RE: City of San Jose 711 Project, Santa Clara County

Dear Mr. Galvan:

I am writing to you regarding a project located in the City of San Jose, California. The project entails development 3,000 square foot convenience store, a fuel canopy with four (4) fuel dispensers and three (3) new underground fuel tanks on a 0.47 acre site located at 6211 Santa Teresa Boulevard in San Jose, California. The project would require the demolition of existing structures on the site and removal of the existing underground fuel tanks. The project lies in Township 8 South, Range 1 East and is depicted on the Santa Teresa Hills USGS 7.5' quadrangle in Santa Clara County. On the attached map, the project site is defined by a red line, with dashed lines marking a 1/4-mile radius.

A record search has been completed with negative results. The distance from an available water source indicates a low potential for archaeological resources to be uncovered during construction.

If you have any information regarding cultural resources within the proposed project area, I would appreciate it if you would contact me so that it may be documented appropriately and integrated into project planning. I can be reached by phone at (916) 447-3479 or by email at cgross@analyticalcorp.com.

Thank you,

Charlane Gross. M.A., RPA
Senior Archaeologist
