

# Recycle Right Truck Sign Design Contest

## Winning Designs

### Grades K-5 Winner:

Taizo Honda - Forest Hill Elementary School, 4th Grade

### Grades 6-8 Winner:

Sophia He - 7th grade, Piedmont Middle School

Artist Description: My artwork has a couple of squirrels recycling. They empty out water bottles and throw away leftover food in the garbage. This way the containers would be clean when they are recycled.

**Grades 9-12 Winner:**

**Hannah McCarthy - Branham High School, 9th Grade**

Artist Description: This poster was very fulfilling to make. Throughout the process, I was thinking "this could actually be on the side of a recycle truck" and that my art would be used to influence how people could recycle in the best way possible. The "no food" part felt creative to me and so did the "no liquid" portion because it was represented with the actual examples of the food and liquid. I added a recycling symbol and a recycling can to further expand on the idea of properly recycling. The color palette also felt like it would grab people's attention as well as educate them about recycling.

**Honorable Mentions:**

**Grades K-5 Honorable mention:**

**Claire Janse - Virtual School Program, Cambrian School District, 5th Grade**

Artist Description: I Made this poster to appeal to kids and or teenagers because we are the next generation and we will be inventing all these new things. But, we might forget about recycling and how important that is.

**Grades 6-8 Honorable mention:**

**Carly Ann Bundalian - Morrill Middle School, 8th Grade**

Artist Description: On the poster I put flowers because they are a good sign of being full of life and garbage cans with the correct things to put inside sticking out. Bright colors are nice and flowers in general always remind what naturally and beautifully lies on Earth.

**Grades 9-12 Honorable mention:**

**Sarah Osmond - Summit Tahoma Charter School, 11th Grade**

Artist Description: An artwork constructed out of paint pens, watercolor, and fine liners, shows the many objects that can and should be recycled. The phrase, "No Food. No Liquid. No Problem." is stated at the top making it simple to understand the steps of recycling while the person depicted in the middle is holding a cleaned cup and lid.
