Subject: Phase I Environmental Site Assessment Report:  
Oakland Road Property  
1332 Oakland Road  
San Jose, CA 95212  
APN(s): 24113019

Dear Mr. Shah:

As requested, Enviro Assessment, PC (Enviro Assessment) has prepared a Phase I Environmental Site Assessment (ESA) for 1332 Oakland Road, San Jose, CA 95212. The Property is identified by its APN(s) as 24113019. For the purpose of this report, the term "Property" shall refer to either one parcel or multiple parcels. This report was produced in accordance with the American Society for Testing and Materials (ASTM) International Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM International E1527-13) and is compliant with the All Appropriate Inquiries (AAI) rule.

---

## **1. EXECUTIVE SUMMARY**

A Phase I Environmental Site Assessment has been conducted for the Property. The objective of this Phase I ESA is to identify, to the extent feasible pursuant to the process described in ASTM International Standard E1527-13, recognized environmental conditions (RECs).

### **1.1 Significant Data Gaps**

Data Gaps are a lack of—or inability to—obtain information required by this practice, despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance. Data gaps are only significant if other information and/or professional experience raises reasonable concerns involving the data gaps. Significant data gaps may not include the exceptions identified in Section 2.4 of this report (Limitations and Exceptions).

Based on the Findings of this Phase I ESA, no significant data gaps were identified.

### **1.2 Business Environmental Risks**

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate and is not an issue required to be investigated based on the ASTM International E1527-13 Standard.

Based on the Findings of this Phase I ESA, no Business Environmental Risks were identified.

---

### **1.3 Recognized Environmental Conditions**

A Recognized Environmental Condition (REC) is the presence or likely presence of any hazardous substances or petroleum products in, on, or at the Property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Based on the Findings of this Phase I ESA, no RECs were identified.

### **1.4 Historical Recognized Environmental Conditions**

An Historical Recognized Environmental Condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Based on the Findings of this Phase I ESA, no Historical Recognized Environmental Conditions were identified.

### **1.5 Controlled Recognized Environmental Conditions**

A Controlled Recognized Environmental Condition (CREC) is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place, subject to the implementation of required controls (for example, property use

---

restrictions, activity and use limitations, institutional controls, or engineering controls).

Based on the Findings of this Phase I ESA, no Controlled Recognized Environmental Conditions were identified.

### **1.6 Vapor Intrusion**

For the purposes of this Report, hazardous substances or petroleum products in any form, including (for example) solid and liquid at the surface or subsurface, and vapor in the subsurface were evaluated for possible impacts to the Property. Any likely impacts to the Property in any form (for example soil vapor intrusion) are identified in this report.

### **1.7 Recommendations**

*ASTM International Standard E1527-13 and AAI represents the minimum level of inquiry necessary to support the LLPs. It is important, however, to understand that additional inquiry ultimately may be necessary or desirable for legal—as well as business—reasons, depending upon the outcome of this Phase I assessment and the particular risk tolerances of a user. For example, such additional inquiry may assist the user in determining whether he would have continuing obligations in the event he acquires the Property and may also assist the user in defining the scope of future steps to be taken to satisfy the obligation to take reasonable steps. Additionally, a user may be concerned about Business Environmental Risks that do not fall within the definition of a REC. If a Phase I assessment performed to the requirements of the ASTM International Standard E1527-13 identifies the presence of RECs, the user may desire to conduct additional subsurface investigation (commonly referred to as a “Phase II” environmental investigation).*

*Recommendations are not required by the ASTM International Standard E1527-13. A user should consider whether recommendations for additional inquiries or other services are desired. Recommendations are an additional service that may be useful in the user’s analysis of LLPs or business environmental risk. Typically, if Recommendations are provided, Enviro Assessment, PC will provide them in a separate letter.*

## 2. INTRODUCTION

### 2.1 Purpose

The purpose of this Phase I Environmental Site Assessment is to identify, to the extent feasible, Recognized Environmental Conditions (REC) in connection with the Property. The report follows the processes prescribed by the AAI rule and in ASTM International Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. As defined by ASTM International E1527-13, §1.1.1, the term "Recognized Environmental Conditions" refers to:

*The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*

### 2.2 Detailed Scope-of-Service

The scope of work performed for this Phase I Environmental Site Assessment report includes:

- Collecting and reviewing available environmental related information concerning the Property and other data pertinent to the specific site per the ASTM International Standard E1527-13;
- Conducting a site visit to observe current site uses, observe adjacent land use, and gather data on possible spills, or misuse of chemicals that could be considered a REC;
- Contacting appropriate regulatory personnel and reviewing regulatory files regarding the Property in question.

No additional non-scope considerations per Section 13 of the ASTM International Standard E1527-13 were included in this Phase I Environmental Assessment report.

---

### **2.3 Significant Assumptions**

No significant assumptions were made in this assessment.

### **2.4 Limitations and Exceptions**

#### Limitations

This report is applicable only for the project and site studied. Report findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied. This report contains information and data provided by others; Enviro Assessment in no way warrants the accuracy or completeness of the information provided by those sources. Enviro Assessment's services are performed in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This report is prepared using the ASTM International Standard E1527-13 and includes several inherent limitations, including but not limited to: Section 4.5.1 - Uncertainty Not Eliminated, Section 4.5.2 - Not Exhaustive, Section 7.4 - No Sampling, and Section 7.5.2.1 - Reliance. This report was requested to be produced within a specific time frame. Any information received within 20 days following this production date would be included in an addendum letter. This could include RECs that were not previously defined.

#### Exceptions

No exceptions to or deviations from the ASTM International Standard E1527-13 was made during the course of work, with the exception of the following:

- No interviews were conducted with local agencies as part of this assessment. Relevant local agencies for the area have policies of referring requests for interviews to their file review departments.
- A complete list of previous occupants of the Property was not located; therefore, no determination can be made based on every previous use of the Property.
- A complete history in five-year intervals was not reasonably ascertainable.

- 
- All obvious uses of the Property dating back to the first developed use, or back to 1940, were not obtainable for this report using the standard historical sources cited in the ASTM International Standard 1527-13 in Sections 8.3.4.1 through 8.3.4.8.

These limitations are not anticipated to represent a significant data gap for the investigation.

## **2.5 Special Terms and Conditions**

Enviro Assessment has been authorized by Nirav Shah to perform a Phase I Environmental Site Assessment of the Property. It is Enviro Assessment's understanding that Mr. Shah will use the information contained in this report for due diligence purposes. Without prior written consent of the client, Enviro Assessment will keep confidential, and not disclose to any person or entity, any data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

## **2.6 User Reliance**

This report was prepared for the exclusive use of Nirav Shah. No other person or entity is entitled to rely upon this report without the specific written authorization of Enviro Assessment. Such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. Enviro Assessment specifically disclaims any responsibility for any unauthorized use of this report. Based on the ASTM International Standard, this Phase I report expires 180 days from the date the work was conducted.

# **3. SITE DESCRIPTION**

## **3.1 Location and Legal Description**

The Property is located at 1332 Oakland Road, San Jose, CA 95212. The Property is identified by its APN(s) as 24113019. A Vicinity and Site Map are located on Plates A1 and B1, respectively.

---

### **3.2 Site and Vicinity General Characteristics**

The Property is relatively flat and consists of an approximately .25-acre parcel. The Property is located on the northeast corner of the intersection of Oakland Road and Faulstich Court, within the northeast-central portion of the city of San Jose, California. The surrounding area consists of a mix of commercial and residential properties. The city of San Jose is located within the Santa Clara Valley, between the Santa Cruz Mountains to the south, San Francisco Bay to the north, and the Diablo Mountains to the east.

### **3.3 Description of Improvements on Property**

The Property consists of vacant land.

### **3.4 Current Uses of the Adjoining Properties**

Aerial imagery and parcel data were reviewed in an attempt to determine the types of use of the adjoining properties. The following observations are discussed below:

<b>Direction</b>	<b>Type of Use</b>
North	Residential
South	Commercial
East	Residential
West	Commercial

## **4. USER PROVIDED INFORMATION**

### **4.1 Title Records**

Chain of title reports were provided by the client for use in preparing this report. A Preliminary Title Report was reviewed for pertinent title records and/or judicial records. A Commitment for Title Insurance was reviewed. No records were identified that would appear as a significant environmental condition.

---

#### **4.2 Environmental Liens or Activity and Use Limitations**

No additional information was provided identifying actual knowledge of environmental liens or activity and use limitations recorded against the Property. Included in the records review section is a search of state deed restrictions, liens, and use limitations.

#### **4.3 Specialized Knowledge**

No information was provided identifying specialized knowledge or experience that is material to Recognized Environmental Conditions in connection with the Property.

#### **4.4 Commonly Known or Reasonably Ascertainable Information**

No information was provided identifying knowledge of commonly known or reasonably ascertainable information related to the Property.

#### **4.5 Valuation Reduction for Environmental Issues**

No information was provided identifying knowledge of valuation reduction of the Property.

#### **4.6 Owner, Property Manager, and Occupant Information**

Information provided by the owner of the Property is discussed in Section 7 of this report.

#### **4.7 Reason for Performing Phase I**

The Phase I has been requested by Nirav Shah for due diligence purposes.

#### **4.8 Other**

No other information related to the Property was provided for review.

### **5. RECORDS REVIEW**

#### **5.1 Standard and Additional Environmental Records**

The Environmental Records used for this Phase One ESA were obtained through Environmental Data Resources, Inc. (ERIS<sup>®</sup>) of Austin, Texas. The search radius used for each of the records is listed below and is based on the ASTM International Standard E1527-13 Sections; 8.2.1 and 8.2.3. The date of each of the government records searched and the date ERIS<sup>®</sup> obtained the records are

listed in the ERIS<sup>®</sup> Report (attached). In addition to the search results, lists of sites which may be located within the search area but, due to lack of information, cannot be accurately located are provided (Unplottable Sites). This Unplottable Report list is reviewed and all sites which may be included within the search radius have been included in this report.

### 5.2 Database Results

For the full name, description, and the date each of the databases were last updated, please refer to the Government Records section of the ERIS<sup>®</sup> Report.

### 5.3 Methodology of Records Review

Enviro Assessment conducts *Regulatory Agency File and Records Reviews* in accordance with ASTM International Standard E1527-13; sections 8.1.1 through 8.1.8. *The purpose of the regulatory file review is to obtain sufficient information to assist the environmental professional in determining if a recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a de minimis condition exists at the Property.*

*Standard historical sources* (8.3.4.1) that are *practically reviewable* (3.2.96) and *publicly available* (3.2.72) have been examined by Enviro Assessment, PC personnel. Records that are not *practically reviewable* were not used to determine any professional opinion in regard to potential impacts to the Property. This review of the *standard historical sources* includes case files that meet the definition requirements of a *recognized environmental condition, historical recognized environmental condition, controlled recognized environmental condition, or a de minimis condition*. Please refer to the ERIS Report and appendices attached to this report for further details (Terms and definitions in italics denote direct references from ASTM International Standard E1527-13).

### **5.4 Property**

The Property was not listed in the ERIS records searched.

### **5.5 Adjoining Properties**

The ERIS Report was reviewed for any adjoining sites which may pose a risk of significant environmental concern to the Property. The following sites of potential environmental concern are discussed below:

- R & D MANUFACTURING (R & D PRECISION MANUFACTURING INC) is an adjoining property to the southeast and was listed in the CERS HAZ, SANTA CLARA CUPA, FINDS/FRS, SANJOSE HM, HAZNET, and RCRA NON GEN databases. The CERS HAZ listing details that in 2014, the site was listed as a hazardous waste generator with general violations. Compliance was achieved in 2016. The SANTA CLARA CUPA listing details that the site generates 100 kg of hazardous waste material a year. The SANJOSE HM lists the site in 2017 as an auto wrecking/miscellaneous simple facility. The HAZNET listing details that between 2000 and 2014, the site generated between 0.125 and 0725 tons of hazardous waste per year. The RCRA NON GEN listing lists the site as a handler of hazardous waste in 2000 with no violations found as of March 2019. No impact to the Property is anticipated from this site based on the amount of regulatory oversight.
- City of San Jose at 1350 Oakland Road is presumed to be on the adjoining property to the northeast and was listed in the CHMIRS database. In 2008, grease blocking a main sewer line at a residence spilled 780 gallons of sewage; of which 600 gallons spilled into the creek. No impact to the Property is anticipated from this site based on the type of containment and amount of regulatory oversight.

### **5.6 Surrounding Properties**

The ERIS Report was reviewed for any surrounding sites which may pose a risk of significant environmental concern to the Property. The following sites of potential environmental concern are discussed below:

- 
- 850 Faulstich Court is located 0.03 miles to the southeast and is listed under the names SUMMIT STEEL WORKS and Saratoga Plastics.
    - SUMMIT STEEL WORKS was listed in the CERS HAZ, SANTA CLARA CUPA, SANJOSE HM, and RCRA NON GEN databases. The CERS HAZ details that the site is listed a chemical storage facility and a hazardous waste generator and that several general/regulatory violations were noted in 2013 and 2014. The SANTA CLARA CUPA database details that the site's facility generates between 100 kg to under 5 tons per year. The SANJOSE HM database details that the site is an auto wrecking facility. No other relevant information was given. The RCRA NON GEN database details that, as of March 2019, there are no compliance monitoring and enforcement violation records associated with the facility. No impact the Property is anticipated from this site based on the nature of the violations, amount of regulatory oversight, and the regulatory nature of the remaining databases.
    - Saratoga Plastics was listed in the SANTA CLARA LO database. Geotracker, which was provided as a link via the County of Santa Clara link within the database details that in 1989, an 8,000-gallon and a 10,000 gallon diesel underground storage tank and their piping were removed from the site. In 1990, a soil boring revealed that the groundwater had a diesel sheen. In 1996, a groundwater monitoring well was constructed, but samples were unsuccessful due to the lack of water. In 2000, four borings were drilled, and some contamination was found in the groundwater. The Santa Clara Valley Water District concluded that there was no threat due to the levels found and the case was closed in 2001. No impact the Property is anticipated from this site based on case closure, and the amount of regulatory oversight.

The remaining cases listed in the ERIS Report were for regulatory database listings, permitted facilities listings, closed/remediated cases, and historical database listings; including sites which, based on their distances, are not anticipated to impact the Property. Please refer to the Appendix for further details on these sites.

### 5.7 Unplottable Sites

The Unplottable Report was reviewed. No sites are listed that are within the search radius of the Property.

### 5.8 Physical Setting Sources

According to the most recent USGS Topographic maps covering the Property and vicinity, the Property is relatively flat and lies at approximately 67 feet above mean sea-level.

### 5.9 Historical Use Information on the Property and Adjoining Properties

#### Historical Topographic Maps

Topographic maps of the Property were reviewed as part of this investigation. The results are discussed below:

Date	Map Description
1889 - Revised 1939	15 Minute USGS Topo Map. No structures are depicted on the Property or on the adjoining properties. The lack of elevation lines demonstrates the Property as relatively flat. Coyote Creek is visible running to the northeast. A road is depicted to the west, running roughly north-south. Two structures are depicted in the surrounding area to the west and northwest.
1953 - Revised 1955	7.5 Minute USGS Topo Map. A structure is depicted on the northern portion of the Property. Another structure is depicted on the adjoining site to the southeast. Oakland Road is now represented on the map and is depicted as a secondary highway. An orchard is shown in the surrounding area to the southeast. A few more structures are visible to the north, and a drive-in theatre is labeled to the west.
1961 - Revised 1980	7.5 Minute USGS Topo Map. Property is relatively unchanged. The structure to the southeast is no longer visible and there is now a structure on the adjoining property to the north. A railroad is also depicted further south. The 1980 revision depicts several developed roads to the north-northeast of the Property, with that area being labeled as a Trailer Park and three large structures to the southwest and southeast.
2015	7.5 Minute USGS Topo Map. No structures are depicted on the Property, adjoining properties, or in the surrounding area. This era map does not depict structures.

These maps are included in the Appendix.

#### Fire Insurance Maps

An attempt was made by ERIS to obtain Fire Insurance Maps (FIM) for the period covering the years 1866 through the present in order to determine what types of activities were conducted on the Property and on adjoining properties. FIM coverage was not available for the Property or surrounding area.

---

City Directories

A search of local historical city directories was conducted by ERIS for the Property. The review included directories in five-year intervals from 1930 to 2018 (as available). The results are discussed below:

<b>Date</b>	<b>Listing Description</b>
1966	BENSON C E
1971	CURT I LINDA GALLO JOANNE
1976	FIGURE CRAFT PROD
1987	XXXX
1990-91	XXXX
1995-96	XXXX

No other listings were found for the Property; however, please refer to the ERIS City Directory Report in the Appendix for the numerous listings for the surrounding properties for more details.

Based on the aerial photos, topographic maps, and City Directory listings of the site, in addition to information obtained while conducting interviews, the Property was developed with a structure and associated outbuildings sometime before 1948. Between 1954 and 1960, an additional structure was added to the north of the original structure. Between 1968 and 1974, a third structure was added to the east of the original structure and the outbuildings were removed. Between 1985 and 1993, the original structure and the structure to the east were removed, leaving just the structure to the north. Between 1993 and 1999, the structure to the north was removed, leaving the Property vacant. Between 2004 and 2009, a fence was installed along the southwest portion of Property. Prior to the development of the original structure, the site existed as a single-family rural residence and agricultural land dating back to the first located aerial photograph from 1948. Historical use of the site includes, but is not limited to agricultural land, single-family residence, single-family residences, presumed storage area for vehicles, and vacant land.

## 6. SITE RECONNAISSANCE

A visual reconnaissance of the Property was conducted on May 23, 2019 by Ms. Balcaen, under the supervision of Mr. Robinson. A site map and photographs of the Property are attached to this report in the Appendix.

### 6.1 Methodology and Limiting Conditions

The periphery of the Property was inspected. A detailed inspection was conducted of all major site features visible from the public portions of the Property.

### 6.2 Exterior and Interior Observations

Observations made during the site visit are summarized in the following table:

General Site Setting	Site Visit Observations
Current use of Property	The Property currently consists of vacant land.
Evidence of past use of Property	No past use was evident.
General description of Property structures	The Property consists of no structures.
Physical setting of Property	Site is relatively flat.
Current use of adjoining properties	The adjoining properties consist of R & D Precision Manufacturing and Dependable Rooter & Plumbing to the south-southeast, South Bay Mobile Home Park to the north and east, and a Roofline Supply to the west.
Evidence of past use of adjoining properties	No past use was evident.
Current land uses in surrounding area	Commercial and residential.
Adjoining Roads	The adjoining roads consist of Oakland Road and Faulstich Court.
Potable water source	Presumed to be City water based on the observation of two rusty pipes near the
Sewage disposal source	Public sewer.
Interior and Exterior Observations	
Odors	No odors were identified.
Presence of pits / ponds / lagoons / pools of liquid	None observed.

Floor drains, sumps, or wastewater	None observed.
Stained, corroded, cracked, or patched concrete and/or asphalt; stained soil	Remnants of a concrete slab foundation from a former structure were observed on the southeast central portion.
Electric or hydraulic equipment likely to contain PCBs	None observed.
Storage tanks	None observed.
Drums or other containers	None observed.
Hazardous substances or petroleum products	None observed.
Heating or cooling systems	None observed.
Stressed vegetation	None observed.
Solid waste	Windblown and abandoned debris was observed, including a few household appliances.

## 7. INTERVIEWS

An attempt has been made to obtain historical—as well as current—information relative to the Property from several individuals and local agencies. The objective of the interview process is to obtain any information indicating Recognized Environmental Conditions in connection with the project site.

### 7.1 Interview with Owner or Site Manager

An Environmental Questionnaire and Disclosure Statement was sent to Nirav Shah, on May 15, 2019, via e-mail. We received the completed questionnaire from Mr. Shah via e-mail on May 20, 2019. The questionnaire was reviewed, and no significant environmental concerns were noted in the answers provided.

### 7.2 Interview with Local Government Officials

#### Santa Clara County Consumer and Environmental Protection Agency

The Santa Clara Consumer and Environmental Protection Agency was contacted by e-mail on May 20, 2019, as part of the records review of the subject property. We requested any fire department reports related to under/above ground storage tanks or hazardous waste issues (permitting, tank

---

removal, spillage, or contaminations), fire code violations, and the date of last inspection. A second request was made via e-mail on May 22, 2019 and a third request was made via e-mail on May 30, 2019. As of the date of this report we have not received a response.

#### Santa Clara County Assessor

Santa Clara County Assessor Parcel Viewer was reviewed on May 17, 2019, as part of the records review of the Property. We researched building permits with dates issued, and violations, in addition to dates and descriptions of any structures built, remodeled, or removed from the Property. Nothing of an environmental nature was noted. We also contacted the Assessor's office via e-mail on May 17, 2019. We received a response via e-mail on May 20, 2019 from Melissa Belloso, who stated that they have no records for the Property.

#### City of San Jose Building Department

The City of San Jose Building Department was contacted via e-mail on May 17, 2019 as part of the records review of the subject property. We asked for a list of building permits and the dates issued. We received a response via e-mail on May 20, from Anthony Thornberry, who referred us to their online permit portal. We searched the database and found the following two permits: a Permit dated 9/13/1994 for the demolition of a residence at 1332 and 1338 Oakland Road, and a review of site plan for a car wash and smog check station permit, dated 10/3/2006.

#### San Jose Environmental Services Department

The San Jose Environmental Services Department was contacted by e-mail on May 17, 2019, as part of the records review of the subject property. We requested any fire department reports related to under/above ground storage tanks or hazardous waste issues (permitting, tank removal, spillage, or contaminations), fire code violations, and the date of last inspection. A second request was made via e-mail on May 22, 2019. We received a response via e-mail on May 23, 2019 from Monica Dinsmore, who stated that they have no records for the Property.

#### San Jose Fire Department

The San Jose Fire Department was contacted by e-mail on May 17, 2019, as part of the records review of the subject property. We requested any fire department reports related to under/above

ground storage tanks or hazardous waste issues (permitting, tank removal, spillage, or contaminations), fire code violations, and the date of last inspection. A second request was made via e-mail on May 22, 2019, and a third request was made via e-mail on May 30, 2019. As of the date of this report we have not received a response.

#### GeoTracker / EnviroStor Database Review

The GeoTracker and EnviroStor databases were reviewed on May 17, 2019, for any additional information available regarding the Property. We found the following information: GeoTracker lists four open verification monitoring sites, one closed and completed cleanup program site, and 39 closed LUST cleanup sites. EnviroStor lists two State Response sites, two inactive tiered permit sites, one HAZ waste- RERA undergoing closure, and two voluntary cleanup sites – one a fertilizer company and the other a chemical business. None of these listings are anticipated to impact the Property based on distance and case status.

### **7.3 Interview with Others**

No additional interviews were conducted in this assessment.

## **8. FINDINGS**

The Property is located at 1332 Oakland Road, San Jose, CA 95212. The Property is identified by its APN(s) as 24113019. The Property currently consists of vacant land.

The Property was not listed in the ERIS Report.

The ERIS Report was reviewed for any adjoining and/or surrounding sites which may pose a risk of significant environmental concern to the Property. Several sites of potential concern were identified in the surrounding area. Please refer to Sections 5.5 and 5.6 of this report for additional details on these sites.

---

The Unplottable Report was reviewed. No sites were listed that were within the search radius of the Property. Please refer to Section 5.7 of this report for additional details on these sites.

Based on the aerial photos, topographic maps, and City Directory listings of the site, in addition to information obtained while conducting interviews, the Property was developed with a structure and associated outbuildings sometime before 1948. Between 1954 and 1960, an additional structure was added to the north of the original structure. Between 1968 and 1974, a third structure was added to the east of the original structure and the outbuildings were removed. Between 1985 and 1993, the original structure and the structure to the east were removed, leaving just the structure to the north. Between 1993 and 1999, the structure to the north was removed, leaving the Property vacant. Between 2004 and 2009, a fence was installed along the southwest portion of Property. Prior to the development of the original structure, the site existed as a single-family rural residence and agricultural land dating back to the first located aerial photograph from 1948. Historical use of the site includes, but is not limited to agricultural land, single-family residence, single-family residences, presumed storage area for vehicles, and vacant land.

Interviews were conducted with individuals and local government agencies in an attempt to obtain any information indicating Recognized Environmental Conditions in connection with the Property. Please refer to Section 7 of this report for additional details on these interviews.

Enviro Assessment personnel identified no significant observable contaminated areas on the Property during the site reconnaissance.

## **9. OPINION**

All available standard historical sources have been reviewed in an attempt to identify the likelihood of past uses of the Property and surrounding area, having led to Recognized Environmental Conditions (RECs) in connection with the site. No significant environmental concerns have been identified based on the historical use of the Property or surrounding area.

---

The Property was not listed in the ERIS Report; therefore, no RECs were identified within any database listings for the site.

The ERIS Report was reviewed for any adjoining, surrounding, or Unplottable sites which may pose a risk of significant environmental concern to the Property. Based on the description of the cases, the type of database listings, the amount of past regulatory oversight, and the relative distances to the Property, the sites listed are not anticipated to impact the Property at this time.

Enviro Assessment personnel did not observe any visible RECs related to the Property.

No significant environmental concerns were identified during the interviews conducted for the Property.

## **10. CONCLUSIONS**

Enviro Assessment has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM International Standard E1527-13 practice for the Property located at 1332 Oakland Road, San Jose, CA 95212. The Property is identified by its APN(s) as 24113019. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Property.

## **11. DEVIATIONS**

No deviations from ASTM International Standard E1527-13 have been noted during the course of this assessment.

## **12. ADDITIONAL SERVICES**

No additional services as listed in the ASTM International Standard E1527-13 have been requested in writing and placed under contract in regard to this assessment; including, but not limited to, asbestos testing of material at the site and possible drug lab uses of the site.

Received results of hazardous waste determination for a composite sample of grinding dust and fines from shop fabrication and operations. Results indicated the waste fines are hazardous waste (Zinc 10,000 mg/kg). Please begin to manage waste fines from grinding, fabrication and operations as hazardous waste unless separate determination is made for other waste streams generated. Storage, labeling and disposal requirements will apply to this hazardous waste stream. Note: Sample was analyzed for CAM-17 Metals for hazardous waste classification against the Total Threshold Limit Concentration per Title 22 of the California Code of Regulations by Curtis Tompkins Ltd. in Berkeley, CA Questions, please contact Jeffrey M. On-site to conduct a hazardous waste generator permit investigation. Facility, Roofline Supply & Delivery, is a roofing supply distributor. Facility walk through was conducted with Sean Alborzi, branch manager. Facility stores asphalt shingles, aerosols, acrylic and silicone coatings, caulk, mastic, and general sealants. Mr. Alborzi noted that the facility does not accept returns unless they are able to be resold. Expired items are sent back to manufacturer or are sold at-cost to contractors. No spills have been observed by Mr. Alborzi. Observed in warehouse: waste 55 gallon drum of Rooftek white acrylic roof coating waste 5 gallon bucket of GAF acrylic top coat Mr. Albarzi was unsure of details surrounding waste, including why it was there, since when, and how to handle it. Mr. Alborzi stated that it is very rare for any waste to be handled by facility. Based on these observation, facility will be permitted for generating <100kg of waste per year. Mr. [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Violation Notes:**

Returned to compliance on 05/03/2017. Empty 5 gallon cans of mineral spirits were observed in the fleet maintenance shop. Upon inquiry, Mr. Calvillo stated that the mineral spirits are used to wash equipment in the red parts washer. A small quantity of brown-black liquid and three brake cleaner aerosol cans were observed in an open, red parts washer. The parts washer does not have an attached accumulation container and waste solvent remains in the open, parts washer tank. Upon inquiry as to how the used parts washer solvent is disposed, Mr. Calvillo stated that it evaporates. Allowing used parts washer solvent to evaporate for the purpose of disposal constitutes illegal treatment of hazardous waste. Ensure that any used parts washer solvent is collected, managed, and disposed of as hazardous waste (e.g. properly labeled, accumulated in a closed, compatible container, transported for disposal by a hazardous waste hauler).

One 55 gallon drum is used to accumulate used antifreeze in the fleet maintenance shop. Ensure used antifreeze does not accumulate for longer than one year.

**Violation Description:**

Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following:  
 ? accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator  
 ? the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information  
 ? container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area  
 ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated  
 ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.

Returned to compliance on 05/03/2017. Coarse metal fines were observed on the ground around the lathe in the fleet maintenance shop. Current practice is to sweep up the metal fines and dispose of as non-hazardous trash. Metal fines may contain RCRA-regulated metals (e.g. chromium, lead). A hazardous waste determination must be conducted using generator knowledge or laboratory testing, as outlined below. If determined to have RCRA-regulated metals in regulated concentrations, the coarse metal fines must be collected and managed as scrap metal or as fully-regulated hazardous waste. Provide documentation of the hazardous waste determination to HMCD for review.

**Violation Description:**

Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

NOTE TO FACILITY: - Upon your next HMBP submittal, ensure that each hazardous material/waste is properly identified by its hazardous material type (pure, mixture, waste). On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed in HMBP-reportable quantities: 1. Used Oil: 110 gallons total 2. Used Antifreeze: 55 gallons total 3. Motor Oil: 205 gallons total 4. Liquefied Petroleum Gas: 699 gallons total (600 gallon tank + cylinders for forklift and other use throughout facility) It is of note that small quantities of carbon dioxide, argon/argon dioxide mixture, oxygen, acetylene, nitrogen, diesel exhaust fluid (DEF), and muriatic acid were observed, but below

The facility is commingling paper-encased used oil and fuel filters with metal-encased used oil and fuel filters for management as "drained used oil and gasoline filters." At the time of inspection, about half of the two used filter drums' contents were used paper filters. Paper used oil and fuel filters do not meet the definition of "drained used oil filter" and cannot be managed as "drained used oil and gasoline filters," because the used paper filters cannot be recycled for their scrap metal value. Begin collecting and managing the used paper filters as hazardous waste (e.g. used oil-saturated debris).

Mr. Luna stated that the facility disposes of the contaminated cardboard to the trash. 3) Absorbent is used to clean-up small spills of used oil, used antifreeze, diesel, and other automotive-related fluids. There is no collection container for used absorbent. Rags, cardboard, absorbent, and other debris contaminated with hazardous waste and hazardous materials may meet hazardous waste criteria or the definition of "used oil." A hazardous waste determination must be conducted, as outlined below, on each of the above-identified waste streams. UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: The Chief Financial Officer (CFO) Letter is incorrectly submitted in the Certification of Financial Responsibility element and the Certification of Financial Responsibility form is incorrectly submitted in the UST Site Plan element on CERS. WITHIN 30 DAYS, UPLOAD THE FORMS TO THE CORRECT SUBMITTAL ELEMENT AND RE-SUBMIT THE UST INFORMATION PAGES. On-site for a routine inspection in conjunction with the Annual Monitoring System Certification performed by Alltech Petro, Inc. Service Technician, Chad White on 6/8/2017. Mr. White has a current ICC Service Technician Certification and Veeder-Root certification. This inspection was completed and the report issued on 6/13/2017. The underground storage tank (UST) systems are comprised of two manifolded tanks (10,000 gallon Diesel, 2,000 gallon Regular Unleaded) that share an annular space. The tanks have reported installation date of 8/31/1993 and are used for motor vehicle fueling. [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

The following minor violations were observed, but corrected at the time of inspection. G020C: Marking of Hazardous Waste: One cart used to accumulate used oil and one cart used to accumulate used coolant are marked with illegible hazardous waste labels (information has wiped off). G412C: Container Marking: Used Oil/Fuel Filters: Two 55 gallon drums used to collect used oil and gasoline filters is not fully labeled as "drained used oil and gasoline filters." On-site to conduct a routine hazardous waste inspection. This inspection was initiated on 6/8/2017 and completed on 6/13/2017. The facility conducts automotive maintenance on their fleet vehicles and maintains an underground tank used for motor vehicle fueling. The diesel portion of the manifolded UST is still in-use, but the gasoline portion of the UST has been emptied and is no longer used. Hazardous wastes generated include used oil, used coolant, used diesel (from parts washing), and used oil and fuel [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Returned to compliance on 10/29/2014. Facility has not made an adequate hazardous waste determination for the sludge from the sheet metal speed grain machine. Currently the sludge is being placed in the scrap metal bin for recycling, however the sludge does not meet the definition of scrap metal in California due to the size of the grain waste particles. Conduct a hazardous waste determination by analyzing the sludge for California Regulated Heavy Metals (Title 22 Metals). Perform a total threshold limit concentration test (TTLIC test) for Title 22 Metals at a State Certified Laboratory.

**Violation Description:**

Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Returned to compliance on 04/16/2018. Facility uses annual SP001 tank inspection logs to satisfy tank integrity testing requirements. Logs are maintained by a third party vendor and facility did not have records available for inspection. Facility must maintain their own records to demonstrate compliance with tank integrity testing requirements.

**Violation Description:**

"Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan:

1. On a regular schedule.
2. After making material repairs.
3. Use non-destructive testing.
4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."

Returned to compliance on 12/12/2014. Records demonstrating hazardous waste tanks are inspected daily were insufficient.

**Violation Description:**

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:

- 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
- 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
- 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
- 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
- 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Returned to compliance on 04/16/2018. Description of security measures do not address security lighting.

**Violation Description:**

Failure to describe in the SPCC Plan facility security measures including:

1. How access to the oil handling, processing, and storage areas is secured and controlled.
2. How master flow and drain valves are secured.
3. How unauthorized access to starter controls on oil pumps is prevented.
4. How out-of-service and loading/unloading connections of oil pipelines is secured.
5. The appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.

Returned to compliance on 04/16/2018. SPCC plan includes an attachment for training logs to be used for annual SPCC briefing and oil handling training. While these logs were used for compliance team, a different form was used for drivers and mechanics for recent years. Amend plan to include forms for drivers and mechanics, or complete all employee trainings with the forms already attached to the plan.

**Violation Description:**

Failure to include in the SPCC plan an adequate description of employee training. Training shall address, at a minimum: operation and maintenance of equipment to prevent discharges; discharge procedure protocols; applicable pollution control laws, rules, and regulations; general facility operations; content of the facility SPCC plan; and annual discharge prevention briefings for oil-handling personnel to assure adequate understanding of the SPCC plan.

**Violation Notes:**

A hazardous waste tank assessment was not on file for review for the 500 gallon used oil tank.

**Violation Description:**

Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information:

- (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed;
- (2) Hazardous characteristics of the waste(s) to be handled;
- (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of:
  - (A) Factors affecting the potential for corrosion, including but not limited to:
    - 1. Soil moisture content;
    - 2. Soil pH;
    - 3. Soil sulfides level;
    - 4. Soil resistivity;
    - 5. Structure to soil potential;
    - 6. Influence of nearby underground metal structures (e.g., piping);
    - 7. Stray electric current; and,
    - 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and
  - (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following:
    - 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic;
    - 2. Corrosion-resistant coating (such as epoxy or fiberglass) with cathodic protection (e.g., impressed current or sacrificial anodes); and
    - 3. Electrical isolation devices such as insulating joints and flanges;
  - (4) For underground tank system components that are likely to be affected by vehicular traffic, a determination of design or operational measures that will protect the tank system against potential damage; and
  - (5) Design considerations to ensure that:
    - (A) Tank foundations will maintain the load of a full tank;
    - (B) Tank systems will be anchored to prevent flotation or dislodgement where the tank system is placed in a saturated zone, or is located within a seismic fault zone;
    - (C) Tank systems will withstand the effects of frost heave; and
    - (D) The installation of a corrosion protection system that is field fabricated shall be supervised by an independent corrosion expert to ensure proper installation.

Onsite today for follow-up inspection to prior inspection completed on 11/12/14, noted the following: -Drain Pans for used oil are properly labeled with detail information, including the words "Empty Daily." -Tank Inspections are being completed daily during normal business operations; additionally containers are being inspected weekly. -A binder is located in Jeff Cook's office with a log of used oil and waste coolant pick-ups, as well as copies of the consolidated manifests. The current used oil tank is being replaced with a new double wall steel 500 gallon tank. The new tank has a completed tank assessment, however, the tank has not yet been installed as the old tank is being closed through San Jose Fire Department and the new tank is in plan check process with building and permitting. Please provide final notification once tank installation is complete via email to

Facility has one maintenance shop where all petroleum bulk storage containers and tanks are located. Annual tank facility statement submitted via CERS. Facility is eligible for a Tier 1 Template but choses to implement a full SPCC plan. 500 gallon used oil tank: double walled tank with float gages in primary and secondary containment and audible high liquid level alarm for primary containment. 500 gallon motor oil tank, 500 gallon gear oil tank, 500 gallon transmission oil tank: double walled tanks with dip sticks to check liquid level. Access to secondary containment port for visual inspection. Facility uses a fast response system to prevent overflow for all tanks and containers. Liquid levels are checked prior to filling or float gages are in view during filling operations. Daily, weekly, and monthly tank inspections are logged. Monthly tank inspections according to SP001 standard are attached to the plan. Facility keeps up to 14x55 gallon containers of [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Site History:**

Background The subject site was used as a bulk fuel operation. The record is not clear as to when the bulk fuel operation began operating, but it could date back to the 19th century although there is some evidence it may have started in the 1920s. No records of original tank installations are known to exist. The site was also used as a retail fuel dispensing facility doing business as Spartan Service Center. Currently the site is occupied by a two story storage business. 1993 Six soil borings were installed. Free product was reported in each of the borings. Nine USTs were removed from the site. Soil samples collected beneath the former USTs detected up to 6,000 ppm TPH-g and 7,500 ppm TPH-d. 1994 Six above ground fuel storage tanks were removed from the site. 1995-96 Three exploratory trenches were excavated to assess the lateral and vertical extent of contamination. Groundwater was encountered at 26 feet bgs. TPH-g and TPH-d were detected at concentrations up to 24,000 ppm in soil. In April 1996, five monitoring wells were installed. Floating product was noted in the vicinity of MW-1 and MW-3, and in boring B-1. In soil up to 7.8 ppm TPH-g, 210 ppm TPH-d, and 0.31 ppm benzene were detected. In groundwater collected from MW-4 TPH-g and TPH-d were detected at 110 and 450 ppb, respectively. It was noted that groundwater flow was toward the west which is in the direction of a school which borders the western side of the site. In November 1996, two additional groundwater monitoring wells were installed to assess the downgradient extent of the contaminant plume. In soil up to 1,400 ppm TPH-g and 570 ppm TPH-d were detected. A groundwater sample collected from B-4 contained 15,000 ppb TPH-g, 690 ppb MTBE, and 990 ppb Benzene. 1998 An excavation to remove contaminated soil took place in 1998. The excavation reached a depth of 14 to 16 feet below ground surface. Impacted soil was excavated and stockpiled on-site. Off-hauling took place in two stages: the first stage removed 1516 tons of soil and the second 648 tons. Off-hauled soil was transported to Forward landfill in Manteca CA. 2006 From June 6, 2006 to December 28, 2006 a SVE system was operating. During the six months the system operated approximately 5.91 gallons of hydrocarbons were removed. The system was turned off due to inefficient extraction results.

#### Site History:

##### Background

The subject site was used as a bulk fuel operation. The record is not clear as to when the bulk fuel operation began operating, but it could date back to the 19th century although there is some evidence it may have started in the 1920s. No records of original tank installations are known to exist. The site was also used as a retail fuel dispensing facility doing business as Spartan Service Center. Currently the site is occupied by a two story storage business.

1993

Six soil borings were installed. Free product was reported in each of the borings.

Nine USTs were removed from the site. Soil samples collected beneath the former USTs detected up to 6,000 ppm TPH-g and 7,500 ppm TPH-d.

1994

Six above ground fuel storage tanks were removed from the site.

1995-96

Three exploratory trenches were excavated to assess the lateral and vertical extent of contamination. Groundwater was encountered at 26 feet bgs. TPH-g and TPH-d were detected at concentrations up to 24,000 ppm in soil.

In April 1996, five monitoring wells were installed. Floating product was noted in the vicinity of MW-1 and MW-3, and in boring B-1. In soil up to 7.8 ppm TPH-g, 210 ppm TPH-d, and 0.31 ppm benzene were detected. In groundwater collected from MW-4 TPH-g and TPH-d were detected at 110 and 450 ppb, respectively. It was noted that groundwater flow was toward the west which is in the direction of a school which borders the western side of the site.

In November 1996, two additional groundwater monitoring wells were installed to assess the downgradient extent of the contaminant plume. . In soil up to 1,400 ppm TPH-g and 570 ppm TPH-d were detected. A groundwater sample collected from B-4 contained 15,000 ppb TPH-g, 690 ppb MTBE, and 990 ppb Benzene.

1998

An excavation to remove contaminated soil took place in 1998. The excavation reached a depth of 14 to 16 feet below ground surface. Impacted soil was excavated and stockpiled on-site. Off-hauling took place in two stages: the first stage removed 1516 tons of soil and the second 648 tons. Off-hauled soil was transported to Forward landfill in Manteca CA.

2006

From June 6, 2006 to December 28, 2006 a SVE system was operating. During the six months the system operated approximately 5.91 gallons of hydrocarbons were removed. The system was turned off due to inefficient extraction results.

**Site History:**

1985 - In later reports, it is noted that 4 monitoring wells (2 groundwater and 2 vadose) were installed in June. Documentation of the well installation were not found in the file. 1989 - In October, the underground storage tanks (USTs) were precision tested and a gasoline and a diesel UST failed. 1990 - In July, the 4 USTs and piping were removed and replaced at the site. The USTs were reported to be in good condition upon removal. 12 soil samples were collected from approximately 11 feet below the ground surface (ft bgs) and were reported to contain low to non-detectable concentrations of the constituents of concern (COCs). It was reported that a monitoring well (MW3) was destroyed during the UST removal activities. Based on the presence of odors beneath the unleaded and diesel USTs, additional soil was removed to approximately 20 feet. The remainder of the excavation was deepened to 15 feet to accommodate the new USTs. 2 confirmation soil samples (UV1 and DC1) were collected and were not reported to have concentrations of

the COCs present above the laboratory reporting limits. Approximately 600 cubic yards of soil were removed. Following removal of the piping, 4 soil samples were collected from 2-3 ft bgs and were reported to have maximum concentrations of 10,000 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 95 ppm Benzene, 690 ppm Toluene, 180 ppm Ethylbenzene, and 950 ppm Xylenes in sample P2. Sample P2 was collected beneath the northeastern fuel dispenser. Based on odors in this area, an exploration hole was dug and the impacted soil appeared to extend to at least 8 ft bgs. No soil samples were collected and the soil was replaced in the excavation. Approximately 50 cubic yards of soil were removed. Piping was installed parallel and adjacent to each pump island such that it could possibly be used in the future for remediation. The soil generated during this work was stockpiled onsite. The ultimate disposition of the soil was not reported. 1992 - In May, the Responsible Party filed for bankruptcy. 1993 - In January, 1 monitoring well (MW3) was installed to 45 ft bgs and 6 soil borings (B1 through B6) were also advanced onsite. 19 soil samples were collected and reported to contain low to non-detectable concentrations of the COCs. 3 monitoring wells (MW1 through MW3) were sampled and reported to have maximum concentrations of 0.51 parts per billion (ppb) Benzene, 1.4 ppb Toluene, and 0.54 ppb Xylenes. The detections were reported for the sample collected from well MW2 west of the USTs. 1994 - In December, periodic groundwater monitoring commenced at the site. No work was conducted at the site between 1996 and 1999. 1999 - In October, the dispensers were replaced at the site. 5 soil samples (S1 through S5) were collected and reported to contain a maximum concentration of 9,000 ppm TPH as Diesel (TPHd) in sample S4; all other COCs were not reported to be present above the laboratory reporting limits. Sample depths were not reported. In September, the monitoring wells were sampled and reported to contain up to 3.1 ppb Methyl tert-Butyl Ether (MtBE); all other COCs were not reported to be present above the laboratory reporting limits. No work was conducted at the site between 2000 and 2001. 2001 - In August, an enhanced leak detection test was run on the UST system at the site and the system failed. It reported that there were vapor releases occurring in the area of the fill/vapor recovery risers. In December, 9 geoprobe borings (GB1 through GB9) were advanced onsite for the collection of grab groundwater samples. 9 grab groundwater samples were collected and reported to contain maximum concentrations of 63 ppb TPHg, 4.1 ppb Ethylbenzene, 24 ppb Xylenes, and 11,000 ppb MtBE. The maximum MtBE concentration was reported in the sample collected from boring GB3 located near the southwestern corner of the UST excavation. 2002 - In January, 3 soil borings (BH1 through BH3) and one well (MW4) were advanced onsite. 8 soil samples were collected and reported to have maximum concentrations of 1.7 ppm MtBE and 0.43 ppm Tert Butyl Alcohol (TBA). No work was conducted at the site between 2002 and 2004. Periodic groundwater monitoring recommenced in 2004. 2004 - In September, 7 borings (EB1, EB2 and EB4 through EB8) were advanced to 25 ft bgs onsite. In October, 1 boring (EB3) and 1 well (STMW5 later known as MW5) were advanced offsite. 49 soil samples were collected and reported to contain maximum concentrations of 15 ppm TPHg, 15 ppm MtBE and 0.63 ppm TBA. The maximum TPHg and MtBE were reported in the soil sample collected at 20 ft bgs in boring EB2 located near the southwestern corner of the UST excavation. Groundwater was encountered in borings around 20 ft bgs. EB3 was advanced to 45 ft bgs near the southwestern corner of the UST excavation for the collection of a deeper groundwater sample; which was not reported to have concentrations of the COCs present above the laboratory reporting limits. 2006 - In May, containment beneath 4 dispensers and piping were replaced at the site. 8 soil samples were collected and reported to contain maximum concentrations of 230 ppm TPHd and 17 ppm Lead. Between 2006 and 2008 the only ongoing activity was groundwater monitoring. 2008 - In February, the wells were inspected using downhole submersible cameras. Based on the inspection, it was concluded that wells MW1 and MW2 are screened in the shallow portion of the water-bearing zone, wells MW4 and MW5 are screened in the middle portion of the water bearing zone and well MW3 is screened in the deeper portion of the water bearing zone. 2010 - In March, 4 soil borings (SB1, SB3 and SB4) were advanced onsite. Boring SB2 was not advanced due to previous sampling in close proximity. 3 soil samples were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. 4 grab groundwater samples were collected and reported to have maximum concentrations of 1,900 ppb TBA; all other constituents were not reported to be present above the laboratory reporting limits. The maximum TBA concentration was reported in the sample collected from SB4 advanced between MW2 and MW4. It was later reported that during the March investigation, groundwater was encountered around 40 ft bgs and quickly rose to 20 ft bgs, indicating confined groundwater conditions. 2012 - In March, 6 soil borings (B1, B2, B4 through B6 and B8) were advanced to 44.5 ft bgs. 2 other planned borings were not advanced due to utilities. 19 soil samples were collected and were only reported to have 3 detections of TBA (maximum concentration of 0.099 ppm at 25 ft bgs in B1); all other COCs were not reported to be present above the laboratory reporting limits. TBA was detected in samples collected in borings B1 and B8. Boring B1 was advanced near the UST excavation and boring B8 was advanced downgradient of the pump islands. 3 deeper monitoring wells (MW6 through MW8) were installed to depths of 46 and 50 ft bgs. The final depth of the wells was based on drill rig refusal. 3 soil samples were collected from the soil-groundwater interface and were not reported to have concentrations of the COCs present above the laboratory reporting limits. Following installation, the wells and all site wells were re-surveyed and the new wells were added to the groundwater monitoring program. An attempt was made to collect depth discrete samples from the site wells using a Solinst Discrete Interval Sampler. 2 samples were collected from wells MW1 through MW5 and 3 samples were collected from wells MW6 through MW8 for a total of 19 grab groundwater samples. MtBE concentrations ranged from non-detect to 1.7 ppb and TBA concentrations ranged from non-detect to 1,800 ppb. MtBE was only reported for samples collected from the shallower wells (MW1 through MW6). During drilling, a shallow perched groundwater zone was observed at 13 ft bgs in a clayey sand lense above an underlying clay layer. An attempt was made to collect grab groundwater samples in the borings of this shallow groundwater, but insufficient groundwater entered the boreholes. An underlying groundwater zone (Zone A) extends from about 15 to 44 ft bgs and appears to be semi-confined. The underlying Zone B (clayey gravelly well-graded sand layer from 49-50 ft bgs) is confined and is the most permeable zone observed beneath the site. 2013 - In January, 2 well pairs (MW9 A/B and MW10 A/B) were installed to 35 and 55 ft bgs. The new wells were added to the groundwater monitoring program. 2014 - In November, 2 soil boring pairs (SB1 A/B and SB2 A/B) were advanced across the street in a parking lot to depths of 48 and 60 ft bgs for the collection of grab groundwater samples. 4 grab groundwater samples were collected and only the sample SB1B (48 ft bgs) was reported to contain 0.7 ppb MtBE; the other samples did not have detections of MtBE or TBA. 2015 - In March, the final groundwater monitoring event was conducted and reported maximum concentrations of 1.6 ppb MtBE and 520 ppb TBA in wells MW3 and MW5, respectively.

**Site History:**

1985 - In later reports, it is noted that 4 monitoring wells (2 groundwater and 2 vadose) were installed in June. Documentation of the well installation were not found in the file.

1989 - In October, the underground storage tanks (USTs) were precision tested and a gasoline and a diesel UST failed.

1990 - In July, the 4 USTs and piping were removed and replaced at the site. The USTs were reported to be in good condition upon removal. 12 soil samples were collected from approximately 11 feet below the ground surface (ft bgs) and were reported to contain low to non-detectable concentrations of the constituents of concern (COCs).

It was reported that a monitoring well (MW3) was destroyed during the UST removal activities.

Based on the presence of odors beneath the unleaded and diesel USTs, additional soil was removed to approximately 20 feet. The remainder of the excavation was deepened to 15 feet to accommodate the new USTs. 2 confirmation soil samples (UV1 and DC1) were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits.

Approximately 600 cubic yards of soil were removed.

Following removal of the piping, 4 soil samples were collected from 2-3 ft bgs and were reported to have maximum concentrations of 10,000 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg), 95 ppm Benzene, 690 ppm Toluene, 180 ppm Ethylbenzene, and 950 ppm Xylenes in sample P2. Sample P2 was collected beneath the northeastern fuel dispenser. Based on odors in this area, an exploration hole was dug and the impacted soil appeared to extend to at least 8 ft bgs. No soil samples were collected and the soil was replaced in the excavation. Approximately 50 cubic yards of soil were removed.

Piping was installed parallel and adjacent to each pump island such that it could possibly be used in the future for remediation.

The soil generated during this work was stockpiled onsite. The ultimate disposition of the soil was not reported.

1992 - In May, the Responsible Party filed for bankruptcy.

1993 - In January, 1 monitoring well (MW3) was installed to 45 ft bgs and 6 soil borings (B1 through B6) were also advanced onsite. 19 soil samples were collected and reported to contain low to non-detectable concentrations of the COCs.

3 monitoring wells (MW1 through MW3) were sampled and reported to have maximum concentrations of 0.51 parts per billion (ppb) Benzene, 1.4 ppb Toluene, and 0.54 ppb Xylenes. The detections were reported for the sample collected from well MW2 west of the USTs.

1994 - In December, periodic groundwater monitoring commenced at the site.

No work was conducted at the site between 1996 and 1999.

1999 - In October, the dispensers were replaced at the site. 5 soil samples (S1 through S5) were collected and reported to contain a maximum concentration of 9,000 ppm TPH as Diesel (TPHD) in sample S4; all other COCs were not reported to be present above the laboratory reporting limits. Sample depths were not reported.

In September, the monitoring wells were sampled and reported to contain up to 3.1 ppb Methyl tert-Butyl Ether (MtBE); all other COCs were not reported to be present above the laboratory reporting limits.

No work was conducted at the site between 2000 and 2001.

2001 - In August, an enhanced leak detection test was run on the UST system at the site and the system failed. It reported that there were vapor releases occurring in the area of the fill/vapor recovery risers.

In December, 9 geoprobe borings (GB1 through GB9) were advanced onsite for the collection of grab groundwater samples. 9 grab groundwater samples were collected and reported to contain maximum concentrations of 63 ppb TPHg, 4.1 ppb Ethylbenzene, 24 ppb Xylenes, and 11,000 ppb MtBE. The maximum MtBE concentration was reported in the sample collected from boring GB3 located near the southwestern corner of the UST excavation.

2002 - In January, 3 soil borings (BH1 through BH3) and one well (MW4) were advanced onsite. 8 soil samples were collected and reported to have maximum concentrations of 1.7 ppm MtBE and 0.43 ppm Tert Butyl Alcohol (TBA).

No work was conducted at the site between 2002 and 2004. Periodic groundwater monitoring recommenced in 2004.

2004 - In September, 7 borings (EB1, EB2 and EB4 through EB8) were advanced to 25 ft bgs onsite. In October, 1 boring (EB3) and 1 well (STMW5 later known as MW5) were advanced offsite. 49 soil samples were collected and reported to contain maximum concentrations of 15 ppm TPHg, 15 ppm MtBE and 0.63 ppm TBA. The maximum TPHg and MtBE were reported in the soil sample collected at 20 ft bgs in boring EB2 located near the southwestern corner of the UST excavation. Groundwater was encountered in borings around 20 ft bgs.

EB3 was advanced to 45 ft bgs near the southwestern corner of the UST excavation for the collection of a deeper groundwater sample; which was not reported to have concentrations of the COCs present above the laboratory reporting limits.

2006 - In May, containment beneath 4 dispensers and piping were replaced at the site. 8 soil samples were collected and reported to contain maximum concentrations of 230 ppm TPHd and 17 ppm Lead.

Between 2006 and 2008 the only ongoing activity was groundwater monitoring.

2008 - In February, the wells were inspected using downhole submersible cameras. Based on the inspection, it was concluded that wells MW1 and

MW2 are screened in the shallow portion of the water-bearing zone, wells MW4 and MW5 are screened in the middle portion of the water bearing zone and well MW3 is screened in the deeper portion of the water bearing zone.

2010 - In March, 4 soil borings (SB1, SB3 and SB4) were advanced onsite. Boring SB2 was not advanced due to previous sampling in close proximity. 3 soil samples were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. 4 grab groundwater samples were collected and reported to have maximum concentrations of 1,900 ppb TBA; all other constituents were not reported to be present above the laboratory reporting limits. The maximum TBA concentration was reported in the sample collected from SB4 advanced between MW2 and MW4.

It was later reported that during the March investigation, groundwater was encountered around 40 ft bgs and quickly rose to 20 ft bgs, indicating confined groundwater conditions.

2012 - In March, 6 soil borings (B1, B2, B4 through B6 and B8) were advanced to 44.5 ft bgs. 2 other planned borings were not advanced due to utilities. 19 soil samples were collected and were only reported to have 3 detections of TBA (maximum concentration of 0.099 ppm at 25 ft bgs in B1); all other COCs were not reported to be present above the laboratory reporting limits. TBA was detected in samples collected in borings B1 and B8. Boring B1 was advanced near the UST excavation and boring B8 was advanced downgradient of the pump islands.

3 deeper monitoring wells (MW6 through MW8) were installed to depths of 46 and 50 ft bgs. The final depth of the wells was based on drill rig refusal. 3 soil samples were collected from the soil-groundwater interface and were not reported to have concentrations of the COCs present above the laboratory reporting limits. Following installation, the wells and all site wells were re-surveyed and the new wells were added to the groundwater monitoring program.

An attempt was made to collect depth discrete samples from the site wells using a Solinst Discrete Interval Sampler. 2 samples were collected from wells MW1 through MW5 and 3 samples were collected from wells MW6 through MW8 for a total of 19 grab groundwater samples. MtBE concentrations ranged from non-detect to 1.7 ppb and TBA concentrations ranged from non-detect to 1,800 ppb. MtBE was only reported for samples collected from the shallower wells (MW1 through MW6).

During drilling, a shallow perched groundwater zone was observed at 13 ft bgs in a clayey sand lense above an underlying clay layer. An attempt was made to collect grab groundwater samples in the borings of this shallow groundwater, but insufficient groundwater entered the boreholes. An underlying groundwater zone (Zone A) extends from about 15 to 44 ft bgs and appears to be semi-confined. The underlying Zone B (clayey gravelly well-graded sand layer from 49-50 ft bgs) is confined and is the most permeable zone observed beneath the site.

2013 - In January, 2 well pairs (MW9 A/B and MW10 A/B) were installed to 35 and 55 ft bgs. The new wells were added to the groundwater monitoring program.

2014 - In November, 2 soil boring pairs (SB1 A/B and SB2 A/B) were advanced across the street in a parking lot to depths of 48 and 60 ft bgs for the collection of grab groundwater samples. 4 grab groundwater samples were collected and only the sample SB1B (48 ft bgs) was reported to contain 0.7 ppb MtBE; the other samples did not have detections of MtBE or TBA.

2015 - In March, the final groundwater monitoring event was conducted and reported maximum concentrations of 1.6 ppb MtBE and 520 ppb TBA in wells MW3 and MW5, respectively.

<b>Site History:</b>						

The site parcel (APN 237-07-017) is approximately 39,640 square feet in area located in a commercial area of north central San Jose. See Figure 1 for a Site Area Topographic Map and Figure 2 for a Generalized Site Map. An existing restaurant (Burger King) is located in the southcentral area of the parcel. The majority of the lot is paved for customer parking, with limited landscaped areas. Former 12,000-gallon gasoline and 2,000-gallon diesel underground storage tanks (USTs) were located 40 to 50 feet outside the northeast corner of the existing building (Blaine 1985). The USTs were removed in July 1985. Areas of environmental concern for the site appear to be limited to residual soil and groundwater contamination related to the previous underground release of gasoline and diesel compounds from the former UST facility. Four groundwater monitoring wells (MW-1 through MW-4) each approximately 30 feet deep have been installed at the site. Soil Testing Data from UST Pit Samples, Exploratory Borings and Monitoring Well-Bores Up to 8,700 mg/Kg Total Petroleum Hydrocarbons as gasoline (TPHg), and up to 27 mg/Kg Total Petroleum Hydrocarbons as diesel (TPHd) were detected in soil samples collected by Blaine Tech Services from beneath the former gasoline and diesel USTs in July 1985. Elevated concentrations of TPHg (up to 2,070 mg/Kg) were additionally detected in soil samples collected after overexcavation on 12/03/85 by Chips Environmental Consultants. Petroleum impact to soil was confirmed by the detected concentrations of TPHg ranging between 160 mg/Kg to 280 mg/Kg, TPHd ranging between 55 mg/Kg to 1,100 mg/Kg, and trace concentrations of benzene (up to 2.8 mg/Kg) in soil samples collected vertically from soil boring EB-1 by Dugan Associates on 11/11/97. Dugan Associates installed four monitoring wells (MW-1 through MW-4) in June 1999. Concentrations of TPHg up to 190 mg/Kg, TPHd up to 920 mg/Kg, and trace BTEX concentrations (up to 0.67 mg/Kg) were detected in soil samples collected from the well-bore for MW-1, which was drilled in the vicinity of the former elevated Blaine Tech Services samples, and Dugan Associates samples from boring EB-1. The gasoline additives EDB, 1,2-DCA, DIPE, ETBE, MTBE, TAME, and TBA do not appear to have impacted the soil at the site. The lateral and vertical extent of gasoline and diesel-impacted soils from the former leaky 12,000-gallon gasoline and 2,000-gallon diesel USTs appear to have been defined, and appears to be limited to the vicinity of the former USTs. Vertical control has been defined by soil sample S-MW1-30, collected 30 feet bgs in well-bore MW-1, where trace levels of TPHd (1.8 mg/Kg), benzene (0.01 mg/Kg), and non-detectable concentrations of TPHg, toluene, ethylbenzene, xylenes, and MTBE were reported. Lateral control has been defined by non-detectable concentrations in soil samples collected from MW-2, MW-3, and MW-4. Previous Groundwater Flow Direction and Groundwater Sampling Data The groundwater gradient beneath the site has been documented to be consistently in the westsouthwest direction (See Figure 3). Cumulative groundwater monitoring data for samples collected from wells MW-2, MW-3 and MW-4 have been below drinking water standards (below MCLs and taste-threshold levels for gasoline and diesel compounds). The lateral extent of gasoline and diesel-impacted groundwater beneath the site appears limited to the vicinity of the former USTs and MW-1. Cumulative groundwater monitoring data is presented in Table 2 and a time trend plot showing TPHg, TPHd, and benzene concentrations in MW-1 versus groundwater elevation is presented in Attachment C. Dual-Phase, High-vacuum Extraction Test (3-day event) GeoRestoration, Inc. (GRI) conducted a 3-day Dual-phase, High-vacuum Extraction Test (DPHVE) at the site in December 2004. The conclusions of that report indicated that the 3-day event only removed approximately 24 pounds of hydrocarbons from the site. GRI concluded that if the average hydrocarbon concentration of the water removed was 40 ppm (not measured but estimated from groundwater monitoring) 2,000-gallons of water would contain only 0.7 pounds of hydrocarbons. Continued SVE extraction would likely remove hundreds of additional pounds of hydrocarbons. However, drawing down the groundwater elevation is required to operate the SVE system, since the aquifer material is flooded. Such drawdown of groundwater will yield thousands of gallons of groundwater, requiring treatment and disposal of groundwater.

**Site History:**

The site parcel (APN 237-07-017) is approximately 39,640 square feet in area located in a commercial area of north central San Jose. See Figure 1 for a Site Area Topographic Map and Figure 2 for a Generalized Site Map. An existing restaurant (Burger King) is located in the southcentral area of the parcel. The majority of the lot is paved for customer parking, with limited landscaped areas. Former 12,000-gallon gasoline and 2,000-gallon diesel underground storage tanks (USTs) were located 40 to 50 feet outside the northeast corner of the existing building (Blaine 1985). The USTs were removed in July 1985. Areas of environmental concern for the site appear to be limited to residual soil and groundwater contamination related to the previous underground release of gasoline and diesel compounds from the former UST facility. Four groundwater monitoring wells (MW-1 through MW-4) each approximately 30 feet deep have been installed at the site.

Soil Testing Data from UST Pit Samples, Exploratory Borings and Monitoring Well-Bores Up to 8,700 mg/Kg Total Petroleum Hydrocarbons as gasoline (TPHg), and up to 27 mg/Kg Total Petroleum Hydrocarbons as diesel (TPHd) were detected in soil samples collected by Blaine Tech Services from beneath the former gasoline and diesel USTs in July 1985. Elevated concentrations of TPHg (up to 2,070 mg/Kg) were additionally detected in soil samples collected after overexcavation on 12/03/85 by Chips Environmental Consultants. Petroleum impact to soil was confirmed by the detected concentrations of TPHg ranging between 160 mg/Kg to 280 mg/Kg, TPHd ranging between 55 mg/Kg to 1,100 mg/Kg, and trace concentrations of benzene (up to 2.8 mg/Kg) in soil samples collected vertically from soil boring EB-1 by Dugan Associates on 11/11/97. Dugan Associates installed four monitoring wells (MW-1 through MW-4) in June 1999. Concentrations of TPHg up to 190 mg/Kg, TPHd up to 920 mg/Kg, and trace BTEX concentrations (up to 0.67 mg/Kg) were detected in soil samples collected from the well-bore for MW-1, which was drilled in the vicinity of the former elevated Blaine Tech Services samples, and Dugan Associates samples from boring EB-1. The gasoline additives EDB, 1,2-DCA, DIPE, ETBE, MTBE, TAME, and TBA do not appear to have impacted the soil at the site.

The lateral and vertical extent of gasoline and diesel-impacted soils from the former leaky 12,000-gallon gasoline and 2,000-gallon diesel USTs appear to have been defined, and appears to be limited to the vicinity of the former USTs. Vertical control has been defined by soil sample S-MW1- 30, collected 30 feet bgs in well-bore MW-1, where trace levels of TPHd (1.8 mg/Kg), benzene (0.01 mg/Kg), and non-detectable concentrations of TPHg, toluene, ethylbenzene, xylenes, and MTBE were reported. Lateral control has been defined by non-detectable concentrations in soil samples collected from MW-2, MW-3, and MW-4.

**Previous Groundwater Flow Direction and Groundwater Sampling Data**

The groundwater gradient beneath the site has been documented to be consistently in the westsouthwest direction (See Figure 3). Cumulative groundwater monitoring data for samples collected from wells MW-2, MW-3 and MW-4 have been below drinking water standards (below MCLs and taste-threshold levels for gasoline and diesel compounds). The lateral extent of gasoline and diesel-impacted groundwater beneath the site appears limited to the vicinity of the former USTs and MW- 1. Cumulative groundwater monitoring data is presented in Table 2 and a time trend plot showing TPHg, TPHd, and benzene concentrations in MW-1 versus groundwater elevation is presented in Attachment C.

Dual-Phase, High-vacuum Extraction Test (3-day event) GeoRestoration, Inc. (GRI) conducted a 3-day Dual-phase, High-vacuum Extraction Test (DPHVE)

at the site in December 2004. The conclusions of that report indicated that the 3-day event only removed approximately 24 pounds of hydrocarbons from the site. GRI concluded that if the average hydrocarbon concentration of the water removed was 40 ppm (not measured but estimated from groundwater monitoring) 2,000-gallons of water would contain only 0.7 pounds of hydrocarbons.

Continued SVE extraction would likely remove hundreds of additional pounds of hydrocarbons. However, drawing down the groundwater elevation is required to operate the SVE system, since the aquifer material is flooded. Such drawdown of groundwater will yield thousands of gallons of groundwater, requiring treatment and disposal of groundwater.

**Site History:**

Volatile organic compounds (VOCs) released at the Gorilla Circuits site have polluted soil and groundwater, with groundwater pollution extending offsite. Maps of the groundwater pollutant plume produced for the Gorilla Circuits site indicate that the groundwater pollutant plume impacts the southern portion of the adjacent property (Aqua Science, Inc., December 26, 2007, Groundwater Monitoring Report). Additional groundwater remedial actions are to take place at and near the Site in 2018.

**Site History:**

Volatile organic compounds (VOCs) released at the Gorilla Circuits site have polluted soil and groundwater, with groundwater pollution extending offsite. Maps of the groundwater pollutant plume produced for the Gorilla Circuits site indicate that the groundwater pollutant plume impacts the southern portion of the adjacent property (Aqua Science, Inc., December 26, 2007, Groundwater Monitoring Report). Additional groundwater remedial actions are to take place at and near the Site in 2018.

**Calwater Watershed Name:** Santa Clara - Coyote Creek (205.30)

**DWR GW Subbasin Name:** Santa Clara Valley - Santa Clara (2-009.02)

**Disadvantaged Community:**

**Site History:**

Site address is also 751 Commercial Street, San Jose. 2003 - In February, the Regional Water Quality Control Board (RWQCB) requested an investigation be conducted to determine if MtBE had impacted groundwater at this site due to its location relative to a water supply well. In July, 10 Geoprobe borings (GP1 through GP10) were advanced onsite. Groundwater was not encountered in GP7 and GP8, but was encountered in the remaining borings between 19 and 28 ft bgs. 8 grab groundwater samples were collected and sampled for fuel oxygenates. Maximum concentrations were reported of 690 ppb MtBE and 890 ppb TBA in the sample collected in GP1 located on the northwestern corner of the site and downgradient of the existing tanks. The only other detection was 25 ppb MtBE in GP3, which is located downgradient of the dispenser islands. 2005 - In December, 3 monitoring wells (MW5 through MW7) were installed to 30 ft bgs onsite. It was not reported at what depth groundwater was encountered and was not noted on the boring logs. 6 soil samples were collected from each well and maximum concentrations were reported for soil samples collected from well MW6 located near boring GP3 and well MW7 located between boring GP1 and former well MW1. Maximum concentrations in soil were reported of 330 ppm TPHg and 38 ppm TPHd at 25 ft bgs in MW6 and 0.05 ppm MtBE and 0.23 ppm TBA at 20 ft bgs in MW7. Initial groundwater samples collected from these wells reported maximum concentrations of 1,200 ppb TPHg, 0.64 ppb Benzene, 0.59 ppb Ethylbenzene, 0.61 ppb Xylenes, 170 ppb MtBE, 240 ppb TBA, and 0.51 ppb 1,2-Dichloroethane (1,2-DCA). MtBE was the only constituent detected in all three wells, but was highest in well MW7 (and the highest TBA) and lowest in well MW5. Well MW6 had detections of the most constituents. 2011 - In February, the wells were sampled and reported to have maximum concentrations of 430 ppb TPHg, 120 ppb MtBE, and 380 ppb TBA in well MW6.

<b>Potential Contamin of Concern:</b>			

CHLORDANE, DDD, DDE, DDT

**Site History:**

Garden Valley Fertilizer Co. manufactured and distributed liquid fertilizer products for approximately 40 years at this Site. Chlordane and cadmium were detected in soil above U.S. EPA Region IX Preliminary Remediation Goals (PRG) for residential land use. However, neither chemical was detected above the PRG for commercial land use. Chlordane was detected in groundwater above its drinking water standard. Site data indicates that there may be a potential upgradient source for some of the chlordane detected. An environmental restriction has been recorded prohibiting the use of the site for sensitive land uses such as for residences, schools, day care facilities and hospitals and also prohibiting the use of shallow groundwater underlying the Site. Therefore, with the exception of compliance with the environmental restriction requirements, DTSC has determined that no further action is required.

**Site History:**

Garden Valley Fertilizer Co. manufactured and distributed liquid fertilizer products for approximately 40 years at this Site. Chlordane and cadmium were detected in soil above U.S. EPA Region IX Preliminary Remediation Goals (PRG) for residential land use. However, neither chemical was detected above the PRG for commercial land use. Chlordane was detected in groundwater above its drinking water standard. Site data indicates that there may be a potential upgradient source for some of the chlordane detected. An environmental restriction has been recorded prohibiting the use of the site for sensitive land uses such as for residences, schools, day care facilities and hospitals and also prohibiting the use of shallow groundwater underlying the Site. Therefore, with the exception of compliance with the environmental restriction requirements, DTSC has determined that no further action is required.

#### Site History:

Garden Valley Fertilizer Co. manufactured and distributed liquid fertilizer products for approximately 40 years at this Site. Chlordane and cadmium were detected in soil above U.S. EPA Region IX Preliminary Remediation Goals (PRG) for residential land use. However, neither chemical was detected above the PRG for commercial land use. Chlordane was detected in groundwater above its drinking water standard. Site data indicates that there may be a potential upgradient source for some of the chlordane detected. An environmental restriction has been recorded prohibiting the use of the site for sensitive land uses such as for residences, schools, day care facilities and hospitals and also prohibiting the use of shallow groundwater underlying the Site. Therefore, with the exception of compliance with the environmental restriction requirements, DTSC has determined that no further action is required.

**Site History:**

**STATUS:**

The Department of Toxic Substances Control (DTSC) will meet with the Responsible Parties (RPs) in early 2008, to discuss implementation of a Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI). The RFI will be conducted to determine the extent of contamination at the site. A draft corrective action consent agreement (CACA) has recently been provided to the RPs for review. The CACA is signed by both the RPs and DTSC and describes what the investigation should entail and the associated costs involved in the State over-seeing investigation of the site.

**SITE HISTORY:**

The DTSC conducted a RCRA Facility Assessment (RFA) pursuant to the RCRA Corrective Action process. The purpose of the RFA is to identify Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs), collect existing information on contaminant releases, and evaluate site information to determine if further investigation is necessary. The report presents the results of the RFA, documents the process leading to its conclusions and recommendations, and consolidates pertinent information on the facility and its SWMUs and AOCs.

The subject property, located at 1300-1310 Old Bayshore Highway, has a history of commercial and industrial operations. Current operations demonstrate no evidence of release of hazardous materials to the environment. The thick concrete and asphalt cap currently in place prevents contaminant migration. Presently contamination is documented to be limited to near surface the soil; groundwater has reportedly not been impacted. The mobility of existing contamination is thought to be minimal because of the presence of the cap, and the presumed low solubility of suspected contaminants.

4/11/2018- Facility was issued a permit effective 09/30/1983 to 09/30/1988. According to CACA dated 03/27/2013, facility notified DHS that it was closing operations on February 1986. A letter dated 06/01/1988 and a memorandum of the Chronology of Events dated 07/17/1992 stated that closure was not completed and that facility will be referred to clean up. The facility is currently being handled under clean up as confirmed by Project Manager, Henry Chui.

ORGANOCHLORINE PESTICIDES (8081 OCPS), PETROLEUM, POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS), UNDER INVESTIGATION, VOLATILE ORGANICS (8260B VOCS)

**Site History:**

Ultra-Chem site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company (Moyer). Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. According to historical documentation included in the Iris Site Conditions Report, chemicals potentially used and/or stored onsite may have included organochlorine, organophosphorus, and carbamate pesticides; petroleum hydrocarbons; solvents; metals and inorganic compounds; acids; and bases.

C. L. Scott Enterprises, Inc. doing business as Ultra-Chem and All-Chem (Ultra-Chem) reportedly leased a portion of the property in November 1982 and operated at the site from 1983 to 1986. At some point prior to Ultra-Chem beginning onsite operations, the parcel occupied by Moyer was split; Ultra-Chem and the subsequent owners occupied the southern portion of the split property. In September 1983, the Department of Health Services (DHS; now Department of Toxic Substances Control - DTSC) issued a permit to the Ultra-Chem Facility for storage of hazardous waste and treatment

by distillation. Ultra-Chem operated as a transfer station collecting and storing hazardous wastes from hazardous waste generators before reportedly transferring the wastes to a disposal facility; solvents were reportedly reclaimed in an onsite distillation unit. The operations closed in February 1986 but the facility was never properly closed and never obtained a closure certification from the Department. Ultra-Chem. filed for bankruptcy in April 1986. Beginning in 1985, during Ultra-Chem's tenure at the site, Fitzpatrick Barricade and Safety Supply (Fitzpatrick) became a tenant. Fitzpatrick was reportedly a small-quantity generator of hazardous waste. Documentation regarding the specific wastes generated by Fitzpatrick is unavailable. Fitzpatrick remained a tenant at the site through at least 1989.

From 1986 to 2003, the property ownership title has changed several times. Most of the business that operated at the Site since 1986 are auto body shops. In 2003, Maxim I Properties (Maxim) acquired title to the Site from Enviro-Tech Business & Development, Inc. and Kamal S. Farshi. In 2012 the Santa Clara Superior Court entered a judgment of rescission in favor of Maxim, declaring the 2003 sale of the Site void from the date of the transaction. American Drilling Company (American Drilling) leased the northern portion of the Site from Maxim and began onsite operations in 2003 as a construction drilling contractor and is currently operating the Site. The southern portion of the Site is currently being leased by Santa Clara Dairy, and has been since 2005.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. The current land use at the site is industrial, and the site is zoned as heavy industrial use and the immediate site vicinity is zoned as heavy industrial and light industrial use. There are four buildings onsite: three large warehouses along the eastern property line and an office building in the central-western portion of the site. The office building is the only building with daily occupants. The entire Site is capped with concrete. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 18 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt. Beneath this clay layer is a series of interbedded sand and gravel which constitute the second water bearing zone (B-zone) that begins at approximately 45 to 50 ft bgs and extends to a depth greater than 100 ft bgs, the greatest depth investigated at the site. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest. The B-zone appears to be confined from observations in B-zone wells with a relatively flat gradient to the west southwest.

Soil vapor samples collected at the Site during previous site investigations indicated presence of chlorinated volatile organic compounds (VOCs) and petroleum-related VOCs in soil vapor at concentrations exceeding their applicable regulatory screening criteria. chlorinated VOCs were detected along the western Site boundary with lower concentrations across the rest of the Site. Concentrations of chlorinated VOCs were lower in shallow 5 ft bgs samples than deep 15 ft bgs samples. In addition, petroleum-related VOCs were detected along the eastern Site boundary behind and immediately south of the three warehouse buildings at the Site. Concentrations of petroleum-related VOCs were higher and more laterally extensive in shallow 5 ft bgs samples compared to deep 15 ft bgs samples.

Soil samples collected at the Site during previous site investigations indicated presence organochlorine and organophosphorus pesticides, chlorinated and petroleum-related VOCs, petroleum hydrocarbons, and metals (arsenic and cobalt) exceeding their applicable regulatory screening criteria. organochlorine pesticides were detected in shallow and deep soil (between 2 and 25 ft bgs) along the eastern property boundary, the southern property boundary, and the western property boundary. Organophosphorus pesticides exceeded their respective screening criteria only in shallow soil, five ft. or less, along the eastern property boundary behind the warehouses. In addition, petroleum-related VOCs were detected in shallow and deep soil along the eastern property boundary and southern property boundary. Chlorinated VOC exceedances were generally limited to shallow and deep soil in an isolated area on the western boundary of the site. Total petroleum hydrocarbons (TPHs) were generally detected in shallow and deep soil samples across the site. Metal impacts were observed in shallow soil along the eastern property boundary and in portions of the southern portion of the site.

Groundwater impacts at the site in A-zone ground water include organochlorine pesticides, chlorinated and petroleum-related VOCs, metal (antimony, arsenic, barium, beryllium, chromium, lead, mercury, and nickel if grab groundwater [high turbidity] results are considered; and only arsenic, if sole groundwater monitoring well sampling results are considered), and petroleum hydrocarbons at concentrations exceeding their applicable screening criteria. Groundwater exceedances in the B-zone include organochlorine pesticides, metals and TPHs and are generally limited to grab groundwater samples (high turbidity). All analytical groups including organochlorine pesticides, petroleum-related VOCs, metals (grab groundwater samples - high turbidity), and TPHs were detected in A-zone ground water above regulatory screening criteria along the eastern limits of the Site behind the warehouses and along the Site's southern boundary. Chlorinated VOCs were observed along the Site's western boundary. TPH was detected in A-zone ground water above screening criteria across the Site as well as upgradient of the Site to the north and downgradient of the Site to the south.

According to the 14th groundwater sampling event and 5th semiannual sampling event for the Site with the current network of monitoring wells, concentrations of pesticides, VOCs, semi-volatile organic compounds, petroleum, and metals observed in ground water were consistent with concentrations observed during previous sampling events, except where noted in the respective groundwater monitoring reports.

DTSC is currently reviewing the Draft Corrective Measures Study for the Site.

Comments:		The RCRA Facility Investigation (RFI) report documents the results of an investigation that was performed to determine the nature and extent of releases of hazardous waste or constituents from formerly permitted units, solid waste management units, and other source areas. Soil and groundwater were found to be contaminated with pesticides, total petroleum hydrocarbon, volatile organic compounds (VOCs), and metals. VOCs in soil gas were found in limited areas of the Site. The data gathered during the RFI will be used to prepare a Corrective Measures Study report that will evaluate corrective measures alternatives for the Site.

**STATUS:**

The Department of Toxic Substances Control (DTSC) will meet with the Responsible Parties (RPs) in early 2008, to discuss implementation of a Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI). The RFI will be conducted to determine the extent of contamination at the site. A draft corrective action consent agreement (CACA) has recently been provided to the RPs for review. The CACA is signed by both the RPs and DTSC and describes what the investigation should entail and the associated costs involved in the State over-seeing investigation of the site.

**SITE HISTORY:**

The DTSC conducted a RCRA Facility Assessment (RFA) pursuant to the RCRA Corrective Action process. The purpose of the RFA is to identify Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs), collect existing information on contaminant releases, and evaluate site information to determine if further investigation is necessary. The report presents the results of the RFA, documents the process leading to its conclusions and recommendations, and consolidates pertinent information on the facility and its SWMUs and AOCs.

The subject property, located at 1300-1310 Old Bayshore Highway, has a history of commercial and industrial operations. Current operations demonstrate no evidence of release of hazardous materials to the environment. The thick concrete and asphalt cap currently in place prevents contaminant migration. Presently contamination is documented to be limited to near surface the soil; groundwater has reportedly not been impacted. The mobility of existing contamination is thought to be minimal because of the presence of the cap, and the presumed low solubility of suspected contaminants.

4/11/2018- Facility was issued a permit effective 09/30/1983 to 09/30/1988. According to CACA dated 03/27/2013, facility notified DHS that it was closing operations on February 1986. A letter dated 06/01/1988 and a memorandum of the Chronology of Events dated 07/17/1992 stated that closure was not completed and that facility will be referred to clean up. The facility is currently being handled under clean up as confirmed by Project Manager, Henry Chui.

**Site History:**

From 1964 to 1983, Moyer Chemical Company produced pesticides, fungicides, insecticides, and weed killers. From 1983 to 1986, Ultra-Chem operated as a hazardous waste treatment facility, a lacquer thinner reclamation facility, and distributed proprietary commercial and industrial chemicals. In 1986 Ultrachem declared bankruptcy and left the site without completing closure. From 1987 until 1993, National Auto Recovery Bureau occupied the site. Since 1993 the site has been the location of auto wrecking operations.

All future work is addressed under ULTRA-CHEM/ALL-CHEM/SCOTT ENTERPRISES (80001847) DTSC will be proceeding with an Corrective Action Consent Order to cleanup the site. Please use the Ultra-Chem facility link.

**Site History:**

Moyer Chemical site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company. Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. Diamond Alkali Chemical Manufacturing (DACM) occupied the Site from 1959 to 1965. Activities conducted by DACM are not known. After 1965, the Site was occupied by Howard Electric until 1981. From 1981 to January 31, 2019, San Jose Concrete Transfer Company, Inc. occupied and managed the Site. On January 31, 2019, the property title was transferred to Old Bayshore South, LLC. The Site is currently being developed as a remote parking lot for commuter vans or similar vehicles.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is currently used for storage by the owner, San Jose Concrete Transfer Company. The Site contains warehouse buildings and open yard space for the storage of concrete pipes and equipment. The northern corner is paved with concrete and most of the southwestern portion of the Site is paved with asphalt. The southeast portion is also being used as storage for the neighboring tenant, American Drilling at 1300-1310 Old Bayshore Highway, which is accessed through an opening in the fence between the two sites. The southern portion of the Site where an office building is located is occupied by Romero Construction. All other structures at the Site are used for storage and are not enclosed structures.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 12 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt that extends to the top of the B-zone (a gravely sand unit) at approximately 40 to 55 ft bgs. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest with an average magnitude of 0.005. The B-zone appears to be confined from observations in B-zone wells at the neighboring Ultra-Chem facility with a relatively flat gradient to the west southwest with a magnitude of 0.001. Vertical hydraulic gradients between the A-zone and B-zone are characterized by the potential for downward flow from the A-zone to the B-zone.

Investigation activities conducted at the Site reported organochlorine pesticides (OCPs), petroleum volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and metal (cobalt) in soil at concentrations exceeding their applicable regulatory screening criteria.

OCPs were detected in shallow and deep soil (2-25 ft bgs) along the eastern and northern property boundaries with lower concentrations across the rest of the Site. OCP exceedances appear to align with areas designated as areas of concern during Moyer Chemical's operations. Petroleum VOCs, metals and TPH impacts were detected in deep soil (20-25 ft bgs) coinciding with the A-zone along the eastern property boundary bordering the railroad track. Limited exceedances of TPH were also found in shallow soil (2-10 ft bgs) along the eastern property boundary. Cobalt impacts were observed in shallow soil along the northern property boundary.

Groundwater impacts at the Site include petroleum VOCs, OCPs, metal (arsenic) and TPH at concentrations exceeding their applicable regulatory screening criteria in A-zone groundwater. All analytical groups including VOCs, TPH, metals, and OCPs were detected in A-zone groundwater above regulatory screening criteria along the eastern property limits bordering the railroad track.

OCPs impacts were observed both along the eastern property boundary and in the western corner of the Site. Exceedances of metals in A-zone groundwater were found the western and eastern corners of the Site. TPH was detected in A-zone groundwater above screening criteria across the Site. In addition, TPH impacts in A-zone ground water were observed in offsite samples to the north of the property and to the south of the property at 1300-1310 Old Bayshore Highway. There are no exceedances of any contaminants in B-zone groundwater samples.

2016 Removal Action Plan recommended as a remedy alternative the implementation of institutional control, engineering control, light non-aqueous phase liquid (LNAPL) removal and groundwater monitoring to protect human health and the environment and comply with the applicable or relevant and appropriate requirements.

Institutional control would include restrictions on land use and activities at the Site, property zoning restrictions, groundwater usage regulations and a site-Specific Soil Management Plan. Engineering control will consist of the existing concrete and asphalt cap and new concrete cover above uncovered areas to minimize worker exposure to chemical of concerns (COCs) impacts in shallow soil and storm water infiltration through impacted soil to ground water. LNAPL, present in SJMW-4, will be removed using absorbent socks. In addition, groundwater monitoring will be performed within the A- and B-zones to assess the stability of the existing groundwater plume and monitor potential horizontal and downward vertical migration of COCs present in A-zone ground water.

Following the implementation of the 2016 RAW recommended remedy alternative, a Removal Action Implementation Report will be prepared to document the work activities conducted as part of recommended remedy alternative. In addition, a subsequent Operation and Maintenance (O&M) Plan will be prepared to provide long-term protection of human health and the environment. O&M activities will include long-term groundwater monitoring of the existing well network and the proposed sentinel well network, an evaluation of sentinel well analytical data, groundwater monitoring well maintenance activities, annual inspections and maintenance of the concrete and asphalt cover at the Site, and the preparation of five-year review reports.

<b>Activity Type:</b>					Completed Activities	
<b>Date Completed:</b>					12/10/2015	
<b>Comments:</b>					The Remedial Investigation (RI) Report was prepared pursuant to the Imminent and Substantial Endangerment and Remedial Action Order issued to the former Moyer Chemical Company (previous owner) and San Jose Concrete Transfer Company (current owner). The RI field activities were conducted between April 2014 and March 2015 which included soil, soil gas, and groundwater sampling. No volatile organic compounds (VOCs) were detected in soil vapor above any regulatory screening levels. In soil, petroleum, pesticides, and metals were found across the site. In groundwater, petroleum, arsenic and pesticides were detected primarily along the eastern property boundary with some exceedances along the western property boundary and northern central portion of the site. A Removal Action Workplan will be prepared to address the contamination at the site.

<b>Comments:</b>					The Phase I Environmental Site Assessment was performed on the property in January/February 2012. Operations have included Moyer Chemical and Diamond Alkali Chemical from 1953 through the mid 1960s as pesticide manufacturers, Howard Electric, Inc. from the mid 1960s to late 1980s, and San Jose Concrete Pipe Company from the late 1980s to present. From the file and record search and based upon the historical uses, the property may have contributed to the contamination to soil or groundwater in the surrounding area and the report recommended collection of soil and groundwater samples for the property.

<b>Comments:</b>					The quarterly groundwater monitoring data were consistent with the previous quarters. However, an observation was made that there were constituents in the analytical results for well SJMW-4 that did not meet the Data Quality Objectives (screening values, e.g. benzene, ethylbenzene etc.). If the comparison criteria are not met during the next quarterly sampling, DTSC requested that a discussion be included in the quarterly monitoring report explaining why the comparison criteria were not met (e.g. interferences because of TPH products).

**Site History:**

Moyer Chemical site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company. Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. Diamond Alkali Chemical Manufacturing (DACM) occupied the Site from 1959 to 1965. Activities conducted by DACM are not known. After 1965, the Site was occupied by Howard Electric until 1981. In 1981, the current owner, San Jose Concrete Transfer Company, occupied the Site.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is currently used for storage by the owner, San Jose Concrete Transfer Company. The Site contains warehouse buildings and open yard space for the storage of concrete pipes and equipment. The northern corner is paved with concrete and most of the southwestern portion of the Site is paved with asphalt. The southeast portion is also being used as storage for the neighboring tenant, American Drilling at 1300-1310 Old Bayshore Highway, which is accessed through an opening in the fence between the two sites. The southern portion of the Site where an office building is located is occupied by Romero Construction. All other structures at the Site are used for storage and are not enclosed structures.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 12 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt that extends to the top of the B-zone (a gravely sand unit) at approximately 40 to 55 ft bgs. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest with an average magnitude of 0.005. The B-zone appears to be confined from observations in B-zone wells at the neighboring Ultra-Chem facility with a relatively flat gradient to the west southwest with a magnitude of 0.001. Vertical hydraulic gradients between the A-zone and B-zone are characterized by the potential for downward flow from the A-zone to the B-zone.

Investigation activities conducted at the Site reported organochlorine pesticides (OCPs), petroleum volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and metal (cobalt) in soil at concentrations exceeding their applicable regulatory screening criteria.

OCPs were detected in shallow and deep soil (2-25 ft bgs) along the eastern and northern property boundaries with lower concentrations across the rest of the Site. OCP exceedances appear to align with areas designated as areas of concern during Moyer Chemical's operations. Petroleum VOCs, metals and TPH impacts were detected in deep soil (20-25 ft bgs) coinciding with the A-zone along the eastern property boundary bordering the railroad track. Limited exceedances of TPH were also found in shallow soil (2-10 ft bgs) along the eastern property boundary. Cobalt impacts were observed in shallow soil along the northern property boundary.

Groundwater impacts at the Site include petroleum VOCs, OCPs, metal (arsenic) and TPH at concentrations exceeding their applicable regulatory screening criteria in A-zone groundwater. All analytical groups including VOCs, TPH, metals, and OCPs were detected in A-zone groundwater above regulatory screening criteria along the eastern property limits bordering the railroad track.

OCPs impacts were observed both along the eastern property boundary and in the western corner of the Site. Exceedances of metals in A-zone groundwater were found the western and eastern corners of the Site. TPH was detected in A-zone groundwater above screening criteria across the Site. In addition, TPH impacts in A-zone ground water were observed in offsite samples to the north of the property and to the south of the property at 1300-1310 Old Bayshore Highway. There are no exceedances of any contaminants in B-zone groundwater samples.

2016 Removal Action Plan recommended as a remedy alternative the implementation of institutional control, engineering control, light non-aqueous phase liquid (LNAPL) removal and groundwater monitoring to protect human health and the environment and comply with the applicable or relevant and appropriate requirements.

Institutional control would include restrictions on land use and activities at the Site, property zoning restrictions, groundwater usage regulations and a site-Specific Soil Management Plan. Engineering control will consist of the existing concrete and asphalt cap and new concrete cover above uncovered areas to minimize worker exposure to chemical of concerns (COCs) impacts in shallow soil and storm water infiltration through impacted soil to ground water. LNAPL, present in SJMW-4, will be removed using absorbent socks. In addition, groundwater monitoring will be performed within the A- and B-zones to assess the stability of the existing groundwater plume and monitor potential horizontal and downward vertical migration of COCs present in A-zone ground water.

Following the implementation of the 2016 RAW recommended remedy alternative, a Removal Action Implementation Report will be prepared to document the work activities conducted as part of recommended remedy alternative. In addition, a subsequent Operation and Maintenance (O&M) Plan will be prepared to provide long-term protection of human health and the environment. O&M activities will include long-term groundwater monitoring of the existing well network and the proposed sentinel well network, an evaluation of sentinel well analytical data, groundwater monitoring well maintenance activities, annual inspections and maintenance of the concrete and asphalt cover at the Site, and the preparation of five-year review reports.

<b>Comments:</b>					The Phase I Environmental Site Assessment was performed on the property in January/February 2012. Operations have included Moyer Chemical and Diamond Alkali Chemical from 1953 through the mid 1960s as pesticide manufacturers, Howard Electric, Inc. from the mid 1960s to late 1980s, and San Jose Concrete Pipe Company from the late 1980s to present. From the file and record search and based upon the historical uses, the property may have contributed to the contamination to soil or groundwater in the surrounding area and the report recommended collection of soil and groundwater samples for the property.

<b>Comments:</b>					The Remedial Investigation (RI) Report was prepared pursuant to the Imminent and Substantial Endangerment and Remedial Action Order issued to the former Moyer Chemical Company (previous owner) and San Jose Concrete Transfer Company (current owner). The RI field activities were conducted between April 2014 and March 2015 which included soil, soil gas, and groundwater sampling. No volatile organic compounds (VOCs) were detected in soil vapor above any regulatory screening levels. In soil, petroleum, pesticides, and metals were found across the site. In groundwater, petroleum, arsenic and pesticides were detected primarily along the eastern property boundary with some exceedances along the western property boundary and northern central portion of the site. A Removal Action Workplan will be prepared to address the contamination at the site.

					of contamination from past historical operations. The scope of work outlined in the Workplan includes cone penetrometer testing at three locations, collection of soil samples from up to 15 soil borings, installation of three groundwater monitoring wells, sampling of the three new and existing monitoring wells, and installation and sampling of four multi-depth soil vapor wells.

A trend analysis was performed using the data from the February 2016 and past groundwater sampling events and showed the February 2016 results were consistent with the previous sampling events. Based on the trend analysis, DTSC concurred with the recommendation to reduce the groundwater sampling program from quarterly to semi-annual basis. The next semi-annual report will be due to DTSC in November 2016.

However, an observation was made that there were constituents in the analytical results for well SJMW-4 that did not meet the Data Quality Objectives (screening values, e.g. benzene, ethylbenzene etc.). If the comparison criteria are not met during the next quarterly sampling, DTSC requested that a discussion be included in the quarterly monitoring report explaining why the comparison criteria were not met (e.g. interferences because of TPH products).

**Site History:**

Moyer Chemical site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company. Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. Diamond Alkali Chemical Manufacturing (DACM) occupied the Site from 1959 to 1965. Activities conducted by DACM are not known. After 1965, the Site was occupied by Howard Electric until 1981. In 1981, the current owner, San Jose Concrete Transfer Company, occupied the Site.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is currently used for storage by the owner, San Jose Concrete Transfer Company. The Site contains warehouse buildings and open yard space for the storage of concrete pipes and equipment. The northern corner is paved with concrete and most of the southwestern portion of the Site is paved

with asphalt. The southeast portion is also being used as storage for the neighboring tenant, American Drilling at 1300-1310 Old Bayshore Highway, which is accessed through an opening in the fence between the two sites. The southern portion of the Site where an office building is located is occupied by Romero Construction. All other structures at the Site are used for storage and are not enclosed structures.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 12 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt that extends to the top of the B-zone (a gravely sand unit) at approximately 40 to 55 ft bgs. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest with an average magnitude of 0.005. The B-zone appears to be confined from observations in B-zone wells at the neighboring Ultra-Chem facility with a relatively flat gradient to the west southwest with a magnitude of 0.001. Vertical hydraulic gradients between the A-zone and B-zone are characterized by the potential for downward flow from the A-zone to the B-zone.

Investigation activities conducted at the Site reported organochlorine pesticides (OCPs), petroleum volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and metal (cobalt) in soil at concentrations exceeding their applicable regulatory screening criteria.

OCPs were detected in shallow and deep soil (2-25 ft bgs) along the eastern and northern property boundaries with lower concentrations across the rest of the Site. OCP exceedances appear to align with areas designated as areas of concern during Moyer Chemical's operations. Petroleum VOCs, metals and TPH impacts were detected in deep soil (20-25 ft bgs) coinciding with the A-zone along the eastern property boundary bordering the railroad track. Limited exceedances of TPH were also found in shallow soil (2-10 ft bgs) along the eastern property boundary. Cobalt impacts were observed in shallow soil along the northern property boundary.

Groundwater impacts at the Site include petroleum VOCs, OCPs, metal (arsenic) and TPH at concentrations exceeding their applicable regulatory screening criteria in A-zone groundwater. All analytical groups including VOCs, TPH, metals, and OCPs were detected in A-zone groundwater above regulatory screening criteria along the eastern property limits bordering the railroad track.

OCPs impacts were observed both along the eastern property boundary and in the western corner of the Site. Exceedances of metals in A-zone groundwater were found the western and eastern corners of the Site. TPH was detected in A-zone groundwater above screening criteria across the Site. In addition, TPH impacts in A-zone ground water were observed in offsite samples to the north of the property and to the south of the property at 1300-1310 Old Bayshore Highway. There are no exceedances of any contaminants in B-zone groundwater samples.

2016 Removal Action Plan recommended as a remedy alternative the implementation of institutional control, engineering control, light non-aqueous phase liquid (LNAPL) removal and groundwater monitoring to protect human health and the environment and comply with the applicable or relevant and appropriate requirements.

Institutional control would include restrictions on land use and activities at the Site, property zoning restrictions, groundwater usage regulations and a site-Specific Soil Management Plan. Engineering control will consist of the existing concrete and asphalt cap and new concrete cover above uncovered areas to minimize worker exposure to chemical of concerns (COCs) impacts in shallow soil and storm water infiltration through impacted soil to ground water. LNAPL, present in SJMW-4, will be removed using absorbent socks. In addition, groundwater monitoring will be performed within the A- and B-zones to assess the stability of the existing groundwater plume and monitor potential horizontal and downward vertical migration of COCs present in A-zone ground water.

Following the implementation of the 2016 RAW recommended remedy alternative, a Removal Action Implementation Report will be prepared to document the work activities conducted as part of recommended remedy alternative. In addition, a subsequent Operation and Maintenance (O&M) Plan will be prepared to provide long-term protection of human health and the environment. O&M activities will include long-term groundwater monitoring of the existing well network and the proposed sentinel well network, an evaluation of sentinel well analytical data, groundwater monitoring well maintenance activities, annual inspections and maintenance of the concrete and asphalt cover at the Site, and the preparation of five-year review reports.

<b>Comments:</b>		The Remedial Investigation (RI) Report was prepared pursuant to the Imminent and Substantial Endangerment and Remedial Action Order issued to the former Moyer Chemical Company (previous owner) and San Jose Concrete Transfer Company (current owner). The RI field activities were conducted between April 2014 and March 2015 which included soil, soil gas, and groundwater sampling. No volatile organic compounds (VOCs) were detected in soil vapor above any regulatory screening levels. In soil, petroleum, pesticides, and metals were found across the site. In groundwater, petroleum, arsenic and pesticides were detected primarily along the eastern property boundary with some exceedances along the western property boundary and northern central portion of the site. A Removal Action Workplan will be prepared to address the contamination at the site.

<b>Comments:</b>		The Phase I Environmental Site Assessment was performed on the property in January/February 2012. Operations have included Moyer Chemical and Diamond Alkali Chemical from 1953 through the mid 1960s as pesticide manufacturers, Howard Electric, Inc. from the mid 1960s to late 1980s, and San Jose Concrete Pipe Company from the late 1980s to present. From the file and record search and based upon the historical uses, the property may have contributed to the contamination to soil or groundwater in the surrounding area and the report recommended collection of soil and groundwater samples for the property.

<b>Comments:</b>					The quarterly groundwater monitoring data were consistent with the previous quarters. However, an observation was made that there were constituents in the analytical results for well SJMW-4 that did not meet the Data Quality Objectives (screening values, e.g. benzene, ethylbenzene etc.). If the comparison criteria are not met during the next quarterly sampling, DTSC requested that a discussion be included in the quarterly monitoring report explaining why the comparison criteria were not met (e.g. interferences because of TPH products).

**Site History:**

In October 1991, one 900 gallon underground storage tanks (UST) was removed from the site. Subsurface contamination was observed and reported during the UST removal and the fuel leak investigation case was opened in November 1991. Contaminants detected in soil and groundwater include TPHg, Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and Methyl tert Butyl Ether (MtBE). Several rounds of site investigation have adequately defined the nature and extent of contamination which is confined to the property boundaries. Soil excavation and dual-phase extraction were used to remediate subsurface contamination. Twelve monitoring wells have been installed to monitor groundwater contamination since the case was opened. Routine groundwater monitoring has occurred from 1994 to July 2015. The depth to groundwater beneath the site has varied between approximately 6 to 15 feet below grade. All monitoring wells were destroyed on August 12, 2016.

**Site History:**

In 1959, 2 single-walled UST were installed to provide 1500 gallons of gasoline and 2000 gallons of diesel storage. In 1998, vapor wells were installed and monitoring of combustible gas commenced. In February 1990 and March 1992, reported total combustible gas readings consistently over 10,000 ppm in 2 wells. In June 1992, 5 soil borings (SB1 and wells FS5-4 through FS5-7) were advanced onsite. SB1 was advanced to 41.5 ft bgs and the wells were completed between 20-26.5 ft bgs. Soil contamination as well as free product (FP) were identified by the investigation. FP was measured in wells FS5-4 and FS5-6. A FP skimmer was installed in 6/92. Both tanks were removed in 1993. The vapor wells were removed during UST removal and over-excavation. Maximum concentrations were reported of 430 ppm TPHd, 370 ppm TPHg, 1.5 ppm Benzene, 1.6 ppm Toluene, 7.1 ppm Ethylbenzene, and 43 ppm Xylenes in a soil sample collected from the final excavation. 270 cubic yards of soil were removed from the site. In April 1995, 2 additional soil borings and 4 groundwater monitoring wells (FS5-9 through FS5-12) were advanced on and offsite. In December, 2 additional wells FS5-14 and FS5-15 were installed. Additional investigation downgradient was to be completed to define the extent of contamination, however, the adjacent property owner has not granted access. In 2004, it was proposed to place ORC socks in the monitoring wells for remedial purposes. To date, this has not been completed.

**Site History:**

The Clean Harbors San Jose facility is a permitted offsite hazardous waste storage and treatment facility. The hazardous waste management operations have been at this location since 1974, previously under the names of Solvent Services Inc. and Safety Kleen Corp. Clean Harbors accepts aqueous acids and bases, laboratory packs, aqueous organic solutions, and solid wastes with organics. The facility accepts over 5 million gallons of waste per year, mostly industrial wastes with the exception of explosive, radioactive, or gas cylinders. It is authorized to store in containers and tanks. Treatment includes phase separation (organic solvents, water, and oil), neutralization, aqueous metal precipitation, fuel blending (organic solvents with fuel value), solvent distillation, and consolidation of these waste streams.

The San Francisco Regional Water Quality Control Board is the lead agency for Corrective Action in accordance with SB1082. Soil and groundwater remediation for volatile organic compounds has been in operation for over a decade. Groundwater is pumped from both beneath the site and offsite and is then treated on-site before being discharged to the sanitary sewer.

 QUARTELRY UPDATE  
 Quarterly Update Period: July to September 2018  
 DTSC is reviewing the Clean Harbor permit renewal application and anticipates completing the technical review and issuing the first Notice of Deficiency (NOD) in December 2018. DTSC is working with the CEQA Unit to prepare the necessary documents to comply with CEQA.

DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. The application is currently under review by DTSC. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

**FACILITY DESCRIPTION/HISTORY**

The Clean Harbors San Jose facility is located at 1021 Berryessa Road, San Jose, Santa Clara County, California. The facility is in North San Jose on the northwest side of Berryessa Road, easterly of US Interstate Highway 101 and westerly of Coyote Creek. It occupies 2.9 acres of land in an area zoned Heavy Industrial (M-4). US 101 runs within 500 feet of the facility.

Single family and multi-family residences are located within 1,000 feet of the facility to the south across US 101. Mobile home residences are located approximately one-half mile north of the site. The closest school to the facility is approximately three fourths of a mile of 3,600 feet. Surrounding land uses include a Chevron gasoline storage facility directly south of the site, an auto recycling facility to the east, an industrial park to the north, and a truck warehouse and truck maintenance shop to the west. The site is completely paved and graded to control run-off. The topography of the area is generally flat.

The Clean Harbors San Jose facility is a permitted offsite hazardous waste storage and treatment facility. The hazardous waste management operations have been at this location since 1974, previously under the names of Solvent Services Inc. and Safety Kleen Corp. Clean Harbors accepts aqueous acids and bases, laboratory packs, aqueous organic solutions, and solid wastes with organics. The facility accepts over 5 million gallons of waste per year, mostly industrial wastes with the exception of explosive, radioactive, or gas cylinders. It is authorized to store in containers and tanks. Treatment includes phase separation (organic solvents, water, and oil), neutralization, aqueous metal precipitation, fuel blending (organic solvents with fuel value), solvent distillation, and consolidation of these waste streams.

**PERMITTING REGULATORY DESCRIPTION/HISTORY**

Clean Harbors was first issued a RCRA-equivalent Hazardous Waste Facility Permit in 1983 under the name Solvent Services, Inc. This permit expired on October 13, 1988. The facility submitted a timely application on February 13, 1987. The RCRA-equivalent permit renewal became effective December 27 1989 with an expiration date of December 26, 1999. Since the permit was issued in 1999, Clean Harbors has made five Class I Permit Modifications for minor changes to the operating procedures and a name change from Solvent Services, Inc. to Clean Harbors San Jose, LLC; and two Class 2 Permit Modifications for the addition of units. One Class 1 Permit Modification for replacement of a drum crusher is still in progress. Clean Harbors submitted a renewal application in June 1999. The second renewal permit became effective February 10, 2003 with an expiration date of February 9, 2013. DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

The San Francisco Regional Water Quality Control Board is the lead agency for Corrective Action in accordance with SB1082. Soil and groundwater remediation for volatile organic compounds has been in operation for over a decade. Groundwater is pumped from both beneath the site and offsite and

is then treated on-site before being discharged to the sanitary sewer.

QUARTELRY UPDATE  
 Quarterly Update Period: July to September 2018  
 DTSC is reviewing the Clean Harbor permit renewal application and anticipates completing the technical review and issuing the first Notice of Deficiency (NOD) in December 2018. DTSC is working with the CEQA Unit to prepare the necessary documents to comply with CEQA.

DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. The application is currently under review by DTSC. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

**FACILITY DESCRIPTION/HISTORY**

The Clean Harbors San Jose facility is located at 1021 Berryessa Road, San Jose, Santa Clara County, California. The facility is in North San Jose on the northwest side of Berryessa Road, easterly of US Interstate Highway 101 and westerly of Coyote Creek. It occupies 2.9 acres of land in an area zoned Heavy Industrial (M-4). US 101 runs within 500 feet of the facility.

Single family and multi-family residences are located within 1,000 feet of the facility to the south across US 101. Mobile home residences are located approximately one-half mile north of the site. The closest school to the facility is approximately three fourths of a mile of 3,600 feet. Surrounding land uses include a Chevron gasoline storage facility directly south of the site, an auto recycling facility to the east, an industrial park to the north, and a truck warehouse and truck maintenance shop to the west. The site is completely paved and graded to control run-off. The topography of the area is generally flat.

The Clean Harbors San Jose facility is a permitted offsite hazardous waste storage and treatment facility. The hazardous waste management operations have been at this location since 1974, previously under the names of Solvent Services Inc. and Safety Kleen Corp. Clean Harbors accepts aqueous acids and bases, laboratory packs, aqueous organic solutions, and solid wastes with organics. The facility accepts over 5 million gallons of waste per year, mostly industrial wastes with the exception of explosive, radioactive, or gas cylinders. It is authorized to store in containers and tanks. Treatment includes phase separation (organic solvents, water, and oil), neutralization, aqueous metal precipitation, fuel blending (organic solvents with fuel value), solvent distillation, and consolidation of these waste streams.

**PERMITTING REGULATORY DESCRIPTION/HISTORY**

Clean Harbors was first issued a RCRA-equivalent Hazardous Waste Facility Permit in 1983 under the name Solvent Services, Inc. This permit expired on October 13, 1988. The facility submitted a timely application on February 13, 1987. The RCRA-equivalent permit renewal became effective December 27 1989 with an expiration date of December 26, 1999. Since the permit was issued in 1999, Clean Harbors has made five Class I Permit Modifications for minor changes to the operating procedures and a name change from Solvent Services, Inc. to Clean Harbors San Jose, LLC; and two Class 2 Permit Modifications for the addition of units. One Class 1 Permit Modification for replacement of a drum crusher is still in progress. Clean Harbors submitted a renewal application in June 1999. The second renewal permit became effective February 10, 2003 with and expiration date of February 9, 2013. DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

The San Francisco Regional Water Quality Control Board is the lead agency for Corrective Action in accordance with SB1082. Soil and groundwater remediation for volatile organic compounds has been in operation for over a decade. Groundwater is pumped from both beneath the site and offsite and is then treated on-site before being discharged to the sanitary sewer.

QUARTELRY UPDATE  
 Quarterly Update Period: July to September 2018  
 DTSC is reviewing the Clean Harbor permit renewal application and anticipates completing the technical review and issuing the first Notice of Deficiency (NOD) in December 2018. DTSC is working with the CEQA Unit to prepare the necessary documents to comply with CEQA.

DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. The application is currently under review by DTSC. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

**FACILITY DESCRIPTION/HISTORY**

The Clean Harbors San Jose facility is located at 1021 Berryessa Road, San Jose, Santa Clara County, California. The facility is in North San Jose on the northwest side of Berryessa Road, easterly of US Interstate Highway 101 and westerly of Coyote Creek. It occupies 2.9 acres of land in an area zoned Heavy Industrial (M-4). US 101 runs within 500 feet of the facility.

Single family and multi-family residences are located within 1,000 feet of the facility to the south across US 101. Mobile home residences are located approximately one-half mile north of the site. The closest school to the facility is approximately three fourths of a mile of 3,600 feet. Surrounding land uses include a Chevron gasoline storage facility directly south of the site, an auto recycling facility to the east, an industrial park to the north, and a truck warehouse and truck maintenance shop to the west. The site is completely paved and graded to control run-off. The topography of the area is generally flat.

The Clean Harbors San Jose facility is a permitted offsite hazardous waste storage and treatment facility. The hazardous waste management operations have been at this location since 1974, previously under the names of Solvent Services Inc. and Safety Kleen Corp. Clean Harbors accepts aqueous acids and bases, laboratory packs, aqueous organic solutions, and solid wastes with organics. The facility accepts over 5 million gallons of waste per year, mostly industrial wastes with the exception of explosive, radioactive, or gas cylinders. It is authorized to store in containers and tanks. Treatment includes phase separation (organic solvents, water, and oil), neutralization, aqueous metal precipitation, fuel blending (organic solvents with fuel value),

solvent distillation, and consolidation of these waste streams.

PERMITTING REGULATORY DESCRIPTION/HISTORY

Clean Harbors was first issued a RCRA-equivalent Hazardous Waste Facility Permit in 1983 under the name Solvent Services, Inc. This permit expired on October 13, 1988. The facility submitted a timely application on February 13, 1987. The RCRA-equivalent permit renewal became effective December 27 1989 with an expiration date of December 26, 1999. Since the permit was issued in 1999, Clean Harbors has made five Class I Permit Modifications for minor changes to the operating procedures and a name change from Solvent Services, Inc. to Clean Harbors San Jose, LLC; and two Class 2 Permit Modifications for the addition of units. One Class 1 Permit Modification for replacement of a drum crusher is still in progress. Clean Harbors submitted a renewal application in June 1999. The second renewal permit became effective February 10, 2003 with an expiration date of February 9, 2013. DTSC received a permit renewal application from Clean Harbors on August 10, 2012 to continue operating an offsite hazardous waste storage and treatment facility. The application was determined to be administratively complete on December 13, 2012 and is now under technical review. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

The San Francisco Regional Water Quality Control Board is the lead agency for Corrective Action in accordance with SB1082. Soil and groundwater remediation for volatile organic compounds has been in operation for over a decade. Groundwater is pumped from both beneath the site and offsite and is then treated on-site before being discharged to the sanitary sewer.

Site History:

This site is located at 1021 Berryessa Road and is owned and operated by Safety-Kleen. In 1973, Solvent Services opened the facility to store, treat, and recycle industrial waste chemicals. Solvent Service Company was acquired by USPCI, a subsidiary of Union Pacific Corporation in 1990. Union Pacific sold the operations of USPCI to Laidlaw Environmental Services in 1994. In 1998, Laidlaw Environmental Services acquired Safety-Kleen Corporation and assumed the name Safety-Kleen Corporation.

**Hazardous Waste Handler Details**

**Sequence No:** 6  
**Receive Date:** 20180215  
**Handler Name:** CLEAN HARBORS SAN JOSE  
**Generator Status Universe:** Large Quantity Generator  
**Source Type:** Annual/Biennial Report update with Notification

**Waste Code Details**

**Hazardous Waste Code:** 121  
**Waste Code Description:** Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

**Hazardous Waste Code:** 122  
**Waste Code Description:** Alkaline solution without metals (pH > 12.5)

**Hazardous Waste Code:** 123  
**Waste Code Description:** Unspecified alkaline solution

**Hazardous Waste Code:** 131  
**Waste Code Description:** Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

**Hazardous Waste Code:** 132  
**Waste Code Description:** Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

**Hazardous Waste Code:** 133  
**Waste Code Description:** Aqueous solution with 10% or more total organic residues

**Hazardous Waste Code:** 134  
**Waste Code Description:** Aqueous solution with <10% total organic residues

**Hazardous Waste Code:** 135  
**Waste Code Description:** Unspecified aqueous solution

**Hazardous Waste Code:** 141  
**Waste Code Description:** Off-specification, aged, or surplus inorganics

**Hazardous Waste Code:** 151  
**Waste Code Description:** Asbestos-containing waste

**Hazardous Waste Code:** 161  
**Waste Code Description:** Fluid-cracking catalyst (FCC) waste

**Hazardous Waste Code:** 162  
**Waste Code Description:** Other spent catalyst

**Hazardous Waste Code:** 171  
**Waste Code Description:** Metal sludge (see 121)

**Hazardous Waste Code:** 172  
**Waste Code Description:** Metal dust (see 121) and machining waste

**Hazardous Waste Code:** 181  
**Waste Code Description:** Other inorganic solid waste

**Sequence No:** 5  
**Receive Date:** 20140301  
**Handler Name:** CLEAN HARBORS SAN JOSE LLC  
**Generator Status Universe:** Large Quantity Generator  
**Source Type:** Annual/Biennial Report update with Notification

**Waste Code Details**

**Hazardous Waste Code:** 121  
**Waste Code Description:** Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

**Hazardous Waste Code:** 122  
**Waste Code Description:** Alkaline solution without metals (pH > 12.5)

**Hazardous Waste Code:** 123  
**Waste Code Description:** Unspecified alkaline solution

**Hazardous Waste Code:** 131  
**Waste Code Description:** Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

**Hazardous Waste Code:** 132  
**Waste Code Description:** Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

**Hazardous Waste Code:** 133  
**Waste Code Description:** Aqueous solution with 10% or more total organic residues

**Hazardous Waste Code:** 134  
**Waste Code Description:** Aqueous solution with <10% total organic residues

**Hazardous Waste Code:** 135  
**Waste Code Description:** Unspecified aqueous solution

**Hazardous Waste Handler Details**

**Sequence No:** 2  
**Receive Date:** 20121012  
**Handler Name:** CLEAN HARBORS SAN JOSE, LLC  
**Generator Status Universe:** Large Quantity Generator  
**Source Type:** Annual/Biennial Report update with Notification

**Waste Code Details**

**Hazardous Waste Code:** 121  
**Waste Code Description:** Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

**Hazardous Waste Code:** 122  
**Waste Code Description:** Alkaline solution without metals (pH > 12.5)

**Hazardous Waste Code:** 123  
**Waste Code Description:** Unspecified alkaline solution

**Hazardous Waste Code:** 131  
**Waste Code Description:** Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

**Hazardous Waste Code:** 132  
**Waste Code Description:** Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

**Hazardous Waste Code:** 133  
**Waste Code Description:** Aqueous solution with 10% or more total organic residues

**Hazardous Waste Code:** 134  
**Waste Code Description:** Aqueous solution with <10% total organic residues

**Hazardous Waste Code:** 135  
**Waste Code Description:** Unspecified aqueous solution

**Hazardous Waste Code:** 141  
**Waste Code Description:** Off-specification, aged, or surplus inorganics

**Hazardous Waste Code:** 151  
**Waste Code Description:** Asbestos-containing waste

**Hazardous Waste Code:** 161  
**Waste Code Description:** Fluid-cracking catalyst (FCC) waste

**Hazardous Waste Code:** 162  
**Waste Code Description:** Other spent catalyst

**Hazardous Waste Code:** 171  
**Waste Code Description:** Metal sludge (see 121)

**Hazardous Waste Handler Details**

**Sequence No:** 1  
**Receive Date:** 20100716  
**Handler Name:** CLEAN HARBORS SAN JOSE, LLC  
**Generator Status Universe:** Large Quantity Generator  
**Source Type:** Annual/Biennial Report update with Notification

**Waste Code Details**

**Hazardous Waste Code:** 121  
**Waste Code Description:** Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

**Hazardous Waste Code:** 122  
**Waste Code Description:** Alkaline solution without metals (pH > 12.5)

**Hazardous Waste Code:** 123  
**Waste Code Description:** Unspecified alkaline solution

**Hazardous Waste Code:** 131  
**Waste Code Description:** Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

<b>Waste Code Description:</b>					WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)	
<b>Hazardous Waste Code:</b>				F024		
<b>Waste Code Description:</b>					PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)	
<b>Hazardous Waste Code:</b>				F025		
<b>Waste Code Description:</b>					CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.	
<b>Hazardous Waste Code:</b>				F026		
<b>Waste Code Description:</b>					WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROENZENE UNDER ALKALINE CONDITIONS.	
<b>Hazardous Waste Code:</b>				F027		
<b>Waste Code Description:</b>					DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)	
<b>Hazardous Waste Code:</b>				F028		
<b>Waste Code Description:</b>					RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

**Site History:**

Safety-Kleen occupies a site on North Tenth Street bounded by Highway 101 on the north and a lumber company, Soares & Son, to the south. There is a bridge on Tenth Street, which crosses over the Highway 101. This site has a small parking lot with restricted access to the back area with a gate and fence. Previous names for Safety-Kleen have been Solvent Services 1973-1990, USPCI, a subsidiary of Union Pacific Corporation acquired Solvent Services in 1990. Union Pacific sold the operation of USPCI to Laidlaw Environmental Services (also known briefly as Laidlaw-USPCI during the transition) in 1994. In 1998 Laidlaw Environmental Services acquired Safety-Kleen Corporation and assumed the name Safety-Kleen Corporation. While the permit application for this address was being processed, Safety-Kleen operated this site as a transfer station with a maximum 10 days on site for the spent solvents. Safety-Kleen transported spent solvents (perchloroethylene (PCE), paints, inks, lacquer thinners, ethylene glycols, spent photochemicals and waste oils) it picked up from customers for recycling. Safety-Kleen is a permitted Hazardous Waste Facility, by Department of Toxic Substances Control (DTSC). The permit licenses the facility from October 1996 to October 2006. DTSC Staff inspected the site in 1997 and found no violations. In 1998 Safety-Kleen requested that designation of overseeing agency be changed to Regional Water Quality Control Board (RWQCB). Groundwater monitoring is ongoing for volatile organic compounds (VOCs).

TPH-GAS, VOLATILE ORGANICS (8260B VOCS)

**Site History:**

Safety Kleen distributes "new" solvents and collects used solvents from various businesses. Used solvents are collected from the generators, temporary store on-site, before transferring to a permitted treatment facility for recycling. Safety Kleen has been operating at this Site since 1984. Investigations were conducted and found elevated concentrations of volatile organic compounds in soil, soil gas, and groundwater.

<b>Comments:</b>					The 2014 4th Quarter Progress Report describes the activities that were performed during the quarter and presents the next quarter activities. During the 4th quarter, Safety-Kleen collected groundwater samples from all nine monitoring wells and presented the results as part of the semiannual monitoring program for the site. Several volatile organic compounds (PCE, TCE, and CFC) were detected that have not been detected in groundwater since 2001 to 2002. The monitoring wells were resampled and the results were consistent with the historical detections. It was determined that residual equipment contamination resulted in a false positive detections and the Standard Operating Procedures for decontaminating equipment were updated to prevent this from reoccurring. For the next quarter (1st Quarter 2015), Safety-Kleen will conduct soil vapor/indoor air sampling. No groundwater monitoring activities are planned for the next quarter.

#### Site History:

Update 6/29/07 - DTSC staff met with Brian Culnan of SK on 6/5/07 at the DTSC Sacramento Regional Office to discuss corrective action and AB1651 at SK San Jose. Based on the 6/5/07 meeting, the following is the history of the site: This was converted to a transfer facility years ago. Tanks were removed as part of past closure; closure certification was not completed because of extensive contamination to soil and groundwater. The site work was further complicated by corrective action work performed on the groundwater at an adjacent site. There is a CACA in place (2003). An earlier RFI Work Plan was submitted to DTSC regarding soil borings only because at the time, DTSC was the lead on soil and the RWQCB was the lead for groundwater. Later, in September 2003, when DTSC took jurisdiction over groundwater, a subsequent RFI Work Plan was submitted to DTSC for groundwater issues. SK has been monitoring the groundwater (semiannually) near the dewatering tanks which show high contamination but a decreasing trend. MTBE is found upgradient, but not related to SK operations.

**Site History:**

Site History: The site is a news paper printing and hazardous waste facility. The facility also maintained a fleet of trucks and automobiles for deliveries and service. The property included the main press building, an automobile maintenance garage, a car wash, and a pumping station formerly supplied by eight underground storage tanks. The known release of fuel led to several soil and groundwater investigation at the site. In 1991, under the direction of the Santa Clara Valley Water District (SCVWD) all USTs were removed. Based on the results of the ongoing investigations and risk assessment, in January 1996, the Regional Water Quality Control Board (RWQCB) requested the facility to determine the plume stability followed by source removal and the evidence of passive remediation (natural attenuation) occurring in groundwater.

On July 22, 1993, San Jose Mercury News was authorized to manage hazardous waste under Permit by Rule. On December 16, 1996, facility submitted the Phase I Environmental Assessment identifying six areas of concern to be further investigated. On December 8, 1997, DTSC conducted a site inspection and concluded that further investigation is needed. A Corrective Action Consent Agreement was signed with the facility on May 26, 2000 to reimburse the oversight costs for the investigation. The facility investigated five of the six areas of concern and postponed one area of concern pending building renovation.

**Site History:**

DTSC entered into a Voluntary Cleanup Agreement with the Villalba Family Trust in June 2012 to oversee a Preliminary Endangerment Assessment and reviewed and approved a workplan and report for a subsurface investigation. Cadmium was detected in shallow soil at a maximum concentrations of 1,390 mg/kg. The elevated cadmium concentrations in soil are localized and mostly beneath the slab of the building on the Site. The subsurface investigation report recommended either capping with a land use covenant or excavation of the cadmium-impacted soil. The project proponent did not conduct further work with DTSC oversight and reportedly performed soil excavation inside the building to remove impacted soil. The Site is currently where San Jose Metals, a recycling center is operating and the Site is covered by the building and pavement.

**Site History:**

In January 1988, EPA informed DHS about its decision to delist the Cristina Warehouse based on the fact that Part A application was returned and that DHS verified that Cristina Warehouse no longer operates as a hazardous waste storage facility. In August 1988, DHS notified Cristina Warehouse that

its operation is not regulated as a treatment, storage or disposal facility under State law and regulations as authorized by the EPA according to the provisions of the Resources Conservation and Recovery Act and its interim status document was rescinded.

Technical Report  
8/12/1997

The Report describes a Preliminary Site Assessment that was conducted on the Site on July 16, 1997. Work included advancement of five soil borings, completion of three groundwater monitoring wells, and collection and chemical analysis of soil and groundwater samples. The work was conducted in accordance with a work plan approved by the Santa Clara Valley Water District. The Report concluded that there were minimal subsurface impacts, no further action at the Site was warranted, and recommended a request for case closure be submitted to the Santa Clara Valley Water District.

Phase 1  
3/23/2017

Originally, Cristina Warehouse operated as a storage facility for hazardous materials. In 1980, Cristina Warehouse submitted a Part A hazardous waste storage permit application to the U.S. Environmental Protection Agency (EPA). Due to economic reasons, Cristina Warehouse withdrew the Part A application and discontinued storing hazardous materials/wastes. In August 1987, the Department of Health Services, Toxic Substances Control Division notified Cristina Warehouse that its operation was no longer regulated as a treatment, storage or disposal facility under State law and regulations as authorized by EPA according to the provisions of the Resources Conservation and Recovery Act and its interim status document was rescinded. Two underground storage tanks, a 550-gallon gasoline tank and a 5,000 gallon diesel tank, were removed from the Site in 1988. On February 23, 1999, Santa Clara Valley Water District issued a Fuel Leak Site Case Closure letter. Based on the documentation found and reviewed during this site screening, DTSC has determined that no further action is needed for the Site.

The property was used as a paper recycling facility from 1977 to 1988, after which it was occupied by San Jose Plating Works, a metal plating facility. Processes at the facility included a spray booth, dip tanks, tin plating, solder plating, deflashing, and washing. The facility is located in an area of light industry. The nearest residential area is at least 1/2 mile from the site.

**Site History:**

Prior to use by Markovitz and Fox as a metal recycling operation, the site was a pear orchard. Markovitz and Fox purchased the site in 1957 and began operations in 1964. The facility ceased operations in March 2000. The on-site metal recycling operations included sorting, shredding, and compressing of ferrous and non-ferrous metals. In 1963, an area approximately 250 by 100 feet was excavated approximately 15 feet deep for a refuse pit in the northwest section of the site. The excavated area was backfilled with solid wastes, until approximately 1970. The landfill area is now currently paved over. Prior to the early 1980s, an incinerator was present in the northern portion of the site and west of the warehouse. The incinerator was used to burn wire insulation and recover the copper wire and melted lead. Markovitz and Fox recycled transformer casings and coils under contract with Pacific Gas and Electric. The transformers still contained some residual transformer fluid. Vehicle batteries were also recycled and stored on site. Battery recycling involved the removal of lead cores from the vehicle batteries. Three underground fuel storage tanks were previously located near the truck scale and another in the northwestern corner of the site. All four tanks were removed under the oversight of the San Jose Fire Department. In November 2001, all buildings and structures on the Site were demolished. The metal recycling operation has been discontinued and the site closed.

To accommodate the requirement of the new consolidation cell on the Brokaw Road Site, the property owners requested a lot line adjustment from the City of San Jose. The lot line adjustment was approved in December 2010. The reconfigured 1633 Oakland Road parcel now consists of approximately 16 acres from the previous approximately 18 acres parcel size.

<b>Comments:</b>	A former waste oil underground storage tank (UST) was encountered during grading activities that occurred on the site subsequent to DTSC's certification. Polychlorinated biphenyls were discovered in a sediment/sludge sample

					that was collected from the UST and analyzed. Because of the discovery of the PCBs, DTSC contacted US EPA, and the site was determined to be subject to regulation under the federal Toxic Substances Control Act. The Report was requested by US EPA to summarize the sampling and mitigation activities related to PCBs. Sampling showed that the residual PCB concentrations were below the 1.0 milligram per kilogram (mg/kg) cleanup objective established by DTSC for the Site, with the exception of one sample beneath the future street section, where PCBs were detected at 1.8 mg/kg. The 95 percent upper confidence limit of the arithmetic mean PCB concentrations was calculated to be 0.15 mg/kg; therefore, it was concluded the on sample exceeding the 1.0 mg/kg PCB cleanup objective would not be an environmental concern.

**Comments:** DTSC approves the proposed soil pile inspection schedule, reducing the soil pile inspections to a weekly event, rather than a daily event as outlined in the RAW and the storage extension request for the soil pile. Preparation of the new consolidation cell is expected to being in the Spring of 2007.

Due to the uncertain status of the 1040-1080 Brokaw Road Site, it is premature to amend the Removal Action Workplan, at this time.

**Site History:**

Site History: The facility is located at 1009 Timothy Drive, in the City of San Jose, Santa Clara County. Surrounding properties consist of commercial and industrial developments. Prime Plating is comprised of a single building structure of approximately 33,000 square feet. The building is further subdivided into different rooms for different operations. The entire property is 90,000 square feet. The facility has been operating in its current location for the past 38 years, prior to that the land was undeveloped. The Facility contact person is Mr. Edward Pease, the Chemical Engineer who has been with the Facility for the past 6 years. The President of the facility is Mr. Barraco.

The operations at the Facility include metal plating and finishing, metal forming, precision machining, photochemical machining, metal etching, metal to ceramic brazing, lamination and assembly, sintering and heat treatment. Elcon specialized in base materials such as nickel, gold, kovar, molybdenum, tungsten, silver, stainless steel, beryllium copper, tungsten copper, copper, and brass. Metal etching and plating tend to be on a small scale for biomedical, aerospace and electronic processes.

**Site History:**

The facility conducted metal plating from at least 1988 to 1996. Previous uses are unknown. The facility plan shows an underground storage tank (UST), wastewater treatment area, former concrete pads, chemical storage areas, and a sludge drying area outside the building. It also shows areas inside the buildings for plating and buffing, repair and storage, and sumps. The facility was a hazardous waste generator and small quantity treatment facility. No HMBP was on file at the San Jose Fire Department for this facility and details of chemicals used at the facility are unknown. The property at 1575 Terminal Ave is currently vacant and for sale, while the property at 1585 Terminal Ave is occupied by a construction company.

**Site History:**

California Electro-Plating Company (CEPCO) was located in suites B, C, and D (3 of 5 separate lease units, 9,500 square feet). The building is in an industrial area of San Jose. California Electro-Plating Company (CEPCO) was in operation at this site from 1974 to 1993. CEPCO's shop caught fire on July 1, 1993 and the business was destroyed. The U.S. EPA took jurisdiction of the containment and cleanup activities in conjunction with the City of San Jose Fire Department and Hazardous Materials Department. The City of San Jose, after conferring with the Fire Department and Hazardous Materials issued an occupancy permit after completion of the repairs. CEPCO did not return to the building after it was cleaned and repaired. A CERCLA Screening Site Inspection was done in 1991 with the recommendation of "No Further Action (NFA) based on sampling results very low metal (Cadmium, Chromium, Copper, Nickel, Zinc, Lead) concentrations below the concrete floor, the lack of potential impact on groundwater, and Environmental Protection Agency (EPA) and San Jose Fire Department study results". The site is listed under the EPA as an Archive (NFRAP) Site. Current occupant of suites C and D is Filtek Engineering and Black Bear Corporation, a Material Handling Equipment Supplier, occupies Suite B. The other occupants of

this building area are as follows: In Suite A, TiSys Construction and Development, and Suite Suite E, A-1 Printing, Ruiz and Sons. During the drive-by , a drum of coolant, valcool, was visible outside the rollup door, and a drill press and lathe were visible inside the building. No other chemical or waste containers were visible. There are no known tenants currently at this site that either store or use hazardous materials.

#### Site History:

Ultra-Chem operated in the industrial complex space 425 from June 1980 until 1982. Space 460 was rented in 1981 to early 1983 when all operations moved to 1310 Old Bayshore (see Moyer Chemical Company). Ultra-Chem was a distributor of proprietary chemicals for commercial, industrial use (cleaners, deoxidizers, phosphates, and degreasers) and also had a lacquer thinner reclamation business at unit 460. Ultra-Chem submitted a closure plan in February 1983. Department of Health Services (DHS), predecessor to Department of Toxic Substances Control (DTSC) approved the plan in March 1983. Closure was completed by April 1983. DTSC certified the closure on April 28, 1983 and issued a No Further Action recommendation for the Ultra Chem 425-460 Reynolds Circle site on January 18, 2002. (Ultra-chem moved all its operations to 1310 Old Bayshore formerly occupied by Moyer Chemical) Details of ongoing site activities can be found at the second listing for ULTRA-CHEM (ID - 43280013).

**Potential Contamin of Concern:**

**Site History:**

Prior to the purchase of the property by Markovits and Fox in 1957, the property consisted of a large pear orchard, extending from the Coyote Creek, north to present day Brokaw Road and bounded on the east and west by Oakland Road and the Union Pacific Railroad Right-of-Way, respectively.

In 1964, Markovits and Fox began the metal recycling operation, initially on the southern portion of the old pear orchard, near the creek and expanding north to present day Brokaw Road. Only the western most third of the site, near the railroad tracks, was included in the metal recycling operation. The eastern portion remained undeveloped and subleased out for agricultural production, mainly grass type crops such as grain and hay.

In the early 1980s, after the construction of Brokaw Road, the western portion of the property being used as part of the metal recycling operation was divided, with the northern portion being redeveloped into an office building (1040 Brokaw Road, parcel number 237-03-061) and the southern portion near the railroad spur remaining as part of the recycling operation. At this time the entire property (less the portion remaining as part the recycling operation) was graded for the potential for further commercial redevelopment of the property. The eastern portion of the property ceased to be used for grass production, but remained undeveloped.

In the late 1990s, the rest of the property was redeveloped into two more office buildings (1060 and 1080 Brokaw Road, parcel number 237-03-069). The portion of the site being used by the metal recycling operation was used for additional parking for the new buildings.

<b>Comments:</b>		The Annual Operation and Maintenance Observation Report presents the results of the annual inspection performed on April 16, 2016, which included checking the condition of the cap on Consolidation Cell CCB. The conditions of the site, where a new retail development was being constructed, are summarized in the report. The cap over Consolidation Cell CCB was observed to be intact, except for a utility trench on the north site that was excavated in accordance with an DTSC-approved Soil Management Plan.

The Report documented that the cap over Consolidation Cell B was observed to be intact, no evidence of activities that may have breached the cap was observed, and no violations of the Land Use Covenant were noted. Recommendations were included in the Report to repair a storm drain inlet adjacent to an area of ponded water and to smooth and recompact the surface of the cap with vehicle track ruts. These repairs were subsequently performed.</p>

HALOGENATED SOLVENTS

**Site History:**

Contamination was discovered in soil and groundwater in September 2001. Perchloroethylene was detected in soil as high as 10 parts per million, and trichloroethylene was detected in groundwater as high as 180 parts per billion. Based on these data, DTSC conducted a responsible party search and issued a draft "Imminent and Substantial Endangerment Determination and Remedial Action Order" on August 5, 2002 to potentially responsible parties. Subsequent information submitted by the site owner to DTSC indicated that the San Francisco Bay Regional Water Quality Control Board (RWQCB) was actively working with the site owner to investigate groundwater contamination at the Eldo Drapery & Dry Cleaning site. In a letter to the site owner dated August 26, 2002, DTSC indicated that it would not issue an order as long as the site owner continued to comply with RWQCB requirements to investigate and cleanup the site. RWQCB is currently working with the Site owner to determine the extent of contamination at the Site.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

## Standard Environmental Record Sources

### Federal

#### National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

**Government Publication Date: Feb 6, 2019**

#### National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

**Government Publication Date: Feb 6, 2019**

#### Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**Government Publication Date: Feb 6, 2019**

#### SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Apr 11, 2019**

#### Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

#### SEMS List 8R Archive Sites:

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Apr 11, 2019**

**Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS:**

CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Mar 4, 2019**

**RCRA non-CORRACTS TSD Facilities:**

RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Mar 4, 2019**

**RCRA Generator List:**

RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Mar 4, 2019**

**RCRA Small Quantity Generators List:**

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Mar 4, 2019**

**RCRA Conditionally Exempt Small Quantity Generators List:**

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt Small Quantity Generators (CESQG) generate 100 kilograms or less per month of hazardous waste or one kilogram or less per month of acutely hazardous waste.

**Government Publication Date: Mar 4, 2019**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Mar 4, 2019**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Sep 20, 2018**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency ) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Sep 20, 2018**

**Emergency Response Notification System:**

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1982-1986**

**Emergency Response Notification System:**

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1987-1989**

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Mar 21, 2019**

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 11, 2019**

**FEMA Underground Storage Tank Listing:**

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date: Dec 31, 2017**

**LIEN on Property:**

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date: Apr 11, 2019**

**Superfund Decision Documents:**

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date: Feb 12, 2019**

**State**

**State Response Sites:**

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

**Government Publication Date: Mar 11, 2019**

**EnviroStor Database:**

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

**Government Publication Date: Mar 11, 2019**

**Delisted State Response Sites:**

DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

**Government Publication Date: Mar 11, 2019**

**Solid Waste Information System (SWIS):**

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

**Government Publication Date: Feb 11, 2019**

**EnviroStor Hazardous Waste Facilities:**

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

**Government Publication Date: Mar 11, 2019**

**Land Disposal Sites:**

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

**Government Publication Date: Nov 30, 2018**

**Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:**

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

**Government Publication Date: Dec 31, 1995**

**Leaking Underground Fuel Tank Reports:**

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

**Delisted Leaking Storage Tanks:**

[DELISTED LST](#)

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Apr 10, 2019

**Permitted Underground Storage Tank (UST) in GeoTracker:**

[UST](#)

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Nov 30, 2018

**Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:**

[SWRCB SWF](#)

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

**Proposed Closure of Underground Storage Tank Cases:**

[UST CLOSURE](#)

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Mar 11, 2019

**Historical Hazardous Substance Storage Information Database:**

[HHSS](#)

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

**Aboveground Storage Tanks:**

[AST](#)

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

**Delisted Storage Tanks:**

[DELISTED TNK](#)

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Mar 11, 2019

**California Environmental Reporting System (CERS) Tanks:**

[CERS TANK](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: May 6, 2019

**Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:**

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Mar 11, 2019

**Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:**

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

**Deed Restrictions and Land Use Restrictions:**

DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Nov 30, 2018

**Voluntary Cleanup Program:**

VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Mar 11, 2019

**GeoTracker Cleanup Program Sites:**

CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Apr 17, 2019

**Delisted California Environmental Reporting System (CERS) Tanks:**

DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: May 6, 2019

**Historical Hazardous Substance Storage Container Information - Facility Summary:**

HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

**Orange County - Anaheim City UST Cleanup Cases:**

[UST CLEANUP](#)

A list of UST Cleanup Cases in the City of Anaheim in Orange County. As part of its Groundwater Protection Program, the City of Anaheim managed the UST Cleanup Oversight Program from April 1991 to June 2014. This list is published by the City of Anaheim Underground Storage Tank Cleanup Program.

*Government Publication Date: May 26, 2015*

**San Francisco County - Maher Ordinance:**

[MAHER SF](#)

List of development projects that are located on sites with known or suspected soil and/or groundwater contamination are subject to the provisions of Health Code Article 22A, which is administered by the San Francisco County Department of Public Health (DPH).

*Government Publication Date: Apr 17, 2019*

**Santa Clara County - City of San Jose Hazardous Material Facilities:**

[SANJOSE HM](#)

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

*Government Publication Date: Apr 28, 2019*

**Santa Clara County - Gilroy City CUPA Facilities List:**

[GILROY CUPA](#)

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

*Government Publication Date: Jan 30, 2019*

**Santa Clara County - CUPA Facilities List:**

[SANTA CLARA CUPA](#)

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental Health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

*Government Publication Date: Apr 16, 2019*

### **Federal**

**Facility Registry Service/Facility Index:**

[FINDS/FRS](#)

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

*Government Publication Date: Jan 30, 2019*

**Toxics Release Inventory (TRI) Program:**

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date: Dec 31, 2017**

**Hazardous Materials Information Reporting System:**

HMIRS

**Government Publication Date: Jan 8, 2019**

**National Clandestine Drug Labs:**

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date: Jul 18, 2018**

**Toxic Substances Control Act:**

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

**Government Publication Date: Jun 30, 2017**

**Hist TSCA:**

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date: Dec 31, 2006**

**FTTS Administrative Case Listing:**

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

**Government Publication Date: Dec 20, 2018**

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

**Integrated Compliance Information System (ICIS):**

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

**Drycleaner Facilities:**

FED DRYCLEANERS

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 29, 2018

**Delisted Drycleaner Facilities:**

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 29, 2018

**Formerly Used Defense Sites:**

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Oct 23, 2018

**Material Licensing Tracking System (MLTS):**

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Nov 1, 2018

**Historic Material Licensing Tracking System (MLTS) sites:**

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

**Government Publication Date: Apr 16, 2019**

### **Delisted Drycleaners:**

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

**Government Publication Date: Apr 16, 2019**

### **Non-Toxic Dry Cleaning Incentive Program:**

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

**Government Publication Date: Feb 28, 2018**

### **Hazardous Waste and Substances Site List - Site Cleanup:**

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

**Government Publication Date: Apr 23, 2019**

### **List of Hazardous Waste Facilities Subject to Corrective Action:**

[DTSC HWF](#)

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

**Government Publication Date: Jul 18, 2016**

[INSP COMP ENF](#)

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

**Government Publication Date: Apr 19, 2019**

### **School Property Evaluation Program Sites:**

[SCH](#)

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

**Government Publication Date: Mar 11, 2019**

### **California Hazardous Material Incident Report System (CHMIRS):**

[CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jan 25, 2019**

### **Hazardous Waste Manifest Data:**

[HAZNET](#)

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Oct 24, 2016**

**Historical California Hazardous Material Incident Report System (CHMIRS):**

[HIST CHMIRS](#)

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jan 1, 1993**

**Historical Hazardous Waste Manifest Data:**

[HIST MANIFEST](#)

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Dec 31, 1992**

**Historical Cortese List:**

[HIST CORTESE](#)

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

**Government Publication Date: Nov 13, 2008**

**Cease and Desist Orders and Cleanup and Abatement Orders:**

[CDO/CAO](#)

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

**Government Publication Date: Feb 16, 2012**

**California Environmental Reporting System (CERS) Hazardous Waste Sites:**

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Sites in GeoTracker:**

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

**Government Publication Date: Apr 17, 2019**

**Waste Discharge Requirements:**

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH  
Oakland Road Property  
1332 Oakland Road San Jose, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

# Geologic Information

## Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

## Geologic Information

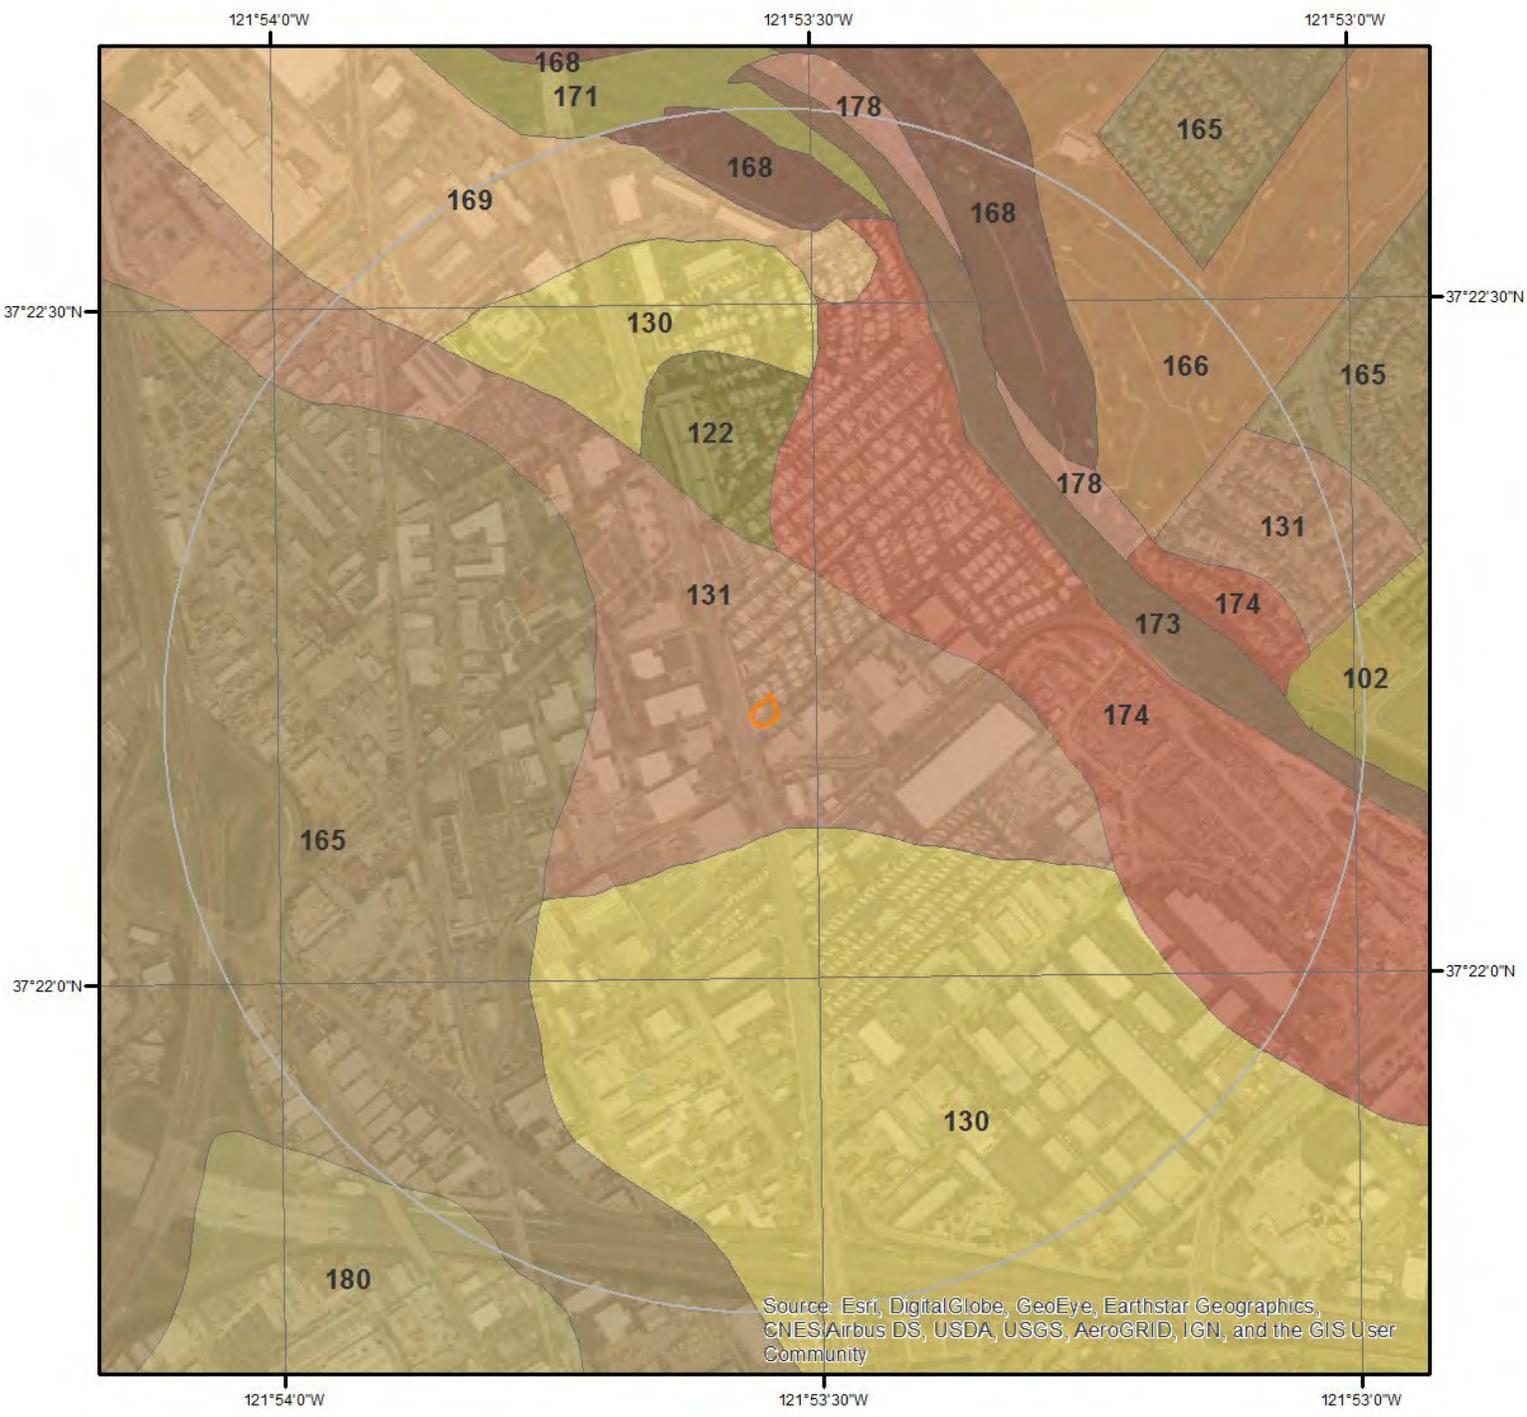

The previous page shows USGS geology information. Detailed information about each unit is provided below.

---

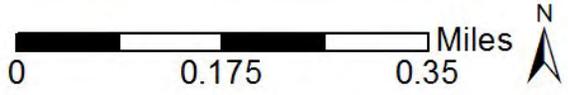

### Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

# Soil Information

## SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

### Map Unit 102

Map Unit Name:	Urban land, 0 to 2 percent slopes, alluvial fans
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null
Major components are printed below	

---

### Map Unit 122

Map Unit Name:	Xerorthents, anthropogenic fill, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.
Major components are printed below	

Xerorthents(100%)

horizon ^A(0cm to 5cm)	Sandy clay loam
horizon ^C1(5cm to 25cm)	Sandy clay loam
horizon ^C2(25cm to 50cm)	Sandy clay loam
horizon ^C3(50cm to 75cm)	Very gravelly sandy clay loam
horizon ^C4(75cm to 100cm)	Gravelly sandy clay loam

### Map Unit 130

Map Unit Name:	Urban land-Still complex, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	null
Hydrologic Group - Dominant:	null
Major components are printed below	

Still(25%)

horizon A1(0cm to 4cm)	Sandy loam
horizon A2(4cm to 30cm)	Very fine sandy loam
horizon Bw1(30cm to 50cm)	Silt loam
horizon Bw2(50cm to 83cm)	Silt loam
horizon 2Ab1(83cm to 95cm)	Loam
horizon 2Ab2(95cm to 130cm)	Loam

## Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for SANTA CLARA County: **2**

*Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L*

*Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L*

*Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L*

### Federal Area Radon Information for SANTA CLARA County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

## **Federal Sources**

### **FEMA National Flood Hazard Layer**

**FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

### **Indoor Radon Data**

**INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

### **Public Water Systems Violations and Enforcement Data**

**PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

### **Radon Zone Level**

**RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

### **Safe Drinking Water Information System (SDWIS)**

**SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

### **Soil Survey Geographic database**

**SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

### **U.S. Fish & Wildlife Service Wetland Data**

**US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

### **USGS Current Topo**

**US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

### **USGS Geology**

**US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

### **USGS National Water Information System**

**FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

## **State Sources**

### **Oil and Gas Wells**

**OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

## Appendix

Oil, Gas and Geothermal Resources.

### **Public Water Supply Wells**

**PWSW**

List of community water supply wells in California. This data was made available by California Department of Water Resources, Division of Statewide Integrated Water Management, who indicates that the management of the data in an ongoing project, and some county data is not represented. Location information is provided using the Public Land Survey System (PLSS) and is subject to the accuracy limitations inherent to the PLSS system.

### **Water Wells**

**WATER WELLS**

A list of water wells maintained by the Department of Water Resources (DWR) Water Data Library.

### **Well Investigation Program Case List**

**WIP**

The Well Investigation Program (WIP) was developed by the State Water Resources Control Board (SWRCB) to locate, assess and remediate sources of solvent contamination impacting drinking water wells. This list contains WIP cases (active and historical) for the San Gabriel and San Fernando Valley area and was provided by the Los Angeles Regional Water Quality Control Board.

**ENVIRONMENTAL SITE ASSESSMENT**  
**- ENVIRONMENTAL QUESTIONNAIRE -**

**PART ONE ~ USER'S RESPONSIBILITIES**  
*To be completed by the Client*

**PROJECT NUMBER: 2019-05-017**  
**PROJECT NAME: Oakland Road Property**

1. Has a chain-of-title or preliminary title report been prepared for the Property (Please provide copies of any available reports)?

**Yes, attach to response.**

2. Have any previous Phase 1 or other environmental reports been prepared for the Property (Please provide copies of any available reports)?

**Not to my knowledge.**

3. Did a search of recorded land title records identify any environmental liens filed or recorded against the Property under federal, tribal, state or local law?

**Not to my knowledge.**

4. Did a search of recorded land title records identify any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions, or institutional controls, that are in place at the Property, and/or have been filed or recorded against the Property, under federal, tribal, state, or local law?

**Not to my knowledge.**

5. Does the purchase price being paid for the Property reasonably reflect the fair market value of the Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?

**Already purchased.**

6. Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? If "yes," please specify. For example:

(a.) Do you know the past uses of the Property? **No**

(b.) Do you know of specific chemicals that are present or once were present at the Property?  
**No**

(c.) Do you know of spills or other chemical releases that have taken place at the Property?

**No**

(d.) Do you know of any environmental cleanups that have taken place at the Property?

**No**

7. Based on your knowledge and experience related to the Property, are there any obvious indicators that point to the presence or likely presence of releases at the Property?

**No**

8. Why have you requested this Phase I Environmental Site Assessment?
- a) To qualify as "innocent landowner" under CERCLA
  - b) Due to bank / loan requirement
  - c) Other reason (specify): Going through a planning approval process for a new building on the site and planning is asking for some background on the site that we cannot definitively answer without at least a phase I report.

9. What is the last known or current use of the Property?

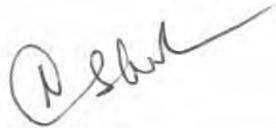

We don't know, part of the reason we want a phase I, the land is currently vacant, raw land with some evidence of past structures on it.

10. What is the proposed future use of the Property?

Please provide a site map, if available.

4 story hotel with underground parking.

As the User of the Phase I Environmental Site Assessment being prepared for the Property (or the duly authorized representative of such User), I have specific knowledge of the questions posed in Part I of the Questionnaire regarding the Property, and hereby certify that to the best of my knowledge, information, and belief, the information disclosed above is true and correct.

## SITE INFORMATION

1. Please describe current use(s) of the Property:  
Vacant
2. Please describe any other known past use(s) of the Property, and approximate dates of each use:  
Unknown, we are hoping the phase 1 will divulge this information.
3. Are there any businesses using any portion of the Property which are operated by an entity other than the Property owner (including a tenant farming operation)? If yes, please provide contact name and phone number for each:  
No, vacant and fenced off.
4. To the best of your knowledge has the Property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill; or as a waste treatment, storage, disposal, processing, or recycling facility?  
Not to our knowledge but the site is in an industrial zone on a corner and seems prime for a gas station so it would not surprise me. Again hoping the phase 1 might uncover this.
5. To the best of your knowledge has any adjoining property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill; or as a waste treatment, storage, disposal, processing, or recycling facility?  
Not to our knowledge. All adjoining properties are residential so doubtful.
6. Do you have any knowledge of environmental liens or governmental notifications relating to past or recurrent violations of environmental laws, with respect to the Property or any facility located on the Property?  
Not to our knowledge.
7. Do you have any knowledge of past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the Property or any facility located on the Property?  
Not to our knowledge.
8. Please describe any other relevant historical information in your possession concerning the Property:  
Not to our knowledge.
9. Are there any electrical transformers or capacitors on the Property which are known to contain Polychlorinated Biphenyls (PCBs), or which may have been manufactured before 1980 and the PCB content is unknown?  
Not to our knowledge.
10. Water is provided to the Property by: Vacant land, so no water service to the property at this time.
  - A well Not to our knowledge.
  - Public water system Not to our knowledge.
  - N/A

11. Waste water disposal is provided to the Property by: **Vacant land so no sewer connections on the property at this time.**
- Public sewer system: Age of system \_\_\_\_\_
  - On-site septic system: Age of system \_\_\_\_\_
  - Pond(s)
  - Other
  - N/A
12. Are there any wastewaters generated and /or disposed of on the Property, other than storm water runoff and domestic sewage? Please describe (please attach copies of any wastewater discharge permits or licenses pertaining to operations of the Property).  
**Not to our knowledge.**
13. Are there any other types of liquid wastes or solid wastes generated at the Property? Please describe how they are handled and disposed of (please attach copies of any waste disposal permits or licenses pertaining to operations on the Property).  
**No, lot is vacant.**
14. Are there any activities on the Property which generate air pollutants, including fuel burning equipment? Please describe (please attach copies of any air permits or licenses pertaining to operations on the Property).  
**No, lot is vacant.**

**STRUCTURES**

Are there currently any structures on the Property?

No.

To the best of your knowledge, have there been any structures on the Property in the past which have been removed?

**Not sure but there looks to be some concrete flat work on the site that could have been part of a building at one time.**

**If the answer to either question is "yes" please answer the following ~**

1. For each existing building, please provide the type of building and date of original construction, and any substantial renovations:  
**Have no information on this.**
2. For each building known to have been removed, please provide the type of building and approximate dates the building existed:  
**Have no information on this.**
3. How are the structures heated and cooled (e.g., central, wall-mounted unit, space heaters, etc.), and what powers the heating and cooling devices (e.g., electric, propane, fuel oil tank, fireplace, etc.)?  
**No buildings currently present.**
4. Provide a brief description of existing development with Property dimensions, area, and acreage:  
**Vacant corner lot adjoining residential uses in an industrial area. +/-121'x98'; 11,068 square feet; .254 acres.**
5. Are there currently, or to the best of your knowledge, have there previously been, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?  
**No.**
6. If any buildings were constructed prior to 1980, is there currently, or was there previously, asbestos in any of the construction materials contained in the building(s)?  
**No building there now, and no clue what the condition, construction or use of that building was.**  
  
If so, has a survey been conducted to assess the type, amount, location and condition of asbestos?  
(Please attach a copy of any survey report.)
7. If any buildings were constructed prior to 1980, is there currently, or was there previously, any lead-based paint applied to the building(s)?  
**See response to question #6**  
If so, has a survey been conducted to assess the type, amount, location and condition of lead-based paint?  
(Please attach a copy of any survey report.)

## STORAGE TANKS AND OTHER CHEMICAL STORAGE

Are there currently, or to the best of your knowledge, have there previously been, any registered or unregistered gasoline, diesel, fuel oil, or other chemical storage tanks (above or underground) located on the Property?

Not to our knowledge.

Are there any pesticides, paints, or other chemicals stored or used on the property in drums, sacks, or other containers, greater than 5 gallons each, or 50 gallons in the aggregate?

Not to our knowledge

**If the answer to either question is "yes" please answer the question below**

1. For each tank, please list the substance stored and tank capacity.  
N.A.
2. Have the tanks been inspected or tested for leakage? When was the most recent test? What were the results? (Please attach copies of results if available).  
N.A.
3. For other storage containers, please describe the substances, quantities stored, and types of containers.  
N.A.
4. Have there been any spills, leaks, or other releases of chemicals on the Property? If so, please describe the chemicals and quantities released, the cleanup measures taken, and the results of any soil or groundwater samples performed to detect the presence of chemicals spilled, leaked, or released on the Property.  
N.A.
5. Please attach copies of any permits or licenses pertaining to the use, storage, handling, or disposal of chemicals on the Property.  
N.A.

## INDUSTRIAL PROPERTIES

Is the property currently used for any industrial purpose?

No, vacant.

Has the Property ever been used for an industrial purpose (other than the current use)?

We have no idea what is was used for in the past.

**If the answer to either question is "yes" please answer the following ~**

1. Has the Property been used for disposal of any liquid or solid waste?  
Not to our knowledge.
2. Have evaporation or storage ponds been located on the Property?  
Not to our knowledge.
3. Have wastewater treatment facilities, such as acid neutralization vaults, been located on the Property?  
Not to our knowledge.
4. Are there raw chemical or waste chemical storage areas on the Property?  
Not to our knowledge.

If the answer to any of questions 1 - 4 are "yes," please provide a description, including the location of all disposal sites, treatment facilities and storage areas, the type of chemicals or wastes handled at each site, the results of any soil or groundwater samples taken in the vicinity of each site, and the manner in which each site not presently in use was closed.

N.A.

## AGRICULTURAL PROPERTIES

Is the Property currently used for agricultural purposes other than grazing or pasture land?

No.

To the best of your knowledge, has the Property been used in the past for agricultural purposes other than grazing or pasture land?

Not to our knowledge.

**If the answer to either question is "yes," please answer the following ~**

1. Have pesticides, herbicides, or other agricultural chemicals been applied to the Property? If so, please describe the locations where such pesticides, herbicides, or chemicals were applied, and the type of pesticides, herbicides, or chemicals applied in each area. (Please attach copies of pesticide use reports if available.)

N.A.

2. Have pesticides, herbicides, or other agricultural chemicals been mixed, formulated, rinsed, or disposed of on the Property? If so, please describe the locations where such pesticides, herbicides, or chemicals were mixed, formulated, rinsed, or disposed of, and the type of pesticides, herbicides, or chemicals mixed, formulated, rinsed, or disposed of at each location.

N.A.

3. Has any soil or groundwater analysis been performed to detect pesticides, herbicides, or chemicals used at on the Property? If so, please provide a summary of the finding or attach the report(s).

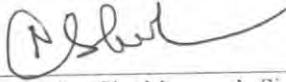

N.A.

## UNDERSTANDING

As the present owner of the Property, or as an officer or general partner of the present owner of the Property (or the duly authorized representative of such owner), I am familiar with all of the operations presently conducted on the Property, and hereby certify that to the best of my knowledge, information, and belief, the information disclosed above is true and correct.

I grant Enviro Assessment, PC or its agents, permission to enter the Property, including all structures on the Property, as necessary to complete the Phase I report.

I understand that I will be given appropriate notice before the date of the site inspection at the phone number provided below.

**DO NOT RECORD**

The following is a copy of provisions one (1) to fourteen (14), inclusive, of the fictitious deed of trust, recorded in each county in California, as stated in the foregoing Deed of Trust and incorporated by reference in said Deed of Trust as being a part thereof as if set forth at length therein.

**TO PROTECT THE SECURITY OF THIS DEED OF TRUST, TRUSTOR AGREES:**

1. To keep said property in good condition and repair; not to remove or demolish any building thereon; to complete or restore promptly and in good and workmanlike manner any building which may be constructed, damaged or destroyed thereon and to pay when due all claims for labor performed and materials furnished therefore; to comply with all laws affecting said property or requiring any alterations or improvements to be made thereon; not to commit or permit waste thereof; not to commit, suffer or permit any act upon said property in violation of law; to cultivate, irrigate, fertilize, fumigate, prune and do all other acts which from the character or use of said property may be reasonably necessary, the specific enumerations herein not excluding the general.
2. To provide, maintain and deliver to Beneficiary fire insurance satisfactory to and with loss payable to Beneficiary. The amount collected under any fire or other insurance policy may be applied by Beneficiary upon any indebtedness secured hereby and in such order as Beneficiary may determine, or at option of Beneficiary the entire amount so collected or any part thereof may be released to Trustor. Such application or release shall not cure or waive any default or notice of default hereunder or invalidate any act done pursuant to such notice.
3. To appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; and to pay all costs and expenses, including cost of evidence of title and attorney's fees in a reasonable sum, in any such action or proceeding in which Beneficiary or Trustee may appear, and in any suit brought by Beneficiary to foreclose this Deed.
4. To pay: at least ten days before delinquency all taxes and assessments affecting said property, including assessments on appurtenant water stock; when due, all encumbrances, charges and liens, with interest, on said property or any part thereof, which appear to be prior or superior hereto; all costs, fees and expenses of this Trust.  
Should Trustor fail to make any payment or to do any act as herein provided, then Beneficiary or Trustee, but without obligation so to do and without notice to or demand upon Trustor and without releasing Trustor from any obligation hereof, may: make or do the same in such manner and to such extent as either may deem necessary to protect the security hereof, Beneficiary or Trustee being authorized to enter upon said property for such purposes; appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; pay, purchase, contest or compromise any encumbrance, charge or lien which in the judgment of either appears to be prior or superior hereto; and, in exercising any such powers, pay necessary expenses, employ counsel and pay his reasonable fees.
5. To pay immediately and without demand all sums so expended by Beneficiary or Trustee, with interest from date of expenditure at the amount allowed by law in effect at the date hereof, and to pay for any statement provided for by law in effect at the date hereof regarding the obligation secured hereby any amount demanded by the Beneficiary not to exceed the maximum allowed by law at the time when said statement is demanded.
6. That any award of damages in connection with any condemnation for public use of or injury to said property or any part thereof is hereby assigned and shall be paid to Beneficiary who may apply or release such moneys received by him in the same manner and with the same effect as above provided for disposition of proceeds of fire or other insurance.
7. That by accepting payment of any sum secured hereby after its due date, Beneficiary does not waive his right either to require prompt payment when due of all other sums so secured or to declare default for failure so to pay.
8. That at any time or from time to time, without liability therefore and without notice, upon written request of Beneficiary and presentation of this Deed and said note for endorsement, and without affecting the personal liability of any person for payment of the indebtedness secured hereby, Trustee may: reconvey any part of said property; consent to the making of any map or plat thereof; join in granting any easement thereon; or join in any extension agreement or any agreement subordinating the lien or charge hereof.

**DO NOT RECORD**

9. That upon written request of Beneficiary stating that all sums secured hereby have been paid, and upon surrender of this Deed and said note to Trustee for cancellation and retention and upon payment of its fees, Trustee shall reconvey, without warranty, the property then held hereunder. The recitals in such reconveyance of any matters or facts shall be conclusive proof of the truthfulness thereof. The Grantee in such reconveyance may be described as "the person or persons legally entitled thereto." Five years after issuance of such full reconveyance, Trustee may destroy said note and this Deed (unless directed in such request to retain them):
10. That as additional security, Trustor hereby gives to and confers upon Beneficiary the right, power and authority, during the continuance of these Trusts, to collect the rents, issues and profits of said property, reserving unto Trustor the right, prior to any default by Trustor in payment of any indebtedness secured hereby or in performance of any agreement hereunder, to collect and retain such rents, issues and profits as they become due and payable. Upon any such default, Beneficiary may at any time without notice, either in person, by agent, or by a receiver to be appointed by a court, and without regard to the adequacy of any security for the indebtedness hereby secured, enter upon and take possession of said property or any part thereof, in his own name sue for or otherwise collect such, rents, issues, and profits, including those past due and unpaid, and apply the same, less costs and expenses of operation and collection, including reasonable attorney's fees, upon any indebtedness secured hereby, and in such order as Beneficiary may determine. The entering upon and taking possession of said property, the collection of such rents, issues and profits and the application thereof as aforesaid, shall not cure or waive any default or notice of default hereunder or invalidate any act done pursuant to such notice.
11. That upon default by Trustor in payment of any indebtedness secured hereby or in performance of any agreement hereunder, Beneficiary may declare all sums secured hereby immediately due and payable by delivery to Trustee of written declaration of default and demand for sale and of written notice of default and of election to cause to be sold said property, which notice Trustee shall cause to be filed for record. Beneficiary also shall deposit with Trustee this Deed, said note and all documents evidencing expenditures secured hereby.  
After the lapse of such time as may then be required by law following the recordation of said notice of default, and notice of sale having been given as then required by law, Trustee, without demand on Trustor, shall sell said property at the time and place fixed by it in said notice of sale, either as a whole or in separate parcels, and in such order as it may determine, at public auction to the highest bidder for cash of lawful money of the United States, payable at time of sale. Trustee may postpone sale of all or any portion of said property by public announcement at such time and place of sale, and from time to time thereafter may postpone such sale by public announcement at the time fixed by the proceeding postponement. Trustee shall deliver to such purchaser its deed conveying the property so sold, but without any covenant or warranty, express or implied. The recitals in such deed of any matters or facts shall be conclusive proof of the truthfulness thereof. Any person, including Trustor, Trustee, or Beneficiary as hereinafter defined, may purchase at such sale.  
After deducting all costs, fees and expenses of Trustee and of this Trust, including cost of evidence of title in connection with sale, Trustee shall apply the proceeds of sale to payment of: all sums expended under the terms hereof, not then repaid, with accrued interest at the amount allowed by law in effect at the date hereof; all other sums then secured hereby; and the remainder, if any, to the person or persons legally entitled thereto.
12. Beneficiary, or any successor in ownership of any indebtedness secured hereby, may from time to time, by instrument in writing, substitute a successor or successors to any Trustee named herein or acting hereunder, which instrument, executed by the Beneficiary and duly acknowledged and recorded in the office of the recorder of the county or counties where said property is situated, shall be conclusive proof of proper substitution of such successor Trustee or Trustees, who shall, without conveyance from the Trustee predecessor, succeed to all its title, estate, rights, powers and duties. Said instrument must contain the name of the original Trustor, Trustee and Beneficiary hereunder, the book and pages where this Deed is recorded and the name and address of the new Trustee.
13. That this Deed applies to, inures to the benefit of, and binds all parties hereto, their heirs, legatees, devisees, administrators, executors, successors and assigns. The term Beneficiary shall mean the owner and holder, including pledgees, of the note secured hereby, whether or not named as Beneficiary herein. In this Deed, whenever the context so requires, the masculine gender includes the feminine and/or neuter, and the singular number includes the plural.
14. That Trustee accepts this Trust when this Deed, duly executed and acknowledged, is made a public record as provided by law. Trustee is not obligated to notify any party hereto of pending sale under any other Deed of Trust or of any action or proceeding in which Trustor, Beneficiary or Trustee shall be a party unless brought by Trustee.

# CLTA STANDARD COVERAGE POLICY OF TITLE INSURANCE

Issued By:

CHICAGO TITLE INSURANCE COMPANY

Policy Number:

**FWPS-2996150600**

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE EXCEPTIONS FROM COVERAGE CONTAINED IN SCHEDULE B AND THE CONDITIONS AND STIPULATIONS, CHICAGO TITLE INSURANCE COMPANY, a Nebraska corporation, herein called the Company, insures, as of Date of Policy shown in Schedule A, against loss or damage, not exceeding the Amount of Insurance stated in Schedule A, sustained or incurred by the insured by reason of:

1. Title to the estate or interest described in Schedule A being vested other than as stated therein;
  2. Any defect in or lien or encumbrance on the title;
  3. Unmarketability of the title;
  4. Lack of a right of access to and from the land;
- and in addition, as to an insured lender only:
5. The invalidity or unenforceability of the lien of the insured mortgage upon the title;
  6. The priority of any lien or encumbrance over the lien of the insured mortgage, said mortgage being shown in Schedule B in the order of its priority;
  7. The invalidity or unenforceability of any assignment of the insured mortgage, provided the assignment is shown in Schedule B, or the failure of the assignment shown in Schedule B to vest title to the insured mortgage in the named insured assignee free and clear of all liens.

The Company will also pay the costs, attorneys' fees and expenses incurred in defense of the title or the lien of the insured mortgage, as insured, but only to the extent provided in the Conditions and Stipulations.

IN WITNESS WHEREOF, CHICAGO TITLE INSURANCE COMPANY has caused this policy to be signed and sealed by its duly authorized officers.

**CHICAGO TITLE INSURANCE COMPANY****POLICY NO. FWPS-2996150600****EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
  - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
  - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
  - (c) resulting in no loss or damage to the insured claimant;
  - (d) attaching or created subsequent to Date of Policy; or
  - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

**CONDITIONS AND STIPULATIONS****1. DEFINITION OF TERMS**

The following terms when used in this policy mean:

- (a) "insured": the insured named in Schedule A, and, subject to any rights or defenses the Company would have had against the named insured, those who succeed to the interest of the named insured by operation of law as distinguished from purchase including, but not limited to, heirs, distributees, devisees, survivors, personal representatives, next of kin, or corporate or fiduciary successors. The term "insured" also includes:
  - (i) the owner of the indebtedness secured by the insured mortgage and each successor in ownership of the indebtedness except a successor who is an obligor under the provisions of Section 12(c) of these Conditions and Stipulations (reserving, however, all rights and defenses as to any successor that the Company would have had against any predecessor insured, unless the successor acquired the indebtedness as a purchaser for value without knowledge of the asserted defect, lien, encumbrance, adverse claim or other matter insured against by this policy as affecting title to the estate or interest in the land);
  - (ii) any governmental agency or governmental instrumentality which is an insurer or guarantor under an insurance contract or guaranty insuring or guaranteeing the indebtedness secured by the insured mortgage, or any part thereof, whether named as an insured herein or not;
  - (iii) the parties designated in Section 2(a) of these Conditions and Stipulations.
  - (iv) Subject to any rights or defenses the Company would have had against the named insured, (A) the spouse of an insured who receives title to the land because of dissolution of marriage, (B) the trustee or successor trustee of a trust or any estate planning entity created for the insured to whom or to which the insured transfers title to the land after the Date of Policy or (C) the beneficiaries of such a trust upon the death of the insured.
- (b) "insured claimant": an insured claiming loss or damage.
- (c) "insured lender": the owner of an insured mortgage.
- (d) "insured mortgage": a mortgage shown in Schedule B, the owner of which is named as an insured in Schedule A.
- (e) "knowledge" or "known": actual knowledge, not constructive knowledge or notice which may be imputed to an insured by reason of the public records as defined in this policy or any other records which impart constructive notice of matters affecting the land.
- (f) "land": the land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways, but nothing herein shall modify or limit the extent to which a right of access to and from the land is insured by this policy.
- (g) "mortgage": mortgage, deed of trust, trust deed, or other security instrument.
- (h) "public records": records established under state statutes at Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.

**CHICAGO TITLE INSURANCE COMPANY****POLICY NO. FWPS-2996150600**

(continued)

- (i) "unmarketability of the title": an alleged or apparent matter affecting the title to the land, not excluded or excepted from coverage, which would entitle a purchaser of the estate or interest described in Schedule A or the insured mortgage to be released from the obligation to purchase by virtue of a contractual condition requiring the delivery of marketable title.

**2. CONTINUATION OF INSURANCE****(a) After Acquisition of Title by Insured Lender.**

If this policy insures the owner of the indebtedness secured by the insured mortgage, the coverage of this policy shall continue in force as of Date of Policy in favor of (i) such insured lender who acquires all or any part of the estate or interest in the land by foreclosure, trustee's sale, conveyance in lieu of foreclosure, or other legal manner which discharges the lien of the insured mortgage; (ii) a transferee of the estate or interest so acquired from an insured corporation, provided the transferee is the parent or wholly-owned subsidiary of the insured corporation, and their corporate successors by operation of law and not by purchase, subject to any rights or defenses the Company may have against any predecessor insureds; and (iii) any governmental agency or governmental instrumentality which acquires all or any part of the estate or interest pursuant to a contract of insurance or guaranty insuring or guaranteeing the indebtedness secured by the insured mortgage.

**(b) After Conveyance of Title by an Insured.**

The coverage of this policy shall continue in force as of Date of Policy in favor of an Insured only so long as the Insured retains an estate or interest in the land, or holds an indebtedness secured by a purchase money mortgage given by a purchaser from the insured, or only so long as the Insured shall have liability by reason of covenants of warranty made by the insured in any transfer or conveyance of the estate or interest. This policy shall not continue in force in favor of any purchaser from an Insured of either (i) an estate or interest in the land, or (ii) an indebtedness secured by a purchase money mortgage given to an insured.

**(c) Amount of Insurance.**

The amount of insurance after the acquisition or after the conveyance by an insured lender shall in neither event exceed the least of:

- (i) The amount of insurance stated in Schedule A;
- (ii) The amount of the principal of the indebtedness secured by the insured mortgage as of Date of Policy, interest thereon, expenses of foreclosure, amounts advanced pursuant to the insured mortgage to assure compliance with laws or to protect the lien of the insured mortgage prior to the time of acquisition of the estate or interest in the land and secured thereby and reasonable amounts expended to prevent deterioration of improvements, but reduced by the amount of all payments made; or
- (iii) The amount paid by any governmental agency or governmental instrumentality, if the agency or the instrumentality is the Insured claimant, in the acquisition of the estate or interest in satisfaction of its insurance contract or guaranty.

**3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT**

An insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in 4(a) below, (ii) in case knowledge shall come to an Insured hereunder of any claim of title or interest which is adverse to the title to the estate or interest or the lien of the insured mortgage, as insured, and which might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if title to the estate or interest or the lien of the insured mortgage, as insured, is rejected as unmarketable. If prompt notice shall not be given to the Company, then as to that insured all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice the rights of any insured under this policy unless the Company shall be prejudiced by the failure and then only to the extent of the prejudice.

**4. DEFENSE AND PROSECUTION OF ACTIONS; DUTY OF INSURED CLAIMANT TO COOPERATE**

- (a) Upon written request by an insured and subject to the options contained in Section 6 of these Conditions and Stipulations, the Company, at its own cost and without unreasonable delay, shall provide for the defense of such insured in litigation in which any third party asserts a claim adverse to the title or interest as insured, but only as to those stated causes of action alleging a defect, lien or encumbrance or other matter insured against by this policy. The Company shall have the right to select counsel of its choice (subject to the right of such insured to object for reasonable cause) to represent the insured as to those stated causes of action and shall not be liable for and will not pay the fees of any other counsel. The Company will not pay any fees, costs or expenses incurred by an insured in the defense of those causes of action which allege matters not insured against by this policy.
- (b) The Company shall have the right, at its own cost, to institute and prosecute any action or proceeding or to do any other act which in its opinion may be necessary or desirable to establish the title to the estate or interest or the lien of the insured mortgage, as insured, or to prevent or reduce loss or damage to an insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this policy. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
- (c) Whenever the Company shall have brought an action or interposed a defense as required or permitted by the provisions of this policy, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from any adverse judgment or order.
- (d) In all cases where this policy permits or requires the Company to prosecute or provide for the defense of any action or proceeding, an insured shall secure to the Company the right to so prosecute or provide defense in the action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such insured for this purpose. Whenever requested by the Company, an insured, at the Company's expense, shall give the Company all reasonable aid (i) in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or proceeding, or effecting settlement, and (ii) in any other lawful act which in the opinion of the Company may be necessary or desirable to establish the title to the estate or interest or the lien of the insured mortgage, as insured. If the Company is prejudiced by the failure of an insured to furnish the required cooperation, the Company's obligations to such insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such cooperation.

**CHICAGO TITLE INSURANCE COMPANY****POLICY NO. FWPS-2996150600**

(continued)

**5. PROOF OF LOSS OR DAMAGE**

In addition to and after the notices required under Section 3 of these Conditions and Stipulations have been provided the Company, a proof of loss or damage signed and sworn to by each insured claimant shall be furnished to the Company within ninety (90) days after the insured claimant shall ascertain the facts giving rise to the loss or damage. The proof of loss or damage shall describe the defect in, or lien or encumbrance on the title, or other matter insured against by this policy which constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage. If the Company is prejudiced by the failure of an insured claimant to provide the required proof of loss or damage, the Company's obligations to such insured under the policy shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such proof of loss or damage.

In addition, an insured claimant may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Policy, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the insured claimant shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by an insured claimant provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of an insured claimant to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonably necessary information from third parties as required in this paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this policy as to that insured for that claim.

**6. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS; TERMINATION OF LIABILITY**

In case of a claim under this policy, the Company shall have the following additional options:

**(a) To Pay or Tender Payment of the Amount of Insurance or to Purchase the Indebtedness.**

- (i) to pay or tender payment of the amount of insurance under this policy together with any costs, attorneys' fees and expenses incurred by the insured claimant, which were authorized by the Company, up to the time of payment or tender of payment and which the Company is obligated to pay; or
- (ii) In case loss or damage is claimed under this policy by the owner of the indebtedness secured by the insured mortgage, to purchase the indebtedness secured by the insured mortgage for the amount owing thereon together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of purchase and which the Company is obligated to pay.

If the Company offers to purchase the indebtedness as herein provided, the owner of the indebtedness shall transfer, assign, and convey the indebtedness and the insured mortgage, together with any collateral security, to the Company upon payment therefor.

Upon the exercise by the Company of the option provided for in paragraph a(i), all liability and obligations to the insured under this policy, other than to make the payment required in that paragraph, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation, and the policy shall be surrendered to the Company for cancellation.

Upon the exercise by the Company of the option provided for in paragraph a(ii) the Company's obligation to an insured Lender under this policy for the claimed loss or damage, other than the payment required to be made, shall terminate, including any liability or obligation to defend, prosecute or continue any litigation.

**(b) To Pay or Otherwise Settle with Parties Other than the Insured or With the Insured Claimant.**

- (i) to pay or otherwise settle with other parties for or in the name of an insured claimant any claim insured against under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay; or
- (ii) to pay or otherwise settle with the insured claimant the loss or damage provided for under this policy, together with any costs, attorneys' fees and expenses incurred by the insured claimant which were authorized by the Company up to the time of payment and which the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in paragraphs b(i) or b(ii), the Company's obligations to the insured under this policy for the claimed loss or damage, other than the payments required to be made, shall terminate, including any liability or obligation to defend, prosecute or continue any litigation.

**7. DETERMINATION AND EXTENT OF LIABILITY**

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the insured claimant who has suffered loss or damage by reason of matters insured against by this policy and only to the extent herein described.

**(a) The liability of the Company under this policy to an insured lender shall not exceed the least of:**

- (i) the Amount of Insurance stated in Schedule A, or, if applicable, the amount of insurance as defined in Section 2(c) of these Conditions and Stipulations;
- (ii) the amount of the unpaid principal indebtedness secured by the insured mortgage as limited or provided under Section 8 of these Conditions and Stipulations or as reduced under Section 9 of these Conditions and Stipulations, at the time the loss or damage insured against by this policy occurs, together with interest thereon; or
- (iii) the difference between the value of the insured estate or interest as insured and the value of the insured estate or interest subject to the defect, lien or encumbrance insured against by this policy.

(b) In the event the insured lender has acquired the estate or interest in the manner described in Section 2(a) of these Conditions and Stipulations or has conveyed the title, then the liability of the Company shall continue as set forth in Section 7(a) of these Conditions and Stipulations.

**CHICAGO TITLE INSURANCE COMPANY**

**POLICY NO. FWPS-2996150600**

(continued)

If loss should result from any act of the insured claimant, as stated above, that act shall not void this policy, but the Company, in that event, shall be required to pay only that part of any losses insured against by this policy which shall exceed the amount, if any, lost to the Company by reason of the impairment by the insured claimant of the Company's right of subrogation.

**(b) The Insured's Rights and Limitations.**

Notwithstanding the foregoing, the owner of the indebtedness secured by an insured mortgage, provided the priority of the lien of the insured mortgage or its enforceability is not affected, may release or substitute the personal liability of any debtor or guarantor, or extend or otherwise modify the terms of payment, or release a portion of the estate or interest from the lien of the insured mortgage, or release any collateral security for the indebtedness.

When the permitted acts of the insured claimant occur and the insured has knowledge of any claim of title or interest adverse to the title to the estate or interest or the priority or enforceability of the lien of an insured mortgage, as insured, the Company shall be required to pay only that part of any losses insured against by this policy which shall exceed the amount, if any, lost to the Company by reason of the impairment by the insured claimant of the Company's right of subrogation.

**(c) The Company's Rights Against Non-insured Obligors.**

The Company's right of subrogation against non-insured obligors shall exist and shall include, without limitation, the rights of the insured to indemnities, guaranties, other policies of insurance or bonds, notwithstanding any terms or conditions contained in those instruments which provide for subrogation rights by reason of this policy.

The Company's right of subrogation shall not be avoided by acquisition of an insured mortgage by an obligor (except an obligor described in Section 1(a)(ii) of these Conditions and Stipulations) who acquires the insured mortgage as a result of an indemnity, guarantee, other policy of insurance, or bond and the obligor will not be an insured under this policy, notwithstanding Section 1(a)(i) of these Conditions and Stipulations.

**13. ARBITRATION**

Unless prohibited by applicable law, either the Company or the Insured may demand arbitration pursuant to the Title Insurance Arbitration Rules of the American Arbitration Association. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. All arbitrable matters when the Amount of Insurance is One Million And No/100 Dollars (\$1,000,000) or less shall be arbitrated at the option of either the Company or the Insured. All arbitrable matters when the Amount of Insurance is in excess of One Million And No/100 Dollars (\$1,000,000) shall be arbitrated only when agreed to by both the Company and the insured. Arbitration pursuant to this policy and under the Rules in effect on the date the demand for arbitration is made or, at the option of the Insured, the Rules in effect at Date of Policy shall be binding upon the parties. The award may include attorneys' fees only if the laws of the state in which the land is located permit a court to award attorneys' fees to a prevailing party. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court having jurisdiction thereof.

The law of the situs of the land shall apply to an arbitration under the Title Insurance Arbitration Rules.  
A copy of the Rules may be obtained from the Company upon request.

**14. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT**

- (a) This policy together with all endorsements, if any, attached hereto by the Company is the entire policy and contract between the insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.
- (b) Any claim of loss or damage, whether or not based on negligence, and which arises out of the status of the lien of the insured mortgage or of the title to the estate or interest covered hereby or by any action asserting such claim, shall be restricted to this policy.
- (c) No amendment of or endorsement to this policy can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

**15. SEVERABILITY**

In the event any provision of the policy is held invalid or unenforceable under applicable law, the policy shall be deemed not to include that provision and all other provisions shall remain in full force and effect.

**16. NOTICES, WHERE SENT**

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this policy and shall be addressed to the Company at:

# CHICAGO TITLE COMPANY

## PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, **Chicago Title Company** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(ies) of title insurance to be issued hereunder will be policy(ies) of Chicago Title Insurance Company, a Florida corporation.

**Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.**

**It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.**

## NOTES

- Note 1.** If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.
- Note 2.** Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.
- Note 3.** The requirement that the complete and correct name(s) of the buyer(s) in this transaction be submitted to the Title Department at least 5 days prior to the close of Escrow.
- Note 4.** Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirements cannot be met, please call the company at the number provided in this report.
- Note 5.** Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.
- Note 6.** Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

## END OF NOTES

Inquire before you wire!

## WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.  
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

**FIDELITY NATIONAL FINANCIAL  
PRIVACY NOTICE  
Revised May 1, 2018**

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF", "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

**Types of Information Collected**

We may collect two types of information from you: Personal Information and Browsing Information.

Personal Information. FNF may collect the following categories of Personal Information:

- contact information (e.g., name, address, phone number, email address);
- demographic information (e.g., date of birth, gender, marital status);
- identity information (e.g. Social Security Number, driver's license, passport, or other government ID number);
- financial account information (e.g. loan or bank account information); and
- other personal information necessary to provide products or services to you.

Browsing Information. FNF may automatically collect the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or mobile device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

**How Personal Information is Collected**

We may collect Personal Information about you from:

- information we receive from you on applications or other forms;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

**How Browsing Information is Collected**

If you visit or use an FNF Website, Browsing Information may be collected during your visit. Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

**Other Online Specifics**

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to other websites. FNF is not responsible for the privacy practices or the content of any of those other websites. We advise you to read the privacy policy of every website you visit.

### **Use of Personal Information**

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and third parties' products and services, jointly or independently.

### **When Information Is Disclosed**

We may make disclosures of your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Please see "**Choices With Your Information**" to learn the disclosures you can restrict.

### **Security of Your Information**

We maintain physical, electronic, and procedural safeguards to guard your Personal Information. We limit access to nonpublic personal information about you to employees who need to know that information to do their job. When we provide Personal Information to others as discussed in this Privacy Notice, we expect that they process such information in compliance with our Privacy Notice and in compliance with applicable privacy laws.

### **Choices With Your Information**

If you do not want FNF to share your information with our affiliates to directly market to you, you may send an "opt out" request by email, phone, or physical mail as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 934-3354 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about you creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

### **Information From Children**

The FNF Websites are meant for adults and are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

### **International Users**

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence for any of the purposes described in this Privacy Notice. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

### **FNF Website Services for Mortgage Loans**

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except (1) as required or authorized by contract with the mortgage loan servicer or lender, or (2) as required by law or in the good-faith belief that such disclosure is necessary to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

### **Your Consent To This Privacy Notice; Notice Changes**

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The revised Privacy Notice, showing the new revision date, will be posted on the FNF Website. Each time you provide information to us following any amendment of this Privacy Notice, your provision of information to us will signify your assent to and acceptance of the terms of the revised Privacy Notice for all previously collected information and information collected from you in the future. We may use comments, information or feedback that you submit to us in any manner that we may choose without notice or compensation to you.

### **Accessing and Correcting Information; Contact Us**

If you have questions, would like to access or correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, send your requests via email to [privacy@fnf.com](mailto:privacy@fnf.com), by phone to (888) 934-3354, or by mail to:

## CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990

### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
  - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
  - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
  - (c) resulting in no loss or damage to the insured claimant;
  - (d) attaching or created subsequent to Date of Policy; or
  - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

### EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
  - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
  - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
  - c. that result in no loss to You; or
  - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
  - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
  - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

**LIMITATIONS ON COVERED RISKS**

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

#### **EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).
