

Fire Station 20

FACT SHEET

Location

- Located on Coleman Avenue and Airport Boulevard at Mineta San José International Airport

Facility Features

- 18,300 square foot building
- Modern hybrid design for Aircraft and Fire Fighting Rescue
- Six firefighter dormitories, restrooms with showers, kitchen, laundry and training rooms
- Five apparatus bays designated for airport use and direct access to the airfield

Community Benefits

- One new apparatus bay to serve the San José community
- Replaces the current facility that was built in 1963 with an innovative fire fighting facility
- Sufficient parking including electric vehicle charging stations

Partnerships

- This design-build project is a collaborative effort between multiple City of San José departments:
 - Mineta San José International Airport
 - San José Fire Department
 - Public Works
- Design and Construction by:
 - Overaa Construction
 - Tenover Studio
 - Yamamar Architecture

About SJC

- SJC has continued to be America's fastest-growing major airport
- SJC welcomed a record-breaking 15.7 million passengers in 2019
- The relocation of Fire Station 20 to Coleman Avenue allows needed space for the airport's future expansion including a new Terminal south of Terminal B, a hotel and parking garage
