Replacement Project**

**Water Pollution Control Plant**

***Mission:*** Delivering world class utility services and programs to improve our health, environment, and economy.

The Sanitary Sewer System Capital Improvement Program (CIP) constructs sewer improvement projects that enhance sewer capacity to meet economic development goals and rehabilitates existing sewers to minimize sanitary sewer overflows.

The Storm Sewer System CIP continues a multi-year strategy to replace or rehabilitate pump stations to reduce the risk of local flooding during storm events. The program addresses the drainage needs in residential neighborhoods, business districts, and walking routes to schools and public facilities. Major investments include the development of a city-wide master plan.

The Water Pollution Control Plant (Plant) is a regional advanced wastewater treatment facility that serves the cities of San José, Santa Clara, and Milpitas, as well as the Cupertino Sanitary District, West Valley Sanitation District, County Sanitation Districts 2-3, and Burbank Sanitary District. The Plant is one of the largest tertiary wastewater treatment works in the western United States, serving more than 1.4 million residents and approximately 17,000 businesses. A major master planning effort was completed in late 2013, resulting in Environmental Impact Report certification and formal adoption of a 30-year master plan. The master plan provides the framework for over \$1.0 billion in new construction at the Plant over the next 10 to 15 years, and responds to aging infrastructure, future regulations, population growth, and treatment technology improvements.

The Water Utility System CIP ensures reliable utility infrastructure for the San José Municipal Water System and includes the construction of new facilities, maintenance of existing infrastructure, and improvements to existing facilities.

## Recent Accomplishments

- Sanitary Sewer System CIP:
  - Sanitary Sewer Condition Assessment 2013 East and West - inspected and assessed 125 miles of pipes (completed in Feb. 2014)
- Storm Sewer System CIP:
  - Citywide Storm Sewer Inlet and Lateral Replacement – replaced and upsized inlets and laterals at 35 locations throughout the City (completed in Sept. 2013)
  - Gateway Pump Station – rehabilitated and upgraded the electrical and mechanical systems (completed in Feb. 2014)
- Water Pollution Control CIP:
  - Program Management Services – awarded a multi-year consultant agreement to assist with program validation, prioritization, and start-up (awarded in Sept. 2013)
  - Street Rehabilitation-Phase Two – replaced curbs, gutters, sidewalks, driveways, and pavement on Main Street, from A Street to C Street (completed in Oct. 2013)
- Water Utility System CIP:
  - Dove Road Main Extension – connected two water systems to increase reliability and redundancy (completed in Dec. 2013)

## Program Highlights

### Sanitary Sewer System Capital Program

2015-2019 Adopted CIP: \$205.1 million

#### Sanitary Sewer Rehabilitation Projects:

- Sanitary Sewer Condition Assessment Repairs
- Spreckles Sanitary Sewer Pump Station and Force Main

#### Sanitary Sewer Interceptor/Capacity Improvement Projects:

- 60-inch Brick Interceptor - Phase VIA and VIB
- Almaden Expressway Sanitary Sewer Improvements

### Storm Sewer System Capital Program

2015-2019 Adopted CIP: \$61.8 million

- Storm Sewer Master Plan City-wide
- Large Trash Capture Devices
- Willow Glen – Guadalupe, Phase III

### Water Pollution Control Capital Program

2015-2019 Adopted CIP: \$926.3 million

#### Preliminary Wastewater Treatment:

- Headworks Improvements
- New Headworks

#### Primary Wastewater Treatment:

- Iron Salt Feed Station

#### Biosolids:

- Digester and Thickener Facilities Upgrade

#### Electrical Systems and Power Generation:

- Emergency Diesel Generators
- Cogeneration Facility
- Plant Electrical Reliability

### Water Utility System Capital Program

2015-2019 Adopted CIP: \$26.0 million

- Cadwallader Reservoir Rehabilitation
- North San José Water Well Evaluation and Rehabilitation
- Gumdrop Drive Main Replacement

---

## CSA OUTCOMES

(Supported by the Capital Programs)

- ✓ Reliable Utility Infrastructure
- ✓ Healthy Streams, Rivers, Marsh and Bay
- ✓ Safe, Reliable and Sufficient Water Supply

## Performance Measures

A set of consistent and comprehensive performance measurements along with targets and goals has been established for the entire capital program and adopted for each individual CSA. Measures focus on schedule (cycle time) and project delivery cost. Please see the Budget Guide section narrative for additional information on capital performance measurements.

### *Outcome: Quality CIP Projects Delivered On-Time and On-Budget*

Strategic Goals	CSA Performance Measures	2012-2013 Actual*	2013-2014 Target	2013-2014 Estimate	2014-2015 Target	5-Year Goal
Environmental and Utility Services CSA delivers quality Capital Improvement Program (CIP) projects on-time and on-budget	1. % of CIP projects delivered** within 2 months of approved baseline schedule	93% (26/28)	85%	82% (18/22)	85%	85%
	2. % of CIP projects that are completed within the approved baseline budget***	83% (19/23)	90%	87% (20/23)	90%	90%

*Changes to Performance Measures from 2013-2014 Adopted Budget: No*

\* The 2012-2013 Actual number of projects may vary from the 2012-2013 Adopted Budget Estimate as a result of the date of the estimated beneficial use of the project being revised and the project expected to be delivered in the following fiscal year. Also, the number of projects may change with the inclusion of projects in the 2012-2013 Actual not originally included in the 2012-2013 Adopted Budget Estimate due to incomplete project information at that time.

\*\* Projects are considered to be "delivered" when they are available for their intended use.

\*\*\* Projects are considered "completed" when final cost accounting has occurred and the project has been accepted. Projects are considered "on budget" when the total expenditures do not exceed 101% of the baseline budget.

In 2013-2014, the Environmental and Utility Services CSA is estimated to deliver 18 of 22 (82%) projects within two months of the approved baseline schedule, which is slightly below the performance target of 85%. Some of the notable capital projects delivered in 2013-2014 include sanitary and storm sewer improvements (Arroyo De Platina, Bird Avenue, Brookwood Terrace, Lincoln/San Carlos, Monterey-Riverside, Phase V, Old Bayshore, and South White Road), the Gateway storm pump station rehabilitation project, the Nortech and Trimble Reservoir Rehabilitation project, and various projects at the Water Pollution Control Plant such as the Chlorine and Sulfur Dioxide Building Decommissioning and Dissolved Air Flotation Dissolution Improvements.

In 2013-2014, an estimated 20 of 23 (87%) of the projects either have been, or are expected to be completed within their baseline budgets, short of the one-year performance target of 90%. A few of the notable capital projects completed in 2013-2014 include the Monterey-Riverside Sanitary Sewer Rehabilitation Phase V, the Gateway East Storm Sewer Improvements, and the Water Pollution Control Plant Street Treatment Phase 2. The CSA continues to work to strengthen the alignment of project scopes, schedules, and budgets, while also accounting for external market conditions that may affect the delivery of capital projects. Staff relies heavily on the cost estimating and tracking tools that are available through the City's Capital Project Management System (CPMS). These tools allow project management staff to effectively track project costs on an ongoing basis and assist in ensuring that expenditures remain within budgeted levels.
