Personal Action Plan

A **goal** is something you want to accomplish but may take a while to achieve, such as losing weight or decreasing your blood pressure.

Action plans are short-term plans that help you reach your goal. They must include a specific action or behavior that you **want** to do and know that you will be able to accomplish. Your plan must answer the questions:

- → *What* are you going to do?
- → *How much* are you going to do?
- → When are you going to do it?
- → *How many* days a week are you going to do it?

Your **confidence level** is an indicator of how certain you are that you will succeed with your action plan. You must attach a confidence level of 0 to 10 to your

plan. A confidence level of 7 or higher will help you to succeed. If your confidence level is lower than 7, think about changing your action plan.

Action plan examples:

My goal ice

- → This week I will walk (*what*) for 20 minutes (*how much*) before lunch (*when*) three days (*how many*).
- → This week I will take my medications as prescribed before breakfast, lunch, and dinner every day.
