CLASS SPECIFICATION

TITLE: Airport Equipment Mechanic (3246)

DEPARTMENT	ACCOUNTABLE TO	FLSA STATUS
Airport	Supervisor, Trades	Non-Exempt

CLASS SUMMARY

Installs, operates, maintains and repairs airport terminal equipment (ATE) and systems such as baggage systems, passenger boarding bridges and ground support equipment (GSE). Performs related work as required.

DISTINGUISHING CHARACTERISTICS

This classification differs from the higher level Sr. Airport Equipment Mechanic in that the latter provides technical assistance on the most difficult installations and repairs and may act as a lead to Airport Equipment Technicians. This classification differs from the Mechanic series in that the latter series performs repairs and adjustments to vehicles and other mechanized equipment, while the Airport Equipment Mechanic classification performs maintenance and repair of specialized airport terminal equipment and systems that requires mechanical, hydraulic, pneumatic, electrical, heating, ventilating and air conditioning skills. Work may require weekend and shift work as part of the normal schedule. The physical requirements of this classification require heavy work, such as kneeling, lifting, pushing, reaching; exerting up to 100 pounds of force occasionally, and/or up to 50 pounds of force frequently, and/or up to 20 pounds of force constantly to move objects.

QUALIFICATIONS

(These qualifications are typically required. An equivalent combination of education, experience, knowledge, skills, and abilities sufficient to satisfactorily perform the duties of the job may be substituted.)

Minimum Qualifications

Education and Experience

Equivalent to completion of high school and four (4) years of directly related experience with the operation, repair and maintenance of airport terminal equipment in an airport environment.

Required Licensing (such as driver's license, certifications, etc.)

- A valid California driver's license
- A valid California Class A or B driver's license with applicable endorsements may be required for some designated positions.

CLASS SPECIFICATION

TITLE: Airport Equipment Mechanic (3246)

Other Qualifications

(Incumbents may be required to have different combinations of the listed qualifications, or more specific job-related qualifications depending on the position.)

Basic Knowledge, Skills and Abilities

(Needed at entry into the job in order to perform the essential duties.)

- Knowledge of electrical systems safety, general automotive engine/transmission, passenger boarding bridges, baggage conveyor systems and Ground Support Equipment normally attained through airline industry training and trade schools.
- Knowledge of applicable safety codes and regulations, safety practices such as electrical safety (including lock-out/tag-out procedures), and safe operation of ground support equipment (GSE) in an airport environment.
- Ability to maintain safe operation of passenger boarding bridges and baggage conveyor systems.
- Ability to maintain and repair ATE which includes mechanical, hydraulic, pneumatic, electrical, heating, ventilating and air conditioning, and control systems.
- Ability to use a wide variety of tools and equipment such as general mechanic tools, conveyor belt lacer, volt ohm meter (VOM), and metal fabricating tools.
- Ability to program the system and diagnose and troubleshoot operational problems through the Programmable Logic Controller (PLC) using computer technology and laptop computers.
- Knowledge of machinery, control systems and other devices and mechanisms used in ATE and GSE.
- Skill in installation, operation, maintenance and repair of a wide variety of pumping, heating, ventilating and cooling systems and related equipment found in airport terminal support equipment.
- Knowledge of and skill in welding, metal fabrication and machine work.
- Ability to establish and maintain effective working relationships.
- Knowledge of Airport rules, regulations and general operations.
- Ability to interpret and apply specific safety codes, City ordinances and regulations, verbal/written instructions, and Airport rules and procedures.
- Ability to read and interpret blue prints and diagrams.

Desirable Qualifications

(Knowledge, skills and abilities; licenses, certificates, education, experience that is more position specific and/or likely to contribute to more successful job performance.)

- A two year associate's degree in a related field is highly desirable.
- A Universal Certification for Chlorofluorocarbon (CFC) Refrigerants from the Environmental Protection Agency.
- An Electronics Technician certification.
- A High Pressure Hydraulics certification.
- Knowledge of the organization, functions and processes of City, County, State and Federal levels of government.
- Knowledge of Computer Maintenance Management System (CMMS)
