

**REVISIONS TO THE TEXT OF THE DUPONT STREET GENERAL PLAN AMENDMENT  
INITIAL STUDY (PAGE 41)**

---

The following section contains revisions/additions to the text of the *Dupont General Plan Amendment Initial Study/Addendum*, (page 41) October 2018. Revised or new language is underlined. All deletions are shown ~~with a line through the text~~.

Page 41            Section 4.8.3.2, Construction Impacts, the first paragraph will be **REVISED** as follows:

Given the age of development in the DSAP area, existing structures may have asbestos-containing materials and/or lead-based paint. The primary buildings on the project site are of recent construction and would not contain asbestos or lead-based paint. The site could, however, have small accessor structures that pre-date the banning of these materials. Construction activities could also uncover buried structures, wells, burn areas, debris, or contaminated soil, based on the industrial/commercial history of the project area. If encountered, these materials may require special handling and disposal to avoid impacts to construction workers, the public, and the environment.
