

Memorandum

TO: HONORABLE MAYOR
AND CITY COUNCIL

FROM: Jacky Morales-Ferrand

SUBJECT: AFFORDABLE HOUSING
DATA DASHBOARD

DATE: March 14, 2022

Approved

Date

03/15/22

INFORMATION

There remains a major need for affordable housing throughout San José and the Housing Department is working diligently to meet that need for residents and those most in need. In support of our mission, we have developed an Affordable Housing Data Dashboard (Dashboard). The Dashboard tool provides wide-ranging data regarding affordable housing within San José. The Dashboard provides internal and external stakeholders with current data that they can review and download. Some of the information the Dashboard includes are affordability levels, City investment, and affordable housing developments that are under construction.

Currently, the Dashboard provides data starting from January 1, 2018 through December 31, 2021. The data will be updated on a quarterly basis, and replaces the Production and Preservation Report the Housing Department previously published. The Dashboard provides all the categories of information found in the Production and Preservation Reports plus more useful data, charts and interactive features. We welcome feedback and suggestions on improvements for future iterations of the Dashboard.

The Dashboard is located on the Housing Department [website](#)ⁱ.
