

COMMUNITY MEETING

MINNESOTA AVENUE PROJECT

DATE: Tuesday, September 5, 2017
TIME: 6:30PM - 8:00PM
LOCATION: Cafeteria
Willow Glen Elementary School
1425 Lincoln Avenue
San Jose, CA

PROJECT SCOPE

The City of San José Department of Transportation is repaving Minnesota Avenue between Weaver Drive and Alma Avenue. As part of this project, the City is exploring ways to calm traffic and make the street more complete and comfortable for all roadway users, including people walking and biking. At this meeting, we will share a feasible design option that would **(1) reconfigure travel lanes from four lanes to three between Weaver and Alma; and (2) remove on-street parking between Lincoln Avenue and Alma Avenue** (most of this parking is currently time-limited and infrequently used). This option would allow the installation of bike lanes. Whether these changes are incorporated or not, repaving work is expected to occur during fall 2017.

PROJECT GOALS

- **Improve Safety** by decreasing vehicle speeds, improving motor vehicle safety turning into and out of driveways, improving pedestrian crossing, and adding new bike lanes
- **Provide Safe Routes to School** to Willow Glen Elementary; Hammer and Galarza Elementary Schools (via Bird)
- **Improve Access to Transit & Trails by bike and foot:** VTA Bus Line 64 & 82 and Three Creeks Trail
- **Improve neighborhood livability** by slowing traffic and creating a more comfortable place to walk and bike
- **Leverage resources** by implementing with the City's annual (2017) Pavement Maintenance Program

PROJECT AREA MAP*

* Three Creeks Trail closed for improvements until summer 2018.
