

# San José Airport-Diridon Station Connector Project Alignment Stakeholders Meetings

# Project Overview

## Background

The automobile-focused transportation system in Silicon Valley is reaching its capacity. To accommodate growth in the region in an environmentally sustainable way, transit must improve to be competitive with auto modes to enable car-free living for more people in the area.

## Overarching Goal

*Create new routes in the Silicon Valley transit system emanating from Diridon Station beginning with SJC Airport connector that are safe, fast, frequent, reliable, offering a high level of rider experience and don't allow mixed-traffic.*

# Project Overview

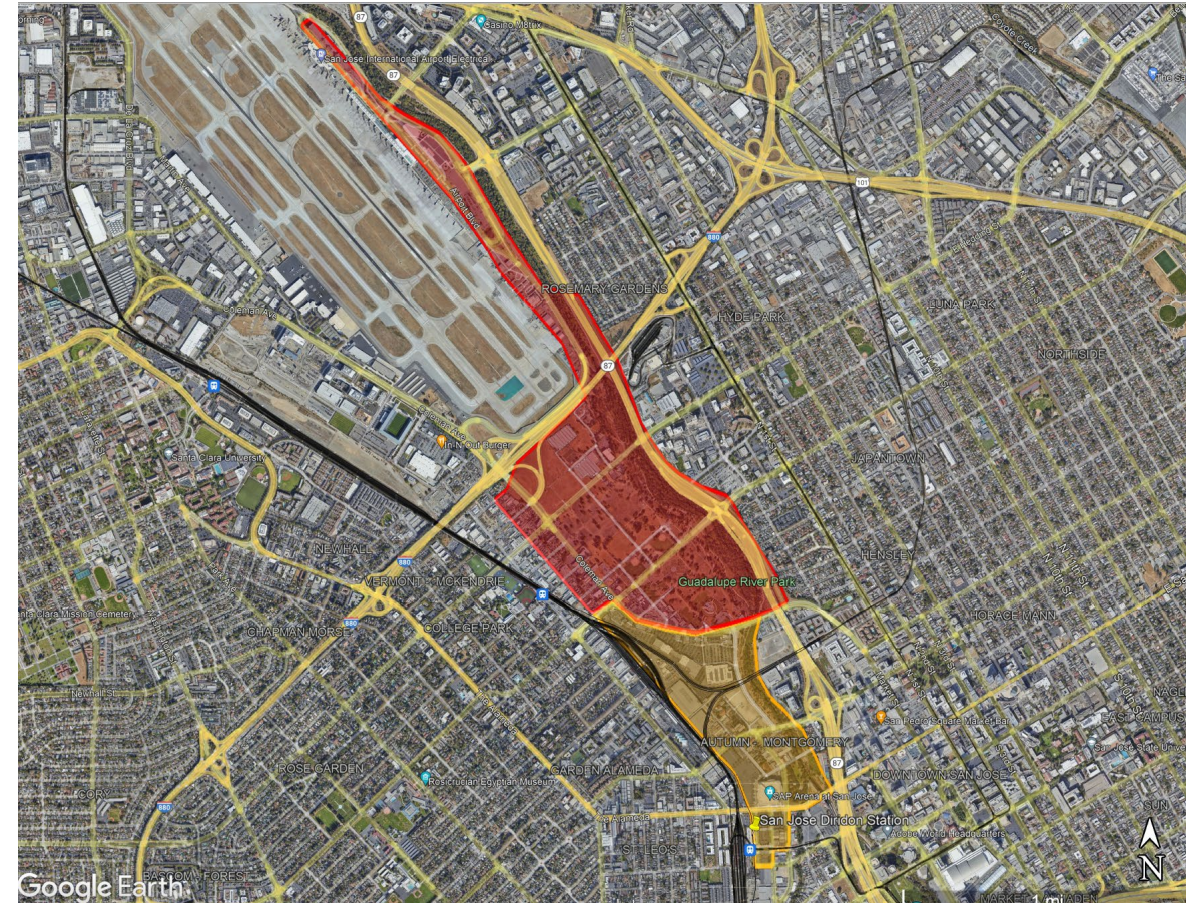

## Project

- Three to four-mile (depending on alignment) transit connection from Diridon Station to SJC Airport that would “integrate Diridon Station and SJC as a single facility from the passenger’s perspective”
- P3 Delivery Model driven by schedule & limited public funding
- Alignment to be determined during pre-development stage (PDA) following selection of technological solution and validating its feasibility

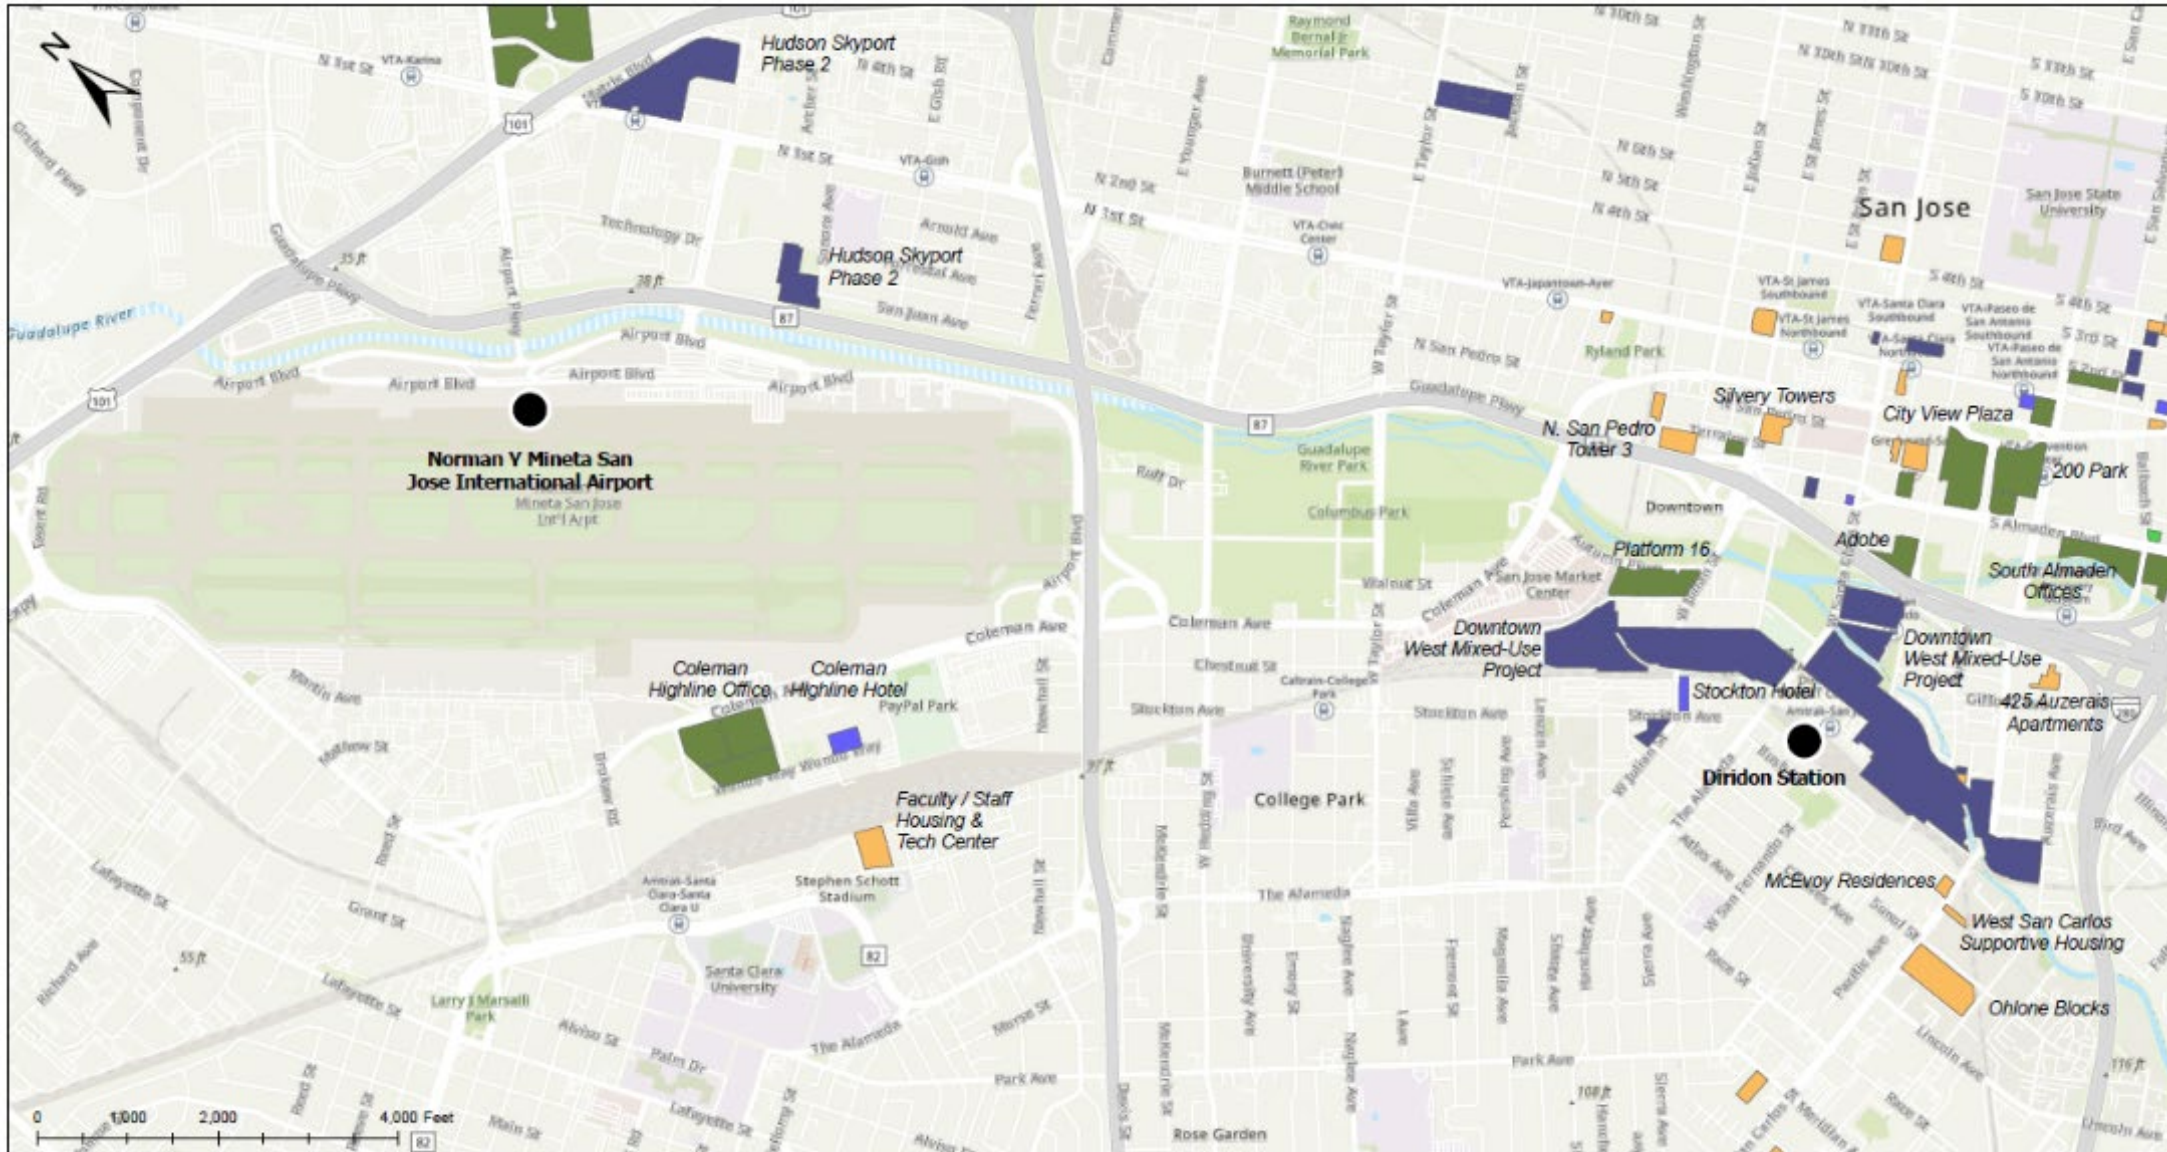

## Timeline

- RFI released in July 2019 with 23 responses.
- RFPQ to be released in Q1 2022.
- City to enter into Pre-development Agreement with successful proposer by mid 2022.

## Area of Potential Alignments

# Major Private Developments

- Legend**
- Additional
  - Affordable Housing
  - Commercial
  - Hotel
  - Housing
  - Mixed Use
  - Office

# Questions for you

- What is your general opinion of the project?
- What do you want the City to know about your site in relation to the RFP?
- How might you want your site to interact with the project? E.g. what constraints and opportunities/synergies are there do you for see?
- Would you be willing to write a letter expressing your site needs/desires/opportunities to be released with the RFP?
