I. SUMMARY AND CONCLUSIONS

KCE Matrix, Inc. (KCE Matrix) has been retained by AMG & Associates, LLC (referred to as “the client” and/or “the user” in this report) to conduct a Phase I Environmental Site Assessment (ESA) in accordance with the American Society of Testing and Materials (ASTM) standard practice E1527-13 for the property located at 295 East Virginia Street, San Jose, California (referred to as “the subject property” in this report).

The following summarizes the findings of this Phase I ESA:

- The subject property is located within a commercial-retail and residential area. The subject site consists of approximately 54,178 square feet, appears to be relatively flat and has an approximate elevation of 101 feet above mean sea level. The site can be accessed from driveways along East Virginia Street and South 7th Street. There is a third access driveway located along South Sixth Street that appears to be locked. The subject property is currently unoccupied and contains a building structure located on the central, eastern portion of the site that appears to have been used previously as a gasoline service station building. The structure measures approximately 2,000 square feet in size. An overhead canopy is located on the southeastern portion of the property where there are two pump islands and the apparent location of former product dispensers. The remaining areas consist of parking areas and driveways covered with asphalt for a majority of these areas with several areas of concrete surfaces located immediately adjacent to the building and beneath the canopy. A trash container is located inside of an enclosed area on the northeast corner of the site behind and attached to the station building. The western and southern most portion of the property is essentially vacant land with no structures and appears to have been used previously as a Propane gas storage and distribution facility. Numerous above ground propane tanks that appear to be currently empty were stored in this area of the subject property. In addition, the concrete supports for a relatively large and former above ground propane storage tank were also observed in this area.
- Based on the historic information obtained during this investigation (including Sanborn Maps, Aerial Photographs, regulatory records researched and information obtained from city directories), the subject property appears to have been vacant land in 1891, and residential property from at least 1915 through 1969. Subsequently, the eastern portion of the property was a gasoline service station from at least 1972 through 1984. The western portion of the property was used for the sale and distribution of propane gas from at least 1984 through approximately 2011. The former gasoline service station building also appears to have been used as an office for the retail sale of propane after the gasoline station on site was no longer operational.

- Based on site reconnaissance, the eastern portion of the subject property was formerly a gasoline service station. The former UST's, product lines and product dispensers are no longer on site. Currently, former station building, the pump islands and canopy structure still exists on the eastern portion of the site.
- As reported in the search of government environmental databases and as presented in Section VI-E of this report, the subject property is located in a commercial and residential area where information related to environmental assessment, remediation and/or management practices is documented for several other properties in the general vicinity of the subject site. These other sites include at least three historic and former cleaning facilities, and two former and one currently existing gasoline service station. Subsurface assessment and investigation work was performed at the currently existing gasoline service station located across East Virginia Street to the south. That matter was granted final closure as of August of 2004. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property at this time.
- Based on the Vapor Encroachment Screen (VES) conducted during this investigation, a Vapor Encroachment Condition (VEC) was identified as originating from the subject property. Further, the VES evaluated several sites in the immediate vicinity of the subject property and eliminated a VEC to the subject property for many of these sites, except for one. Additional research will be necessary to further evaluate this other site to determine whether it presents a VEC to the subject property, if warranted.
- KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.40-mile north of the subject site, the depth to groundwater was reported to range from approximately 14.29 to 18.55 feet below the surface as monitored in December of 2013. Based on monitoring data collected from wells located at a second site that is approximately 0.40-mile northwest of the subject site, the depth to groundwater was reported to range from approximately 12.05 to 22.27 feet below the surface as monitored in February of 2014. Based on monitoring data collected from wells located at a third site that is approximately 0.40-mile southwest of the subject site, the depth to groundwater was reported to range from approximately 14.03 to 17.04 feet below the surface as monitored in January of 2013.

The ASTM standard practice E1527-13 defines the following terms:

- *Recognized Environmental Condition (REC)* as “the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment”.

- *Historical Recognized Environmental Condition* (HREC) as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria as established by the regulatory authority, without subjecting the property to any required controls”.
- *Controlled Recognized Environmental Condition* (CREC) as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls”.

KCE Matrix has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E 1527-13 of 295 East Virginia Street, San Jose, California, the subject property. Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no evidence of a REC, an HREC or a CREC in connection with the subject property, except for the following:

- REC#1: Historic retail gas station. Based on the information obtained during this investigation, the subject property was a retail gasoline service station from at least 1972 through 1984. The regulatory records researched during this investigation did not contain information with regard to the size, removal, disposal or environmental assessment and remediation work that may have been conducted in relation to the former UST fuel system on site. As such, KCE Matrix recommends performing subsurface environmental assessment work in the areas where the former UST's and product lines and dispensers were located at the subject property.

II. INTRODUCTION

A. Purpose

This report presents the results of a Phase I ESA conducted by KCE Matrix for the subject property. The purpose of this investigation was to research and report existing environmental conditions for the subject property based on the American Society of Testing and Materials (ASTM) standard practice E1527-13. Performing a Phase I ESA according to the ASTM Standard E1527-13 is intended to permit a user to satisfy one of the requirements in qualifying for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (the “*landowner liability protections*,” or “*LLPs*”). This practice constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice”.

B. Detailed Scope-of-Services

The scope of services performed during this Phase I ESA project includes:

1. Collecting available information concerning the property as it pertains to:
 - a. Past land use
 - b. Past owners
 - c. Location of buried storage tanks, hazardous waste storage, wastewater treatment facilities and/or on-site landfills, etc.
 - d. Types of chemicals used on site, past and present
 - e. Geologic and hydrogeologic features
 - f. Past geotechnical investigations (if available)
 - g. Other data pertinent to the specific site
2. Conducting a site visit to:
 - a. Identify vegetative features
 - b. Locate surface waters
 - c. Assess physical features
 - d. Observe adjacent land use
 - e. Gather evidence of indiscriminate and/or illegal waste disposal
3. Conducting a review of records maintained by regulatory agencies as follows:
 - a. Reviewing regulatory files regarding the property in question
 - b. Contacting appropriate regulatory personnel
4. Conducting a Vapor Encroachment Screen.
5. Preparing the Phase I Environmental Site Assessment Report, summarizing our findings and inclusive of supporting documentation.

C. Significant Assumptions

No significant assumptions were made during the course of this investigation.

D. Limitations and Exceptions

This type of ESA does not include air, soil or water sampling; or sampling of building materials. Site-specific conditions such as soil deposits and rock formations may vary in thickness, lithology, saturation strength, and other properties across any site beyond what available documentation indicates. Therefore, it is possible that undocumented or concealed improvements or alterations to the property could exist beyond the inquiry of the activities conducted during this site assessment. In addition, environmental changes, either naturally occurring or artificially induced, may cause changes or alterations (which can be significant) to the property as compared to the conditions found at the time that this assessment was conducted.

Based on the best available investigative technologies, no amount of assessment can guarantee that the subject property does not contain contaminants or hazardous substances. The activities conducted during this limited investigation cannot identify all potential concerns for the subject

property, and do not eliminate the possibility that the subject property is completely free of environmental concerns.

KCE Matrix has analyzed and evaluated the information collected during this investigation using what we believe to be the currently applicable assessment and engineering techniques and principles. KCE Matrix assumes no liability from other parties involved in losses sustained as a result of decisions made based on interpretations of this report. KCE Matrix makes no warranty, either expressed or implied, regarding the work conducted, except that our services were performed in accordance with the generally accepted professional principles and practices existing for such work.

During inspection of the subject property, the interior of the commercial building on site was not accessible. Therefore, this investigation specifically excludes site inspection and assessment of the building interior.

E. Special Terms and Conditions

This report and all information obtained during this site assessment are considered confidential and will not be released without written permission by the owner of the subject property, the owner authorized entity conducting this assessment, or as required by law. The owner of the subject property is typically responsible for mitigation of contamination, corrective or remedial action, and disclosure of any information related to environmental issues that may or may not be discovered during this site assessment.

F. User Reliance

This report was prepared for the exclusive use of the client and/or user. No other person or entity is entitled to rely upon this report without the specific written authorization of KCE Matrix. Any such reliance by any third party is at the sole risk of said third party, and such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. KCE Matrix specifically disclaims any responsibility for any unauthorized use of this report.

III. SITE DESCRIPTION

A. Location and Description

The subject property is located on the western corner of the intersection of East Virginia Street and South 7th Street in San Jose, California. A Location Map, Site Plan, and Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively.

B. Site and Vicinity General Characteristics

The subject property is located within a commercial-retail and residential area. The subject site consists of approximately 54,178 square feet, appears to be relatively flat and has an approximate elevation of 101 feet above mean sea level. The site can be accessed from driveways along East

Virginia Street and South 7th Street. There is a third access driveway located along South Sixth Street that appears to be locked.

The subject property contains a building structure located on the central, eastern portion of the site that appears to have been used previously as a gasoline service station building. The structure measures approximately 2,000 square feet in size. An overhead canopy is located on the southeastern portion of the property where there are two pump islands and the apparent location of former product dispensers. The remaining areas consist of parking areas and driveways covered with asphalt for a majority of these areas with several areas of concrete surfaces located immediately adjacent to the building and beneath the canopy. A trash container is located inside of an enclosed area on the northeast corner of the site behind and attached to the station building.

The western and southern most portion of the property is essentially vacant land and appears to have been used previously as a propane gas storage and distribution facility.

C. Current Use of the Property

The subject property is currently vacant and unoccupied.

D. Description of Structures and Other Improvements

The subject property contains a building structure located on the central, eastern portion of the site that appears to have been used previously as a gasoline service station building. The structure measures approximately 2,000 square feet in size. An overhead canopy is located on the southeastern portion of the property where there are two pump islands and the apparent location of former product dispensers. The remaining areas consist of parking areas and driveways covered with asphalt for a majority of these areas with several areas of concrete surfaces located immediately adjacent to the building and beneath the canopy. A trash container is located inside of an enclosed area on the northeast corner of the site behind and attached to the station building.

The western and southern most portion of the property is essentially vacant land with no structures and appears to have been used previously as a propane gas storage and distribution facility. Numerous above ground propane tanks that appear to be currently empty were stored in this area of the subject property. In addition, the concrete supports for a relatively large and former above ground propane storage tank were also observed in this area.

E. Current Uses of the Adjoining Properties

The adjoining properties are comprised of the following:

- NORTH: Interstate 280.
- EAST: South 7th Street, vacant land and Interstate 280.
- SOUTH: East Virginia Street, a gas station, commercial and residential properties and vacant land.
- WEST: Vacant land, Interstate 280 off ramp and residential properties.

IV. USER PROVIDED INFORMATION

A user questionnaire was completed by the client and was provided to KCE Matrix during this investigation. A copy of the completed user questionnaire is presented in Appendix E of this report.

A. Title Records

A title report was not provided to KCE Matrix during this investigation.

B. Environmental Liens or Activity and Use Limitations

The user did not report any information with regard to environmental liens or Activity and Use Limitations (AUL's) recorded against the property.

C. Specialized Knowledge

The user did not report any specialized knowledge related to the property or to nearby properties.

D. Commonly Known or Reasonably Ascertainable Information

The user reported that past use of the property was a gas station. The user did not report any other commonly known or reasonably ascertainable information related to the property.

E. Valuation Reduction for Environmental Issues

The user did not report any information with regard to the value of the subject property based on environmental issues.

F. Owner, Property Manager, and Occupant Information

The user did not provide any information regarding the ownership or management of the subject property.

G. Reason for Performing Phase I

This Phase I ESA is being performed for the client as part of a due diligence investigation of the subject site for purchasing, financing and/or development purposes.

H. Vapor Encroachment

The user reported that the subject property has been and is currently occupied by a gas station. The user also reported that multi-family residential structures with slab-on-grade floors will be constructed on the site in the future.

I. Other

The user did not report any other knowledge or experience with regard to environmental condition for the subject property.

V. RECORDS REVIEW

A. Standard Environmental Record Sources

KCE Matrix retained Environmental Data Resources, Inc. (EDR) to conduct a search of governmental or regulatory agency databases in an attempt to locate the subject site and other sites in the vicinity of the subject property that may affect the environmental quality of the property. The environmental disclosure report prepared by EDR provides a summary of the various databases searched and is presented in Appendix B of this report. The database research presents summaries for the subject site and selected adjoining properties as follows:

A1. Subject Site

The databases identified the subject property as University Chevron Service Station, Amerigas and Amerigas Propane, Inc. The information for the subject property is presented in Appendix B, on pages eight through 10 of the referenced EDR report.

Database	Property Name	Regulatory History and/or Reported Impact and Current Status
EDR US HIST AUTO STATION	University Chevron Service Station	Identified the site as an historic auto station in 1975.
HAZNET	Amerigas	Listed one summary report dated 2000, and two summary reports dated 2011. The information reported included that the site had unspecified oil containing waste, hydrocarbon solvents (benzene, hexane, stoddard solvent, etc.) and latex waste. Reported the TSD EPA ID numbers, and the methods of disposal as: other recovery of reclamation for reuse including acid regeneration, organic recovery etc., and fuel blending prior to energy recovery at another site.
RCRA-SQG	Amerigas Propane Inc	Reported the facility name and EPA ID number. Reported facility classification as small quantity generator. No violations were reported.
FINDS	Amerigas Propane Inc	Reported the registry ID number.

A2. Site Vicinity

The environmental disclosure report obtained by KCE Matrix from EDR presents information with regard to other sites in the immediate and general site vicinity of the subject property. The information for these other sites located in the immediate vicinity of the subject property is presented in Appendix B, on pages 66 through 75 of the referenced EDR report. In addition,

detailed information with regard to other sites located closest to and in the immediate vicinity of the subject property is as follows:

1) Automatic Launderette

The databases identified this property as Automatic Launderette with the address of 284 East Virginia Street. Based on information as obtained by KCE Matrix from EDR, this site is located approximately 192 feet southeast of the subject site.

Database	Regulatory History and/or Reported Impact and Current Status
EDR US HIST CLEANERS	Reported facility names in 1966 as "Automatic Launderette".

2) Willig Shirt Laundry

The databases identified this property as Willig Shirt Laundry with the address of 286 East Virginia Street. Based on information as obtained by KCE Matrix from EDR, this site is located approximately 199 feet east-southeast of the subject site.

Database	Regulatory History and/or Reported Impact and Current Status
EDR US HIST CLEANERS	Reported facility names in 1966 as "Willig Shirt Laundry".

3) Shell Service Station, Shell, K&W Shell Service Station and Virginia Shell

The databases identified this property as shell Service Station, Shell, K&W Shell Service Station and Virginia Shell with the address of 288 East Virginia. Based on information as obtained by KCE Matrix from EDR, this site is located approximately 207 feet east-southeast of the subject site.

Database	Regulatory History and/or Reported Impact and Current Status
RCRA-SQG	Reported the facility name and EPA ID number. Reported facility classification as small quantity generator. No violations were reported.
FINDS	Reported the registry ID number.
LUST	Reported this site as a leaking underground tank case where groundwater (used other than drinking water) was impacted by gasoline. Reported facility status as "Completed - Case Closed", as of 8/10/2004.
LUST SANTA CLARA	Reported that the case is closed as of 8/10/2004.
SAN JOSE HAZMAT	Reported the class as "Gasoline Station" and "Auto Repair".
HAZNET	Listed two summary reports dated 2002. The information reported included that the site had tank bottom waste and other empty containers with a capacity of 30 gallons or more. Reported the TSD EPA ID numbers, and the methods of disposal as "Recycler".
LUST REG 2	Reported the facility status as "Case Closed".
HIST LUST SANTA CLARA	Reported that the case is closed as of 8/10/2004.
EDR US HIST AUTO STATION	Identified the site as an historic auto station in 1970, 1975, 2003, 2004, 2007 and 2010.

Database	Regulatory History and/or Reported Impact and Current Status
HIST UST	Reported the facility ID number. Reported one tank with the capacity of 550 gallons installed in 1969, the tank use as "WASTE", and the type of fuel as "WASTE OIL". Reported three tanks with the capacity of 10,000 gallons installed in 1979, the use of the tanks is reported as "PRODUCT", the types of fuel is reported as "UNLEADED", "REGULAR", and "PREMIUM".
SWEEPS UST	Reported one UST with the capacity of 550 gallons, reported the status as "Active", and reported the use of the tank as "OIL". Reported three UST's with the capacity of 10,000 gallons, reported the status as "Active", and reported the use of the tanks as "M.V.Fuel".

4) Automatic Launderette

The databases identified this property as Automatic Launderette with the address of 801 South 7th Street. Based on information as obtained by KCE Matrix from EDR, this site is located approximately 278 feet east-southeast of the subject site. Based on the reported site name and location, it is possible that this facility is the same facility as reported in Item #1 above.

Database	Regulatory History and/or Reported Impact and Current Status
EDR US HIST CLEANERS	Identified the site as an historic cleaning facility 1950 and 1960.

5) Unmapped Sites

The databases searched identified the following 20 unmapped sites as follows:

Name	Address
Coyote Creek Cilker Property	N of Hwy 237
Cal Dot	Unknown Hwy 101 & 10Th St
T & H Auto Repair	1684 S 7Th St A/B
S J Concrete Pipe Co	1420 N Bayshore Hwy 1
Sjsu-South Campus	1257 S 10Th St
Butterick Demolition	11Th and Horning
PG&E Gas Plant San Jose 408 5	SW Cor San Augustine & Montg-Y
PG&E Gas Plant San Jose 408 5A	4Th/San Fernando/Se Parcel
Stauffer Chem Co Raisch Quarry	S of 1St St
Pacific Airmotive	San Jose Arpt
Marshland Solid Waste Facility	NW Hwy 237 and Gold Street Alviso
P&G Investment Company	1775 Monterey Bldg. #64 Hwy
Kirby Canyon Landfill	Scheller Avenue at Hwy 101
California Water Service Co Ch Sta	E 3Rd St at SW Corner of E 1St
Forest City Commercial Management	Corner of San Fernando & S 1St
Santa Clara Cnty Hwy 280 Resurfaci	Rte 280 Pm 2.2 To 5.1
Ct Joint Seal Assemblies Replaceme	Route 101, Postmile 56.1
Santa Clara County Hwy 280 Median	Highway 280 Kilopost 0 to 5.6
Z Con Specialty Services Inc	1645 Old Bayshore Hwy
Vacant Property Bordered By Guadal	Vacant Property Bordered by Hedding, Ashbury, Walnut and Gua

The disclosure report prepared by EDR identified all 20 unmapped sites as Orphan sites and provided addresses and locations for a majority of the unmapped sites. Based on site vicinity reconnaissance up to an approximate radius of 0.25-mile from the subject site and based on the addresses and location information provided in the Orphan Site Summary as prepared by EDR,

all 20 unmapped sites were not observed to be located in the immediate vicinity of the subject property, and are likely located in excess of 0.25-mile from the subject site.

B. Additional Environmental Record Sources

Regional Water Quality Control Board (RWQCB)

On May 23, 2014; KCE Matrix submitted a written request to the Regional Water Quality Control Board (RWQCB), San Francisco Bay Region – File Review Department; for information regarding Underground Storage Tanks (UST's) and hazardous materials for the subject property. Based on a written email response issued by the RWQCB dated May 29, 2014; this agency does not maintain any records for the subject property. A copy of the written request made by KCE Matrix dated May 23, 2014 and a copy of the RWQCB email response dated May 29, 2014 are presented in Appendix C-1.

Department of Toxic Substances Control (DTSC)

On May 23, 2014; KCE Matrix submitted a written request to the California State Department of Toxic Substance Control (DTSC) – Berkeley Office for information regarding hazardous materials and UST's for the subject property. Based on a letter response issued by the DTSC dated May 29, 2014; this agency does not maintain any records for the subject property. A copy of the written request made by KCE Matrix dated May 23, 2014 and the DTSC response correspondence dated May 29, 2014 are presented in Appendix C-2.

City San Jose – Fire Prevention Bureau

On May 23, 2014; KCE Matrix submitted a written request to the City of San Jose – Fire Prevention Bureau (SJFPB) for information regarding hazardous materials and UST's for the subject property. Based on the documentations provided to KCE Matrix via facsimile dated June 23, 2014; the following information was obtained from this agency for the subject property:

Date	Record	Description
4/28/2002	Non-Waste Hazardous Materials Inventory Statement	Reported Propane LPG on site with a maximum capacity of 30,000 gallons.
5/7/2002	Hazardous Material Business Plan	Reported the business name as Amerigas, reported the owner's name as Amerigas Propane.
3/27/2003	Hazardous Materials Storage System - Permit Application	Reported the removal of 1,000-gallon steel L.P.G. (Propane) container and its associated tank piping system. Reported the business name as Amerigas Propane.
4/16/2003	Hazardous Material Plan Check	Reported that a 1,000 gallon Propane tank and dispenser were removed on 03/27/2003. Reported the applicant name as Amerigas Propane
4/22/2003	Record of Inspection	Reported removal of 1,000 gallon recovery tank.
5/20/2005	Emergency and Hazardous Chemical Inventory	Reported Propane gas on site. Reported the business name as Amerigas Propane.

A copy of the written request made by KCE Matrix dated May 23, 2014 and the SJFPB response correspondence dated June 23, 2014 are presented in Appendix C-3.

Santa Clara County - Department of Environmental Health

On May 23, 2014; KCE Matrix submitted a written request to the Santa Clara County Department of Environmental Health (SCCDEH) for information regarding hazardous materials and UST's for the subject property. Based on the SCCDEH email response dated June 2, 2014; the documentation for the subject property indicated that the property was occupied by a business known as "AMERIGAS" in November of 2011; the facility handles hazardous materials in quantities (liquid $\geq$ 55gal, solid $\geq$ 500 lb, gas $\geq$ 200 ft³); and the facility also had two Propane tanks with maximum daily capacities of 499 gallons and 30,000 gallons. A document dated January 22, 2014 reported the facility's name as "AMERIGAS PROPANE #0130" and that the facility is inactive. No other records were maintained by the SCCDEH for the subject property. A copy of the written request made by KCE Matrix dated May 23, 2014 and the SCCDEH response correspondence dated June 2, 2014 are presented in Appendix C-4.

Santa Clara Valley Water District

On May 23, 2014; KCE Matrix submitted a written request to the Santa Clara Valley Water District (SCVWD) for information regarding hazardous materials and UST's for the subject property. Based on a written response issued by the SCVWD dated May 23, 2014; this agency is no longer responsible for maintaining such records for the subject property. A copy of the written request made by KCE Matrix dated May 23, 2014 and the SCVWD response correspondence dated May 23, 2014 are presented in Appendix C-5.

C. Physical Setting Source(s)

C1. Topography

The site has an approximate elevation of 101 feet above mean sea level. A Location Map that shows the physical setting of the subject property and vicinity is presented in Appendix A, as Figure 1.

C2. Geology/Hydrogeology

KCE Matrix conducted a search of groundwater monitoring data as maintained by the State Water Resources Control Board (SWRCB) – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.40-mile north of the subject site, the depth to groundwater was reported to range from approximately 14.29 to 18.55 feet below the surface as monitored in December of 2013. Based on monitoring data collected from wells located at a second site that is approximately 0.40-mile northwest of the subject site, the depth to groundwater was reported to range from approximately 12.05 to 22.27 feet below the surface as monitored in February of 2014. Based on monitoring data collected from wells located at a third site that is approximately 0.40-mile southwest of the subject site, the depth to groundwater was reported to range from approximately

14.03 to 17.04 feet below the surface as monitored in January of 2013. The groundwater information obtained from the SWRCB Geotracker Database for the site vicinity is presented in Appendix C-6.

D. Historical Use Information - Subject Property

D1. Building Records

During this investigation, KCE Matrix conducted a search of the building records maintained by the City of San Jose – Building and Safety Division. Based on the research conducted, the following information was obtained from this agency for the subject property:

Date	Record	Description
3/8/1972	Building Permit	For a single-story building to be occupied by a service station. Reported the owner as Standard Oil of California
12/12/1972	Electrical Permit	Reported the use of the building as service station, reported the owner as Standard Oil Company
12/28/1972	Plumbing Permit/ Gas Piping Permit	Reported the use of the building as gas station, reported the owner as Standard Oil
4/6/1973	Electrical Permit	Reported the use of the building as service station, reported the owner as Standard Oil
2/29/1984	Electrical Permit	Reported the owner as Cal - Gas, reported the current use of the building as "office and sales" - former gas station
2/29/1984	Building Permit	For 1-story building to be occupied by an office and sales. Reported the owner as Cal Gas
3/7/1984	Building Permit	For fuel storage tank, reported the owner as Cal Gas
5/3/1984	Mechanical Permit	Reported the owner as Cal Gas
6/18/1984	Certificate of Occupancy	Reported the use classification as Office/Sales
1/28/1985	Electrical Permit	Reported the use of the building as propane dispensing-fuel storage tank, reported the owner as Cal Gas Corp.
3/27/2003	Hazardous Materials Storage System Permit Application	To remove one 1,000-gallon steel L.P.G. propane tank along with the tank piping system, reported the business name as Amerigas Propane
4/16/2003	Hazardous Material Plan Check	Stating that a 1,000-gallon propane tank and dispenser were removed on 03/27/03 without an inspection from the San Jose Fire Department, however, given the circumstances associated with the project, no inspection was required by the San Jose Fire Department for this project.

Copies of selected building records maintained by the City of San Jose Building and Safety Division for the subject property are presented in Appendix D-1.

D2. Historic Maps

The following table presents a review of the collection of historic Sanborn® Maps for the subject property as obtained by KCE Matrix from EDR.

Table D2: Historical Sanborn® Maps Summary – Subject Property

Year	Description
1884	The subject property is not presented on this map.

Year	Description
1891	The subject property appears to be vacant land.
1915	The subject property is occupied by residential building structures with some vacant land.
1950	The subject property is occupied by residential building structures.
1969	The subject property is occupied by residential building structures.

Copies of the Sanborn® Maps dated 1884, 1891, 1915, 1950 and 1969 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-2.

D3. Aerial Photographs

The following table presents a review of the collection of aerial photographs for the subject property as obtained by KCE Matrix from EDR.

Table D3: Historical Aerial Photography Summary – Subject Property

Year	Scale	Source	Description
1939	1"=500'	Fairchild	The subject site is occupied by residential building structures.
1948	1"=500'	EDR	The subject site is occupied by residential building structures.
1956	1"=500'	Aero	The subject site is occupied by residential building structures.
1968	1"=500'	EDR	The subject site is occupied by residential building structures.
1974	1"=500'	USGS	The eastern portion of the subject property has been developed into a commercial property. The building, which is most likely a gas station, is evident as a rectangular structure diagonally situated near the center of the eastern portion of the property. A smaller structure, which is likely a canopy, is evident and located on the southeastern portion of the property. The western portion of the property is vacant land with some bushes and/or trees on the western perimeter of the property.
1981	1"=500'	USGS	Similar to the 1974 aerial photograph.
1998(a)	1"=500'	EDR	The eastern portion of the property seems to be similar to what is shown on the 1981 aerial photograph; however, the western portion of the property seems to have been occupied by a commercial and/or industrial facility which is most likely the Propane gas supplier company known as "Amerigas". The relatively large gas tank that was located in the eastern portion of the western side of the property is evident. Several smaller tanks are also evident around the perimeter.
1998(b)	1"=500'	USGS	Similar to the 1998(a) aerial photograph. However, it is difficult to assess the subject site. Individual small structures are not distinguishable.
2005	1"=500'	EDR	Similar to the 1998(a) aerial photograph.
2006	1"=500'	EDR	Similar to the 2005 aerial photograph.
2009	1"=500'	EDR	Similar to the 2006 aerial photograph.
2010	1"=500'	EDR	Similar to the 2009 aerial photograph.
2012	1"=500'	EDR	Similar to the 2010 aerial photograph.

Copies of aerial photographs dated 1939, 1948, 1956, 1968, 1974, 1981, 1998(a), 1998(b), 2005, 2006, 2009, 2010 and 2012 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-3.

D4. Historical Topographic Maps

The following table presents a review of the collection of Historical Topographic Maps for the subject property as obtained by KCE Matrix from EDR.

Table D4: Historical Topographic Map Summary – Subject Property

Map Year	Scale	Description
1899	1:62500	Difficult to assess the subject site. Individual small structures are not distinguishable.
1953(a)	1:24000	The subject site is not evident on the topographic map.
1953(b)	1:62500	The subject site appears to have been developed. However, the individual small structures are not distinguishable.
1961(a)	1:24000	The subject site is not evident on the topographic map.
1961(b)	1:62500	The subject site appears to have been developed. However, the individual small structures are not distinguishable.
1968	1:24000	The subject site is not evident on the topographic map.
1973	1:24000	The subject site is not evident on the topographic map.
1980	1:24000	The subject site is not evident on the topographic map.

Copies of the Historical Topographic Maps dated 1899, 1953(a), 1953(b), 1961(a), 1961(b), 1968, 1973 and 1980 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-4.

D5. City Directory Abstract

The following table presents a review of the City Directory Abstract for the subject property as obtained by KCE Matrix from EDR.

295 East Virginia Street

Table D5(a): City Directory Abstract Summary – Subject Site

Year(s)	Occupant
2013	Amerigas
2000	No Listing
1975	University Chevron Service Station

A copy of the City Directory Abstract obtained from EDR and reviewed by KCE Matrix is presented in Appendix D-5.

D6. Recorded Land Title Records

Oftentimes, the Recorded Land Title Records will provide only names of previous owners, lessees, easement holders, etc. and little or no information about uses or occupancies of the property. However, when employed in combination with another source, the Recorded Land Title Records may provide helpful information about uses of a given property. A title report was not provided to KCE Matrix during this investigation.

E. Historical Use Information - Adjoining Properties

E1. Historic Maps

The following table presents a review of the collection of historic Sanborn® Maps for the subject property and site vicinity as obtained by KCE Matrix from EDR.

Table E1: Historical Sanborn® Maps Summary – Site Vicinity

Year	Description
1884	The general site vicinity to the west and southwest is comprised of vacant land. The areas immediately to the north, east and southeast of the property are not shown. A public school is located to the north of the subject site across Margaret Street is evident.
1891	The general site vicinity is comprised of vacant land with some occasional residential building structures located to the south of the subject site across East Virginia Street. The public school to the north of the subject site across Margaret Street is still evident.
1915	Significant development of residential properties in the general vicinity of the subject site is evident. The property located to the south of the subject site is labeled as "Play Ground". The public school to the north of the subject site across Margaret Street is still evident.
1950	Similar to the 1915 map with further development of residential properties in the general vicinity of the subject property. The public school to the north of the subject site across Margaret Street is still evident.
1969	The general vicinity to the east, north and west of the subject site is occupied by residential properties. The property located to the south of the subject site that was labeled as "Play Ground" is developed to a warehouse facility. The properties located to the south-southeast of the subject across East Virginia Street are occupied by what seems to be at least one and possible two gas stations. The public school to the north of the subject site across Margaret Street is still evident.

Copies of the Sanborn® Maps dated 1884, 1891, 1915, 1950 and 1969 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-2.

E2. Aerial Photographs

The following table presents a review of the collection of Aerial Photographs for the subject property and site vicinity as obtained by KCE Matrix from EDR.

Table E2: Historical Aerial Photography Summary – Site Vicinity

Year	Scale	Source	Description
1939	1"=500'	Fairchild	The general site vicinity to the west, north and east of the subject site consists of residential properties. The area to the south of the subject site across East Virginia Street is a play ground and commercial properties.
1948	1"=500'	EDR	Similar to the 1939 aerial photograph.
1956	1"=500'	Aero	Similar to the 1948 aerial photograph, except that the property located to the south of the subject site across East Virginia Street that was a play ground is occupied by a relatively large commercial building structure.
1968	1"=500'	EDR	The residential building structures located immediate to the north of the subject site, to the west across South 6th Street and to the east across South 7th street have been demolished, and are vacant land. The property located to the south across East Virginia Street is occupied by residential building structures and commercial building structures.
1974	1"=500'	USGS	The interstate 280 highway is first evident immediately to the north of the subject site. The properties to the west of the subject site across South 6th Street and east of the subject site across South 7th Street are vacant land. The property to the east of the intersection of South 6th Street and East Virginia Street is occupied by a gas station facility, the property to the south of the intersection of South 7th Street and East Virginia Street is occupied by a gas station facility. The property to the south of the subject site across East Virginia Street is occupied by commercial building structures.
1981	1"=500'	USGS	Similar to the 1974 aerial photograph.
1998(a)	1"=500'	EDR	Similar to the 1981 aerial photograph, except that the property that is

Year	Scale	Source	Description
			located to east of the intersection of South 6th Street and East Virginia Street that was occupied by a gas station is occupied by a commercial building structure. The gas station that is located to the south of the intersection of South 7th Street and East Virginia Street is still evident.
1998(b)	1"=500'	USGS	Similar to the 1998(a) aerial photograph. However, the individual small structures are not distinguishable.
2005	1"=500'	EDR	Similar to the 1998(a) aerial photograph.
2006	1"=500'	EDR	Similar to the 2005 aerial photograph.
2009	1"=500'	EDR	Similar to the 2006 aerial photograph.
2010	1"=500'	EDR	Similar to the 2009 aerial photograph.
2012	1"=500'	EDR	Similar to the 2010 aerial photograph.

Copies of aerial photographs dated 1939, 1948, 1956, 1968, 1974, 1981, 1998(a), 1998(b), 2005, 2006, 2009, 2010 and 2012 for the subject property and site vicinity obtained by KCE Matrix from EDR are presented in Appendix D-3.

E3. Historical Topographic Maps

The following table presents a review of the collection of Historical Topographic Maps for the subject property and site vicinity as obtained by KCE Matrix from EDR.

Table E3: Historical Topographic Map – Site Vicinity

Map Year	Scale	Description
1899	1:62500	Difficult to assess the site vicinity. Individual small structures are not distinguishable.
1953(a)	1:24000	The general site vicinity to the northeast, east and southeast is not evident on the topographic map. The general site vicinity to the northwest, west and southwest appears to be developed. However, the individual small structures are not distinguishable.
1953(b)	1:62500	The general site vicinity appears to be developed. However, the individual small structures are not distinguishable.
1961(a)	1:24000	The general site vicinity to the northeast, east and southeast is not evident on the topographic map. The general site vicinity to the northwest, west and southwest appears to be developed. The property located to the south of the subject site across East Virginia Street appears to be occupied by commercial and/or industrial structures. The property located to the north of the subject site is occupied by a school known as "Lowell School".
1961(b)	1:62500	Similar to the topographic map dated 1953(b) with increased number of residential, commercial and/or industrial structures in the general vicinity of the subject site. Lowell School to the north and the commercial/industrial structures to the south are still evident.
1968	1:24000	Similar to the topographic map dated 1961(a) with increased number of residential, commercial and/or industrial structures in the general vicinity of the subject site. The residential structures located immediately to the north and west of the subject site appear to be demolished and the area consists of vacant land. Lowell School to the north and the commercial/industrial structures to the south across East Virginia Street are still evident.
1973	1:24000	Further development of commercial and/or industrial structures in the general site vicinity is evident. The Interstate 280 is first evident to immediately to the north of the subject site. The off-ramp of Interstate 280 is first evident immediately to the west of the subject site. Lowell School located to the north of the Interstate 280 and the commercial/industrial structures to the south across East Virginia Street are still evident.
1980	1:24000	Similar to the topographic map dated 1973 with further development of commercial and/or industrial structures in the general site vicinity.

Copies of the Historical Topographic Maps dated 1899, 1953(a), 1953(b), 1961(a), 1961(b), 1968, 1973 and 1980 as obtained from EDR and reviewed by KCE Matrix are presented in Appendix D-4.

E4. City Directory Abstract

Based on review of the City Directory Abstract report obtained by KCE Matrix from EDR; additional information with regard to addresses in the site vicinity is presented. Information with regard to listings that are or were located in the immediate vicinity of the subject property are presented on pages four through 83 of the referenced EDR report. A copy of the City Directory Abstract report obtained from EDR and reviewed by KCE Matrix is presented in Appendix D-5.

VI. SITE RECONNAISSANCE

A. Methodology and Limiting Conditions

Site reconnaissance is limited to the areas accessible and inspected during this investigation. During inspection of the subject property, the interior of the commercial/industrial building currently on site was not accessible. No sampling or analysis of any building materials for asbestos content or paint for lead content was conducted during this assessment.

In general, for building structures that were constructed prior to 1978, it is possible that some of the building materials in such structures may have Asbestos Containing Material (ACM) or may have been painted with Lead-Based Paint (LBP) at some point in time. Exposure to asbestos is a health concern when building materials are friable. In working near, repairing or replacing materials such as these, a licensed asbestos contractor or personnel specially trained in working with or near asbestos should be employed. With regard to LBP, exposure to lead from LBP is a health concern when lead dust is created and can be inhaled or LBP chips are accessible for ingestion. In working near, assessing, repairing or replacing materials that contain LBP, certified lead professionals specially trained in working with or near LBP should be employed.

B. General Site Setting

The subject property is located within a commercial-retail and residential area. The subject site consists of approximately 54,178 square feet, appears to be relatively flat and has an approximate elevation of 101 feet above mean sea level. The site can be accessed from driveways along East Virginia Street and South 7th Street. There is a third access driveway located along South Sixth Street that appears to be locked.

The subject property is currently unoccupied. The site contains a building structure located on the central, eastern portion of the site that appears to have been used previously as a gasoline service station building. The structure measures approximately 2,000 square feet in size. An overhead canopy is located on the southeastern portion of the property where there are two pump islands and the apparent location of former product dispensers. The remaining areas consist of parking areas and driveways covered with asphalt for a majority of these areas with several areas of concrete surfaces located immediately adjacent to the building and beneath the canopy. A trash

container is located inside of an enclosed area on the northeast corner of the site behind and attached to the station building. The western and southern most portion of the property is essentially vacant land with no structures and appears to have been used previously as a Propane gas storage and distribution facility. Numerous above ground propane tanks that appear to be currently empty were stored in this area of the subject property. In addition, the concrete supports for a relatively large and former above ground propane storage tank were also observed in this area.

A Location Map, a Site Plan and a Site Vicinity Map are presented in Appendix A, as Figures 1, 2 and 3, respectively. During site reconnaissance, KCE Matrix also obtained photographs of the subject property and vicinity. Selected photographs are presented in Appendix F.

C. Observations

	Description	Comments
1	Industrial Use	Former propane distribution facility, no business
2	Gas Station/Auto Repair	Former gas station
3	Motor Repair Facility	Possibly associated with former gas station
4	Commercial Printing Facility	-
5	Dry Cleaning	-
6	Photo Development Laboratory	-
7	Junkyard	-
8	Landfill	-
9	Waste Treatment	During inspection of the subject property, the interior of the commercial/industrial building currently on site was not accessible.
10	Storage Facility	-
11	Disposal Facility	-
12	Processing Facility	-
13	Recycling Facility	-
14	Batteries	-
15	Pesticides or agricultural activity	-
16	Paints	-
17	HazMat storage or use	Related to the former gas station
18	Potential HazMat storage or use	-
19	Dumping or Improper Disposal of HazMat	-
20	Drums and Other Containers	-
21	PCB's, Transformers, Capacitors or Hydraulic equipment	-
22	Chemical Products	-
23	Asbestos, Age of Building, Blueprints	Possible, based on age of buildings
24	Paint Condition, LBP	Possible, based on age of buildings
25	Building Demolition or Renovation	-
26	Fill Dirt From Other Locations	Possible during removal of former UST's
27	Stained Soil or Spills	Standard for driveways and parking areas
28	Oil or Gas Wells	-
29	UST's	Formerly associated with gas station
30	AST's	Numerous empty propane tanks located on the western site of the subject property
31	Hydraulic Hoists	During inspection of the subject property, the interior of the building currently on site was not accessible

	Description	Comments
32	Clarifier/Wastewater Interceptor	During inspection of the subject property, the interior of the commercial/industrial building currently on site was not accessible
33	Subsurface or Underground Pipes	Formerly, associated with the former UST's
34	Above Ground Pipes	-
35	Flooring, Drains or Walls Emitting Foul Odors	-
36	Pits, Ponds, Lagoons or Cesspools	-
37	Distressed Vegetation	-
38	Pools of Liquid, Drains, Sumps, Stains, Septic Tanks	-
39	Environmental Liens	-
40	Government Notifications Regarding Environmental Violation	-
41	HazMat Inventory	-
42	Disclosure of Hazardous Substances or Petroleum Products	-
43	Previously Conducted Environmental Site Assessments	Possible, although not evident
44	Wastewater Generation or Disposal	Possible, could not be inspected inside the building
45	Water Supply System, Water Usage	-
46	Regulated Air Emissions	Associated with former UST's

D. Site Vicinity Reconnaissance

KCE Matrix conducted a brief inspection of the immediate vicinity of the subject property. The adjoining properties are comprised of the following:

- NORTH: Interstate 280.
- EAST: South 7th Street, vacant land and Interstate 280.
- SOUTH: East Virginia Street, a gas station, commercial and residential properties and vacant land.
- WEST: Vacant land, Interstate 280 off ramp and residential properties.

The disclosure report prepared by EDR identified 20 other sites that may be located in the general site vicinity as unmapped and Orphan sites. Based on site vicinity reconnaissance up to an approximate radius of 0.25-mile from the subject site and based on the addresses provided in the Orphan Site Summary as prepared by EDR, all 20 unmapped sites were not observed to be located in the immediate vicinity of the subject property, and are likely located in excess of 0.25-mile from the subject site. Based on inspection of the site vicinity, KCE Matrix did not observe evidence of subsurface environmental site assessment activity or observations that would indicate potential migration of contamination from other sites towards the subject property.

VII. INTERVIEWS

A. Interview with Owner

KCE Matrix did not conduct an interview with the current owner of the property during this investigation.

B. Interview with Site Manager

KCE Matrix did not conduct an interview with the current site manager of the property during this investigation. The site is currently vacant and unoccupied.

C. Interviews with Occupants

KCE Matrix did not conduct an interview with the current occupant of the property during this investigation. The site is currently vacant and unoccupied.

D. Interviews with Local Government Officials

KCE Matrix did not interview any local government officials regarding the subject property during this investigation.

E. Interviews with Others

KCE Matrix did not conduct any other interviews regarding the subject property during this investigation.

VIII. VAPOR ENCROACHMENT SCREEN

During this investigation, KCE Matrix conducted a Vapor Encroachment Screen (VES) for the subject property based on the ASTM E2600-10 guideline. The goal of conducting a VES as established by the ASTM, is to identify a potential Vapor Encroachment Condition (VEC) for the subject property, which is defined as the presence or likely presence of Chemicals of Concern (COC) vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject site.

A. Subject Property - VES

Based on the research conducted during this investigation, the eastern portion of the subject property has been occupied by a retail fuel facility from approximately 1972 through 1984; the western portion of the subject property has been occupied by a propane gas supplier company from approximately 1998 through 2011. Therefore, potential sources of subsurface and above-ground COC's which include petroleum hydrocarbon chemicals have been identified both historically and relatively recently on site. As such, a VEC has been identified for the subject property.

B. Site Vicinity - VES

Based on the research conducted during this investigation for other sites located in the general vicinity of the subject property, several other sites were evaluated during this VES. The evaluation of these other sites located closest to the subject property is presented as follows:

Name	Address	Distance	Conclusion
K&W Shell Service Station	288 E Virginia Street	57 ft. / 0.011 mi.	VEC Cannot Be Ruled Out
Shell Service Station		57 ft. / 0.011 mi.	VEC Cannot Be Ruled Out
Shell		57 ft. / 0.011 mi.	VEC Cannot Be Ruled Out
Willig Shirt Laundry	286 E Virginia Street	58 ft. / 0.011 mi.	VEC Can Be Ruled Out
Automatic Launderette	284 E Virginia Street	59 ft. / 0.011 mi.	VEC Can Be Ruled Out
Harden H J	801 S 7th Street	79 ft. / 0.015 mi.	VEC Can Be Ruled Out
John S Texaco Service	206 E Virginia Street	371 ft. / 0.07 mi.	VEC Can Be Ruled Out
Barron-Grey Packing Co	825 S 5th Street	447 ft. / 0.085 mi.	VEC Can Be Ruled Out

Based on the reported groundwater flow direction, and the location of these other sites in relation to the subject property (up-gradient, down-gradient or cross-gradient), additional site specific research may be performed to further evaluate this other site that has not been ruled out in greater detail and determine whether it presents a VEC for the subject property. Detailed information with regard to the VES evaluation conducted is presented in a VES summary report presented in Appendix G of this report.

IX. FINDINGS

The following presents our findings based on the work performed during this Phase I ESA:

- The subject property is located within a commercial-retail and residential area. The subject site consists of approximately 54,178 square feet, appears to be relatively flat and has an approximate elevation of 101 feet above mean sea level. The site can be accessed from driveways along East Virginia Street and South 7th Street. There is a third access driveway located along South Sixth Street that appears to be locked. The subject property is currently unoccupied and contains a building structure located on the central, eastern portion of the site that appears to have been used previously as a gasoline service station building. The structure measures approximately 2,000 square feet in size. An overhead canopy is located on the southeastern portion of the property where there are two pump islands and the apparent location of former product dispensers. The remaining areas consist of parking areas and driveways covered with asphalt for a majority of these areas with several areas of concrete surfaces located immediately adjacent to the building and beneath the canopy. A trash container is located inside of an enclosed area on the northeast corner of the site behind and attached to the station building. The western and southern most portion of the property is essentially vacant land with no structures and appears to have been used previously as a Propane gas storage and distribution facility. Numerous above ground propane tanks that appear to be currently empty were stored in this area of the subject

property. In addition, the concrete supports for a relatively large and former above ground propane storage tank were also observed in this area.

- Based on the historic information obtained during this investigation (including Sanborn Maps, Aerial Photographs, regulatory records researched and information obtained from city directories), the subject property appears to have been vacant land in 1891, and residential property from at least 1915 through 1969. Subsequently, the eastern portion of the property was a gasoline service station from at least 1972 through 1984. The western portion of the property was used for the sale and distribution of propane gas from at least 1984 through approximately 2011. The former gasoline service station building also appears to have been used as an office for the retail sale of propane after the gasoline station on site was no longer operational.
- Based on site reconnaissance, the eastern portion of the subject property was formerly a gasoline service station. The former UST's, product lines and product dispensers are no longer on site. Currently, former station building, the pump islands and canopy structure still exists on the eastern portion of the site.
- As reported in the search of government environmental databases and as presented in Section VI-E of this report, the subject property is located in a commercial and residential area where information related to environmental assessment, remediation and/or management practices is documented for several other properties in the general vicinity of the subject site. These other sites include at least three historic and former cleaning facilities, and two former and one currently existing gasoline service station. Subsurface assessment and investigation work was performed at the currently existing gasoline service station located across East Virginia Street to the south. That matter was granted final closure as of August of 2004. Based on the information obtained during this investigation and the site vicinity reconnaissance performed, KCE Matrix did not discover or observe subsurface environmental site assessment activity that would indicate potential migration of contamination from other nearby sites towards the subject property at this time.
- Based on the Vapor Encroachment Screen (VES) conducted during this investigation, a Vapor Encroachment Condition (VEC) was identified as originating from the subject property. Further, the VES evaluated several sites in the immediate vicinity of the subject property and eliminated a VEC to the subject property for many of these sites, except for one. Additional research will be necessary to further evaluate this other site to determine whether it presents a VEC to the subject property, if warranted.
- KCE Matrix conducted a search of groundwater monitoring data as maintained by the SWRCB – Geotracker database for hydrology information for the site and site vicinity. Based on monitoring data collected from wells located at a site that is approximately 0.40-mile north of the subject site, the depth to groundwater was reported to range from approximately 14.29 to 18.55 feet below the surface as monitored in December of 2013. Based on monitoring data collected from wells

located at a second site that is approximately 0.40-mile northwest of the subject site, the depth to groundwater was reported to range from approximately 12.05 to 22.27 feet below the surface as monitored in February of 2014. Based on monitoring data collected from wells located at a third site that is approximately 0.40-mile southwest of the subject site, the depth to groundwater was reported to range from approximately 14.03 to 17.04 feet below the surface as monitored in January of 2013.

X. SIGNATURE

KCE Matrix appreciates the opportunity to have provided services for this project. Should you have any questions or concerns regarding this assessment and report, please do not hesitate to contact me at 818-500-0355.

Sincerely,

KCE Matrix, Inc.

XI. QUALIFICATIONS

KCE Matrix declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Detailed information with regard to the qualifications of the personnel who have worked on this project is presented in Appendix H of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LORENTZ BARREL & DRUM CO.	1515 S 10TH ST	ESE 1/4 - 1/2 (0.455 mi.)	0	10

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LORENTZ BARREL & DRUM CO.	1515 S 10TH ST	ESE 1/4 - 1/2 (0.455 mi.)	0	10

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
BARRON-GREY PACKING CO	825 S 5TH ST	SSW 0 - 1/8 (0.117 mi.)	12	76

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>SHELL SERVICE STATION</i>	<i>288 E VIRGINIA</i>	<i>ESE 0 - 1/8 (0.039 mi.)</i>	<i>B6</i>	<i>67</i>
<i>B-LINE BODY SHOP, INC</i>	<i>161 PATTERSON ST</i>	<i>WSW 1/8 - 1/4 (0.148 mi.)</i>	<i>C14</i>	<i>77</i>

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 12/17/2013 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>LORENTZ BARREL & DRUM CO.</i>	<i>1515 S 10TH ST</i>	<i>ESE 1/4 - 1/2 (0.455 mi.)</i>	<i>0</i>	<i>10</i>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 12/17/2013 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/05/2014 has revealed that there are

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 05/01/2014 has revealed that there are 37 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 05/05/2014 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 03/20/2014 has revealed that there are 2 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 2 HIST UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>VIRGINIA SHELL</i>	<i>288 E VIRGINIA ST</i>	<i>ESE 0 - 1/8 (0.039 mi.)</i>	<i>B9</i>	<i>73</i>
<i>AMERICAN CONTRACT INTERIOR, INC</i>	<i>143 E VIRGINIA ST</i>	<i>SW 1/8 - 1/4 (0.199 mi.)</i>	<i>G27</i>	<i>93</i>

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>VIRGINIA SHELL</i>	<i>288 E VIRGINIA ST</i>	<i>ESE 0 - 1/8 (0.039 mi.)</i>	<i>B9</i>	<i>73</i>

Local Land Records

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.

A review of the DEED list, as provided by EDR, and dated 03/10/2014 has revealed that there is 1 DEED site within approximately 0.5 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 7 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SAN JOSE GAS WORKS	E. SAN FERNANDO AND S.	NW 1/2 - 1 (0.799 mi.)	R78	222

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 7 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 6 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal October 15, 1984): Lorent Barrel Drum Co. recycles drums at a plant in San Jose, Santa Clara County, California. The 5-acre site is surrounded by residential, industrial, and business areas. On-site monitoring wells are contaminated with trichloroethane, trichloroethylene, 1,1-dichloroethylene, and tetrachloroethylene, according to analyses conducted by a consultant to Lorent. Contamination is believed to have resulted from overflowing sumps and spills. About 250,000 people obtain drinking water from wells within 3 miles of the site. Lorent is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of ground water contamination. The board issued a Cleanup and Abatement Order to the company in August 1983. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. On March 25, 1981, EPA removed the facility as a treatment, storage, or disposal facility because it was not engaged in hazardous waste activities. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at

these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): In March 1985, EPA and the California Department of Health Services (CDHS) discovered over 300 drums containing phenols, methylene chloride, and PCBs stored on the Lorent property. In response to action by the Santa Clara District Attorney, the company removed the drums. CRWQCB is overseeing the Lorent investigation to determine the extent of ground water contamination. CDHS will oversee the investigation of soil contamination. On February 7, 1986, the Santa Clara County District Attorney filed a complaint against the company for violation of State hazardous waste laws. The facility has been shut down until procedures for compliance are developed. Status June 24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. The company is classified as a non-filer. Hence, it satisfies a component of EPA's NPL/RCRA policy. In July 1987, the owner of the Lorent site was ordered to shut it down permanently, sentenced to 2 years in jail, and fined 2.04 million. Recent sampling by CDHS consultants has shown extensive contamination in soil and ground water, both on- and off-site. In addition to the chlorinated organics identified earlier, pesticides, metals, and PCBs are present. On December 1, 1987, EPA took over as lead agency for a remedial investigation/feasibility study (RI/FS) at the site. In February 1988, CDHS completed an expedited response action consisting of excavating soil with high concentrations of PCBs. In March 1988, EPA and CDHS completed removal of 1,000 drums of hazardous materials. All materials were transported to regulated disposal facilities. The site was then graded and the surface sealed to control drainage. In May 1988, EPA completed an engineering evaluation cost analysis for systems to pump and treat shallow contaminated ground water. Status October 4, 1989): EPA has placed this site on the NPL. EPA completed the RI/FS. Following a period of public comment, a Record of Decision was signed in September 1988 finalizing the remedy as treatment of ground water with an on-site ultraviolet light oxidation system. EPA is currently designing an off-site extraction system and an on-site treatment facility. EPA is also investigating the extent of the contamination in soils and on structures and expects to complete an RI/FS for the overall site in early 1990.

Site Description: Between 1954 and 1968, the warehouse to the west of the processing facility was reportedly destroyed by fire and other structures were added or modified. The 1971 aerial photograph indicates that the northwest portion of the LB&D property (part of the RFI property) was fenced from the remainder of the LB&D property. This property was used as a junkyard. The 1976 aerial photograph of the current RFI property shows that the area was filled with automobiles (presumably junked), while in a 1980 aerial photo, the majority of the automobiles were gone. The 1982 aerial photograph shows the main RFI facility constructed. The basic structures on the LB&D property remained largely unchanged after 1968. From the photo, it appears that roadway improvements and sidewalk additions on both East Alma Avenue and South Tenth Street, which occurred in the late 1970s or early 1980s, may have covered over portions of land impacted by the LB&D facility operations. There are four predominantly granular water-bearing or potentially water-bearing subsurface zones below the LB&D site. These zones have been designated with respect to increasing depth below ground surface (bgs) as Zone A, Zone B, Zone C, and Zone D. The contaminated shallow groundwater currently located in Zone B comprises OU-2. If contaminated groundwater from Zone B also comes to exist in Zone A (e.g., a rise in the water table or resaturation), Zone A groundwater would be addressed under OU-2. The deep aquifer (Zones C and D) and potential conduits between the shallow and deeper aquifers comprise the groundwater portion of OU-1. Unsaturated portions of Zone A lying above the contaminated groundwater in Zone B contain low levels of VOCs. VOC-contaminated soil gas and soil in Zone A are considered part of OU-1. The LB&D site is located in the southeastern corner of the San Jose subarea as defined by the California Department of Water Resources. This subarea is one of the most important natural sources of groundwater in the south San Francisco Bay area (South Bay). The deep aquifer (250 to 400 feet bgs) is a major source of potable groundwater, from which it is estimated that Santa Clara Valley extracts 107,000 acre-feet per year. Three public water supply well fields (owned by SJWC), located at the 12th Street, Cottage Grove, and Needles Stations, are within 1 mile of the LB&D site. An SJSU well is located at the Spartan Stadium. Groundwater in the area is used for drinking and irrigation. The nearby water wells all draw water from screened intervals located at depths greater than 150 feet bgs. The principal groundwater extraction wells for drinking water purposes are located in the Zone D aquifer and are operated by the SJWC. The SJSU Spartan Stadium well is used for both potable and irrigation purposes. The Kelley Park well provides water for the fish pond and is not used as a potable water supply. There are no extraction wells located in the Zone B aquifer other than those used for treatment of the contaminated groundwater. Coyote Creek is located less than 0.5 miles northeast of the LB&D property. Historically, the primary uses of water from this creek have been agricultural and to some extent recreational.

Its current principal value is the contribution to the ecology of the South Bay. No other surface waters are located within 2 miles of the LB&D site. Approximately 2.75 acres of the LB&D property have been paved with a tar and gravel mixture (chipped seal) to cover an area once used for drum storage. The paved area overlies soils which are discolored and potentially contaminated. A small portion of this 2.75 acres is covered by an asphaltic-concrete cover installed by LB&D. The other 2.5 acres of the LB&D property are unpaved but are covered by five buildings which housed the drum reconditioning facilities, several sumps, an open storage bin located adjacent to the processing facility, various piles of wood, rusted metal debris, numerous empty drums and numerous nonhazardous drums. All of these structures and materials, with the exception of an intact warehouse and drums of ash, are scheduled to be removed in 1993 and 1994 by a group of potentially responsible parties (PRPs) under an Administrative Order on Consent (AOC) as more fully described below. Some of the facility structures, numerous barrels and limited amounts of soil were removed from the LB&D site during 1987 emergency response actions conducted by the California Department of Health Services' (DHS's) toxic substances control division, (now known as DTSC, a part of Cal-EPA). The RFI property includes both the RFI and PSS parcels. The RFI parcel is completely covered by a concrete slab, and the PSS parcel is entirely covered by asphalt. The Lorentz family started recycling drums at the former LB&D facility in 1947. During the early years, portions of the original LB&D property (10.5 acres) were also rented or leased to other companies. Several facilities were in operation on the LB&D property around 1954, including an auto wrecker, a junkyard, a roofing company, a construction company, and sandblasting services. Drums for recycling were received from both private and public sources throughout California and Nevada. Private sources included over 2000 different companies and individuals, representing chemical, food, health care, electronics, paint, ink, and paper industries. Public sources included military bases, research laboratories, and county agencies. Many drums arrived at the LB&D facility containing residual aqueous wastes, organic solvents, acids, oxidizers, and oils. The LB&D facility operations consisted in part of emptying all residues, cleaning, resealing, repainting, and reselling the drums. Residues were removed from the drums by various methods, including caustic and acid washes, incineration, blasting with steel shot, and steam cleaning. Drums were then resurfaced, resealed, and repainted using various substances, including phenolic epoxy resins and rust inhibitors.

From the 1950s until some time between 1976 and 1978, a drainage ditch from the processing facility was utilized to drain wastes. The drainage ditch discharged to a large sump (approximately 30 by 80 feet) located in the northern corner of the LB&D property bounded by the corner of East Alma Avenue and South 10th Street. Aerial photographs of the LB&D site from that time period reveal the presence of liquids in the sump, drainage ditch, and various ponded areas. The sump discharged to the storm drain system. Between 1968 and 1971, the discharge was diverted to the sanitary sewer. Previous investigations have indicated that discharge to the sanitary sewer ceased in 1983 or 1984. After 1984, liquid wastes were reportedly reduced in volume by evaporation, drummed, and disposed as hazardous waste along with incinerator ash, residual liquids, and sludge. Surface runoff was reportedly collected and recycled in the hot caustic wash cycle of the drum recycling process. As a result of the LB&D facility operations, a large variety of chemical residues from drums delivered to the LB&D site, as well as chemicals used by the LB&D facility in its drum reconditioning processes, have contaminated soil, structures, and shallow groundwater at and beneath the LB&D site. Contaminated groundwater has also migrated about 2,000 feet north of the LB&D property. The LB&D facility ceased operations in 1987. In late 1987 and early 1988, DTSC and the U.S. Environmental Protection Agency (EPA) conducted

emergency response actions at the LB&D site that included removal of 3,000 cubic yards of highly contaminated soils at the former main sump area and over 2 6,000 drums, some of which contained residues. At the conclusion of the removal action, the majority of the LB&D property was paved over. In 1992, pursuant to a Consent Decree (CD) with EPA, a group of eleven PRPs, known as the Lorentz Shallow Groundwater Task Force (LSGTF), completed construction of and began operating a shallow groundwater extraction and treatment system. This system addresses the VOC contamination of groundwater beneath the LB&D site, as well as the plume that extends approximately 2,000 feet north from the former main sump. Recently, a separate group of seven PRP companies, known as the Structures Removal Group, has begun a removal of buildings, sumps, drums, and miscellaneous debris pursuant to an AOC with EPA. They are expected to complete the removal in 1994. Since 1981, there have been several environmental sampling studies at the LB&D site aimed at investigating the nature and extent of contamination. Over a period of 6 years DTSC and LB&D have collected soil and groundwater samples from on-site and off-site monitoring wells. Numerous metals, organics, and PCBs were found above Total Threshold Limit Concentrations (TTLC). In 1988, EPA began field activities for the Remedial Investigation (RI). The RI included sampling and analysis of surface and subsurface soil, facility structures, groundwater, sediments, and surface water; a geophysical survey; topographic surveying and mapping; pump tests; borehole geophysics; geotechnical sampling; air sampling; and biota sampling. Additionally, a limited well survey was performed, and potential conduits were investigated. Beginning in 1991, EPA commenced field activities for six RI addenda. For RI Addendum No. 1, EPA installed eight Zone B, one Zone C, and one Zone D monitoring wells to better define the groundwater contaminant plume boundaries and to provide deep aquifer monitoring. RI Addendum No. 2 included sampling of 30 soil borings on the RFI property to assess the impact of the LB&D operations on the RFI property. RI Addendum No. 3 updated the Baseline Health Risk Assessment (BHRA) contained in the RI by evaluating soil risks under a residential use scenario. It also modeled and evaluated potential risk from the vapor-phase migration of groundwater contaminants up to the surface and into confined spaces of buildings located above the plume. In RI Addendum No. 4, EPA assessed the location and status of potential conduits and whether additional conduits existed along the leading edge of the plume. In RI Addendum No. 5, EPA investigated the stockpiled soil excavated from the treatment facility foundation to assess the soil contamination present. The sampling results of the stockpiled soil were compared with previous investigation results to evaluate heterogeneity of LB&D soil. For RI Addendum No. 6, EPA installed one Zone C monitoring well to serve as a warning well for the SJSU Spartan Stadium well and to better define the characteristics of the Zone C aquifer immediately downgradient from the original source area. In addition, various sampling and analysis activities have been performed by the Structures Removal Group as part of the removal of structures, debris, equipment, and drums. Specific sampling activities have been performed on drum contents, sump liquids, and building materials. Since 1968, federal, State, and local authorities have taken many regulatory and enforcement actions at the LB&D site. In summary, the major enforcement actions have included: -1968: City of San Jose industrial waste inspector ordered Lorentz to switch sump discharge from Coyote Creek storm drain to the sanitary sewer. -1980: California Occupational Safety and Health Administration (Cal-OSHA) informed DHS of potential problems with hazardous materials at the Lorentz facility. LB&D site is entered into EPA's CERCLIS database. -1982: DTSC inspected the facility and issued a Notice of Violation to Lorentz for soil and groundwater contamination. -1983: The Regional Water Quality Control Board (RWQCB) began investigating potential threats to the groundwater from sumps and other LB&D facility activities and issued Clean Up & Abatement Order No. 83-007. U.S.

Dept. of Fish & Game cited Lorentz for violations involving heavy metals and petroleum products in surface runoff leaving the LB&D facility and entering the storm drain to Coyote Creek. -1984: San Jose/Santa Clara Water Pollution Control District cited Lorentz for violations and issued a cease and desist order for discharge into sanitary sewer. EPA completed a Preliminary Assessment and Site Investigation and proposed the LB&D site for the National Priorities List (NPL). -1985: DTSC cited LB&D with 14 violations of the California Administrative Code and Federal Regulations concerning the handling and storage of hazardous wastes. The Santa Clara County District Attorney obtained a Temporary Restraining Order to close down operations at LB&D. Operations resumed after 3 months. -1986: The Santa Clara County District Attorney filed a criminal complaint against LB&D and Ernest Lorentz which alleged the defendants had committed one felony and 13 misdemeanor violations of the California Hazardous Waste Control Act. The RWQCB issued Corrective Action Order #86-001 requiring LB&D to determine the lateral off-site extent of groundwater pollution. -1987: The LB&D facility ceased operation. EPA assumed the lead agency responsibility for the LB&D site remediation. -1988: EPA and DTSC completed removal of 3,000 cubic yards of highly contaminated soils and over 26,000 drums. EPA paved most of the LB&D property. -1988: EPA issued the OU-2 ROD for expedited cleanup of the shallow groundwater. -1989: EPA sent Special Notice to 43 PRPs to start negotiations on the OU-2 ROD. The LB&D site went from proposed to final on the NPL. -1990: EPA and 11 PRPs (the LSGTF) signed a CD requiring the PRPs to design, construct, and operate a shallow groundwater extraction and treatment system as specified in the OU-2 ROD. -1992: EPA and a group of 7 different PRPs (the Structures Removal Group) signed an AOC that requires the PRPs to remove from the LB&D property and dispose of the remaining barrels, asbestos, site debris, structures (except the concrete pads and the warehouse), and sumps. -1993: EPA proposed a final remedy addressing all remaining contamination at the LB&D site. The main objective of the response action selected as the final remedy for the LB&D site is to protect human health and the environment from all remaining releases or threats of releases of hazardous substances that have not already been addressed by previous or current cleanup actions at the LB&D site. The materials of concern include groundwater in deeper aquifers, vadose zone soil gas near residences situated above the shallow groundwater contaminant plume, vertical and horizontal conduits (e.g., old agricultural wells and sewer lines), structures and debris (e.g., septic tank), residues (e.g., LB&D incinerator ash), soil contaminated with health-risk based COCs, and, the only principal threat remaining unaddressed at the LB&D site, soil contaminated with VOCs that threaten groundwater. A ROD addressing OU-1 of the Lorentz Barrel and Drum site was completed in August, 1993. The Lorentz Barrel and Drum (LB&D) site is located in Santa Clara County, about 13 miles southeast of the southern tip of San Francisco Bay. The LB&D site is defined as all land previously used for LB&D facility operations and all areas where contamination from the LB&D facility operations has come to reside. The LB&D site includes a contaminated shallow groundwater plume area and properties containing contaminated soil, structures, debris, and residues. The original LB&D property consisted of 10.5 acres located at the southern corner of South Tenth Street and East Alma Avenue in the City of San Jose. A 3.78-acre portion of the original property was never significantly involved in the LB&D drum recycling operations and was transferred shortly after the LB&D operations began. This portion includes the 3.39-acre Norton/Phelps property and a 0.39-acre Western Pacific Railroad easement. This portion is located at the southeastern end of the original LB&D property and is not considered part of the LB&D site. The remaining 6.72-acre portion of the original 10.5-acre LB&D property that is contaminated from operations of the former LB&D facility is part of the LB&D site. This portion includes the LB&D property, defined as the 5.25-acre,

LORENTZ BARREL & DRUM CO. (Continued)**1000208886**

L-shaped parcel that contained the LB&D facility operations in 1987. The former LB&D facility included all the buildings, equipment, and land that LB&D used in operating the drum recycling business from 1947 onward. Before 1981, facility operations also occurred on neighboring property, currently owned by Recycled Fibers, Inc. (RFI), that once was part of the original 10.5-acre LB&D property. The 1.47-acre RFI property includes the 1.32-acre RFI parcel (388 East Alma Avenue) that is occupied by the RFI paper recycling business operations (formerly known as Arata Western) and the 0.15-acre Pacific Sandblast Services (PSS) parcel (400 East Alma Avenue) that is occupied by the PSS business operations. PSS once leased its parcel from LB&D and now leases its parcel from RFI. In addition to the former LB&D facility property, the LB&D site also includes a limited amount of adjacent City of San Jose property. The adjacent city sidewalk area is defined as soil belonging to the City of San Jose located between the LB&D property fence lines parallel to East Alma Avenue and to South Tenth Street and their respective street pavements. While the former LB&D facility operation did not officially involve the adjacent city sidewalk area, it is likely that contaminated runoff from the LB&D property contaminated soil beneath the sidewalks. Finally, the area above the shallow groundwater plume is also part of the LB&D site, although there is no known surface or shallow soil contamination in this area, except for those portions of the plume that lie under LB&D, RFI, and adjacent city sidewalk area properties. The LB&D and RFI property, and the surrounding area to the south and west are zoned for commercial/industrial use per the City of San Jose Planning Department. The predominant zoning within a 1-mile radius of the LB&D property is commercial/industrial. The residential and recreational district to the north and east of the LB&D property includes Spartan Stadium (San Jose State University [SJSU] football stadium), San Jose Municipal Stadium (City of San Jose), and SJSU recreation fields. The City of San Jose intends to maintain and further develop the recreational uses of land to the north and east of the LB&D site. The closest residence to the LB&D property is the SJSU student housing on South Tenth Street, located approximately 700 feet north. Single family residential houses are located 1,100 feet north of the LB&D property. Less than 3,000 people are estimated to live within a 1-mile radius of the LB&D property. Currently, the groundwater is being extracted from a series of extraction wells located both on and off the Site. The extracted groundwater is pumped to an on-Site treatment facility. At the treatment facility the contaminated groundwater is first treated in an ultra violet/oxidation unit ("UV/Ox"). The UV/Ox unit subjects the groundwater to ultra violet light and oxidizing chemicals (ozone) which converts volatile organic compounds ("VOCs") in the contaminated groundwater into less toxic compounds. However, due to a lack of efficiency of the UV/Ox system in destroying several of the organic contaminants, the contaminated groundwater is then filtered through a series of granular activated carbon ("GAC") filters, and treated to levels below allowable discharge limits. The treated groundwater is then discharged to a local storm sewer. Concentrations of organic contaminants at the Site have generally decreased since commencement of the groundwater treatment system in 1992. Based on the reductions in the concentrations of organic contaminants in the groundwater being extracted at the Site, and the inefficiency of the UV/Ox unit in its ability to reduce these organic contaminants to the discharge limits, the potentially responsible parties ("PRPs") implementing the groundwater remediation program have requested that EPA approve a change to the current treatment system involving the removal of the UV/Ox treatment unit from the approved treatment program. The revised treatment system would consist of subjecting the contaminated groundwater to the GAC filters, exclusively. From 1947 to 1987, an operation existed at the Site wherein drums would be received onsite and rinsed and/or reconditioned. The drums often contained substances such as organic solvents, pesticides, acids, bases,

oxidizers, and oils. Many of the substances were discharged to a drainage ditch and on-site sumps, eventually making their way to a nearby creek. Site investigations indicated that on-site operations resulted in organic and inorganic contamination of the local shallow groundwater. These contaminants included trichloroethene (TCE), trichloroethane (TCA), tetrachloroethene (PCE), dichloroethene (DCE), dichloroethane (DCA), vinyl chloride, and others. In September 1988, the OU-2 Record of Decision (ROD) was signed by EPA. Subsequently, in 1990, a group of PRPs for the Site agreed to implement the remedy selected in the OU-2 ROD. This agreement was memorialized in a Partial Consent Decree between the United States and the PRPs. The Partial Consent Decree was approved by the Northern District of California on July 6, 1990 (Civil No. C 90 0488 EFL). This ESD addresses differences to the remedy selected under the OU-2 ROD. The OU-2 ROD addressed an Expedited Response Action (ERA)/Operable Unit for treatment of the contaminated shallow groundwater. The remedy selected in the OU-2 ROD addressed the principal near-term threats to groundwater in the Site vicinity. The threat of contamination of the deep drinking water aquifer and nearby surface water bodies was addressed by extracting the contaminated shallow groundwater and treating it to action levels prescribed by the Applicable or Relevant and Appropriate Requirements (ARARs). The major components of the shallow groundwater remedy chosen in the OU-2 ROD included: -construction and operation of a groundwater extraction system to intercept several shallow groundwater plumes; -construction and operation of a groundwater treatment system; and -disposal of treated groundwater to the storm sewer, which flows to Coyote Creek. The selected groundwater treatment system included a commercially available packaged ultra violet light/ozone system to destroy VOCs. If necessary, an ion exchange column would be added to remove nickel. Treatability studies of the UV/Ox unit conducted at the Site in August 1988 determined that a GAC polishing unit was not necessary in order to meet the cleanup standards. However, startup operations of the UV/Ox unit following signing of the OU-2 ROD in September of 1988 indicated that the GAC polishing process was needed in order to meet the cleanup standards, and became part of the groundwater treatment system. The ion exchange column was found not to be necessary. An Explanation of Significant Differences for Operable Unit 02 of the Lorentz Barrel & Drum Company Site was completed in April 1998.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

File Location: Not reported
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents
Site History: No Water Board oversight of cleanup at this site. This case is included in Geotracker because the site is covered by the Water Boards NPDES general permits for discharges from pump and treat systems to surface waters (one each for fuels- and VOC-impacted sites). This can happen for two reasons: (i) the site is overseen by another agency (e.g., USEPA or DTSC) and needs coverage under one of the NPDES general permits or (ii) construction dewatering in an area of groundwater contamination necessitates NPDES general permit coverage. Including this case in Geotracker helps staff to receive

Completed Info:

Completed Area Name: Newark Group property

Completed Sub Area Name: Not reported

Completed Document Type: Consent Settlement - Administrative

Completed Date: 04/22/2005

Comments: Consent Order signed. The Newark Group agreed to pay response costs incurred by DTSC and to abide by the terms of the site deed restriction.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)

Completed Date: 02/23/1987

Comments: DTSC issued RAO for soil and groundwater contamination resulting from drum reconditioning business.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Consent Order

Completed Date: 01/27/2004

Comments: Consent decree signed to recover DTSC response costs from the primary large quantity generators.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Consent Decree

Completed Date: 05/23/1995

Comments: Administrative order on consent signed for de minimis settlement. The settlement pertains to 89 parties, each contributing less than 1% of the drums recycled at the facility.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Consent Decree

Completed Date: 09/23/1996

Comments: Administrative consent order signed for the 2nd round of cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported

Completed Document Type: Consent Decree

Completed Date: 09/16/1997

Comments: Administrative consent order signed for the 3rd round of the cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: 10th Street Land Management property

Completed Sub Area Name: Not reported

Completed Document Type: Consent Order

Completed Date: 01/23/2002

Comments: DTSC signed Prospective Purchaser Agreement with 10th Street Land Management. Property will be used as a long-term storage yard for commercial and construction vehicles. Settling respondent to maintain site cap and enter into a land use covenant.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on 10th Street Land Management property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision - Amendment
Completed Date: 03/10/1998
Comments: US EPA approved a ROD amendment for groundwater treatment process.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 05/21/1998
Comments: US-EPA approved an ESD for soil remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/28/1998
Comments: Preliminary close-out report finalized. Report documents completion of construction activities for OU1 and OU2. Remaining response consists of operation and maintenance of groundwater treatment system, soil vapor extraction system, and cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Cap design completed. Design calls for 229,000 square feet of 3" asphalt concrete pavement with 6" layer of aggregate base.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Remedial design report approved. Report outlines plans for design, installation, and O&M of SVE system and asphalt cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/30/1994
Comments: EPA completed 3 separate removal actions: (1) Removal of 5 buildings and the process equipment and scrap within including 17 sumps, 7 tanks and several debris stockpiled. At the end of this RA, 1033 tons of industrial wastes, 15 tons of liquid hazardous was and 73 tons of solid hazardous waste was shipped off-site for disposal. (2) Removal

Completed Document Type: Removal Action Completion Report
Completed Date: 03/30/1988
Comments: Implemented an Expedited Response Action (ERA). The ERA consisted of the following activities: drum inventory; construction of decontamination facilities; removal of polychlorinated biphenyl (PCB) contaminated pits, which were later backfilled with clean soil and capped; removal, recycling, or treatment of thousands of gallons of processed plant liquids; removal of 15 tons of contaminated scrap; and design of a surface water control plan, which was submitted to EPA for implementation. EPA installed a chip seal over approximately two thirds of the five-acre site. Demobilization occurred at the end of March 1988. A total of 21,286 drums, 1,330 tons of scrap metal, and 2,982 cubic yards of contaminated soil were removed from the site. Not reported

Comments: Preliminary Site Assessment completed. Report summarizes site characteristics, site history, known soil and groundwater conditions, hydrogeology, surface hydrology, and risks to nearby receptors.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 06/19/1992
Comments: Six addenda to the Remedial Investigation include: report of monitoring well installations in Zone B, C, and D aquifers; results of shallow soil investigation on Recycled Fibers, Inc. property; update to the risk assessment for soils; results of the investigation of four conduits near the leading edge of the plume; results of soil sampling; results of installation and sampling of a monitoring well in the Zone C aquifer.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 08/01/2006
Comments: Soil investigation concluded that pesticides, PCE, TCE, and metals including arsenic were present in soil, however, all contaminants were present at concentrations below human health screening levels (or established background). The proposed design for the repairs includes removal of 1,424 square feet of concrete and asphalt, replacement of the cap in these areas with slab and AC over 12" of aggregate, and sealing of 4,000 linear feet of less severe cracks with joint sealant.

Completed Area Name: Shallow Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 12/27/2007
Comments: 2007 GW monitoring report reviewed by DTSC and found to be adequate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/21/2010
Comments: DTSC reviewed the 5-year report and did not have any comments and concurs with the USEPA recommendations in the report and the finding that the selected remedy continues to be protective in the short-term. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 07/30/2010
Comments: DTSC have reviewed the shallow groundwater treatment monitoring report and has no comments. This is a USEPA and WaterBoard lead site. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Workplan
Completed Date: 12/19/2011
Comments: The USEPA has approved the feasibility study workplan for Lorentz

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline

Site History:
Based on information provided in the May 15, 2009, Quarterly Report #45, 2nd Quarter 2009 Discharge of Treated Groundwater to Storm Drain prepared by Western Geo-Engineers for the groundwater extraction and treatment system at the site; groundwater extraction commenced at the site in 1991, approximately 4 million gallons of groundwater have been treated, and approximately 37 gallons of TPHg have been removed. However, the system was shut down on May 7, 2009, due to the relatively low petroleum hydrocarbon mass removal rate; deactivation of the system was approved by SCCDEH in an April 21, 2009 letter. Groundwater sampling procedures consist of initially measuring and documenting the water level in the well and checking the well for the presence of separate-phase hydrocarbon (SPH) using an oil/water interface probe or a clear Teflon bailer. If the well did not contain SPH, it was purged a minimum of three casing volumes or until dry. During purging, well stabilization parameters (temperature, pH, and electrical conductivity) were monitored and recorded. After 80% recovery of the water level, groundwater samples were collected with a new disposable polyethylene bailer or pre-cleaned reusable Teflon bailer and placed into the appropriate EPA-approved containers. Reusable sampling equipment was cleaned with trisodium phosphate solution and clean water between uses. The samples were labeled, logged onto chain-of-custody documents, and transported on ice to the laboratory using appropriate chain-of-custody documentation. Groundwater samples were submitted to a California state-certified laboratory, and analyzed for TPHg, benzene, toluene, ethylbenzene, xylenes (collectively BTEX), methyl tertiary butyl ether, and tertiary butanol EPA Method 8260B. The results of the current

monitoring event indicate that since shut down of the groundwater extraction and treatment system, dissolved concentrations of petroleum hydrocarbons, MtBE and TBA remain relatively stable and/or within historic ranges, except at wells MW07 and MW08. Continued evaluation of the concentrations will be conducted during ensuing monitoring events; the next event is scheduled for the second half of 2011.

implement a revised corrective action plan to cleanup the remaining contamination, and requires the responsible parties to comply with the Site monitoring requirements. Several remedial investigations to delineate this contamination have occurred between 1986 and 2006. Twenty groundwater monitoring wells have been installed at the Site. Quarterly groundwater monitoring has been performed since 1999. Soil samples collected during Site investigations contained the following maximum concentrations: 5,900 milligrams per kilogram (mg/kg) Total Petroleum Hydrocarbons as diesel (TPH-d), 4,600 mg/kg Total Petroleum Hydrocarbons as gasoline (TPH-g), 70 mg/kg Methyl-tert butyl ether (MtBE), and 13 mg/kg benzene. Soil samples collected during a Site investigation conducted in January/February 2006 contained the following maximum concentrations: 3,300 mg/kg TPH-g, 1.2 mg/kg benzene, 12 mg/kg MtBE, and 3 mg/kg tertiary butyl alcohol (TBA). Groundwater samples collected during Site investigations contained the following maximum concentrations: 560,000 micrograms per kilogram (g/l) TPH-d; 440,000 g/l MtBE; 250,000 g/l TPH-g; 26,000 g/l benzene; 27 g/l TBA, and; 5.9 g/l tertiary amyl methyl ether. Groundwater samples recently collected at the Site during the first quarter 2008 monitoring event contained the following maximum concentrations: 28,000 g/l TBA, 15,000 g/l TPH-g, 13,000 g/l MtBE, 3,100 g/l benzene and 1,200 g/l TPH-d. One 12,000-gallon and two 10,000-gallon gasoline USTs and two 10,000-gallon and one 2,000-gallon diesel UST, and associated piping and dispensers were removed and replaced at the Site in September/October 1997. A groundwater extraction and treatment system has operated sporadically at the Site since December 2002. The system consists of four shallow extraction wells with granular activated carbon treatment. A total of 1,165,000 gallons of groundwater were treated as of February 2008. Approximately 40 pounds of gasoline were removed by groundwater extraction. A SVE system was installed at the Site and operated sporadically from May 2006 to December 2007. An internal combustion engine extracted and treated hydrocarbon contaminated vapor from four groundwater monitoring wells and six vapor extraction wells. However, to date, corrective efforts have not resulted in reducing the residual contamination to acceptable levels. Accurate hydrocarbon mass removal estimation is not possible due to incomplete record keeping. Soil and groundwater remediation has not been completed at the Site. Additional soil and groundwater remediation is needed to meet cleanup standards. Regional Water Board Order No. R2-2009-0054 rescinds Site Cleanup Requirements Order No. R2-2008-0093. The case was transferred to the Santa Clara County Department of Environmental Health since the Dischargers were complying with Regional Water Board requirements.

CA WDS:

Facility ID: San Francisco Bay 438610001
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG912002 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 4082971500
Facility Contact: Lawrence Koo (enviro)
Agency Name: PETES STOP
Agency Address: 290 Keyes Street
Agency City,St,Zip: San Jose 95112
Agency Contact: Cuong Chon Huynh
Agency Telephone: 4089955542
Agency Type: Private
SIC Code: 0
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Status Date: 06/17/2013
Lead Agency: SANTA CLARA COUNTY LOP
Case Worker: LL
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
LOC Case Number: 07S1E16M07f
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Trichloroethylene (TCE), Gasoline
Site History: In 2002, a Phase I Assessment was completed and identified a 1,000-gallon gasoline UST that had been filled with sand slurry in 1985. The site was formerly used for fiberglass manufacturing associated with a pool company. A subsurface investigation was conducted in the area of the UST in 2002 and reported TPHg of up to 1,000 ppm in soil and 300,000 ppb in groundwater. In 2003, the UST was removed and a monitoring well was installed. Additional wells were installed between 2003 and 2004. Between 2004 and 2005, approximately 1,500 tons of soil were removed from the site. The soil excavation activities were conducted prior to the planned re-development of the site. The site has been re-developed with multi-residential structure. Dual Phase Extraction commenced in March 2006 and continued through July 2009. A new consultant has been retained and they are trying to bring the remediation system back online. TCE was detected in soil and groundwater at the site, but not investigated in association with the release from the UST. The TCE may be present from the former pool construction company that was located onsite.

Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: 14-662
LOC Case Number: 07S1E09N01f
File Location: Stored electronically as an E-file
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: Investigation at this site began in April 1986, when gasoline-contaminated soil and groundwater were sampled by Soil Tech Engineering (STE) while installing three monitoring wells in the vicinity of the former fuel tank area. Four underground tanks were removed from the site in January 1992, and soil samples from beneath the tanks confirmed that they were the source of the gasoline contamination. A soil gas survey in June of that year provided further evidence of underground contamination. The next phase of investigation took place in March 1993. STE drilled eleven soil borings and detected gasoline in five of eleven samples collected at a depth of 15 feet. STE later excavated and disposed of 100 yards of this contaminated soil. Four additional monitoring wells were drilled in December 1996 and January 1997. STE prepared a Corrective Action Plan in August 2003. Data collected during January and February 2002 were used to examine the feasibility of using soil vapor extraction, groundwater extraction, and other potential technologies to mitigate the contamination. However, because the extent of the contamination problem was not fully defined, no corrective action has been implemented. Enviro Soil Tech Consultants (ESTC) extended the investigation beyond the property boundaries beginning in October 2002, when thirty-two (32) additional borings were drilled. The borings confirmed that very elevated concentrations of gasoline were present in groundwater north of the site along the east side of 10th Street, and wells were installed in August 2006 to monitor this contamination and better define its extent. In the third quarter of 2006, ESTC recommended moving forward with site remediation, and suggested that air sparging be tested to determine its potential in cleaning up the groundwater. The regulatory agency approved that recommendation in early 2008.

Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: 14-225
LOC Case Number: 07S1E17G02f
File Location: Stored electronically as an E-file
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The first soil borings were drilled onsite in may 1993. 5 soil borings (B1 through B5) were drilled near the former dispenser islands, gasoline USTs and the "unknown featur" at the reas of the building. Petroleum hydrocarbons were detected in both soil and groundwter samples from the soil borings. In August 1994, 7 additional soil borings (SB1 through SB7) were advanced onsite. 4 were completed as groundwater monitoring wells (MW1 through MW4). TPHg was reported in groundwater from well MW1 at 50,000 ppb. In July 1999, 9 geoprobe borings (GP1 through GP9) were advanced for the collection of soil and groundwater samples. In December 2000, 4 wells (MW5 through MW8) were installed on and offsite. In October 2004, a two-phase extraction system (TPET) was installed at the site. In the fourth quarter 2008, the TPET system was replaced with a new dual-phase extraction and treatment (DPET) system. Remediation and monitoring are ongoing.

CA WDS:

Facility ID: San Francisco Bay 438620001
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG912002 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 9169793862
Facility Contact: Garrett Turner (SAIC)
Agency Name: CHEVRONTEXACO
Agency Address: P.O. Box 6012
Agency City,St,Zip: San Ramon 94583
Agency Contact: Mark Lafferty Project Manager
Agency Telephone: 9258428953
Agency Type: Private
SIC Code: 5541
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Reponsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: This site has been proposed for listing on the NPL. At this time, DHS believes that the responsible parties will be unable to pay for the cleanup. Therefore, it is expected that EPA will fund 90 percent of the final remedial action and DHS will be required to fund the remaining 10 percent.
Site Description: Located one block from Kelly Park, this facility had been operating as a drum collecting, reconditioning and resale business between 1946 and 1987. Drums, formerly containing solvents, pesticides and other materials from numerous sources were cleaned, recoated and sold for reuse.
Hazardous Waste Desc: Chlorinated organic solvents, polychlorinated biphenyls and vinyl chloride have been detected in the ground water and surface water. Approximately 5,000 cubic yards of contaminated soils containing hazardous concentration of heavy metals (copper, nickel, lead, zinc, chromium, cadmium) and pesticides (DDT, DDD and DDE) are still present.
Threat To Public Health & Env: The primary threats to the public health and environment are exposure to contaminated ground water, contaminated surface water runoff, contaminated airborne dust, and exposure and direct contact with contaminated soil. Three public water supply systems are within 2,000 feet of the contamination.
Site Activity Status: RI/FS work plan prepared by DHS have been turned over to EPA for implementaion. DHS implemented expedited response actions (ERAs) at a cost of \$4 million. The ERAs included construction of decontamination facilities; removal of 24,615 steel drums and 2,000 polyethylene drums, several budles of containers marked radioactive, contaminated debris and 4 tons of scrap metal. The hot spot ERA removed was 4,500 cubic yards of contaminated soil. In addition, EPA and DHS disposed of 2,100 drums containing hazardous waste liquids. The DHS surface water control plan and site cap was implemented by EPA's Emergency Response Team. As of December 1987, EPA agreed to accept lead responsibility for long term site cleanup. The imminent and substantial endangerment posed by the Lorentz site was completely abated by DHS. EPA is currently proceeding with treatment of the shallow ground water. Long term remediation will be done by EPA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 04/08/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 02/28/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 06/09/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/11/2014
Number of Days to Update: 151	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 03/10/2014
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/23/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/01/2013	Telephone: 202-267-2180
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/04/2014
Number of Days to Update: 66	Next Scheduled EDR Contact: 07/14/2014
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 05/05/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 05/06/2014	Telephone: 916-323-3400
Date Made Active in Reports: 05/19/2014	Last EDR Contact: 05/06/2014
Number of Days to Update: 13	Next Scheduled EDR Contact: 08/18/2014
	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 05/05/2014

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/10/2013	Telephone: 202-307-1000
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 03/04/2014
Number of Days to Update: 65	Next Scheduled EDR Contact: 06/16/2014

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Next Scheduled EDR Contact: 06/23/2014
Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Date Data Arrived at EDR: 07/03/1995
Date Made Active in Reports: 08/07/1995

Last EDR Contact: 06/02/2008
Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/01/2013

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 06/30/2013	Source: Environmental Protection Agency

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
SANTA CLARA, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06085C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
SAN JOSE WEST

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SE
Site Name:	Lorentz Barrel & Drum Co
Site EPA ID Number:	CAD029295706
Groundwater Flow Direction:	North-Northeast
Measured Depth to Water:	25 feet to 40 feet.
Hydraulic Connection:	Aquitards separate the aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Facility Site Plan/Storage Map (Hazardous Materials Business Plan Module)

Site Address: _____

Date Map Drawn: ____/____/____

Map Scale: _____

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CER

All facilities which handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities which generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan which meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials which could threaten human health and/or the environment. At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plans:

a. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply):

☐ Bells; ☐ Horns/Sirens; ☒ Verbal (i.e. shouting); ☒ Other (specify) Intercom

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing which shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance Phone No. 911
State Office of Emergency Services Phone No. (800) 852-7550

b. Post-Incident Contacts*:

Bay Area Air Quality Management District Phone No. (415) 771-6000
Regional Water Quality Control Board Phone No. (510) 286-1255

* These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.

c. Emergency Resources:

Poison Control Center San Jose Hospital Phone No. (800) 876-4766
Nearest Hospital: Name: San Jose Hospital Phone No.: (408) 998-3212
Address: 625 East Santa Clara St. City: San Jose CA 95112

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

Emergency Response/Contingency Plan

6. Emergency Equipment:

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State License Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially effect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

HAZARDOUS MATERIAL PLAN CHECK

April 16, 2003

Closure Location: 295 E. Virginia Street
Facility Name: Amerigas Propane
Plan Date: 04/02/03
Applicant: Amerigas Propane
Type of Work: Aboveground Tank Removal (1)

The plans were reviewed and APPROVED with the following conditions:

Note: 1,000 gallon propane tank and dispenser were removed on 03/27/03 without an inspection from the San Jose Fire Department. Contractor has been notified that to install, remove, or alter a LP-gas tank over 125 gallons and associated piping systems requires a permit and inspection from the San Jose Fire Department prior to removal or prior to placing tank and/or associated piping into service. I spoke with the service manager of Amerigas, Mr. David Aten, on 4/16/03 who stated that Amerigas just recently became aware of the need to obtain permits to remove LP-gas tanks. (Section 2.050 of Resolution No. 71036)

Given the circumstances associated with this project, no inspection is required by the San Jose Fire Department for this project only.

If you have any questions regarding this project, please contact Inspector Mike Randolph at (408) 277-8744.
(Mike Randolph)

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

Page ____ of ____

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made (see section 3, below).

1. Evacuation Plan:

- a. The following alarm signal(s) will be used to begin evacuation of the facility (check all that apply):

☐ Bells; ☐ Horns/Sirens; ☐ Verbal (i.e., shouting); ☐ Other (specify) _____

- b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance _____ Phone No.: 911
California Emergency Management Agency _____ Phone No.: (800) 852-7550

b. Post-Incident Contacts:*

Santa Clara County CUPA _____ Phone No.: (408) 918-3400
Local Hazardous Materials Program _____ Phone No.: (408) 918-3400
California Department of Toxic Substances Control (DTSC) _____ Phone No.: (510) 540-3739
Cal/OSHA Division of Occupational Safety and Health _____ Phone No.: (510) 794-2521
Air Quality Management District _____ Phone No.: (415) 771-6000
Regional Water Quality Control Board _____ Phone No.: ()

* Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.

c. Emergency Resources:

Poison Control Center* _____ Phone No.: (800) 876-4766
Nearest Hospital: Name: _____ Phone No.: ()
Address: _____ City: _____

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:**Emergency Coordinator Responsibilities:**

- a. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the emergency coordinator (*or his/her designee when the emergency coordinator is on call*) shall:
 - i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
 - ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects (*e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.*).
 - iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
 - iv. Notify appropriate local authorities (*i.e., call 911*).
 - v. Notify the California Emergency Management Agency at (800) 852-7550.
 - vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
 - vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.
- b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
 - i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility.
 - ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
 - iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
 - iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

- a. Name, address, and telephone number of the facility's owner/operator;
- b. Name, address, and telephone number of the facility;
- c. Date, time, and type of incident (*e.g., fire, explosion, etc.*);
- d. Name and quantity of material(s) involved;
- e. The extent of injuries, if any;
- f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
- g. Estimated quantity and disposition of recovered material that resulted from the incident;
- h. Cause(es) of the incident;
- i. Actions taken in response to the incident;
- j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators

Employee Training Plan (Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

Page ____ of ____

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. [Note: Items marked with an asterisk (*) are required.]:

1. Personnel are trained in the following procedures:

☒	Internal alarm/notification *	
☒	Evacuation/re-entry procedures & assembly point locations*	
☐	Emergency incident reporting	
☐	External emergency response organization notification	
☐	Location(s) and contents of Emergency Response/Contingency Plan	
☐	Facility evacuation drills, that are conducted at least (specify):	(e.g., "Quarterly", etc.)

2. Chemical Handlers are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *	
☐	Location(s) and proper use of fire and spill control equipment	
☐	Spill procedures/emergency procedures	
☒	Proper use of personal protective equipment *	
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure (i.e., inhalation, ingestion, absorption) *	
☐	Hazardous Waste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.) *	

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures	
☐	Shutdown of operations	
☐	Liaison with responding agencies	
☐	Use, maintenance, and replacement of emergency response equipment	
☐	Refresher training, which is provided at least annually *	
☐	Emergency response drills, which are conducted at least (specify):	(e.g., "Quarterly", etc.)

Facility Site Plan and Storage Map Instructions

(Hazardous Materials Business Plan Module)

A Site Plan (public document) and Storage Map (confidential document) must be included with your HMBP. For relatively small facilities, these documents may be combined into one drawing. However, if combined, the combined Site Plan/Storage Map will become a public document. If you are concerned about displaying the storage locations of hazardous materials to the public, you must provide a separate facility Storage Map. Since these drawings are intended for use in emergency response situations, larger facilities (*generally those with complex and/or multiple buildings*) should provide an overall site plan and a separate storage map for each building/storage area. A blank Facility Site Plan/Storage Map sheet has been provided on the following page. You may complete that page or attach any other drawing(s) that contain(s) the information required below:

1. **Site Plan (public document):** This drawing shall contain, at a minimum, the following information:
 - a. An indication of North Direction;
 - b. Approximate scale (*e.g.*, "1 inch = 10 feet");
 - c. Date the map was drawn;
 - d. All streets bordering the facility;
 - e. Locations of all buildings and other structures;
 - f. Parking lots and internal roads;
 - g. Hazardous materials loading/unloading areas;
 - h. Outside hazardous materials storage or use areas;
 - i. Storm drain and sanitary sewer drain inlets;
 - j. Wells for monitoring of underground tank systems;
 - k. Primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas.

2. **Storage Map (confidential):** The map(s) shall contain, at a minimum, the following information:
 - a. General purpose of each section/area within each building (*e.g.*, "Office Area", "Manufacturing Area", *etc.*);
 - b. Location of each hazardous material/waste storage, dispensing, use, or handling area (*e.g.*, *individual underground tanks, aboveground tanks, storage rooms, paint booths, etc.*). Each area shall be identifiable by a Grid Number, to be used in item 204 on the Hazardous Materials Inventory - Chemical Description pages of the Business Plan;
 - c. For tanks, the capacity limit in gallons and common name of the hazardous material contained in each tank;
 - d. Entrances to and exits from each building and hazardous material/waste room/area;
 - e. Location of each utility emergency shut-off point (*i.e.*, *gas, water, electric.*);
 - f. Location of each monitoring system control panel (*e.g.*, *underground tank monitoring, toxic gas monitoring, etc.*).

Subject: RE: Request to Conduct File Review: 295 East Virginia Street, San Jose, California 95112
Attachments: UST Solvent Lead Agencies 2013 update.doc

Dear Hagop Tatian,

Thank you for inquiring about UST/Solvent Case files. The Santa Clara Valley Water District is no longer the lead agency for solvent and underground storage tank contamination files.

We do provide some files at: <http://www.valleywater.org/Services/FuelLeaksAndSolvents.aspx> ; however, please note that these files may be incomplete and not kept up to date. For the official records you will need to contact the appropriate regulatory agencies listed in the attached file. Please bookmark these websites for your future reference.

Please let me know if you are inquiring about any other type of information that you are seeking for this address. If you have any questions, contact me or any of the records management staff at PublicRecords@valleywater.org or call us at the phone numbers provided below.

Sincerely,

Santa Clara Valley
Water District

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

HAZARDOUS MATERIAL PLAN CHECK

April 16, 2003

Closure Location: 295 E. Virginia Street
Facility Name: Amerigas Propane
Plan Date: 04/02/03
Applicant: Amerigas Propane
Type of Work: Aboveground Tank Removal (1)

The plans were reviewed and APPROVED with the following conditions:

Note: 1,000 gallon propane tank and dispenser were removed on 03/27/03 without an inspection from the San Jose Fire Department. Contractor has been notified that to install, remove, or alter a LP-gas tank over 125 gallons and associated piping systems requires a permit and inspection from the San Jose Fire Department **prior to removal or prior to placing tank and/or associated piping into service.** I spoke with the service manager of Amerigas, Mr. David Aten, on 4/16/03 who stated that Amerigas just recently became aware of the need to obtain permits to remove LP-gas tanks.(Section 2.050 of Resolution No. 71036)

Given the circumstances associated with this project, no inspection is required by the San Jose Fire Department for this project only.

If you have any questions regarding this project, please contact Inspector Mike
Randolph at (408) 277-8744.
(Mike Randolph)

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by KCE Matrix were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX E

USER QUESTIONNAIRE

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.
Commercial Property
295 East Virginia Street, San Jose, California 95112

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

1. Environmental cleanup liens that are filed or recorded against the site

Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

☒ No ☐ Yes, please explain _____

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry

Are you aware of any Activity and Use Limitations (AULs), such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☒ No ☐ Yes, please explain _____

3. Specialized knowledge or experience of the person seeking to qualify for the LLP

As the *user* of this *ESA*, do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☒ No ☐ Yes, please explain _____

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*?

☒ Yes ☐ No, there is a difference between the purchase price and the fair market value

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

please explain _____

5. Commonly known or reasonably ascertainable information about the *property*

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the *property*?

☐ No ☒ Yes, please explain Gas station

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

☒ No ☐ Yes, please explain _____

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

☒ No ☐ Yes, please explain _____

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

☒ No ☐ Yes, please explain _____

6. The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation

As the *user* of this *ESA*, based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

☐ No ☐ Yes, please explain _____

Note: Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.

Commercial Property

295 East Virginia Street, San Jose, California 95112

In addition, certain information should be collected, if available, and provided to *KCE Matrix, Inc.* to conduct the Phase I Environmental Site Assessment. This information is intended to assist *KCE Matrix, Inc.* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) The reason why the Phase I Environmental Site Assessment is required,

(b) The type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

Amerigas Gas Station Purchase Transaction

(c) The complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful)

295 E. Virginia Street APN: 972-25-092 (plot map attached)

(d) The scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

(e) Identification of all parties who will rely on the Phase I report,

(f) Identification of the site contact and how the contact can be reached,

Alexis Gevorgian

(g) Any special terms and conditions which must be agreed upon by the *environmental professional*

No

(h) Any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

No

PHASE I ESA - USER QUESTIONNAIRE

KCE Matrix, Inc.
Commercial Property
295 East Virginia Street, San Jose, California 95112

Vapor Encroachment Screening Section

1. Property Type:

☒ Commercial ☐ Industrial ☐ Multi Tenant ☐ Vacant Land

2. Are there any building/structures on the property?

☐ No ☐ Unknown ☒ Yes, type construction Gas Station

3. Will buildings/structures be constructed on the property in the future?

☐ No ☐ Unknown ☒ Yes, type construction mult-family

4. If buildings exist or are proposed, do/will they have elevators?

☐ Yes ☐ No

5. Type of level below grade (existing or proposed)?

☐ Full Basement ☐ Crawl Space ☒ Slab on Grade ☐ Parking Garage ☐ Multi-Level

6. Ventilation in level below grade?

☐ Yes ☐ No ☐ Unknown N/A

7. Sump pumps, floor drains, or trenches (existing or proposed)?

☐ Yes ☐ No ☒ Unknown

8. Radon or methane mitigation system installed?

☐ Yes ☐ No ☒ Unknown

9. Heating system type? (existing or proposed)? (CHECK ALL THAT APPLY) unknown

☐ Hot Air Circulation	☐ Electric Baseboard	☐ Hot Air Radiation	☐ Heat Pump
☐ Hot Water Radiation	☐ Wood Stove	☐ Kerosene Heater	☐ Steam Radiation
☐ Fireplace	☐ Coal Furnace	☐ Radiant Floor Heat	☐ Hot Water Circulation
☐ Fuel Oil Furnace	☐ Gas Furnace	☐ Other	

10. Type of fuel energy? (existing or proposed)? (CHECK ALL THAT APPLY)

☐ Natural Gas	☒ Electric	☐ Propane	☐ Fuel Oil
☐ Kerosene	☐ Wood	☐ Coal	☐ Solar
☐ Other			

11. Have there ever been any environmental problems at the property?

☐ No ☒ Unknown ☐ Yes, describe _____

12. Does/will a gas station or dry cleaner operate anywhere on the property?

☒ Yes ☐ No ☐ Unknown

13. Do any tenants use hazardous chemicals in relatively large quantities on the property?

☐ No ☒ Unknown ☐ Yes, describe _____

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

EXECUTIVE SUMMARY

TARGET PROPERTY INFORMATION

ADDRESS

COMMERCIAL PROPERTY
295 EAST VIRGINIA STREET
SAN JOSE, CA 95112

COORDINATES

Latitude (North):	37.3272 - 37° 19' 37.926636"
Longitude (West):	121.8758 - 121° 52' 32.88391"
Elevation:	101 ft. above sea level

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records.

EXECUTIVE SUMMARY

PHYSICAL SETTING INFORMATION

Flood Zone: Available

NWI Wetlands: Available

AQUIFLOW®

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60

EXECUTIVE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
 Mixed waste (haz. and radioactive): No
 Recycler of hazardous waste: No
 Transporter of hazardous waste: No
 Treater, storer or disposer of HW: No
 Underground injection activity: No
 On-site burner exemption: No
 Furnace exemption: No
 Used oil fuel burner: No
 Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
 Waste code: D018
 Waste name: BENZENE
 Violation Status: No violations found

RECORD SOURCES AND CURRENCY

To maintain currency of the following databases, EDR contacts the appropriate agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

PRP: Potentially Responsible Parties

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A listing of verified Potentially Responsible Parties

Date of Government Version: 04/15/2013

Source: EPA

Number of Days to Update: 72

Telephone: 202-564-6023

Last EDR Contact :07/01/2014

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS

Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

NPL: National Priority List

Standard Environmental Record Source: Federal NPL

Search Distance: 0.333 Mile

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX H

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

ARAM B. KALOUSTIAN, P.E.
Principal

Mr. Aram Kaloustian has diversified experience in environmental, mechanical and civil engineering including indoor air quality surveys for mold and ventilation systems, asbestos and lead-based paint assessments, Phase I environmental surveys, subsurface environmental site assessments, remedial design, remediation system installation and operation, negotiations with regulatory agencies, computer modeling, research of new environmental investigative and remedial technologies, safety engineering and project management.

Mr. Kaloustian has conducted numerous assessments involving indoor air quality, asbestos and lead-based paint surveys and associated remediation projects by establishing investigative protocol, implementing efficient assessment strategies, and applying the site specific and appropriate remedial recommendations to all assessed projects. Mr. Kaloustian has also designed a variety of protocols for remedial and post-remedial monitoring services for a wide variety of project sites.

Mr. Kaloustian has conducted numerous historical and background Phase I investigations involving review of files located at various county health departments, water quality control boards, state departments of health, air quality management districts, city building departments, city departments of public works and city fire departments. These investigations also involved searches of state and federal databases for hazardous waste sites, generators, transporters and treatment/storage/disposal facilities, title searches, aerial photo reviews and visual site inspections.

Mr. Kaloustian has extensive subsurface site assessment experience involving underground storage tanks, exploratory borings and monitoring wells, implementation of monitoring and sampling programs, evaluation of monitoring and sampling data, review of historical site and site vicinity information, agency negotiations, and assessment and remediation recommendations.

Mr. Kaloustian's remedial design experience includes various vapor extraction and groundwater remediation systems for remediation of soil and groundwater impacted by hydrocarbon contamination. Mr. Kaloustian has designed and implemented vapor extraction treatment systems that have included internal combustion engines, catalytic thermal oxidizers and carbon adsorption. Groundwater treatment systems have included spray aeration tanks, carbon adsorption and air strippers.

Regulatory compliance experience includes obtaining permits for removal of underground storage tanks, drilling exploratory borings, installation of monitoring wells, and installation of vapor extraction treatment systems and groundwater treatment systems. This has required working with local county health departments, city departments of public works, city fire

departments, air quality management districts, a number of publicly owned treatment works and the California Regional Water Quality Control Board.

Mr. Kaloustian has also constructed and evaluated various computer models for site assessment and remediation including models used to evaluate the vacuum influence of vapor extraction systems, the radius of influence of groundwater extraction, fate and transport analysis of contaminant's, and aquifer test data.

Mr. Kaloustian has also participated and has been the lead engineer in the research and development of new investigative and remedial techniques involving indoor air quality, horizontal drilling; and treatment of contaminated soil and sludge materials using remedial surfactants, bioremediation, soil washing, encapsulation and modified oxidation. Additional research experience includes participation in the South Coast Air Quality Survey in 1987 for research involving atmospheric chemistry.

Throughout the years, Mr. Kaloustian has also maintained certification and continuing education for Hazardous Waste Operations and Emergency Response (29CFR1910.120) and supervisory training; and has developed site specific health and safety plans for site assessment and remediation. Mr. Kaloustian has also been responsible for the development and implementation of a safety procedures manual for environmental assessment and remediation firms.
