

# DIY MASON BEE HOUSE

**materials needed:**  
**Can, Tape, Pencil, Paper,**  
**Scissors, Non-toxic/kid**  
**friendly glue, Non-toxic paint**  
**(optional)**

Your Mason bee house needs to be in an open sunny area which isn't shaded by plants. It needs to be at least 3ft above the ground and secure so it doesn't flap around in the wind.

**1. Paint the can (optional)**

**2. Cut a piece of paper into four equal squares and roll the pieces around a pencil and tape up the roll. Continue this step until you have enough rolls to fill the can.**

**3. Apply a thin layer of the glue to the bottom of the can.**

**4. Place the paper rolls in the can leaving no gaps and leave to dry.**

\*If you're scared of bees don't worry, mason bees don't sting
