50
60	10.00	17.25
65	10.00	20.00

100% of disabilities are assumed to be duty related.

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

6. Rates of Mortality for Healthy Lives

Mortality rates for actives, retirees, beneficiaries, terminated vested and reciprocals are based on the male and female RP-2000 combined employee and annuitant mortality tables. To reflect mortality improvements since the date of the table and to project future mortality improvements, the tables are projected to 2010 using scale AA and set back three years for males and no setback for females.

Table B-5 Rates of Mortality for Active and Retired Healthy Lives at Selected Ages								
Age	Age Male Female							
25	0.0308%	0.0180%						
30	0.0363	0.0239						
35	0.0535	0.0425						
40	0.0860	0.0607						
45	0.0957							
50	0.1412							
55	0.2507							
60 0.3954		0.4808						
65	0.7529	0.9231						
70	1.4103	1.5923						
75	2.3454	2.5937						
80	4.1153	4.2767						
85	7.4274	7.2923						
90	12.8097	12.7784						
95	21.0194	19.0654						

It is assumed that 50% of active deaths are service related.

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

7. Rates of Mortality for Retired Disabled Lives

Mortality rates for disabled retirees are based on the male RP-2000 combined employee and annuitant mortality table. To reflect mortality improvements since the date of the table and to project future mortality improvements, the tables are projected to 2010 using scale AA and set back two years.

Table B-6 Rates of Mortality for Disabled Lives at Selected Ages					
Age	Mortality				
50	0.1583%				
55	0.2383				
60	0.4488				
65	0.8695				
70	1.5521				
75 2.6125					
80	4.6195				
85	8.2794				
90 14.3228					
95 22.6746					

8. Rates of Retirement

Rates of retirement are based on age and service according to the following Table B-7.

Table B-7								
anne anne anne anne anne anne anne anne	Rates of Retirement by Age							
	Pol	ice	Fi	ire				
Age	<30 Years	<30 Years	30+ Years					
50 - 54	30.00%	50.00%	17.00%	17.00%				
55 - 59	30.00	50.00	17.00	25.00				
60 - 64	50.00	100.00	17.00	25.00				
65 - 69	50.00	100.00	35.00	35.00				
70 & over	100.00	100.00	100.00	100.00				

These retirement rates apply only to those eligible for unreduced benefits.

9. Administrative Expenses

\$3.0 million added to normal cost. The administrative expenses are assumed to increase with wage inflation. Historically, the administrative expenses were assumed to reduce

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

the investment return assumption by 10 basis points which resulted in a higher Normal Cost. To maintain the same historic division of member and City contributions for administrative expenses for this valuation, members were allocated a portion of the administrative expenses equal to 3/11ths of the difference in Normal Cost that a 10 basis point reduction in the investment return assumption would cause.

10. SRBR

0.22% of the market value of assets is added to the normal cost as the assumed average annual transfer of excess earnings to the SRBR.

11. Changes Since Last Valuation

The investment return assumption was reduced from 7.50% to 7.25% as adopted by the Board in December 2012.

APPENDIX B ACTUARIAL ASSUMPTIONS AND METHODS

B. Actuarial Methods

1. Actuarial Funding Method

The Entry Age actuarial cost method was used for active employees, whereby the normal cost is computed as the level annual percentage of pay required to fund the retirement benefits between each member's date of hire and assumed retirement. The actuarial liability is the difference between the present value of future benefits and the present value of future normal cost. The unfunded actuarial liability is the difference between the actuarial liability and the actuarial value of assets.

2. Asset Valuation Method

For the purposes of determining the employer's contribution, we use an actuarial value of assets. The asset smoothing method dampens the volatility in asset values that could occur because of the fluctuations in market conditions. Use of an asset smoothing method is consistent with the long-term nature of the actuarial valuation process. Assets are assumed to be used exclusively for the provision of retirement benefits and expenses.

The actuarial value of assets is calculated by recognizing the deviation of actual investment returns compared to the expected return (7.50% for 2011-12, 7.75% for 2010-11, 8.00% for prior years) over a five-year period. The dollar amount of the expected return on the market value of assets is determined using the actual contributions and benefit payments during the year. Any difference between this amount and the actual net investment earnings is considered a gain or loss.

Finally, the actuarial value of assets is restricted to a corridor between 80 percent and 120 percent of the market value of assets.

Prior to the June 30, 2011 valuation, the actuarial value of assets was reduced by the SRBR and no liability was reported for the SRBR. After the June 30, 2011 valuation, the SRBR remains a part of the actuarial value of assets and is also added to the actuarial liability.

3. Amortization Method

Actuarial gains and losses and plan changes are amortized as a level percentage of pay assuming 3.5% annual growth in payroll over a 16-year period beginning with the valuation date in which they first arise. Changes in methods and assumptions are amortized as a level percentage of pay assuming 3.5% annual growth in payroll over a 20-year period (16 years for changes prior to June 30, 2011) beginning with the valuation date on which they are effective.

APPENDIX C SUMMARY OF PLAN PROVISIONS

1. Membership Requirement

Participation in the plan is immediate upon the first day of employment with the City of San José as a police officer or fire fighter except for the following:

- Independent contractors,
- Person in City service principally for training or educational purposes,
- Auxiliary or voluntary police officers or fire fighters,
- Part-time or non-salaried employees, and
- Employees receiving credit in any other retirement or pension system.

2. Final Compensation

The highest twelve consecutive months of compensation in covered employment. However, in determining Final Compensation, no compensation in the last 12 months of employment that exceeds 108% of compensation during the 12 months immediately proceeding the last 12 month shall be considered. Compensation excludes overtime pay and expense allowances.

3. Credited Service

Years of service in covered employment plus service purchased for military leave of absence, Federated service, and unpaid leaves of absence.

4. Contributions

a. Member:

The amount needed to fund 3/11 of normal cost calculated under the Entry Age actuarial cost method plus the amortization payment on the February 4, 1996 benefit improvement. For Police members, there is an additional amortization payment for member contributions not made for the last 6 months of 2006.

b. Employer:

The Employer contributes the remaining amounts necessary to fund the Plan in accordance with the Board's funding policy.

5. Service Retirement

Eligibility

Age 55 with 20 years of service, age 50 with 25 years of service, age 70 with no service requirement, or any age with 30 years of service. Reduced benefits are also available at age 50 with 20 years of service.

APPENDIX C SUMMARY OF PLAN PROVISIONS

Benefit

Police:

2.5% of Final Compensation for each year of credited service up to 20 years plus 4.0% of Final Compensation for each year of credited service in excess of 20, subject to a maximum of 90% of Final Compensation.

Fire:

For members with less than 20 years of service, 2.5% of Final Compensation for each year of credited service. For members with 20 or more years of service, 3.0% of Final Compensation for each year of service, subject to a maximum of 90% of Final compensation.

6. Service Connected Disability Retirement

Eligibility

No age or service requirement.

Benefit

Police:

50% of Final Compensation plus 4.0% of Final Compensation for each year of credited service in excess of 20, subject to a maximum of 90% of Final Compensation.

Fire:

For members with less than 20 years of service, 50% of Final Compensation. For members with 20 or more years of service, 3.0% of Final Compensation for each year of service, subject to a maximum of 90% of Final Compensation.

7. Non-Service Connected Disability Retirement

Eligibility

Two years of service.

Benefit -

For members with less than 20 years of service, 32% of Final Compensation plus 1% of Final Compensation for each year of service in excess of two. For members with 20 or more years of service, the benefit amount equals the amount that would be calculated under the service retirement formula.

APPENDIX C SUMMARY OF PLAN PROVISIONS

8. Non-Service-Connected Death

Less than 2 Years of Service:

Lump sum benefit equal to the greater of accumulated employee contributions with interest or \$1,000.

Disabled retirees or members ineligible for service retirement:

Spouse receives 24% of Final Compensation plus 0.75% of Final Compensation for each year of service in excess of two, subject to a maximum of 37.5% of Final Compensation. If a member has eligible dependent children, an additional benefit is payable as follows:

1 Child:

25% of Final Compensation

2 Children:

37.5% of Final Compensation

3+ Children:

50% of Final Compensation

The total benefit payable to a family is limited to 75% of Final Compensation.

If a member does not have a spouse or eligible dependent children, a lump sum benefit equal to the greater of accumulated employee contributions with interest or \$1,000.

Service retirees or members eligible for service retirement:

Spouse receives the greater of 37.5% of Final Compensation or 50% of the member's service retirement benefit, subject to a maximum of 42.5% of Final Compensation for Police and 45% of Final Compensation for Fire. Eligible dependent children will receive the same benefit as defined under the non-service connected death for disabled retirees or members ineligible for service retirement. The total benefit payable to a family is limited to 75% of Final Compensation.

9. Service-Connected Death

Spouse receives the greater of 37.5% of Final Compensation or 50% of the member's service retirement benefit, subject to a maximum of 42.5% of Final Compensation for Police and 45% of Final Compensation for Fire. If a member has eligible dependent children, an additional benefit of 25% of Final Compensation is payable for each eligible dependent child. The total benefit payable to a family is limited to 75% of Final Compensation.

10. Termination Benefits

Less than 10 Years of Service:

Lump sum benefit equal to the accumulated employee contributions with interest at 2% per annum.

APPENDIX C SUMMARY OF PLAN PROVISIONS

10 or more years of credited service:

The amount of the service retirement benefit, payable at the later of age 55 or 20 years from date of membership.

11. Post-retirement Cost-of-Living Benefit

Benefits are increased every February 1 by 3.0%.

12. Supplemental Retiree Benefit Reserve

Annual transfer:

10% of earnings in excess of the actuarially assumed rate on

the actuarial value of assets are transferred to the SRBR and

added to its principal.

Interest credit:

Interest on the SRBR balance equal to the actual rate of

earnings on the actuarial value of assets, but not less than

zero.

Benefit:

Board shall make annual distributions from the SRBR to provide supplemental benefits to retirees and beneficiaries except that no distributions can be made during calendar years 2010, 2011 and 2012, prior to June 30, 2012. In addition, distributions may not reduce the principal of the

SRBR.

Charge to Principal:

If the City's contribution rate increases due to poor investment earnings, 10% of the increased contribution for a one-year period is deducted from the SRBR principal, subject to a maximum deduction of 5% of the SRBR

principal.

Note:

The summary of major plan provisions is designed to outline principal plan benefits. If the Department of Retirement Services should find the plan summary not in accordance with the actual provisions, the actuary should immediately be alerted so the proper provisions are valued.

APPENDIX D GLOSSARY OF TERMS

1. Actuarial Liability

The Actuarial Liability is the difference between the present value of all future Plan benefits and the present value of total future normal costs. This is also referred to by some actuaries as the "accrued liability" or "actuarial accrued liability".

2. Actuarial Assumptions

Estimates of future experience with respect to rates of mortality, disability, turnover, retirement rate or rates of investment income and salary increases. Demographic actuarial assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.

3. Accrued Service

Service credited under the Plan which was rendered before the date of the actuarial valuation.

4. Actuarial Equivalent

A single amount or series of amounts of equal actuarial value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions.

5. Actuarial Funding Method

A mathematical budgeting procedure for allocating the dollar amount of the actuarial present value of a retirement Plan benefit between future normal cost and actuarial accrued liability. Sometimes referred to as the "actuarial funding method."

6. Actuarial Gain (Loss)

The difference between actual experience and actuarial assumption anticipated experience during the period between two actuarial valuation dates.

7. Actuarial Present Value

The amount of funds currently required to provide a payment or series of payments in the future. It is determined by discounting future payments at predetermined rates of interest, and by probabilities of payment.

APPENDIX D GLOSSARY OF TERMS

8. Amortization

Paying off an interest-discounted amount with periodic payments of interest and principal—as opposed to paying off with a lump sum payment.

9. Annual Required Contribution (ARC) under GASB 25

The Governmental Accounting Standards Board (GASB) Statement No. 25 defines the Plan Sponsor's "Annual Required Contribution" (ARC) that must be disclosed annually. The SJPF Employer computed contribution rate for FYE 2014 meets the parameters of GASB 25.

10. Normal Cost

The actuarial present value of retirement Plan benefits allocated to the current year by the actuarial funding method.

11. Set back/Set forward

Set back is a period of years that a standard published table (i.e. mortality) is referenced backwards in age. For instance, if the set back period is 2 years and the participant's age is currently 40, then the table value for age 38 is used from the standard published table. It is the opposite for set forward. A Plan would use set backs or set forwards to compensate for mortality experience in their work force.

12. Unfunded Actuarial Liability (UAL)

The unfunded actuarial liability represents the difference between actuarial liability and the actuarial value of assets. This value is sometimes referred to as "unfunded actuarial accrued liability."

Most retirement Plans have unfunded actuarial liabilities. They typically arise each time new benefits are added and each time experience losses are realized.

The existence of unfunded actuarial liability is not in itself an indicator of poor funding, Also, unfunded actuarial liabilities do not represent a debt that is payable today. What is important is the ability of the plan sponsor to amortize the unfunded actuarial liability and the trend in its amount (after due allowance for devaluation of the dollar).

Presentation to the Board of Administration City of San José Police & Fire Department Retirement Plan

June 30, 2012 Final Actuarial Valuation

Presented By William R. Hallmark, ASA Joshua A. C. Davis, FSA January 3, 2013

Agenda

- Background
- Historical Trends
- Summary of Key Valuation Results
- Results with Elimination of SRBR
- Projections and Stress Tests

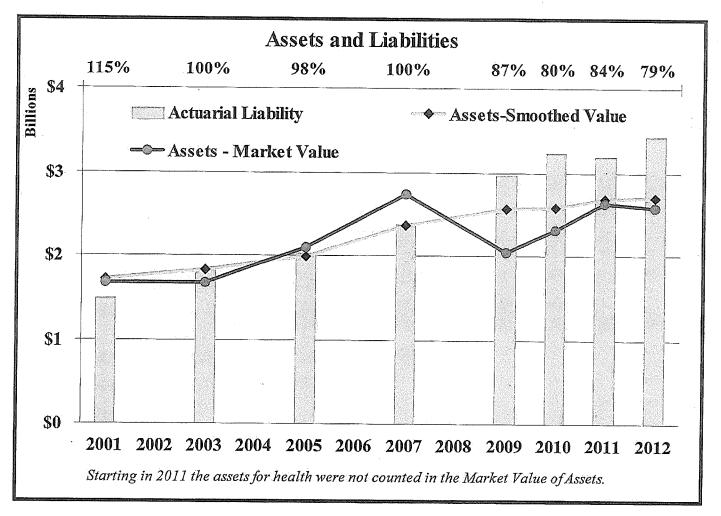

Background

- Measure B
- Passed by voters on June 5, 2012
- Would make changes to Police & Fire Plan
- are reflected in the June 30, 2012 Actuarial Valuation No changes to Municipal Code yet, so no provisions of Measure B
- Effect of eliminating the SRBR is provided in a separate letter
- December 6th Board meeting
- suoidmusse ni Preliminary valuation results presented assuming no changes
- %62.7 of - Board changed the investment return assumption from 7.50%
- investment return assumption Final results presented today reflect the change in the
- bətenimilə si Will also show the difference in the results if the SRBR

ABAS to noitsnimila

- We understand the City plans to implement the part of Measure B that would eliminate the SRBR
- Eliminating the SRBR
- Reduces the AL and UAL by the balance currently in the SRBR (\$32.5 million)
- Does not affect the value of assets
- SRBR assets would be transferred from the SRBR to the General Reserve
- Both are included in assets used for the valuation
- The City's contribution rate is reduced for:
- 16-year amortization of UAL reduction
- Elimination of normal cost charge for SRBR

Stress Testing the Future

Required Disclosures

- In preparing this presentation, we relied on information (some oral and some written) supplied by the City of San José Police & Fire Department Retirement Plan. This information includes, but is not limited to, the plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.
- Please refer to the full June 30, 2012 Actuarial Valuation Report for a summary of the data, assumptions, methods and plan provisions used in this presentation.
- We certify that, to the best of our knowledge, this presentation and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this presentation. This presentation does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.
- Cheiron's presentation was prepared exclusively for the City of San José Police & Fire Department Retirement Plan for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. This presentation is not intended to benefit any third party, and Cheiron assumes no duty or liability to any such party.
