Subject: Phase I Environmental Site Assessment
1665 Alum Rock Avenue
San Jose, California 95116
Partner Project No. 15-145754.1

Dear Mr. Chu:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at 415-992-3755.

Sincerely,

Jay Grenfell
National Client Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by East West Bank for the property located at 1665 Alum Rock Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide East West Bank with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the north side of Alum Rock Avenue, just south of King Road, within a mixed retail and residential area of Santa Clara County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	1665 Alum Rock Avenue, San Jose, California
Additional Address:	1665 ½ Alum Rock Avenue, San Jose, California
Historical Address:	1663-1663 ½ Alum Rock Avenue
Property Use:	Retail/Commercial (used car sales, car smog testing, auto glass repair and tinting)
Land Acreage:	0.54 Acre
Number of Buildings:	Two
Number of Floors:	One
Gross Building Area (SF):	Bldg. 1 - approx. 1,900 sf; Bldg. 2 - approx. 1050 sf
Date of Construction:	Bldg. 1 - prior to 1950 (exact date could not be determined). Bldg. 2 - between 1956 and 1968 (exact date could not be determined).
Assessor's Parcel Number (APN):	481-12-063
Type of Construction:	Wood frame
Current Tenants:	City Motor Sales, Kali Test Only, auto glass tinting
Site Assessment Performed By:	Tim Loeb of Partner
Site Assessment Conducted On:	August 13, 2015

The subject property is developed with two structures that are occupied by three businesses. The main structure is an old single-family home that is occupied by Kali Test Only (smog testing for autos) and the office space for City Motor Sales. The second building at the rear of the subject property is an old structure that was previously occupied by an auto repair business and is now occupied by an auto glass repair and tinting business. The surface area of the subject property not covered by the building footprints is paved with asphalt or concrete.

According to available historical sources, the subject property was undeveloped until the late 1940s; a 1948 aerial photograph depicts a structure on the subject property in the current location of the single-family home that has been converted to office and retail use. The current structure at the northwest end of the subject property first appears in a 1968 aerial photograph. A 1950 Sanborn Map shows an

underground fuel tank (labeled as “gas & oil”) at the front of the subject property nearly adjacent to Alum Rock Avenue, which is further discussed in the Findings segment below. City Directories indicate that the subject property has been occupied by auto sales businesses and an auto smog test business since 1991. Permits issued by the City of San Jose also indicate that auto sales have been conducted on the subject property since 1993.

The immediately surrounding properties consist of a single-family home to the north; a large apartment building and the Amerasian Medical Supply building to the south across Alum Rock Avenue; an old single-family home occupied by The Light of the World church to the northeast; and the West Coast Wheels & Tires building to the southwest.

According to information in an April 3, 2000 Case Closure Summary from the Santa Clara Valley Water District, shallow groundwater in the immediate vicinity of the subject property has been encountered at approximately seven to 12 feet below ground surface (bgs). Flow of shallow groundwater is toward the north-northwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner identified a controlled recognized environmental condition during the course of this assessment. Three subsurface borings are located in the asphalt surface of the subject property. Each boring is capped with a locking metal cover that appears to identify a groundwater monitoring well. According to Helena Tran, the site contact, these are former groundwater monitoring wells that were grouted shut many years ago. Victoria Garcia, with the Santa Clara

Valley Water District Well Program, confirmed that six groundwater monitoring wells were formerly located on the subject property; all six wells were either removed or closed with cement, under a valid well destruction permit issued in 2005.

A Case Closure Summary for the subject property was available on the SCVWD website and was reviewed during this assessment. According to the April 3, 2000 summary, two underground storage tanks were slurried in-place or removed from the subject property in 1987 and 1991, respectively. The Case Closure Summary pertains to Monte's Auto Sales, which was also identified as a "closed" Leaking Underground Storage Tank (LUST) site. The Case Closure Summary shows that residual contamination from petroleum fuel hydrocarbons remained in soil and groundwater under the subject property at the time of closure.

Based on the closure and/or removal of the two tanks and the analytical results presented in the Case Closure Summary, the former underground tanks and residual contamination are considered a controlled recognized environmental condition. There are no known Use Limitations for the subject property. Based on this information, no further action is warranted at this time.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, all observed suspect ACMs and painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Should these materials be replaced or repaired, the identified suspect ACMs and LBP would need to be sampled to confirm the presence or absence of asbestos or lead prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1665 Alum Rock Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further assessment of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 1665 Alum Rock Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

East West Bank engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of East West Bank. Either verbally or in

writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable, which constitutes a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner was unable to determine the subject property use at five-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted a file review request to the San Jose Fire Department, Bureau of Fire Prevention, for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, the fire department has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was partly obstructed due to many parked vehicles.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property is located on the north side of Alum Rock Avenue, just south of King Road, within a mixed retail and residential area of Santa Clara County. The Santa Clara County Assessor identifies the subject property as Assessor Parcel Number (APN) 481-12-063. According to Assessor records, current ownership is vested in Binh Nguyen and Helena Tran (since March 28, 2013).

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently developed with two structures that are occupied by three businesses. The main structure is an old single-family home that is occupied by Kali Test Only (smog testing for autos) and the office space for City Motor Sales. The second building at the rear of the subject property is also an old structure that was previously occupied by an auto repair business and is now occupied by an auto glass repair and tinting business. The surface area of the subject property not covered by the building footprints is paved with asphalt.

The subject property is zoned CP for Commercial Pedestrian development by the City of San Jose.

The subject property was identified as a LUST (Leaking Underground Storage Tank) site, a HIST (Historical) LUST, an RGA LUST, and Historic Cortese site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed retail and residential area of Santa Clara County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: A single-family home is located immediately to the north of the subject property.

South: A large apartment building and the Amerasian Medical Supply building (1668 Alum Rock Avenue) are located adjacent to the south across Alum Rock Avenue.

East: An old single-family home (1675 Alum Rock Avenue) occupied by The Light of the World church is located adjacent to the east-northeast of the subject property.

West: The West Coast Wheels & Tires building (1663 Alum Rock Avenue) is located adjacent to the west-southwest.

No adjacent properties were identified in the regulatory database report discussed in Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *San Jose East, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the

subject property is located at approximately 95 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the north-northwest. The subject property is depicted on the 1980 map in a fully developed urbanized area. No specific structures are shown on the subject property.

A copy of the 1980 topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

The nearest surface water in the vicinity of the subject property is Silver Creek located approximately 1,200 feet east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the San Jose Water Company (SJWC) serves the subject property vicinity. According to a representative of the SJWC, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of San Jose are a combination of surface water from the Santa Cruz Mountains watershed, purchased water from the Santa Clara Valley Water District and groundwater from city-owned deep aquifer wells.

According to information in an April 3, 2000 Case Closure Summary from the Santa Clara Valley Water District, shallow groundwater in the immediate vicinity of the subject property has been encountered at approximately seven to 12 feet below ground surface (bgs). Flow of shallow groundwater is toward the north-northwest.

2.4.3 Geology/Soils

The subject property is situated within the Santa Clara Valley, near the northern boundary of the San Jose Plain Geomorphic Province. Shallow soils under the subject property consist of sandy, clayey soils derived from weathering of parent material in the upland surfaces to the northeast. Deeper soils are likely coarser and contain more gravels and sands. These soil types are likely more than 100 feet thick in the vicinity of the subject property.

Based on information obtained from the United States USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land - Still complex. This soil series consists of sandy, silty loam that formed on alluvial fans of Pleistocene age. The series is well drained.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06085C 0251J, dated February 19, 2004 the subject property appears to be located in Zone X, an area that is outside the 100-year and 500-year flood plains.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1899 -1939	Topo Map, Sanborn Map, Aerial photo	Undeveloped/Raw land
1939-1968	Aerial photos, Sanborn Map	Residential
1968-Present	Aerial photos, Sanborn Map, directories, building department permits	Retail/Commercial (Montes Auto Sales, Cuc Nguyen, Smog N Go, Smog 2 Go, City Motor Sales

According to available historical sources, the subject property was undeveloped until the late 1940s; a 1948 aerial photograph depicts a structure on the subject property in the current location of the single-family home that has been converted to office and retail use. The current structure at the northwest end of the subject property first appears in a 1968 aerial photograph. City Directories indicate that the subject property has been occupied by auto sales businesses and an auto smog test business since 1991. Permits issued by the City of San Jose also indicate that auto sales have been conducted on the subject property since 1993.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on August 17, 2015. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1939	*Scale: 1"= 500'*
Subject Property:	Undeveloped
North:	Undeveloped
South:	Residential across Alum Rock Avenue
East:	Undeveloped
West:	Undeveloped

Date: 1948	*Scale: 1"= 500'*
Subject Property:	Developed with single-family home near the front of the subject property
North:	No significant changes visible
South:	No significant changes visible along the opposite side of Alum Rock Avenue
East:	No significant changes visible
West:	No significant changes visible

Date: 1950	*Scale: 1"= 500'*
Subject Property:	No significant changes visible

West:	No significant changes visible	

Copies of reviewed aerial photographs, except 1993, are included in Appendix B of this report.

3.2 Fire Insurance Maps

The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date: 1915	
Subject Property:	Undeveloped
North:	Single-family home plus a private auto garage
South:	Single-family home plus two small unidentified structures along the opposite side of Alum Rock Avenue
East:	Single-family home plus a private auto garage
West:	Single-family home plus a "tank house"

Date: 1950	
Subject Property:	Single-family home plus small unidentified building along the west boundary. A fuel tank (labeled as "gas and oil") is shown at the front of the subject property near Alum Rock Avenue
North:	Single-family home
South:	Single-family home plus two small unidentified structures
East:	Single-family home
West:	Two buildings labeled as "S" (stores)

Date: 1969	
Subject Property:	A building labeled as "auto repair" is constructed at the northwest end of the subject property. The same building seen on the 1950 map is still located in the south-central part of the subject property. It is now labeled as offices ("Off."). The subject property is also labeled with the term "Auto Sales"
North:	No significant changes from the 1950 map
South:	A large rectangular building labeled as "auto sales" is located adjacent to the south along the opposite side of Alum Rock Avenue
East:	Single-family home
West:	Two buildings labeled as "stores" plus a small office building and a series of small residential units (likely small apartments)

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on August 18, 2015 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 1663 ½, 1665 and 1665 ½ Alum Rock Avenue (Subject Property)	
Year(s)	**Occupant Listed**
1922-1986	Addresses not listed
1991	Montes Auto Sales
1996	Montes Auto Sales
2000	Cuc Nguyen
2008	Smog N Go
2013	Smog 2 Go, City Motor Sales

According to the city directory review, the subject property has been occupied by auto sales companies and vehicle smog check businesses.

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
1991	Apartments (1670 Alum Rock Avenue), Kathy's Store (1663 Alum Rock Avenue)
1996	Apartments (1670 Alum Rock Avenue), Bu Tran (1663 Alum Rock), Amerasian Medical (1668 Alum Rock), Iglesia Del Dios (1675 Alum Rock Avenue)
2000	Apartments (1670 Alum Rock), Lucy Flores (1663 Alum Rock), Amerasian Medical (1668 Alum Rock)), Iglesia Del Dios (1675 Alum Rock)
2006	Apartments (1670 Alum Rock), No listing (1663 Alum Rock), Amerasian Medical (1668 Alum Rock), Iglesia Del Dios (1675 Alum Rock)
2008	Apartments (1670 Alum Rock), Bay Area Rims & Tires (1663 Alum Rock), Amerasian Medical (1668 Alum Rock)
2013	Apartments (1670 Alum Rock), West Coast Wheels & Tires (1663 Alum Rock), Amerasian Medical (1668 Alum Rock), Iglesia Del Dios (1675 Alum Rock)

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on August 17, 2015. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1899	
Subject Property:	Undeveloped raw land
North:	Undeveloped raw land
South:	Undeveloped raw land
East:	Undeveloped raw land
West:	Undeveloped raw land

Date: 1953	
Subject Property:	The subject property is depicted within an urbanized area. No specific features are depicted on the subject property
North:	Within an urbanized area; no specific features depicted on the map
South:	Within an urbanized area; no specific features depicted on the map
East:	Within an urbanized area; no specific features depicted on the map
West:	Within an urbanized area; no specific features depicted on the map

Date: 1961	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted

Date: 1961	
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1968	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1973	
Subject Property:	No significant changes depicted. No specific features depicted on the map.
North:	No significant changes depicted. No specific features depicted on the map.
South:	No significant changes depicted. No specific features depicted on the map.
East:	No significant changes depicted. No specific features depicted on the map.
West:	No significant changes depicted. No specific features depicted on the map.

Date: 1980	
Subject Property:	No significant changes depicted. No specific features depicted on the map.
North:	No significant changes depicted. No specific features depicted on the map.
South:	No significant changes depicted. No specific features depicted on the map.
East:	No significant changes depicted. No specific features depicted on the map.
West:	No significant changes depicted. No specific features depicted on the map.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (Cal EPA)
Point of Contact:	Staff
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(916) 323-2514
Date of Contact:	August 13, 2015
Method of Communication:	Email using agency website
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the California EPA.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Santa Clara County Environmental Health Department
Point of Contact:	Raquel Duenas
Agency Address:	1555 Berger Drive, San Jose, California 95112
Agency Phone Number:	(408) 918-3400
Date of Contact:	August 14, 2015
Method of Communication:	Email using agency website
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the EHD.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	San Jose Fire Department
Point of Contact:	Rosanne Meza
Agency Address:	200 E. Santa Clara Street, San Jose, California
Agency Phone Number:	(408) 535-7750
Date of Contact:	August 14, 2015
Method of Communication:	Email using department website
Summary of Communication:	As of August 28, 2015 Partner has not received a response from the fire department.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Bay Area Air Quality Management District
Point of Contact:	Staff member
Agency Address:	939 Ellis Street, San Francisco, California
Agency Phone Number:	(415) 771-6000

Date of Contact:	August 13, 2015
Method of Communication:	Request sent to the Public Records Portal
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the BAAQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	SF Bay Regional Water Quality Control Board (RWQCB)
Point of Contact:	Melinda Wong
Agency Address:	1515 Clay Street, Oakland, California
Agency Phone Number:	(510) 622-2300
Date of Contact:	August 13, 2015
Method of Communication:	Email to staff using agency website
Summary of Communication:	Partner was referred to the agency's Geotracker website for documents related to contamination cases in San Jose. A LUST file was found for the subject property address on Geotracker. The file pertains to Montes Auto Sales, which is further discussed in applicable sections of this report.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Duty Officer
Agency Address:	1001 I Street, Sacramento, California
Agency Phone Number:	(800) 728-6942
Date of Contact:	August 14, 2015
Method of Communication:	Email using agency website
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	San Jose Building Department
Point of Contact:	Staff
Agency Address:	200 E. Santa Clara St., San Jose, California
Agency Phone Number:	(408) 535-3555
Date of Contact:	August 17, 2015
Method of Communication:	Search of permits using the department website
Summary of Communication:	Permit records were available for review, as listed in the following table.

Building Records Reviewed	
Date	**Description**
1993	Electrical permit (120/240 underground conversion) issued to Montes Auto Sales
2003	Development Review for Retail Vehicle Sales. Zoning verification for Vehicle Dealer's License. Applicant - Jeff Olofsen
2005	Fire Engineering Permit Application - Expired
2005	Site Development Permit to demolish existing structure and build a 6,007 sf commercial building - Helen Tran
2005	Permit for Plumbing Work - Expired
2006	Demo Permit for existing structure. Construction of new 6000 sf retail building - Expired
2006	Permit Application for new construction - Chad Nguyen. Expired
	Property Use Verification for Vehicle Dealers License for City Motor Sales

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	San Jose Planning Department
Point of Contact:	Staff
Agency Address:	200 E. Santa Clara St., San Jose, California
Agency Phone Number:	(408) 535-3555
Date of Contact:	August 17, 2015
Method of Communication:	Department website
Summary of Communication:	The subject property is zoned CP (Commercial Pedestrian) by the City of San Jose.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	Staff
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 323.1886
Date of Contact:	August 17, 2015
Method of Communication:	Review of on-line maps using the agency website
Summary of Communication:	According to the California DOGGR mapping system, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Santa Clara County Assessor
Point of Contact:	Staff Appraiser
Agency Address:	70 W. Hedding Street, San Jose, California
Agency Phone Number:	(408) 299-5500
Date of Contact:	August 20, 2015
Method of Communication:	Phone

Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number 481-12-063. Title to the subject property is currently vested in Binh Nguyen and Helena Tran

4.1.11 Other Agency

Regulatory Agency Data	
Name of Agency:	Santa Clara Valley Water District
Point of Contact:	Victoria Garcia
Agency Address:	5750 Almaden Expressway, San Jose, California
Agency Phone Number:	(408) 265-2607
Date of Contact:	August 13, 2015
Method of Communication:	Phone
Summary of Communication:	Victoria Garcia provided Partner with available information regarding groundwater monitoring wells formerly located on the subject property.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N/A	N/A
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	**Y**	N	N
State/Tribal Registered Storage Tank Sites	0.25	N	N	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
(UST/AST)				
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	1.00	N	N	N
EDR US Hist Auto Station	0.25	N	N	N
EDR US Hist Cleaners	0.25	N	N	N

4.2.2 Subject Property Listings

The subject property is identified as a LUST (Leaking Underground Storage Tank) site, HIST LUST (Santa Clara Valley Water District Historic LUST) site, and a HIST CORTESE site in the regulatory database report, as discussed below:

- The subject property, identified as Montes Auto Sales at 1665 Alum Rock Avenue, had a release of gasoline or diesel fuel hydrocarbons that impacted soil and groundwater (SCVWD ID: 07S1E03M02F dated April 28, 2000). One underground tank was removed and another was closed in place with cement slurry. Over excavation of impacted soil was completed and a groundwater investigation was initiated, which included the installation of six groundwater monitoring wells. After subsurface environmental investigations and groundwater monitoring was completed, the SCVWD issued a Case Closure Summary. The Closure noted that residual fuel hydrocarbons were still located at the subject property, but were expected to diminish over time due to natural biodegradation. The Responsible Parties were identified as John Nguyen and August Fillippi. Based on the removal of the release source and petroleum-impacted soil, analytical data presented in the Case Closure, and the regulatory status, this listing is not expected to present a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties are not identified in the regulatory database report.

4.2.4 Sites of Concern Listings

Based upon regulatory status, distance or location from the subject property, no sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern for the subject property at this time.

4.2.5 Orphan Listings

No orphan listings of potential concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from East West Bank (User of this report).

User Responsibilities

Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire	**X**		**X**	
Title Records, Environmental Liens, and AULs		**X**		
Specialized Knowledge		**X**	**X**	
Actual Knowledge	**X**		**X**	
Valuation Reduction for Environmental Issues		**X**	**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports			**X**	
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

One owner of the subject property since March 28, 2013, identified as Helena Tran, was interviewed at the time of the assessment. Mrs. Tran was unable to provide any useful information regarding history of development or previous uses of the subject property. Mrs. Tran stated that there are no USTs, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Helena Tran, key site manager, indicated that she has no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Mrs. Tran was unable to provide much information regarding history of development or prior uses of the subject property. She stated that the three “groundwater wells” on the subject property were closed or filled with cement many years ago but she could not provide any details regarding the reason for their installation. Mrs. Tran stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of her knowledge.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Transaction Screening Report for 1665 Alum Rock Avenue, San Jose, California; Prepared for United National Bank by Environetics Engineering, March 18, 2005

The Transaction Screening Report identified the subject property as a "closed" Leaking Underground Storage Tank case. The LUST case pertains to Monte's Auto Sales. A Case Closure Summary was prepared by the Santa Clara Valley Water District. The Case Closure Summary stated that residual fuel hydrocarbons remained at the subject property from the leak case. The Summary also stated investigations and cleanup of the reported release were complete. A copy of the Environetics Engineering report is included in Appendix B.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Tim Loeb
Site Assessment Conducted On:	August 13, 2015

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 1665 Alum Rock Avenue (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Helena Tran	Key Site Manager	(408) 891.6519	No
NA	Lot Attendant	(408) 251.8228	Yes

** Accompanied Partner during the field reconnaissance activities.*

Potential environmental concerns were identified during the onsite reconnaissance related to former underground tanks and indications of subsurface investigations, as further discussed in Sections 6.1 and 6.2.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in two dumpsters located on the subject property. An independent solid waste disposal contractor, BFI or Allied Waste, removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of San Jose services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed primarily by sheet flow action across the paved surfaces towards storm water drains located on the subject property. The subject property is connected to a municipal owned and maintained sewer system.

The subject property is not a designated wetland area. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas from Pacific Gas & Electric (PG&E). Hot water is provided in the main structure from a standard natural-gas fired water heater.

6.1.5 Wells and Cisterns

Three subsurface borings are located in the asphalt surface of the subject property. Each boring is capped with a locking metal cover that appears to identify a groundwater monitoring well. According to Helena Tran, the site contact for Partner, these are former groundwater monitoring wells that were grouted shut many years ago. Victoria Garcia, with the Santa Clara Valley Water District Well Program, confirmed that six groundwater monitoring wells were formerly located on the subject property; all six wells were either removed or closed with cement under a valid well destruction permit in 2005.

Cisterns were not discovered or reported at the subject property.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial wastewater is currently generated at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance. Electrical power comes to the subject property from pole-mounted PG&E overhead lines along Alum Rock Avenue.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed prior to 1968. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout the single-family home that has been converted to office/retail use	No	Fair/Good
Stucco	Throughout the office/retail building exterior	No	Fair

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the

site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials at the buildings, a comprehensive ACM survey should be conducted.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property buildings (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed to be in fair condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones

EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location.

However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the San Jose Water Company serves the subject property vicinity. According to a representative of the SJWC, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of San Jose are a combination of surface water from the Santa Cruz Mountains watershed, purchased water from the Santa Clara Valley Water District and groundwater from city-owned deep aquifer wells. According to a 2014 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g. ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises and public right-of-ways. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

6.4.1 PCBs

Pole-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner identified a controlled recognized environmental condition during the course of this assessment. Three subsurface borings are located in the asphalt surface of the subject property. Each boring is capped with a locking metal cover that appears to identify a groundwater monitoring well. According to Helena Tran, the site contact, these are former groundwater monitoring wells that were grouted shut many years ago. Victoria Garcia, with the Santa Clara Valley Water District Well Program, confirmed that six groundwater monitoring wells were formerly located on the subject property; all six wells were either removed or closed with cement, under a valid well destruction permit issued in 2005.

  A Case Closure Summary for the subject property was available on the SCVWD website and was reviewed during this assessment. According to the April 3, 2000 summary, two underground storage tanks were slurried in-place or removed from the subject property in 1987 and 1991, respectively. The Case Closure Summary pertains to Monte's Auto Sales, which was also identified as a "closed" Leaking Underground Storage Tank (LUST) site. The Case Closure Summary shows that residual contamination from petroleum fuel hydrocarbons remained in soil and groundwater under the subject property at the time of closure.

Based on the closure and/or removal of the two tanks and the analytical results presented in the Case Closure Summary, the former underground tanks and residual contamination are considered a controlled recognized environmental condition. There are no known Use Limitations for the subject property. Based on this information, no further action is warranted at this time.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Due to the age of the subject property buildings, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, all observed suspect ACMs and painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Should these materials be replaced or repaired, the identified suspect ACMs and LBP would need to be sampled to confirm the presence or absence of asbestos or lead prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 1665 Alum Rock Avenue in the City of San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further assessment of the subject property at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 1665 Alum Rock Avenue in the City of San Jose, Santa Clara County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject property. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

San Jose, CA 95125

Dear Messrs. Nguyen and Filippi:

Subject: Fuel Leak Site Case Closure—Montes Auto Sales, 1665 Alum Rock Avenue, San Jose, CA; Case No. 06-065

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

SITE INVESTIGATION AND CLEANUP SUMMARY

Please be advised that the following conditions exist at the site:

- Residual contamination of soil with petroleum hydrocarbons exists at the site; however, it appears that natural attenuation will effectively reduce the remaining contaminant levels.

If you have any questions, please call Mr. James Crowley at (408) 265-2607, extension 2638. Thank you.

Sincerely,

San Jose, CA 95125

Dear Messrs. Nguyen and Filippi:

Subject: Fuel Leak Site Case Closure—Montes Auto Sales, 1665 Alum Rock Avenue, San Jose, CA; Case No. 06-065

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

ORIGINAL SIGNED BY

James S. Crowley, P.E.

CASE CLOSURE SUMMARY
LEAKING UNDERGROUND FUEL STORAGE TANK PROGRAM

I. AGENCY INFORMATION

Date: April 3, 2000

Agency Name: Santa Clara Valley Water District	Address: 5750 Almaden Expressway
City/State/Zip: San Jose, CA 95118	Phone: (408) 265-2600
Responsible Staff Person: James S. Crowley, P.E.	Title: Engineering Unit Manager

II. CASE INFORMATION

Site Facility Name: Montes Auto Sales		
Site Facility Address: 1665 Alum Rock Avenue, San Jose, CA 95116		
RB LUSTIS Case No.: —	Local Case No.: 07S1E03M02f	LOP Case No.: 06-065
URF Filing Date: 02/03/96	SWEEPS No.: —	APN: 481-12-063

Responsible Parties	Addresses	Phone Number
Mr. John Nguyen	478 East Santa Clara Street, Suite 203 San Jose, CA 95112	(408) 287-2378
Mr. August Filippi	2142 Cedarwood Lane San Jose, CA 95125	—

Tank I.D. No	Size in Gallons	Contents	Closed In Place/Removed?	Date
—	500	Gasoline	Slurried in place	12/03/87
—	—	—	Removed	11/14/91
Piping—Not reported			—	—

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Several holes were observed in 550-gallon tank at time of removal.		
Site characterization complete? Yes	Date Approved By Oversight Agency: 01/14/00	
Monitoring wells installed? Yes	Number: 6	Proper screened interval? Yes[1]
Highest GW Depth Below Ground Surface: 4.83	Lowest Depth: 8.31	Flow Direction: Northwest
Most Sensitive Current Use: Drinking water supply		

[1]Some wells are submerged by 1 to 2 feet.

Summary of Production Wells in Vicinity: One abandoned water production well (07S01E03L002) exists 800 feet from the site. The well may not have been properly destroyed; however, it is not judged to be affected by residual contamination at the site.	
Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Groundwater Basin
Is surface water affected? No	Nearest SW Name: Lower Silver Creek
Off-Site Beneficial Use Impacts (Addresses/Locations): None	
Reports on file? Yes	Where are reports filed? Santa Clara Valley Water District

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL			
Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	500 gallons	Disposed at Erickson, Richmond, CA	11/14/91
Piping	Not reported	—	—
Free Product	—	—	—
Soil	15 cubic yards	Not reported	1992 to 1993
Groundwater	—	—	—
Barrels	—	—	—

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS—BEFORE AND AFTER CLEANUP
OPTIONAL: (Please see Attachment for additional information on contaminant locations and concentrations)

Contaminant	Soil (ppm)		Water (ppb)		Contaminant	Soil (ppm)		Water (ppb)	
	Before[1]	After[2]	Before	After[3]		Before	After	Before	After[3]
TPH (Gas)	6,500	130	—	1,900	Xylene	810	0.049	—	22
TPH (Diesel)	—	—	—	—	Ethylbenzene	120	0.110	—	300
Benzene	7.9	0.039	—	130	Oil & Grease	—	—	—	—
Toluene	150	0.041	—	ND	Heavy Metals	—	—	—	—
Other* (8240/8270)	1,2 DCA	—	—	4.4 1,2 DCA*	MTBE	—	—	—	9.1

Description of Interim Remediation Activities: Minor soil excavation.

ND = Not detected

[1]Soil samples collected after tank removal on November 14, 1991. Sample collected January 4, 1986, at a depth of 8.5 feet near gasoline tank showed 1,400 parts per million (ppm).

[2]Soil sample collected at base of excavation June 23, 1993, following overexcavation of 100 cubic yards of contaminated soil.

[3]Groundwater sampling date April 9, 1998.

*ND for tert-Butyl Ether, Di-Isopropyl Ether, Ethyl tert-Butyl Ether, Tertiary Amyl Methyl Ether, and Ethylene Dibromide.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: 0	Number Retained: 6
List Enforcement Actions Taken: Referred to San Francisco Regional Water Quality Control Board on July 29, 1991, for enforcement. Santa Clara Valley Water District agreed to oversee case in October 1991 in response to actions of responsible party.		
List Enforcement Actions Rescinded: —		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

January 1, 1986—Sample collected near 500-gallon underground storage tank (UST) at an approximate depth of 8.5 feet contained 1,400 ppm Total Petroleum Hydrocarbons as Gasoline (TPHG). The sample was apparently collected prior to the installation of a backfill well.

December 3, 1987—Mr. Ed Cutter of San Jose Fire Department observed a UST slurried in place.

November 14, 1991—500-gallon gasoline tank removed. Stained soil and holes were observed. Unauthorized Release Form filed by San Jose Fire Department on January 15, 1992. Soil sample results indicated a maximum concentration of 6,500 ppm TPHG and 7.9 ppm Benzene.

January 1992—Approximately 5 cubic yards of soil removed from tank pit. A sample from the center of the excavated pit contained 130 ppm TPHG and 1.1 ppm Benzene. The pit was backfilled with pea gravel and rock.

June 1993—Backfill was excavated and an additional 10 cubic yards of contaminated soil. Sample collected from midpoint of pit contained 130 ppm TPHG and 39 ppb Benzene.

September 1993—Four borings drilled and one monitoring well installed. Groundwater collected from well MW-1 had 5,700 parts per billion (ppb) TPHG and 500 ppb Benzene.

July 1996—Four monitoring wells installed. Maximum groundwater contamination detected during monitoring was again in MW-1 at 9,500 ppb TPHG and 800 ppb Benzene.

May 1997—One monitoring well installed (MW-6) which detected 990 ppb TPHG and 8.3 ppb Benzene.

June 22, 1998—Corrective Action Plan prepared that documents in-situ bioremediation as the proposed final corrective action.

December 2, 1998—Santa Clara Valley Water District notifies nearby properties of Corrective Action Plan. No comments received.

Conclusion:

The majority of contamination had been over-excavated and removed from the site. Although low levels of residual contamination still exists in the soil, it appears that natural attenuation will over time reduce the remaining contamination. In addition, analytical results for groundwater samples collected from the monitoring wells did not indicate significant residual contamination from petroleum compounds. The Santa Clara Valley Water District staff does not believe that a significant impact to soil or groundwater exists at this site. Therefore, no further corrective action is required at this time.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature:	Date:
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature:	Date: 4/20/00

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

VII. REGIONAL BOARD NOTIFICATION

March 18, 2005

Mr. George Chen
United National Bank
10991 N. De Anza Blvd.
Cupertino, CA 95129

Subject: Transaction Screening Report on Property located at 1665 Alum Rock Avenue, San Jose, CA 95116

On March 14, 2005 Mr. George Chen contacted Environetics Engineering, Inc., requesting us to perform a Transaction Screening Report for the property located at the above referenced address. The report consists of a review of applicable Federal, State and Local records. The Transaction Screening Report for the above referenced property has been completed.

Base on the review of available information and observations of the subject site and vicinity, it was determined that a high potential exists for significant site contamination form off-site sources. In addition high potential for contaminations exists for present conditions at the subject site.

It is recommended that for the purpose of best management practice and due diligence, further investigations be performed. All environmental procedures and documents should be updated to include a complete Phase 1 Site Assessment.

Special indications were recorded that indicate the subject site has potential for adverse environmental impact. Further studies are recommended and warranted at this time.

If you have any questions, or require additional information, please contact Environetics Engineering at (408) 727-4274 or via email Environetics@sbcglobal.net.

Respectfully submitted,
ENVIRONETICS ENGINEERING

FINDING, CONSLUSIONS AND RECOMMENDATIONS

The Transaction Report was conducted to evaluate whether past of current usage of the site of the site or near-vicinity sites may have adversely impacted the soil or ground water quality of the property located at 1665 Alum Rock Avenue, San Jose, CA 95116.

Based on the Report, the potential risks of any significant contamination associated with current and past operations are low with indications observed that present activities adjacent to the subject site have the potential for adverse environmental impacts on the site. Further studies are recommended and warranted at this time.

The enclosed Transaction Report indicates a "high" environmental risk code. Underground contamination has been recorded within 1/8 of a mile of subject property. Two contaminated sites are within 1 block. Very few of the recorded sites have been "closed." There is a high probability that underground contamination exists.

Due to the possibility of underground drinking water contamination in regards to the high volume of leaking underground storage tanks with ½ mile radius from the property (17 reported sites) we have included Geological Physical Setting Source Map Findings.
This report locates all active water wells in close proximity of the site and includes soil structure information. No specific testing for contaminated underground water at this site has been performed, but the possibility exists that any one of the contaminated sites with ½ mile radius could develop a plume under this site.

No significant elevated Radon levels exist in the area of the site.

Environetics Engineering recommends that a complete Phase 1 Environmental Site Assessment be performed on the subject property prior to any property transfer to confirm possible liabilities to the purchaser.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STATE ASTM STANDARD

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 17 Cortese sites within approximately 0.5 miles of the target property.

Design Flow: 0 Million Gal/Day Baseline Flow: 0 Million Gal/Day
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
Agency Type: Private

Actual: 94 ft.

MAYFAIR AUTO WRECKERS (Continued) **S102415855**

Waste Type: Not reported
Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
Reclamation: Not reported

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List
Source: EPA
Telephone: N/A
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/14/04
Date Made Active at EDR: 02/03/05
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 02/01/05
Elapsed ASTM days: 2
Date of Last EDR Contact: 02/01/05

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-413-0223
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/14/04

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/21/04
Elapsed ASTM days: 49
Date of Last EDR Contact: 12/21/04

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-413-0223
As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

RCRA: Resource Conservation and Recovery Act Information
Source: EPA
Telephone: 800-424-9346
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are Individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/23/04
Date Made Active at EDR: 01/18/05
Database Release Frequency: Quarterly

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/01/01
Database Release Frequency: Biennially

Date of Last EDR Contact: 12/13/04
Date of Next Scheduled EDR Contact: 03/14/05

CONSENT: Superfund (CERCLA) Consent Decrees
Source: Department of Justice, Consent Decree Library
Telephone: Varies
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 03/05/04
Database Release Frequency: Varies

Date of Last EDR Contact: 10/25/04
Date of Next Scheduled EDR Contact: 01/24/05

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 09/09/04
Database Release Frequency: Annually

Date of Last EDR Contact: 01/05/05
Date of Next Scheduled EDR Contact: 04/04/05

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: N/A
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/14/04
Database Release Frequency: Quarterly

Date of Last EDR Contact: 02/01/05
Date of Next Scheduled EDR Contact: 05/02/05

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report
Source: EPA
Telephone: N/A
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 01/12/05
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/03/05
Date of Next Scheduled EDR Contact: 04/04/05

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/08/04
Database Release Frequency: Annually

Date of Last EDR Contact: 01/19/05
Date of Next Scheduled EDR Contact: 04/18/05

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 11/30/04
Database Release Frequency: Quarterly

Date of Last EDR Contact: 01/03/05
Date of Next Scheduled EDR Contact: 04/04/05

MINES: Mines Master Index File
Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 11/15/05
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 12/28/04
Date of Next Scheduled EDR Contact: 03/28/05

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/91
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 02/22/05
Date of Next Scheduled EDR Contact: 05/23/05

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-564-3887
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 09/30/04
Database Release Frequency: Annually

Date of Last EDR Contact: 02/23/05
Date of Next Scheduled EDR Contact: 05/09/05

DOD: Department of Defense Sites
Source: USGS
Telephone: 703-692-8801
This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 10/01/03
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/08/05
Date of Next Scheduled EDR Contact: 05/09/05

UMTRA: Uranium Mill Tailings Sites
Source: Department of Energy
Telephone: 505-845-0011
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized. In 1978, 24 inactive uranium mill tailings sites in Oregon, Idaho, Wyoming, Utah, Colorado, New Mexico, Texas, North Dakota, South Dakota, Pennsylvania, and on Navajo and Hopi tribal lands, were targeted for cleanup by the Department of Energy.

Date of Government Version: 12/29/04
Database Release Frequency: Varies

Date of Last EDR Contact: 12/21/04
Date of Next Scheduled EDR Contact: 03/21/05

ODI: Open Dump Inventory
Source: Environmental Protection Agency
Telephone: 800-424-9346
An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/85
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 05/23/95
Date of Next Scheduled EDR Contact: N/A

FUDS: Formerly Used Defense Sites
Source: U.S. Army Corps of Engineers
Telephone: 202-528-4285
The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/03
Database Release Frequency: Varies

Date of Last EDR Contact: 01/03/05
Date of Next Scheduled EDR Contact: 04/04/05

INDIAN RESERV: Indian Reservations
Source: USGS
Telephone: 202-208-3710
This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 10/01/03
Database Release Frequency: Semi-Annually

Date of Last EDR Contact: 02/08/05
Date of Next Scheduled EDR Contact: 05/09/05

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last EDR Contact: 12/06/04
Date of Next Scheduled EDR Contact: 03/07/05

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/02
Database Release Frequency: Annually

Date of Last EDR Contact: 12/20/04
Date of Next Scheduled EDR Contact: 03/21/05

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/02
Database Release Frequency: Every 4 Years

Date of Last EDR Contact: 12/06/04
Date of Next Scheduled EDR Contact: 03/07/05

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA

DEED: Deed Restriction Listing
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

REF: Unconfirmed Properties Referred to Another Agency
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.

Date of Government Version: 11/09/04
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/01/05
Date of Next Scheduled EDR Contact: 05/30/05

SCH: School Property Evaluation Program
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 11/09/04
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/01/05
Date of Next Scheduled EDR Contact: 05/30/05

NFE: Properties Needing Further Evaluation
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY HISTORICAL DATABASES

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

BROWNFIELDS DATABASES

VCP: Voluntary Cleanup Program Properties
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 11/09/04
Database Release Frequency: Quarterly

Date of Last EDR Contact: 03/01/05
Date of Next Scheduled EDR Contact: 05/30/05

US BROWNFIELDS: A Listing of Brownfields Sites
Source: Environmental Protection Agency
Telephone: 202-566-2777
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Next Scheduled EDR Contact: N/A

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

1665 ALUM ROCK AVENUE
1665 ALUM ROCK AVENUE
SAN JOSE, CA 95116

TARGET PROPERTY COORDINATES

Latitude (North):	37.352200 - 37° 21' 7.9"
Longitude (West):	121.857101 - 121° 51' 25.6"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	601224.1
UTM Y (Meters):	4134352.8
Elevation:	94 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

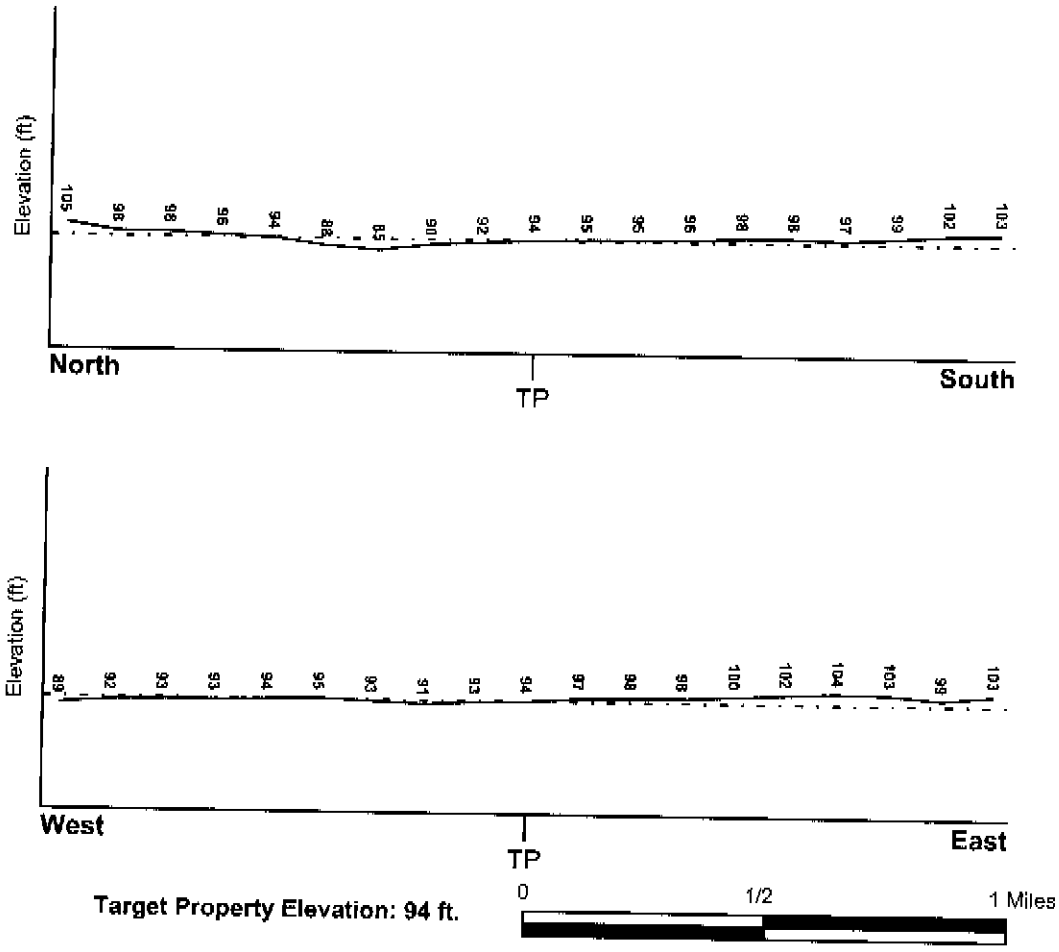
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map:	37121-C7 SAN JOSE EAST, CA
General Topographic Gradient:	General NW
Source:	USGS 7.5 min quad index

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
SANTA CLARA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 0603490020E

0603370255E
0603490025D

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, modorately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

System Number:	4310011		
System Name:	San Jose Water Company		
Organization That Operates System:	1221 S. Bascom Avenue San Jose, CA 95128		
Pop Served:	944000	Connections:	206890
Area Served:	SAN JOSE VICINITY		

Sample Information: *** Only Findings Above Detection Level Are Listed**

Sample Collected:	02/05/1980	Findings:	18.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	02/05/1980	Findings:	590.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	02/05/1980	Findings:	7.790
Chemical:	PH (LABORATORY)		
Sample Collected:	02/05/1980	Findings:	207.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CACO3)		
Sample Collected:	02/05/1980	Findings:	250.000 MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	02/05/1980	Findings:	1.000 MG/L
Chemical:	CARBONATE ALKALINITY		
Sample Collected:	02/05/1980	Findings:	.160 UG/L
Chemical:	PHOSPHATE		
Sample Collected:	02/05/1980	Findings:	180.000 MG/L
Chemical:	TOTAL HARDNESS (AS CACO3)		
Sample Collected:	02/05/1980	Findings:	47.000 MG/L
Chemical:	CALCIUM		
Sample Collected:	02/05/1980	Findings:	15.000 MG/L
Chemical:	MAGNESIUM		
Sample Collected:	02/05/1980	Findings:	53.000 MG/L
Chemical:	SODIUM		
Sample Collected:	02/05/1980	Findings:	1.720
Chemical:	SODIUM ABSORPTION RATIO		
Sample Collected:	02/05/1980	Findings:	1.200 MG/L
Chemical:	POTASSIUM		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	02/05/1980	Findings:	35.000 MG/L
Chemical:	CHLORIDE		
Sample Collected:	02/05/1980	Findings:	21.000 MG/L
Chemical:	SILICA		
Sample Collected:	02/05/1980	Findings:	8.000 UG/L
Chemical:	LITHIUM		
Sample Collected:	02/05/1980	Findings:	332.000 MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	02/05/1980	Findings:	.340
Chemical:	LANGELIER INDEX @ SOURCE TEMP.		
Sample Collected:	02/05/1980	Findings:	6.000 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/05/1980	Findings:	.032 UG/L
Chemical:	IODIDE		
Sample Collected:	02/05/1980	Findings:	.080 NTU
Chemical:	TURBIDITY (LAB)		
Sample Collected:	02/05/1982	Findings:	17.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	02/05/1982	Findings:	610.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	02/05/1982	Findings:	7.830
Chemical:	PH (LABORATORY)		
Sample Collected:	02/05/1982	Findings:	219.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CACO3)		
Sample Collected:	02/05/1982	Findings:	265.000 MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	02/05/1982	Findings:	1.200 MG/L
Chemical:	CARBONATE ALKALINITY		
Sample Collected:	02/05/1982	Findings:	.080 UG/L
Chemical:	PHOSPHATE		
Sample Collected:	02/05/1982	Findings:	206.000 MG/L
Chemical:	TOTAL HARDNESS (AS CACO3)		
Sample Collected:	02/05/1982	Findings:	51.000 MG/L
Chemical:	CALCIUM		
Sample Collected:	02/05/1982	Findings:	19.000 MG/L
Chemical:	MAGNESIUM		
Sample Collected:	02/05/1982	Findings:	51.000 MG/L
Chemical:	SODIUM		
Sample Collected:	02/05/1982	Findings:	1.530
Chemical:	SODIUM ABSORPTION RATIO		
Sample Collected:	02/05/1982	Findings:	1.400 MG/L
Chemical:	POTASSIUM		
Sample Collected:	02/05/1982	Findings:	38.000 MG/L
Chemical:	CHLORIDE		
Sample Collected:	02/05/1982	Findings:	.110 MG/L
Chemical:	FLUORIDE (TEMPERATURE DEPENDENT)		
Sample Collected:	02/05/1982	Findings:	28.000 MG/L
Chemical:	SILICA		
Sample Collected:	02/05/1982	Findings:	10.000 UG/L
Chemical:	LITHIUM		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	02/05/1982	Findings:	362.000 MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	02/05/1982	Findings:	.440
Chemical:	LANGELIER INDEX @ SOURCE TEMP.		
Sample Collected:	02/05/1982	Findings:	7.000 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02/05/1982	Findings:	.035 UG/L
Chemical:	IODIDE		
Sample Collected:	02/05/1982	Findings:	.100 NTU
Chemical:	TURBIDITY (LAB)		
Sample Collected:	10/31/1983	Findings:	20.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	10/31/1983	Findings:	1.000 UNITS
Chemical:	COLOR		
Sample Collected:	10/31/1983	Findings:	920.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	10/31/1983	Findings:	7.650
Chemical:	PH (LABORATORY)		
Sample Collected:	10/31/1983	Findings:	337.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CACO3)		
Sample Collected:	10/31/1983	Findings:	408.000 MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	10/31/1983	Findings:	1.200 MG/L
Chemical:	CARBONATE ALKALINITY		
Sample Collected:	10/31/1983	Findings:	.160 UG/L
Chemical:	PHOSPHATE		
Sample Collected:	10/31/1983	Findings:	439.000 MG/L
Chemical:	TOTAL HARDNESS (AS CACO3)		
Sample Collected:	10/31/1983	Findings:	78.000 MG/L
Chemical:	CALCIUM		
Sample Collected:	10/31/1983	Findings:	60.000 MG/L
Chemical:	MAGNESIUM		
Sample Collected:	10/31/1983	Findings:	36.000 MG/L
Chemical:	SODIUM		
Sample Collected:	10/31/1983	Findings:	.740
Chemical:	SODIUM ABSORPTION RATIO		
Sample Collected:	10/31/1983	Findings:	1.700 MG/L
Chemical:	POTASSIUM		
Sample Collected:	10/31/1983	Findings:	38.000 MG/L
Chemical:	CHLORIDE		
Sample Collected:	10/31/1983	Findings:	.150 MG/L
Chemical:	FLUORIDE (TEMPERATURE DEPENDENT)		
Sample Collected:	10/31/1983	Findings:	28.000 MG/L
Chemical:	SILICA		
Sample Collected:	10/31/1983	Findings:	573.000 MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	10/31/1983	Findings:	.600
Chemical:	LANGELIER INDEX @ SOURCE TEMP.		
Sample Collected:	10/31/1983	Findings:	18.000 MG/L
Chemical:	NITRATE (AS NO3)		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	10/31/1983	Findings:	.008 UG/L
Chemical:	IODIDE		
Sample Collected:	10/31/1983	Findings:	.150 NTU
Chemical:	TURBIDITY (LAB)		
Sample Collected:	01/24/1984	Findings:	18.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	01/24/1984	Findings:	620.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	01/24/1984	Findings:	7.870
Chemical:	PH (LABORATORY)		
Sample Collected:	01/24/1984	Findings:	221.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CACO3)		
Sample Collected:	01/24/1984	Findings:	266.000 MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	01/24/1984	Findings:	1.300 MG/L
Chemical:	CARBONATE ALKALINITY		
Sample Collected:	01/24/1984	Findings:	.110 UG/L
Chemical:	PHOSPHATE		
Sample Collected:	01/24/1984	Findings:	208.000 MG/L
Chemical:	TOTAL HARDNESS (AS CACO3)		
Sample Collected:	01/24/1984	Findings:	49.000 MG/L
Chemical:	CALCIUM		
Sample Collected:	01/24/1984	Findings:	21.000 MG/L
Chemical:	MAGNESIUM		
Sample Collected:	01/24/1984	Findings:	52.000 MG/L
Chemical:	SODIUM		
Sample Collected:	01/24/1984	Findings:	1.580
Chemical:	SODIUM ABSORPTION RATIO		
Sample Collected:	01/24/1984	Findings:	1.400 MG/L
Chemical:	POTASSIUM		
Sample Collected:	01/24/1984	Findings:	40.000 MG/L
Chemical:	CHLORIDE		
Sample Collected:	01/24/1984	Findings:	30.000 MG/L
Chemical:	SILICA		
Sample Collected:	01/24/1984	Findings:	376.000 MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	01/24/1984	Findings:	.460
Chemical:	LANGELIER INDEX @ SOURCE TEMP.		
Sample Collected:	01/24/1984	Findings:	7.000 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01/24/1984	Findings:	.034 UG/L
Chemical:	IODIDE		
Sample Collected:	01/24/1984	Findings:	.150 NTU
Chemical:	TURBIDITY (LAB)		
Sample Collected:	07/11/1986	Findings:	23.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	07/11/1986	Findings:	1.000 UNITS
Chemical:	COLOR		
Sample Collected:	07/11/1986	Findings:	610.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Sample Collected:	07/11/1986	Findings:	7.580
Chemical:	PH (LABORATORY)		
Sample Collected:	07/11/1986	Findings:	229.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CACO3)		
Sample Collected:	07/11/1986	Findings:	277.000 MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	07/11/1986	Findings:	.700 MG/L
Chemical:	CARBONATE ALKALINITY		
Sample Collected:	07/11/1986	Findings:	.140 UG/L
Chemical:	PHOSPHATE		
Sample Collected:	07/11/1986	Findings:	220.000 MG/L

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Water System Information:

Prime Station Code:	07S/01E-09D04 M	User ID:	HEN
FRDS Number:	4310011089	County:	Santa Clara
District Number:	05	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Untreated
Source Lat/Long:	372100.0 1215200.0	Precision:	0.5 Mile (30 Seconds)
Source Name:	SEVENTEENTH ST. WELL 06		
System Number:	4310011		
System Name:	San Jose Water Company		
Organization That Operates System:	1221 S. Bascom Avenue San Jose, CA 95128		
Pop Served:	944000	Connections:	206890
Area Served:	SAN JOSE VICINITY		

Sample Information: * **Only Findings Above Detection Level Are Listed**

Sample Collected:	01/12/1981	Findings:	19.000 C

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002. 7.5-Minute DEMs correspond to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Subject: Transaction Screening Report on Property located at:
1665 Alum Rock Avenue, San Jose, CA 95116 (Automotive Sales Lot)

On March 14, 2005 **Environetics Engineering, Inc.** was contacted requesting us to perform a Transaction Screening for the property located at the above referenced address. The report will consist of a review of applicable Federal, State and Local records. The Transaction Screening Report for the above referenced property will be ordered pursuant to our verbal agreement of service established on March 14, 2005 as sated below and upon receipt of a signed copy of this proposal.

One EDR Transaction Screen Map Report with ToxiCheck for the price of $600.00

Upon acceptance of this proposal we require a deposit of $300.00 to proceed with this order.

If you have any questions, or require additional information, please contact Environetics Engineering at (408) 727-4274 or via email Environetics@sbcglobal.net.

Respectfully submitted,
ENVIRONETICS ENGINEERING

James P. Burgard, P.E., R.E.A
President/CEO

Mr. Chen,

Attached is our copy of the proposal letter requesting a Transaction Screening for property 1665 Alum Rock Ave.

Please sign and date and fax back to us 408/727-0763.

I will also put the original copy in the mail this evening.

Thank you,

Nancy Brocchini

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

TESORO WEST COAST CO	1598 ALUM ROCK AVE	SW 1/8 - 1/4 (0.159 mi.)	F27	43

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 06/15/2015 has revealed that there are 27 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 06/15/2015 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 12 EDR US

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within approximately 0.25 miles of the target property.

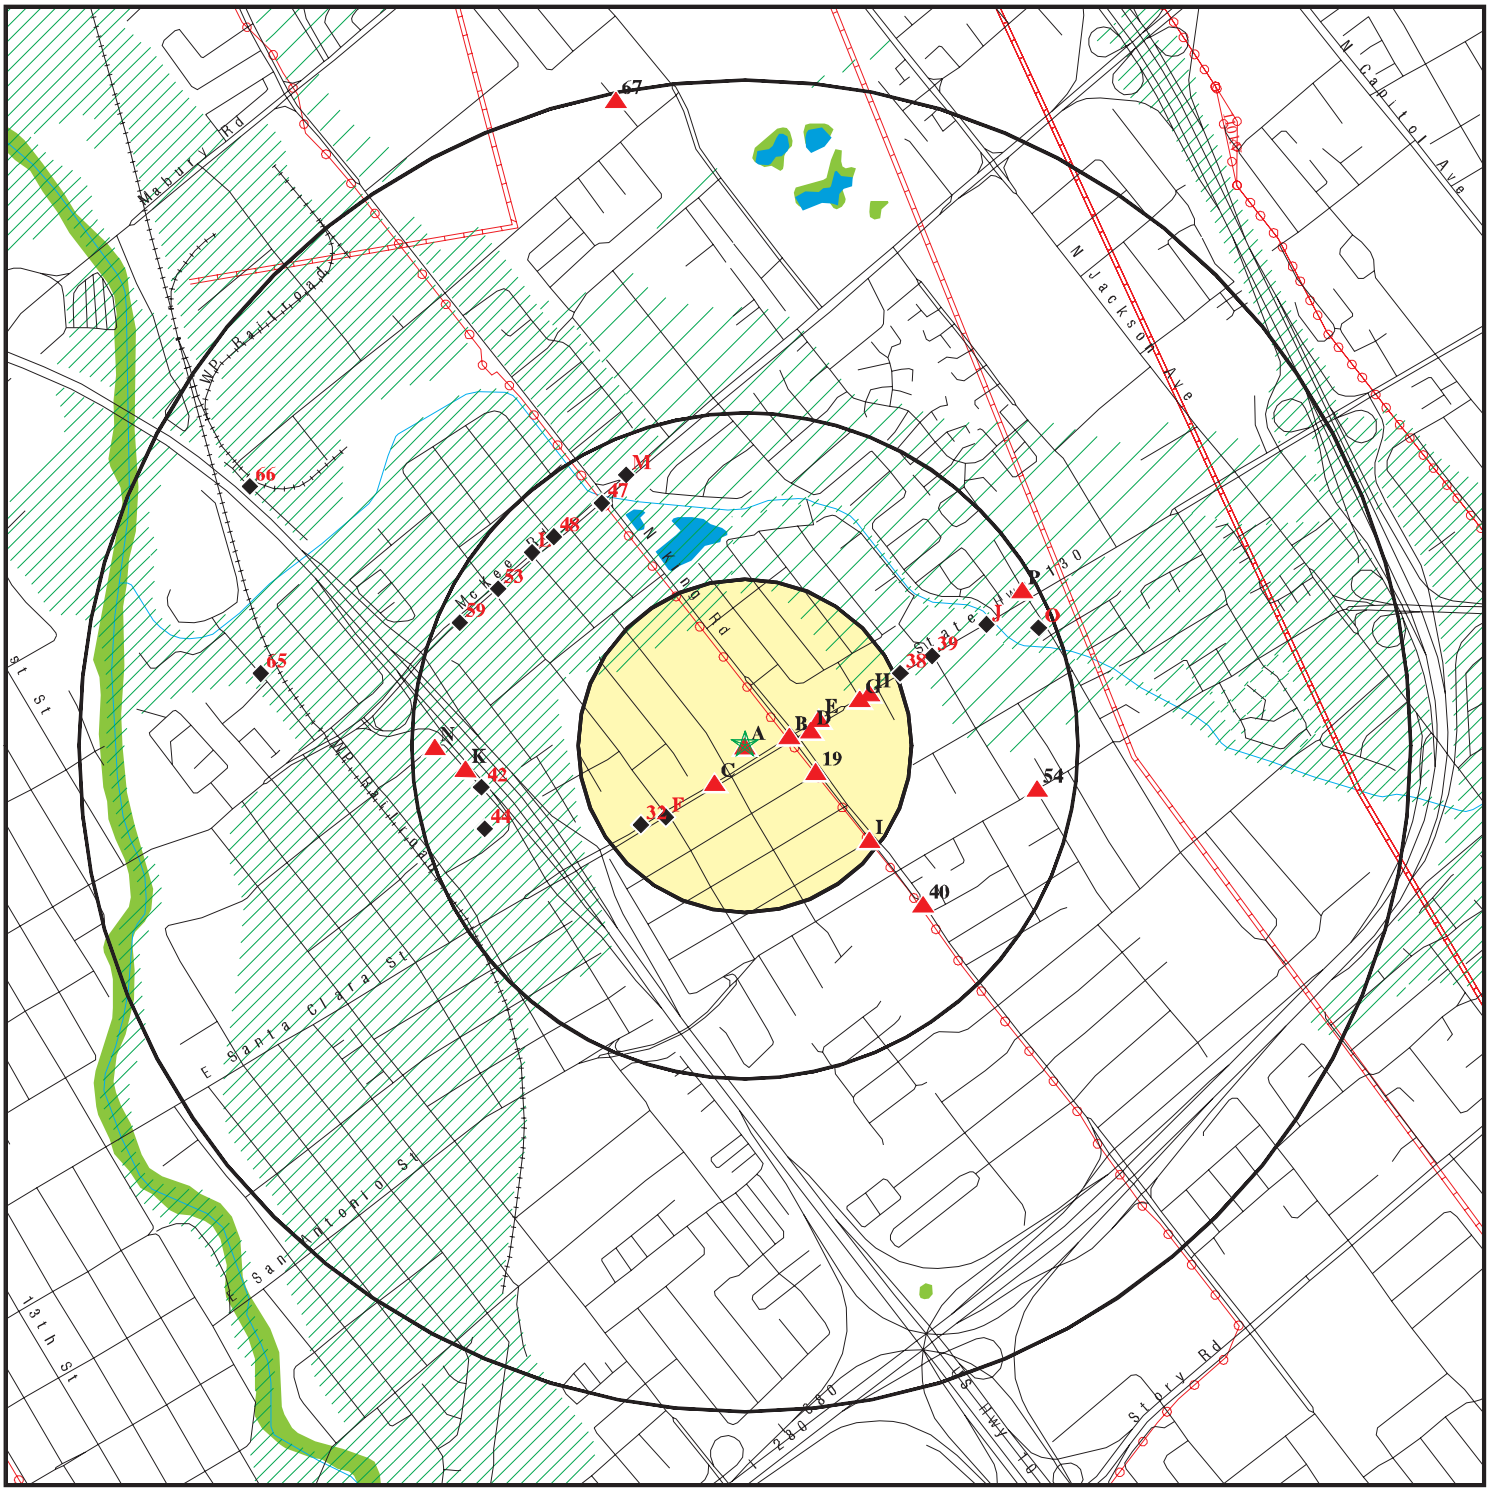
EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 3 records.

Site Name	Database(s)
NELLA OIL COMPANY #417	CHMIRS, CDL
CIVIC CENTER PARKING GARAGE	LUST, HIST LUST
	SLIC

OVERVIEW MAP - 4377612.2S



0 1/4 1/2 1 Miles

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Pipelines
- 100-year flood zone
- 500-year flood zone
- National Wetland Inventory
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Type:	Not reported
Status:	Open - Verification Monitoring
Status Date:	07/15/2014
Lead Agency:	Not reported
Case Worker:	AC
Local Agency:	Not reported
RB Case Number:	02-017
LOC Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	as of July 2012, TPH-g, MTBE and TBA concentrations in groundwater exceed cleanup standards. Discharger is implementing remedial actions for cleanup of groundwater onsite and offsite areas.

LOC Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	The site has been out of compliance since October 2010. The discharger has not submitted any groundwater monitoring reports. The discharger submitted a DPE work plan to DEH on October 10, 2010. The work was prepared in response to the February 26, 2010 County of Santa Clara Department of Environmental Health (SCCDEH) letter requesting a work plan for additional site assessment work for the case. The work plan has not been implemented and report has not been submitted as of October 16, 2012. The proposed work should enable completion of soil and groundwater assessment tasks associated with the release, particularly within residential areas north of the site, and will provide performance data to enable evaluation of the effectiveness of DPE as a potential remedial alternative.

LOC Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	One UST was removed on 4.12.1985 . Three monitoring wells were developed on 6.21.07. Groundwater was sampled on 8/13/07 and 8/17/09. Groundwater samples collected from the three monitoring wells during the third quarter of 2009 were reported to have up to 87,000 parts per billion (ppb) TPHg, and 14,000 ppb benzene. MTBE was reported below the detection limit; however, the detection limit was as high as 1,100 ppb. Additional site assessment, wells survey and quarterly groundwater monitoring has been requested to be performed.

LOC Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Surface water
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	This site contains a warehouse and stone-working shop. On May 2005, one 2,000 gallon UST used to store gasoline was removed from the site. Confirmation soil samples collected beneath the tank indicated gasoline has been release and report showed TPHg 1.5 ppm and MTBE 1.9 ppm. Subsurface investigations were conducted at the site in July and

DELLA MAGGIORE TILE INC (Continued) **U001602692**

September 2006. A total of 11 temporary borings were advanced at the site, The investigaiton findings indicated that impacts to soil were restricted to the immediate vicinity of the former UST, however petroleum hydrocarbon impacts to groundwater appeared to extend southward beneath Five Wounds Lane, In June 2007 six borings at the site were advanced. Results of the investigation indicated that contaminants had migrated south-southest beneath Five Wounds Lane and MTBE concentrations in groundwater appeared to increase with distance from the former UST excavation.In September 2007 five wells were constructed, one within the boundaries of the former UST and four ofsite within the public right-of-way of Five Wounds Lane. the lateral extent of the plume west of MW-3 and south of MW-4 was not defined and additional investigation was assessed. In February 2008, grab groundwater samples from three borings located west of MW-3 and southwest of MW-4 indicated that the non=detect plume boundary exists somewhere within 50 feet west-southwest of Mw-3. TPHg and MTBE were both reported at c concentration of 69 ppb in the grab groundwater sample. Site access to the Five Wounds Catholic School property to advance a boring south of MW-4 was not obtained. On October 2008, three additional MW were installed. Last sampling event took place October 2008 and resulted in the following highest concentrations: TPHg 290 ppb and MTBE 276 ppb. Workplan to define the lateral extent and to conduct soil gas survey was requested in May 2009.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	On May 29, 1990 a (vadose) monitoring well was installed in the former waste oil tank backfill to comply with the City of San Jose's local hazardous materials ordinance. A soil sample collected at the bottom of the borehole at eight feet (ft) below ground surface (bgs) contained 190 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons in the gasoline range (TPHg); 49 mg/kg of total petroleum hydrocarvon compounds in the diesel fuel range (TPHd); and 64 mg/kg total petroleum hydrocarbon compounds in the motor oil range (TPHmo). These results were transmitted to the City of San Jose Fire Department on August 14, 1990 by D&D Management Consultants Inc.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Indoor Air, Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	As of October 6, 2012- Based on the current trends of contaminants of concern and due to low residual concentrations of petroleum compounds in soil and groundwater at this site as documented in the most recent groundwater monitoring report dated March 19, 2010, and in the supplemental soil and groundwater investigation report dated August 31, 2011, this case qualifies for low-threat regulatory closure.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	1988: Petroleum hydrocarbons were discovered in subsurface soils during repair of fuel piping below a dispenser island (Amen, Kieth and Berg, 1989). Three 5,000-gallon gasoline underground storage tanks (UST) were located on the northeastern portion of the Site; a 12,000 gallon gasoline UST and 550-gallon waste oil UST were located in the southwestern portion of the Site, and four fuel dispenser islands were located in the northwestern portion of the original property (Tank Protect Engineering, Inc., 1993). These facilities were demolished during soil remediation at the site which was initiated in 1990. The site was redeveloped to its current configuration in 2000. 1990: Monitoring wells MW-1, MW-2 and MW-3 were installed near the three 5,000 gallon USTs. 1990: The three 5,000-gallon USTs, the 12,000-gallon UST, the 550-gallon waste-oil UST, associated piping, and well MW-3 were excavated and removed from the Site. Holes were present in one of the 5,000-gallon USTs but were not observed in the remaining USTs. TPHg was detected in soil samples from the excavation endwalls for the 5,000-gallon USTs at concentrations up to 2,800 mg/kg, and was detected in groundwater grab samples from the excavation at concentrations up to 560,000 ug/l (Tank Protect Engineering, 1990). November 1990 to August 1993: An extensive soil over-excavation was conducted around the former USTs, and along the southeastern and southern property boundaries to an average depth of 13 feet bgs. Work included demolition of the existing site building. Excavated soils were stockpiled onsite for aeration, profiling and potential re-use (Tank Protect Engineering, 1993). The portions of the excavation below groundwater were backfilled with pea gravel. Soil that had been aerated onsite was used to backfill the portions of the excavation above groundwater (Tank Protect Engineering, 1993). It is estimates that approximately 4,000 tons of soil was excavated and treated prior to reuse. March to September 1994: Approximately 160,000 gallons of groundwater was pumped from the excavation, treated and released to the storm drain under a temporary discharge permit issued by the California Regional Water Quality Control Board - San Francisco Bay Region (RWQCB). In addition, well MW-4 was installed near the northern edge of the property (Sabek, 1995). May 1995: Soil over-excavation was extended across the southeastern property boundary onto the residential property adjacent to the Site and along a short section of the northwestern edge of the excavation. The Site owner subsequently purchased the property and demolished the residential structure.

GAS AND SHOP (Continued) **S101303976**

Residual contamination within the newly excavated portions of the remedial excavation ranged from 150 mg/kg to 620 mg/kg TPHg along the northwestern sidewall and from 1.1 mg/kg to 1,400 mg/kg along the southeastern sidewall. Based Preliminary Site Conceptual Model and Workplan for Additional Site Assessmenton the described extent and depth of the excavation, it is estimated that approximately 500 tons of soil was excavated and treated prior to reuse. July 1996 to February 1997: Soil samples collected from the stockpiled onsite excavation spoils were found to contain no detectable concentrations of TPHg (IT Corporation, 1996). The remainder of the excavation was backfilled with imported gravel fill and the stockpiled soil. July 1997: Four hand-auger borings were advanced adjacent to the former fuel dispenser islands on the western portion of the Site (Figure 2). TPH-G was detected at concentrations up to 2,500 mg/kg in soil samples collected from 3 to 7 feet bgs, and a groundwater grab sample from one of the borings contained 250,000 "g/L TPH-G, 13,000 "g/L and 27,000 "g/L benzene (Ecology Control Industries, Inc., 1997). Based on the results of this investigation, the SCVWD requested installation of an additional groundwater monitoring well and an additional soil investigation to further evaluate site conditions (SCVWD, 1997). April 1998: Six soil borings were advanced and groundwater monitoring well MW-5 was installed near the former pump islands in the southwestern portion of the Site. TPH -G was detected at concentrations up to 9,000 mg/kg in soil samples collected from three of the six soil borings (Table 1). TPHg, MTBE and benzene were detected in the groundwater grab sample at concentrations of 120,000 ug/l, 2,200 ug/l and 3,400 ug/l, respectively (Table 3). July 2000: Petroleum hydrocarbon impacted soils were encountered on the southern portion of the Site property during re-development construction activities, and was excavated from approximately 100 by 35 foot area to a depth of approximately 12 feet bgs. The maximum residual TPHg concentration in soil samples collected from the southern and southeastern sidewalls of the excavation was 160 mg/kg. Approximately 1,660 tons of impacted soil was disposed offsite. The site was redeveloped to its current configuration and new USTs were installed within the remedial excavation. April 2003: Three onsite and three offsite groundwater monitoring wells (MW 6 through MW 11) were installed. Samples collected from the wells showed that elevated concentrations of petroleum hydrocarbons in groundwater extended offsite to the northwest, west and southwest of the Site. June 2005: Ten direct-push borings were advanced west of the site. Four of the borings were installed adjacent to the site in a transect along McKee Road, four were installed in a transect along the opposite side of McKee Road, and two were installed on the property immediately southwest of the site. Depth-discrete groundwater grab samples were collected from the borings at depths ranging from 18 feet to 40 feet bgs. Up to 880,000 "g/L TPHg and 4,100 "g/L benzene, and 180 "g/L MTBE were detected in groundwater samples, with the maximum concentration detected at the west corner of the Site. June 2006: Five additional offsite monitoring wells (MW-12 to MW-16) and three additional onsite monitoring wells (MW-17 to MW-19) were installed. For aquifer testing purposes, wells MW-16, MW-18 and MW-19 were constructed with 4-inch-diameter PVC casing. The remaining wells were constructed with 2-inch-diameter casing. July 2006: Two step-drawdown pumping tests were conducted, one using well MW-16 and one using well MW-18 as the pumping wells. A 24-hour constant rate aquifer pump test was then conducted using well MW-16 as the pumping well. The tests

GAS AND SHOP (Continued) **S101303976**

showed that a flow rate of 3.8 gallons per minute was sustainable for at least 24 hours.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Site Inspection (SI) Report
Completed Date: 10/21/1988
Comments: Completed SI. In August 1986, while transferring solvent from one subsurface underground tank to another, about 260 gallons solvent (Hi Sol #10) spill occurred in the underground storage tank (UST) farm. The subsequent investigation found levels of total hydrocarbons in the soil (7600 ppm) at the site and in the groundwater (56 ppb) below the site. SF Regional Water Quality Control Board (RWQCB) issued Cleanup and Abatement Order (CAO) No. 87-004 to Dap. Starting in August 1988, seven USTs and contaminated soil were removed. The soil analyses results showed ethyl benzene (5 to 14 ppb),

TRANSPAK INC (Continued) **U001560008**

1,4-dichlorobenzene (15 ppb), toluene (0.8 to 20 ppb) and xylene (15 to 150 ppb).

TELEWAVE INC (Continued) **S101482292**

RB Case Number:	06-010
LOC Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, Gasoline
Site History:	Site history based on conclusions and recommendations in the March 30, 2102, Site Conceptual Model Report: The chemicals of concern (COCs) for the case appear to be limited to TPHd, TPHg, BTEX, and MTBE. Of these compounds, the release appears to be predominantly TPHd with low concentrations of TPHg and trace levels of MTBE and benzene within source area soils and groundwater. Overall, the site investigations to date have characterized the subsurface lithology and COC impacts associated with the release, except for the areas down-gradient of boring EB-6, cross-gradient boring EB-4, and in the area near the former USTs adjacent to the existing site building. Therefore, data gaps remain in the understanding of the subsurface lithology and COCs in these areas associated with the release resulting in an unknown hazard risk for occupants of the site building and off-site residences from breathing MTBE-vapor associated from vapor intrusion from impacted groundwater and soil. These data gaps should be addressed by the installation of up to three direct-push borings, and the collection of soil, groundwater, and/or soil gas samples from the borings. One step-out boring is proposed to be drilled to a depth of 25 feet bgs approximately 35 feet west of boring EB-4. Grab water samples collected from this boring should be tested for TPHd. A second 25 feet deep step-out boring is proposed 40 feet northwest of EB-6. Groundwater samples collected from this boring should be tested for MTBE. Soil gas samples should also be collected from approximately five feet bgs from the step-out boring northwest of EB-6, and from a boring adjacent to the site building near the former USTs. The soil-gas samples should be tested for MTBE. The soil-gas concentration data can be compared to soil-gas concentration criteria (criteria with and without a document bio-attenuation zone beneath the site) to determine if the fuel-release case may pose an unacceptable risk to occupants of the site building and off-site residences (breathing hazard from vapor intrusion). A discussion with the CCDEH representative should be made before future work is performed, and a work plan should be prepared and approved by the SCCDEH to document the proposed work scope.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	03/20/1990
Comments:	Completed Site Screening. In August of 1989, three underground storage fuel storage tanks were removed under the supervision of the San Jose Fire Department. Soil discoloration was observed. Eight soil samples detected elevated levels of total petroleum hydrocarbons as gasoline (TPHg); total petroleum hydrocarbons as diesel (TPHd); and benzene, toluene, ethylbenzene, and total xylenes (BTEX). The contaminated soil was excavated and disposed offsite. Residual levels are below residential screening levels.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/25/2015
Date Data Arrived at EDR: 03/10/2015

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/23/2013

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Southwest Map:	5640416 SAN JOSE WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

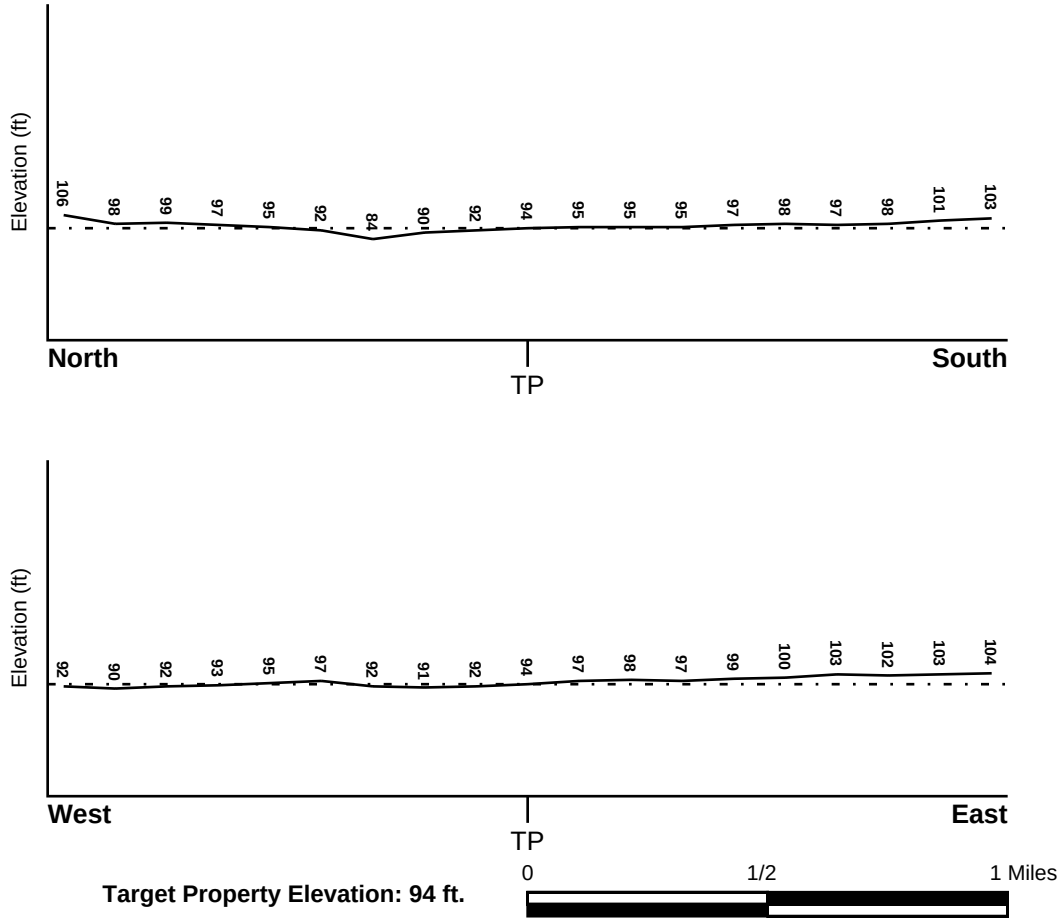
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 94 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
SANTA CLARA, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06085C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX D: QUALIFICATIONS

PARTNER

Timothy G. Loeb

Partner Associate

PARTNER Engineering and Science, Inc.

Education

M.S. Biological Science, Central Washington University

Registrations

California Registered Environmental Assessor License No. 00519

Asbestos Building Inspector, Certification No. 3342

Summary of Professional Experience

Mr. Loeb has 25 years of experience in the environmental engineering and real estate assessment industries. He has significant experience in due diligence assessments for a variety of property types and the needs and requirements of a varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Loeb has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Phase II and III Subsurface Investigations, Property Condition Assessments (PCAs), Small Loan PCAs, Probable Maximum Loss assessments, Regulatory Compliance Assessments, Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, Mold Assessments, and Lead-in-water sampling and analysis.

- Management and preparation of approximately 1300 Phase I Environmental Site Assessments for major lenders, real estate companies, consulting firms, and land developers in California, Nevada, and the southeastern United States. Consulting with clients to help determine the relative risk of property acquisition. Responsible for technical review, editing and preparation of final reports.
- Preparation of approximately 700 Property Condition Assessments for commercial buildings being considered for financing or insurance coverage. Review of these structures for physical condition, construction type, deferred maintenance, seismic risk, and assessment of needed repairs and associated costs.
- Managed and prepared comprehensive Phase I Environmental Assessment studies for surface creeks under jurisdiction of the Santa Clara Valley Water District in Northern California. Conducted all site walks and regulatory record reviews, managed and prepared case file summaries for approximately 100 contaminated sites near creeks, provided opinions and recommendations for Phase II subsurface investigations; prepared and reviewed final reports, tracked costs and budgets. Assisted geologists with Phase II work.
- Assisted with numerous underground fuel storage tank removals and installations at gasoline service stations in the San Francisco Bay Area. Work included supervision of soil excavation and removal; installation of groundwater monitoring wells; preparation of permits and waste manifests. Managed the permitting and installation of vadose zone monitoring wells and automated monitoring systems for underground storage tanks at 45 Quik Stop stores in Northern California. Supervised site remediation activities involving

sampling, excavation and disposal of affected subsurface soils. Preparation of numerous underground storage tank and sump closure documents.

- Prepared the subsurface investigation plan for a hazardous waste transfer facility in Dalton, Georgia which included reviews of site history, operations, identification of Areas of Concern, and development of a Sampling and Analysis Plan.
- Prepared the Hazardous Waste Closure Plan for a quartz manufacturing facility and disk drive manufacturer in Santa Clara, California and an aluminum foil rolling plant in Cupertino, California that included identification of waste streams, development of sampling schemes, and removal of hazardous waste streams.

Finally, Mr. Loeb's diversity of work experience across residential, industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the Southwest region of the United States.

Steve G. Kovach
Project Manager

Education
B.A. - Botany, Miami University (Ohio)
Minor - Conservation and the Environment

Summary of Professional Experience
Mr. Kovach has over thirteen years of experience in a broad range of environmental and engineering disciplines including: engineering and environmental due diligence services, industrial air, water, and wastewater permit compliance and monitoring, hazardous waste management and disposal, electrical utilities projects, environmental engineering projects, and wetland ecology research. Mr. Kovach has worked closely with regulatory agencies including the United States Environmental Protection Agency, California Department of Toxic Substance Control, California State Water Resources Control Board, California Integrated Waste Management Board, Bay Area Air Quality Management District, East Bay Municipal Utilities District, and the United States Department of Energy.

Specifically, Mr. Kovach has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Property Condition Assessments (PCAs), Regulatory Compliance Assessments, Asbestos sampling, Lead-based Paint sampling, Radon Studies, Lead-in-water sampling, permit compliance, hazardous waste storage and handling, air quality monitoring, and environmental emergency responses.

Finally, Mr. Kovach's diversity of experience with residential, industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the San Francisco Bay Area and throughout the United States.

Jay Grenfell
National Client Manager

PARTNER Engineering and Science, Inc.

Education
B.A. in Environmental Science, University of California at Berkeley

Registrations
Registered Environmental Assessor, California, #07798 (program canceled in July 2012)
LEED Accredited Professional, United States Green Building Council

Summary of Professional Experience
Mr. Grenfell has over 14 years experience in the environmental consulting industry and has worked in various disciplines, including regulatory compliance, EH&S, asbestos abatement, air monitoring, Tier II reporting, Phase II ESAs, and environmental due diligence practices, including Phase I ESAs and PCAs. Mr. Grenfell's primary area of expertise is in the environmental due diligence field, where he has performed hundreds of Phase I ESAs and has managed thousands of due diligence projects.

Mr. Grenfell has conducted and managed Phase I ESAs on industrial, office, multi-family, government, retail, and hospitality properties. Most notably, Mr. Grenfell has managed multiple large multi-site due diligence portfolios for varied and demanding clients, including a 300-site portfolio of Class A high-rise office buildings. He has developed scopes of work, mentored field personnel, identified environmental risks, and regularly provides detailed reports within strict deadlines.

Mr. Grenfell is familiar with all aspects of due diligence property assessments and reporting standards, including Fannie Mae DUS, Freddie Mac, HUD, and is especially knowledgeable on EPA's All Appropriate Inquiry and ASTM E1527-05. In addition, he has worked with diverse client groups with unique client-specific scopes of work and reporting requirements.

A sample of Mr. Grenfell's project experience includes:

- Completed hundreds of Phase I ESAs on multi-family properties, commercial office buildings, shopping centers, gasoline stations, hotels, dry cleaners, auto repair shops, and industrial facilities, including a former blueprint and film manufacturing facility. Areas of concern included former chemical storage/transfer areas, areas of drainage/deteriorated piping, historical groundwater dispersion wells, and former underground storage tanks systems.
- Managed numerous multi-site portfolios, including a 300-site portfolio of Class A high-rise office buildings, at the time valued as the largest real estate transaction in history.
- Reviewed and evaluated hundreds of third-party Phase I, Phase II and Phase III reports
- Conducted eight Phase II Site Assessments at gasoline stations over a four-day period, coordinating and supervising the advancement of soil borings and collected soil and groundwater samples. Documented results in concise, well-written reports.

- Managed a compliance evaluation team at an 8,000 employee, 24-hour aircraft maintenance center, evaluating environmental regulatory compliance. Provided solutions and established protocols for ensuring compliance.
- Conducted 3rd-party reviews of over 150 gasoline stations, documenting previous report findings and providing a matrix listing issues and updated risk-based recommendations.

Currently, Mr. Grenfell provides management and senior review expertise of Phase I ESAs, transaction screens, and other product types, and is extensively involved in project management and client communications, maintaining an emphasis on providing exemplary client service. Mr. Grenfell is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Mr. Grenfell displays excellent written and verbal communication skills, effectively communicating environmental risks in a succinct fashion by distilling assorted information into pertinent findings and conclusions. Mr. Grenfell excels at providing effective risk-based results for multiple demanding client groups.

Mr. Grenfell has worked with national and regional lenders, banks, investors, equity stakeholders, and property owners, including:

- Bank of America
- Principal Real Estate
- Wachovia
- Wells Fargo
- Morgan Stanley
- Merrill Lynch
- Prudential
- Nationwide Life
- Bear Stearns
- Blackstone Group
- Principal Financial
- Countrywide
- Capmark Finance
- Cingular Wireless

Mr. Grenfell is also a LEED Accredited Professional (AP) who has studied energy auditing practices in commercial buildings and continues to explore energy efficiency and green business practices in the built environment.

Finally, Mr. Grenfell's diversity across managing projects across industrial, residential, retail, and commercial environments, as well as his diverse project experience, is a major contribution to Partner Engineering and Science's Project Management team.
