
Web of Native Botanicals

Artists: Troy Corliss with Elin Christopherson

October 2007

Edenvale Branch Library / 101 Branham Lane, San Jose, CA 95111 / Council District 2

ABOUT THE PROJECT

When considering the content of the artwork, the artist wished to bring images of the natural world outside of the library to the inside. In particular, he imagined a view of the land that may have existed throughout the long history of the area. When working with the community, much of the interest for the project was directed towards the natural beauty that surrounds the area.

Detail View of Artwork

Overview of *Web of Native Botanicals*

Entering the Marketplace, the glass and steel plant forms reveal themselves as a canopy suspended overhead. The work emanates in clusters around the column rising through the center of the room and floats like a huge bouquet cascading into the upper vaulted space of the Marketplace. Four different California native plants are represented: redbud, purple needle grass, California buckwheat and black walnut.

The artist hopes the artwork will generate curiosity and create an incentive to go outside and investigate the surrounding local environment that is so much a part of the City's visual landscape.

ABOUT THE ARTISTS

Troy Corliss creates organic forms designed to interact with a human environment. His work is informed by the study of natural processes and by very hands-on approach to the making of his art forms. Much of Troy's current work is designed for specific large-scale architectural settings - Art in Public Places.

In 1993 Troy graduated from the studio art program at the University of California at Davis where he studied figure drawing and sculpture. In addition to the Edenvale artwork, Troy has completed major commissions throughout the United States including Sacramento, Roseville, Cleveland, Reno, Davis, Denver, and San Francisco. Troy lives in Truckee, California. More of Troy's work may be seen at www.troycorliss.com

Elin Christopherson is the collaborating artist on the project; responsible for the glass elements. She earned her BFA in Glass from California College of Arts and Crafts in Oakland, and her graduate degree in Glass from Alfred University in New York. Elin has taught glassblowing throughout the United States, and is currently teaching at California College of Arts and San Francisco State University. She lives and works in Oakland, California. More of Elin's work can be seen at www.elinchristopherson.com

ABOUT THE PUBLIC ART PROGRAM

The City of San José Public Art Program seeks to build community identity by initiating artworks and exhibitions that enhance the civic landscape. Through active community engagement, public art strives to reflect the City's diversity, historic richness, and envision its present and future.

The Public Art Program is part of the City's Office of Cultural Affairs, a division of the Office of Economic Development. The Public Art Program was established by a 1984 municipal ordinance that provides public art through funding from City capital improvement projects and eligible private development.

For further information and photos, please contact the San José Public Art Program.
