Subject: Phase I Environmental Site Assessment

409 and 425 ½ South 2nd Street
San Jose, California 95113
AEI Project No. 432412
Client Reference Name: Bo Town
Client Project Number: 20-123

Dear Shannon George:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or TGolino@aeiconsultants.com.

Sincerely,
DRAFT
Tory Golino
Vice President
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 409 and 425 ½ South 2nd Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	409 and 425 ½ South 2nd Street, San Jose, Santa Clara County, California 95113
Property ID (APN or Block/Lot)	467-47-097, 467-47-020, 467-47-019
Location	Southwestern corner of the intersection of S 2nd Street and E San Salvador Street, and southwest of S 2nd Street
Property Type	Restaurant and parking lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.7/Assessor
Number of Buildings	Two 409 S 2nd Street: restaurant building 425 1/2 S 2nd Street: vacant storage building
Building Construction Date(s)/Source	409 S 2nd Street: 1967/agency records 425 1/2 S 2nd Street: Prior to 1939/historical sources
Building Square Footage (SF)/Source	5,000/Owner or Property Manager
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	409 S 2nd Street: LvL Up Arcade 425 S 2nd Street: None, interior of the building recently burned down and is therefore currently vacant
Current On-site Operations/Use	General restaurant and arcade activities, and vehicle parking
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	EDR HIST AUTO

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	n/a

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1884-1891	Developed with four residences, ancillary structures and a tank house (5-8 San Salvador Street, 405-435 S Second Street)	Sanborn maps, previous report
1915	Developed with three residences, a "housekeeping rooms" building, a vacant building, sheds and corral, and a tank house (26 San Salvador Street, 405-435 S 2nd Street)	Sanborn map, previous report
1930	Building permit issued to Seaside Oil Company / presumed gasoline service station (405 S 2nd)	Building permit, previous report
1939-1956	Developed with three residences, a "housekeeping rooms" building, the current storage building (used for residential purposes/car garage), a 'store' building (occupied by a used tire shop in 1940, a glass installation company in 1960, and door service company in 1966), auto repair from 1940-1966 (411 S 2nd), a wood shed and corral (26, 30 San Salvador Street, 405-435 S 2nd Street)	Aerial photographs, Sanborn maps, agency records, city directories, previous report
1963	Developed with three residences, a small 'store' building, the current storage building (used for residential purposes/car garage), and vacant land on the southern portion	Aerial photographs, city directories, previous report
1967	Construction of the current commercial building at 409 S 2nd Street	Agency records
1968-1982	Developed with the current commercial building occupied as a restaurant, a residence, the current storage building (used for residential purposes/residential car garage) and vacant land	Aerial photographs, Sanborn maps, agency records, city directories, previous report
1993-Present	Developed with the current commercial building occupied as a restaurant, the current storage building (used for residential purposes/residential car garage and storage), and parking lots	Aerial photographs, agency records, city directories, previous report, site visit

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	The intersection of S 2nd Street and E San Salvador Street followed by Club Milano (394-396 S 2nd Street) S 2nd Street followed by: SA-BY Thai Cuisine (402-404 S 2nd Street) Đại-Thành Supermarket (418 S 2nd Street) Parking lot (430-432 S 2nd Street) Residence (446 S 2nd Street)	EDR HIST AUTO (394-396 S 2nd Street) EDR HIST CLEANER (430-432 S 2nd Street)
Southeast	Pacific Motor Inn - San Jose, Presbyterian Voices for Justice (455 S 2nd Street)	None identified
Southwest	The LGBTQ Youth Space, Heroes Martial Arts (450-452 S 1st Street) Whipsaw (434 S 1st Street)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	Cinequest Film Festival, Forager Tasting Room & Eatery (410-420 S 1st Street) The Ritz (400 S 1st Street)	
Northwest	E San Salvador Street followed by: The Studio Climbing (396 S 1st Street, 559 E San Salvador Street) Parking lot (345 S 2nd Street)	None identified

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- Review of the previous report, historical/regulatory agency sources and/or the regulatory database revealed the following notable onsite tenancies and/or owners: Jack E Castro auto repair - 1940-1966 (411 S 2nd Street), Jett A N Used Tires - 1940 (30 E San Salvador) and Seaside Oil Company - 1930 (405 S 2nd). See Figure 2 and Sanborn maps within the appendices for associated locations.

Jack E Castro auto repair was listed in city directories, the EDR Radius Map (HIST AUTO) and a prior report. It should be noted that this portion of the subject property appeared to be developed with a residence and a rear, large apparent outbuilding/garage during the noted tenancy. It appears that the listing was associated with a concurrent auto repair operation on the premises of the residential property, likely in the rear building.

Jett A N Used Tires was listed in a city directory in a prior report. No additional information was present. A commercial 'Store' building was present at this location from at least 1915 through 1963 (Sanborn maps/aerial photographs). It is unknown if this business performed automotive repairs or only retail tire sales and if the operation included any features of concern such as in-ground lifts, clarifiers and/or USTs. The store building was occupied by a glass installation company in 1960 and a door service company in 1966. Other tenancies of this building as well as the duration of Jett A N Used Tires are unknown.

Lastly, a June 1930 building permit indicated that Seaside Oil Company (a former chain of gasoline service stations per online research) was listed as the property owner on record. The permit was for a new building, valued at \$8000, and included building, electrical, fixtures (no details). Inspections were signed off in June and July, therefore it is presumed that the permitted work was completed for the related developments. The

address corresponding with this permit would have been at the southern corner of S 2nd and San Salvador, per Sanborn maps. It is presumed that the permit was related to the construction of a gas station, therefore the potential for related USTs exists.

Given the time period of the auto repair operations (conducted during a time when no regulatory oversight with respect to hazardous substance/petroleum product storage/handling/waste disposal would have been in place), duration, and potential for related features of concern, paired with the potential for automotive repair operations in conjunction with the tire company, as well as the permit issued to Seaside Oil Company for the apparent service station, the potential exists that these operations may have resulted in releases to the subsurface and that UST(s) may remain in place. Based on this notion, these historical uses are representative of a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- According to David J. Powers & Associates, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI was informed by the User that the subject property is slated for redevelopment. Therefore it would be prudent to develop/implement a Development of a Site Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances and/or petroleum products or other yet unidentified features or conditions that may exist. This document will likely be required by the City of San Jose as part of the redevelopment process.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 409 and 425 ½ South 2nd Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Phase II Subsurface Investigation and Geophysical Survey

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 409 and 425 ½ South 2nd Street, San Jose, Santa Clara County, California ([Appendix A: Figures](#) and [Appendix B: Property Photographs](#)).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to [Section 6.3](#) for a summary of previous reports and other documentation provided to AEI during this assessment.
- Due to the large volume of materials within portions of the building and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the building and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources and nature of occupancy, this limitation is not expected to alter the overall findings of this assessment.
- AEI was not granted interior access to the storage building at 425 1/2 S 2nd Street because the interior had recently burned down. Based on the nature of use and current conditions, this limitation is not expected to alter the overall findings of this assessment.
- On December 29, 2020, AEI contacted the San Jose Fire Department for information on the subject property to identify any evidence of previous or current hazardous substance usage, and/or for any historical information available for the subject property. However, AEI's request is still being processed, and AEI has not received any records as of this report date. Based on the quality of information obtained from other regulatory agencies, this limiting condition will not alter the Findings of this assessment. Additionally, the 2019 prior ESA (Section 6.3) stated that no hazardous materials-related files existed for the subject property (only restaurant inspections).

1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failures were identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was an 1884 Sanborn map indicating that the subject property was developed residentially. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous report, interview

Data Failure	<p>Historical sources were not obtained at five-year intervals dating back to first developed use. AEI was not able to track the history of the subject property between the years 1916 to 1938 as none of the historical sources utilized as part of this assessment covered this time period. In the 1915 Sanborn map and 1939 aerial photograph (poor quality), the subject property is developed residentially.</p> <p>Given the 1930 Seaside Oil Company permit, AEI cannot rule out the potential for onsite service station operations in at least 1930. Refer to the REC/Findings for additional discussion.</p>
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous report, interview

1.6.2 SIGNIFICANT DATA GAPS

The following significant data gap was identified during the course of this assessment:

Significant Data Gap	<p>As discussed in Section 1.6.1, AEI encountered a data failure from 1916 through 1938. The 1915 Sanborn map and 1939 aerial photograph (poor quality) appeared to depict residential uses onsite.</p> <p>Additionally, the tenancy of the former commercial building at 26/30 E San Salvador Street, present from at least 1915 through at least 1966, is unknown for various intervals, as discussed in the REC/Findings.</p>
-----------------------------	--

Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous report, interviews
--------------------------------------	--

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by David J. Powers & Associates on December 21, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	409 and 425 1/2 South 2nd Street, San Jose, Santa Clara County, California 95113
Property ID (APN or Block/Lot)	467-47-097, 467-47-020, 467-47-019
Location	Southwestern corner of the intersection of S 2nd Street and E San Salvador Street, and southwest of S 2nd Street
Property Type	Restaurant and parking lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.7/Assessor
Number of Buildings	Two 409 S 2nd Street: restaurant building 425 1/2 S 2nd Street: vacant storage building
Building Construction Date(s)/Source	409 S 2nd Street: 1967/agency records 425 1/2 S 2nd Street: Prior to 1939/historical sources

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	San Jose Water Company
Sewage Disposal/Treatment	City of San Jose

Utility source/system information listed in the table above is provided by Mr. Brady Coggins, Key Site Manager, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial and residential area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	The intersection of S 2nd Street and E San Salvador Street followed by Club Milano (394-396 S 2nd Street) S 2nd Street followed by: SA-BY Thai Cuisine (402-404 S 2nd Street) Đại-Thành Supermarket (418 S 2nd Street) Parking lot (430-432 S 2nd Street) Residence (446 S 2nd Street)	EDR HIST AUTO (394-396 S 2nd Street) EDR HIST CLEANER (430-432 S 2nd Street)
Southeast	Pacific Motor Inn - San Jose, Presbyterian Voices for Justice (455 S 2nd Street)	None identified
Southwest	The LGBTQ Youth Space, Heroes Martial Arts (450-452 S 1st Street) Whipsaw (434 S 1st Street) Cinequest Film Festival, Forager Tasting Room & Eatery (410-420 S 1st Street) The Ritz (400 S 1st Street)	None identified
Northwest	E San Salvador Street followed by: The Studio Climbing (396 S 1st Street, 559 E San Salvador Street) Parking lot (345 S 2nd Street)	None identified

If the surrounding properties are listed in the regulatory database, please refer to [Section 5.1](#) for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qha: Alluvium (Holocene)/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban land-Elpaloalto complex, 0 to 2 percent slope: Well-drained alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics/USDA Soil Survey Urban Land: this designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey

Groundwater Flow Direction/Source	North/Topographic map interpretation and LUST case data for a nearby site at 300 S 1st Street, via GeoTracker
Estimated Depth to Groundwater/ Source	12 to 16 ft bgs/LUST case data for a nearby site at 300 S 1st Street, via GeoTracker
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	n/a
1884-1891	Developed with four residences, ancillary structures and a tank house (5-8 San Salvador Street, 405-435 S Second Street)	Sanborn maps, previous report
1915	Developed with three residences, a "housekeeping rooms" building, a vacant building, sheds and corral, and a tank house (26 San Salvador Street, 405-435 S 2nd Street)	Sanborn map, previous report
1930	Building permit issued to Seaside Oil Company / presumed gasoline service station (405 S 2nd)	Building permit, previous report
1939-1956	Developed with three residences, a "housekeeping rooms" building, the current storage building (used for residential purposes/car garage), a 'store' building (occupied by a used tire shop in 1940, a glass installation company in 1960, and door service company in 1966), auto repair from 1940-1966 (411 S 2nd), a wood shed and corral (26, 30 San Salvador Street, 405-435 S 2nd Street)	Aerial photographs, Sanborn maps, agency records, city directories, previous report
1963	Developed with three residences, a small 'store' building, the current storage building (used for residential purposes/car garage), and vacant land on the southern portion	Aerial photographs, city directories, previous report
1967	Construction of the current commercial building at 409 S 2nd Street	Agency records
1968-1982	Developed with the current commercial building occupied as a restaurant, a residence, the current storage building (used for residential purposes/residential car garage) and vacant land	Aerial photographs, Sanborn maps, agency records, city directories, previous report
1993-Present	Developed with the current commercial building occupied as a restaurant, the current storage building (used for residential purposes/residential car garage and storage), and parking lots	Aerial photographs, agency records, city directories, previous report, site visit

The following historical addresses were associated with the subject property: 5-8, 26-30 San Salvador Street, 401-435 S Second Street. These addresses were also researched as part of this assessment.

The historical use of the subject property is discussed in the Findings.

If available, copies of historical sources are provided in [Appendix D](#).

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939*, 1948, 1950*, 1956	Apparent residences and trees Possible building or cleared area on northwestern side visible by 1956	NORTHEAST: Roads followed by commercial and/or residential buildings, includes a gas station in 1939 and two gas stations by 1948 SOUTHEAST: Commercial and/or residential buildings SOUTHWEST: Commercial buildings NORTHWEST: Road followed by commercial and/or residential buildings
1963	Three residences and vacant land on the southern portion. Former small commercial building and storage present on northwestern portion.	NORTHEAST: Roads followed by commercial and residential buildings SOUTHEAST: No significant changes SOUTHWEST: Commercial buildings NORTHWEST: Road followed by a commercial building and parking lot
1968*, 1974, 1982	The current commercial building, a residence and vacant land with parking	NORTHEAST: No significant changes SOUTHEAST: The current commercial building SOUTHWEST: No significant changes NORTHWEST: No significant changes
1993, 1998, 2005, 2006, 2009, 2010, 2012	The current commercial building and remaining small building and west/central area, and parking lot	NORTHEAST: No significant changes SOUTHEAST: No significant changes SOUTHWEST: No significant changes NORTHWEST: No significant changes

*Due to poor image quality and/or scale, detailed observation of site features was not possible.

The historical use of the subject property is discussed in the Findings.

Adjoining sites to the northeast are discussed in Section 5.1.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1884	Four two-story buildings (likely residences), a portion of ancillary structures and a tank house* (5-8 San Salvador Street, 409-435 S Second Street) *presumed to be a water tank	NORTHEAST: Roads followed by vacant land, residences and ancillary structures SOUTHEAST: Residences, a hay barn and ancillary structures SOUTHWEST: Vacant land, a carpenter shop and marble workshop NORTHWEST: Road followed by residences, a store, and ancillary structures
1891	No significant changes	NORTHEAST: Roads followed by residences and ancillary structures SOUTHEAST: Residences, a hay barn, wood storage yard, and ancillary structures SOUTHWEST: Vacant land and the Bisson and Bisson marble workshop NORTHWEST: No significant changes
1915	Three residences, a "housekeeping rooms" building, a vacant building, sheds and corral, and a tank house (26 San Salvador Street, 409-435 S 2nd Street)	NORTHEAST: No significant changes, includes upholstery SOUTHEAST: Residences, vacant land, ancillary structures, a horse shoeing shop, store and blacksmith SOUTHWEST: A sheet iron & wire workshop, a black smith shop, the Marcus Blanchard garage, two fuel and feed yards, a store with oils and garage, an auto show room and auto repair shop NORTHWEST: Road followed by a drug store, a church, residences and ancillary structures
1950	Three residences and associated garages, a "housekeeping rooms" building, a store, the current storage building (used for residential purposes/car garage), wood shed and corral (26, 30 San Salvador Street, 409-435 S 2nd Street)	NORTHEAST: Roads followed by an auto repair shop with "gas and oils in yard", another auto repair shop with an "oil station", vacant land, residences and ancillary buildings SOUTHEAST: Residences, furniture store, an auto repair shop, vacant land, and store SOUTHWEST: Two furniture stores, an auto body shop, a paint and wallpaper shop and movie theater NORTHWEST: Road followed by a movie theater, various stores, parking lots, auto repair shop, residence and church

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1969	The current commercial building occupied as a restaurant, an apartment building, a garage, the current storage building (used for residential purposes/car garage), and vacant land (405-435 S 2nd Street)	NORTHEAST: Roads followed by multiple stores, an auto repair shop, and residence SOUTHEAST: The current hotel building SOUTHWEST: Furniture stores and movie theater NORTHWEST: Road followed by a movie theater and parking lot
1984	The current commercial building, occupied as a restaurant, a residence, the current storage building (used for residential purposes/car garage), and parking lots (405-435 S 2nd Street)	NORTHEAST: Roads followed by multiple stores, a Frigidaire equipment repair shop with spray painting, and a residence SOUTHEAST: No significant changes SOUTHWEST: Commercial buildings and a movie theater NORTHWEST: No significant changes

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the Sanborn map review.

Environmental concerns associated with the historical auto repair and gas station at the northeastern adjoining property at 396 S 2nd Street are further discussed in Section 5.1.

According to the Sanborn maps, the northeastern adjoining site at 402-404 S 2nd Street was previously developed with an auto repair shop and oil station in 1950, with the auto repair shop remaining on-site through at least 1969. Additionally, the southwestern adjoining site was occupied by an auto repair shop in 1915 and 1950. Hazardous substances and petroleum products were likely associated with the former auto repair operations and oil station. The sites were not listed for any spills or releases in connection with the use or handling of these materials. Based on the lack of a documented release, the relative distance, and the groundwater gradient, the sites are not expected to represent a significant environmental concern.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1922. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Year(s)	Address - Occupant Listed
1940	30 E San Salvador - Jett A N Used Tires
1940, 1945	411 South 2nd Street: Castro JE
1950, 1955	411 South 2nd Street: Castro Jack E auto repair
1963	411 South 2nd Street: Castro Jack E auto repair
1960	30 E San Salvador - Shamrock Glass Installation
1966	411 South 2nd Street: Castro Jack, residential, apartments 30 E San Salvador - Hulls Door Service

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Refer to the Findings for discussion of these two historical automotive-related businesses.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	December 29, 2020	Email	Ms. Anna Cortez	No hazardous substances records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	December 29, 2020	Email	Ms. Loretta Worthy	Response pending, refer to Section 1.5

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Department (SJBD)	December 29, 2020	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
405 S 2nd Street		
1930	Seaside Oil Co.	Building/electrical/fixture permits
1967	Sambos Restaurant	Demolish apartment building
409 S 2nd Street		
1967	Sambos	Construct a new restaurant building
1978-2009	Various owners listed	Tenant improvements for a restaurant
2020	Not listed	SJPD Document: Site Development Permit to allow the demolition of two existing buildings and the removal of two ordinance-sized trees on-site for the construction of a 29-story high rise building consisting of 520 residential units and 7,685-gross square foot ground floor commercial space with four levels of underground parking on a 0.75-acre site (under review)
411 S 2nd Street		
1967	Sambos Restaurant	Demolish apartment building

Year(s)	Owner/Applicant	Description of Permit and Building Use
425 S 2nd Street		
1987	Mr. Vu	Plumbing and/or gas piping permit for a residence Demolish a residence, to be used as vacant land
1987, 1989	Vu	Demolish a residence, to be used as vacant land
1990	Mr. Vu	Electrical and Plumbing and/or gas piping permit for a residence
1996	Vu	Electrical permit
1997	Not listed	Install parking lot lights
2013	Not listed	Install property line clean out
2020	Not listed	SJPD Document: Site Development Permit to allow the demolition of two existing buildings and the removal of two ordinance-sized trees on-site for the construction of a 29-story high rise building consisting of 520 residential units and 7,685-gross square foot ground floor commercial space with four levels of underground parking on a 0.75-acre site (under review)

As noted above, Seaside Oil Company was identified as the owner of 405 South 2nd Street in 1930. Refer to the Findings for discussion.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Planning Department (SJPD)	December 29, 2020	Website	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	December 29, 2020	Website	N/A	Information obtained is discussed below

Records Summary

APN	467-47-097, 467-47-020, 467-47-019
Acreage	0.7 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided
Additional Information	Not provided

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	January 13, 2021	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	January 13, 2021	Website	N/A	No records on file
CA DTSC EnviroStor	January 13, 2021	Website	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	December 29, 2020	Email	Ms. Rochele Henderson	No records on file
Valley Water (VW) Well Tracker Database	January 13, 2021	Website	N/A	No records on file
VW Historical Fuel Leaks and Solvents Database	December 29, 2020 & January 13, 2021	Website and email	N/A	Website no longer operational

4.7 OIL AND GAS WELLS

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	December 29, 2020	CalGEM Map	No

4.8 OIL AND GAS PIPELINES

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	December 29, 2020	NPMS Public Map Viewer	No

4.9 STATE ENVIRONMENTAL SUPERLIENS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 STATE PROPERTY TRANSFER LAWS

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in [Appendix C](#) of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Facility Name	CASTRO JACK E
Address	411 S 2nd Street
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	EDR HIST AUTO
Comments	The EDR Historical Auto Station database lists "Castro Jack E" at the subject property in 1955. The EDR Historical Auto Station database does not report a release, but rather identifies businesses, based on name, that may have been associated with an automotive activities. Refer to the REC/Findings for discussion.

Facility Name	BILL S ELECTRIC SERVICE
Address	396 South 2nd Street
Distance & Direction	Adjoining to the northeast, across street
Hydrologic Position	Cross-gradient
Databases Listed	EDR HIST AUTO
Comments	The EDR Historical Auto Station database lists "Bill S Electric Service" at the site in 1945. The EDR Historical Auto Station database does not report a release, but rather identifies businesses, based on name, that may have been associated with an automotive activities. This site was also noted to be developed with an an auto repair shop with "gas and oils in yard" according to the 1950 Sanborn map. By 1969, the site had been redeveloped with a store building. Based on the lack of a documented release, the redevelopment of the site, the relative distance, and the groundwater gradient, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	EDNA S CLEANING & MENDING SHOP
Address	432 S 2nd Street
Distance & Direction	Adjoining to the northeast, across street

Hydrologic Position	Cross-gradient
Databases Listed	EDR HIST CLEANER
Comments	The EDR Historical Cleaners database lists "Edna S Cleaning & Mending" at the site in 1960. The EDR Historical Cleaners database does not report a release, but rather identifies businesses, based on name, that may have been associated with cleaning activities. City directories also identified the tenant at the site in 1955, 1957, and 1963. Based on the lack of a documented release, the relative distance, and the groundwater gradient, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	CALIFORNIA THEATER, FOX CALIFORNIA THEATER
Address	325 S 1st Street
Distance & Direction	0.02 mile northwest
Hydrologic Position	Cross-gradient
Databases Listed	RCRA-SQG, FINDS, ECHO, LUST, HIST LUST, CORTESE, CERS
Comments	<p>According to the LUST database, as well as information obtained from the SWRCB's GeoTracker website, a release of heating/fuel oil was reported for this site in April 1994 or September 2001. A 1,500-gallon bunker/fuel oil UST was removed from this site in August 2001 that was located adjacent to the subject property to the southwest, across the alleyway. Initial soil sampling from the tank excavation revealed elevated levels of petroleum hydrocarbon contamination. The tank pit was over-excavated to a total depth of 14 feet bgs, during which no groundwater was encountered. Confirmation soil samples contained a maximum of 21 ppm of diesel; no detectable concentrations of gasoline, BTEX, and MTBE were found. After excavation activities, closure of the LUST case was granted on February 15, 2002 by the SCVWD, stating that no further action related to the petroleum release was required since confirmation sampling did not indicate that a significant contamination release to the subsurface had occurred. Furthermore, residual contamination in soil was expected to continually decline due to natural biodegradation processes; therefore, the SCVWD staff concluded that a continuing threat to groundwater, human health, and the environment from residual petroleum hydrocarbons did not exist at this site and that SWRCB's objectives had not been compromised. Based on the removal of the UST, the confirmation soil sampling results, the groundwater gradient, and the current regulatory status, this site is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

Facility Name	VOP MANAGEMENT COMPANY, DOHRMANN ASSOCIATES, DOHRMAN BUILDING
Address	325 S 1st Street

Distance & Direction	0.029 mile northwest
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NONGEN / NLR, HIST CORTESE, LUST, HIST LUST, CORTESE, CERS
Comments	<p>According to the LUST database, as well as information obtained from the SWRCB's GeoTracker website, a 1,000-gallon heating oil UST was closed in placed at the subject property in December 1989. The tank was located in a concrete reinforced vault, buried beneath the basement floor, underneath the sidewalk along South 1st Street, near the elevator well of the building, based on site maps provided in documents downloaded from the GeoTracker website. The bottom of the vault was approximately 24 feet below street level. In July and August 1989, soil samples were collected from non-native soil from beneath the tank in the vault, as well as from native soils outside of the vault at each end at a depth of one foot below the base of the vault, approximately 10 feet below the basement floor. The soil samples collected from within the vault contained diesel at 120 ppm and total oil & grease at 32 ppm. The soil samples collected from outside the vault contained a maximum of 14 ppm of total oil & grease. A groundwater sample was also collected from within the vault, which appeared to be residual from the water main leak, which was how the heating oil UST was discovered; the grab groundwater sample contained 1.8 ppm of diesel. The tank and vault were pumped and cleaned out prior to filling it with slurry in December 1989. The SCVWD granted closure on February 2, 1995, based on the closure of the tank and vault by slurry filling, as well as the minor levels of petroleum hydrocarbons detected in soil outside of the vault. Based on the confirmation sampling results, the groundwater gradient, and the current regulatory status, this site is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

Facility Name	SEPPHORI INC DBA TATE FAMILY COMPLETE AUTO CARE, TATE FAMILY COMPLETE AUTO CARE, CG-AQ 477 SOUTH MARKET STREET LLC, ROSE MURTY TIRE COMPANY, THE FIRESTONE MIXED-USE DEVELOPMENT, CG-AQ 477 SOUTH MARKET LLC
Address	477 S Market Street
Distance & Direction	Southwest, 0.092 mile
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NONGEN / NLR (3), RCRA-SQG, FINDS, ECHO, HIST CORTESE, CPS-SLIC, CERS, HWTS LUST, HIST LUST, SWEEPS UST, CORTESE, CUPA LISTINGS (2), NPDES, HAZMAT, CIWQS, CERS
Comments	<p>This site is listed as a closed LUST case and open SLIC case. AEI reviewed information via GeoTracker.</p> <p>LUST Case</p>

San Jose Public Works Department was trenching new sewer lines along Balbach Street and Market Street on August 7, 1984, and encountered a pool of 20+ gallons of gasoline and an unknown quantity underground. The fuel was suspected from the subject site due to an inventory loss of approximately 250 gallons since August 1, 1984. The San Jose Fire Department subsequently emptied a 1,000 gallon gasoline UST on-site to eliminate the source, and removed approximately 500 gallons of product gasoline and backfilled the trench. According to the Spill Report Form from the City of San Jose, cleanup activities were directed by the Regional Water Quality Control Board.

One 500-gallon waste oil UST was removed from the property on July 26, 1990. One soil sample was taken from the excavation soils at 6 feet bgs and indicated 0.015 ppm of Trichloroethene (TCE). One 1,000-gallon gasoline UST was removed from the property on January 27, 2000. Two soil samples were taken at each end of the tank. 2,600 ppm of TPHg, 92 ppm of Toluene, 81 ppm of Ethylbenzene, and 670 ppm of Total Xylenes were detected at 9.5 feet bgs from the south end of the tank. This soil sample was re-analyzed on February 8, 2000, which detected 1,200 ppm of TPHg. Due to the presence of petroleum hydrocarbons in the south side of the tank, the tank pit area was over-excavated to a total depth of 9.5 feet below ground surface (bgs) and indicated 7.1 ppm of total Lead (total depth before and after over-excavation was reported at the same depth).

Four borings (HP-1 through HP-4), at each side of former gasoline tank pit area, were drilled on November 5, 2001. Up to 14,000 ppm TPHg, 16 ppm Benzene, 360 ppm Toluene, 140 ppm Ethylbenzene, and 1,300 ppm Xylenes, were detected in collected soil samples at 10 feet bgs. Up to 14,000 and TPHg and 21 ppb of Benzene were detected in collected grab groundwater samples. For closure purposes, three down-gradient monitoring wells, MW-1 through MW-3, approximately 100 feet, 220 feet, and 270 feet, respectively, from the former tank area, located at Balbach-Viola-Market Street Parking Lot Site, owned by the Redevelopment Agency of the City of San Jose, were included as part of the closure justification. These three wells were monitored from October 5, 2000 through October 9, 2001.

According to the SCVWD case closure letter, residual contamination did not seem to be migrating offsite and towards down- and cross-gradient wells, MW-1 through MW-3 (San Jose Redevelopment Agency), located across Balbach Street. Therefore, District staff concluded that the extent of contamination in groundwater was localized within the former tank area. Furthermore, elevated concentrations of petroleum hydrocarbons detected in HP-4, located at the north end of the former tank area, indicated that high levels of residual contamination were present at 10 feet bgs at the site. However, a soil sample collected from HP-4 at 15 feet indicated a significant decrease in petroleum hydrocarbon contaminant concentrations. Therefore, the extent of impacted soil beneath HP-4 seemed to be limited in the vicinity of former tank area, at 10 feet bgs, and was likely to remain limited due to low permeability soils retarding groundwater movement. The District did not consider the residual concentrations of petroleum hydrocarbons to be a significant risk to human health or the environment and expected these concentrations to eventually attenuate to levels below regulatory

concern. The SCVWD granted closure on April 25, 2002. Based on the groundwater gradient, and the current regulatory status, this site is not expected to represent a significant environmental concern.

SLIC Case

Petroleum hydrocarbons and volatile organic compounds (VOCs) have been previously detected in soil and groundwater at the site during former UST removals and subsurface investigations. To assist in the characterization of the site's subsurface conditions for a proposed development project, Langan advanced a total of 16 exploratory borings throughout the site for the collection and analysis of soil, groundwater, and soil vapor.

In June 2018, a total of six environmental borings (EB-1 through EB-6) were advanced at the site for the collection of soil. The borings were advanced to depths between 16 and 35 feet bgs. Two of these boring locations, EB-1 and EB-6, were also constructed as temporary groundwater monitoring wells in order to collect grab groundwater samples. Based on the initial results of the soil sampling, a total of ten additional exploratory soil borings (EB-7 through EB-16) were drilled to depths between approximately 6.5 feet bgs and 22 feet bgs across the site for further characterization of the soil to be disposed off-site during development activities. In July 2019, Langan collected a total of seven soil vapor samples and one duplicate sample. The analytical results indicated that some of the material present at the site contains elevated concentrations of petroleum hydrocarbons, VOCs, and heavy metals in the soil, soil vapor, and groundwater at the site.

Groundwater samples collected from Dewatering Well 12, located approximately 410 feet southwest of the subject property, on July 21, 2020 showed levels of 0.57 ug/L benzene, 3 ug/L 1,2-DCA. All other VOCs were non-detect. The case is still open with ongoing investigation. Based on the relative distance and groundwater gradient, this site is not expected to represent a significant environmental concern.

This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	JONES/SCHAEZLEIN PROPERTY
Address	520 S 1st Street
Distance & Direction	South to southeast, 0.105 mile
Hydrologic Position	Cross- to up-gradient
Databases Listed	LUST, HIST LUST, CORTESE, CERS
Comments	Review of the EDR regulatory database report and State Water Resources Control Board (SWRCB) GeoTracker files indicated that one 200-gallon gasoline underground storage tank (UST) was located beneath the sidewalk immediately adjacent to the southwest of the subject property building. Review of the LUST

Case Closure Summary report for the site indicated that the UST was closed in place by slurry filling in 1985. The UST reportedly had not been used since before 1970. In 2002, a geophysical survey was conducted which identified magnetic anomalies in the sidewalk in front of the building that suggested the UST location. Soil samples were collected from five borings in the suspect UST location. Maximum soil results were 3,700 parts per million (ppm) of Total Petroleum Hydrocarbons as Gasoline (TPH-g), 1,600 ppm of TPH as Diesel (TPH-d), 7.1 ppm of Benzene, and less than 0.005 ppm of Methyl tert-butyl ether (MTBE). The soil samples were also analyzed for metal content, and contained less than 0.5 ppm of Cadmium, 76 ppm of Chromium, 44 ppm of Lead, 130 ppm of Nickel and 96 ppm of Zinc. One groundwater sample was collected from Boring 1, which identified less than 500 parts per billion (ppb) of TPH-g, less than 500 ppb of TPH-d and 700 ppb of Benzene. In June 2002, three groundwater monitoring wells were installed at the site. Soil samples from the borings and initial groundwater samples were collected. The maximum soil results were 450 ppm of TPH-g, 17 ppm of TPH-d, less than 1.25 ppm of Benzene and less than 12.5 ppm of MTBE. The maximum results for groundwater were 14,000 ppb of TPH-g, 590 ppb of TPH-d, 780 ppb of Benzene and less than 5 ppb of MTBE. Quarterly groundwater monitoring commenced in September 2002. In February 2003, the 200-gallon UST was removed from the site. The UST was identified as being in good condition with no visible holes or pitting. Soil samples taken around the UST contained up to 6,100 ppm of TPH-g, 1,100 ppm of TPH-d, 11 ppm of Benzene and less than 12.5 ppm of MTBE. By March 2004, ten (10) groundwater monitoring events had been conducted, and the maximum results for groundwater were 6,500 ppb of TPH-g, 580 ppb of TPH-d, 630 ppb of Benzene and less than 50 ppb of MTBE. SCCDEH indicated that the release was estimated to have occurred prior to 1970 in a limited area beneath the UST. The dissolved petroleum hydrocarbon plume was limited and estimated to have migrated less than 45 feet in the last 30 years. Residual soil contamination (450 ppm of TPH-g and 17 ppm of TPH-d) and groundwater (6,500 ppb of TPH-g, 580 ppb of TPH-d and 630 ppb of Benzene) contamination remained at the site. However, the SCCDEH concluded that there were no likely receptors within ¼ radius of the site. TPH-g, TPH-d and benzene levels in groundwater had generally decreased from initial detected concentrations. Santa Clara Valley Water District believed that residual soil and groundwater contamination at the site did not pose a continuing significant threat to groundwater resources, human health or the environment. On August 18, 2005, SCCDEH closed the case. Based on regulatory case closure, no additional action or investigation is required by SCCDEH. Based on the confirmation sampling results, the groundwater gradient, and the current regulatory status, this site is not expected to represent a significant environmental concern.

This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	PIERCE DEVELOPMENT, FIRESTONE BUILDING, 60 PIERCE-SAN JOSE LLC PROPERTY
Address	561-599 S Market Stret and 60 Reed Street

Distance & Direction	South, 0.162 mile
Hydrologic Position	Up-gradient
Databases Listed	CPS-SLIC, DEED, CERS, HIST CORTESE, CUPA LISTINGS, LUST, HIST LUST, HIST UST, CORTESE, CERS
Comments	<p>According to the database and GeoTracker information, this property has a closed leaking UST case associated with the release of gasoline to groundwater. The database states that the case was opened in 1989 and closed in 1996. The property also has a closed SLIC listing associated with an investigation of lead, polynuclear aromatic hydrocarbons, and total petroleum hydrocarbons in soil. The property also has a DEED listing in association with the closed SLIC listing. Further information obtained from the State Water Resources Quality Control Board's (RWQCB) GeoTracker database indicates that four USTs (three gasoline and one waste oil) were closed in place between 1985 and 1986. Site-specific groundwater gradient was calculated to the south and east, with localized depressions potentially caused by tank backfill, or a sewer/water leak. Based on the decreasing trend of COCs detected in other onsite wells, mainly MW-2, and stability of the plume, the site attained regulatory case closure for the LUST case in 1996.</p> <p>AEI also obtained further information pertaining to the closed SLIC listing at this site from the RWQCB GeoTracker database. Records reviewed state that the SLIC listings encompassed four parcels at 561, 577 and 599 South Market Street, and 60 Reed Street which were slated for commercial and residential redevelopment including a two story parking garage. Records state that five USTs were removed from the site in 2014 including a heating oil UST, three gasoline USTs, and one UST of unknown contents. Over-excavation was performed in the vicinity of the removed USTs. The site was granted case closure in May 2015 based on the determined adequate characterization of the site, identification and assessment of exposure pathways, remediation of pollutant sources to the extent feasible, and mitigation of "unacceptable risks to human health" and "unacceptable threats to groundwater".</p> <p>According to closure documentation, the following contamination levels remained in the groundwater upon closure: 39,300 ppb TPHg, 30,500 ppb TPHd, 231 ppb benzene, 34.3 ppb toluene, 403 ppb ethylbenzene, 112 ppb xylenes, and 129 ppb naphthalene. Soil vapor sampling indicated up to 366ug/m³ benzene, 6.99ug/m³ PCE, 15.2ug/m³ 1,1,1-Trichloroethane, 6.02ug/m³ TCE, and 4.73ug/m³ styrene. Based on the groundwater gradient and the current regulatory status, this site is not expected to represent a significant environmental concern.</p> <p>This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.</p>

Facility Name	SAN JOSE CONVENTION CENTER (SOUTH HALL)
Address	South Market Street

Distance & Direction	Southwest, 0.081 mile
Hydrologic Position	Cross-gradient
Databases Listed	CPS-SLIC, CERS
Comments	<p>According to the database report and information obtained from the GeoTracker website, a release of solvents, lead, and gasoline have impacted groundwater at this site. This property occupies half a city block and is bounded by Balbach, Viola, and South Market Streets. Prior to the City's purchasing the land and construction of the tent structure that occupies the site, the site consisted of a number of parcels and had been a commercial and light industrial use area for many years. When the City of San Jose (through the Redevelopment Agency) acquired the land, soil and groundwater investigations were undertaken, and areas of soil and groundwater contamination were discovered. Limited Phase II investigations were performed in April 1998 and August 2007 to assess the flow direction of shallow groundwater and determine the lateral extent of gasoline, diesel, VOCs, and metals in shallow groundwater beneath the property. Based on the 2007 Phase II investigation, groundwater was measured flowing toward the south. This is generally the opposite direction of groundwater flow measured at other sites in the area, which is northward toward the San Francisco Bay. However, the Guadalupe River is to the west-southwest, which may affect the groundwater flow direction in the area. The gasoline groundwater plume is along the north side of the site, adjacent to South Market and Viola Streets. Gasoline concentrations in groundwater samples collected from three borings advanced in this area range from 12,000 to 53,000 ppb. Diesel concentrations in groundwater samples from two of these borings range from 3,750 to 26,900 ppb. No source for the contamination was found. The petroleum hydrocarbons concentrations are at levels that suggest a nearby source. Levels of non-petroleum VOCs and metals detected in groundwater were low. The closest grab groundwater samples to the subject property were collected from borings BH-6 (1998) and HP-9 (2007), located approximately 530 feet to the southwest, contained a maximum of 53,000 ppb of gasoline, 26,900 ppb of diesel, 780 ppb of benzene, 180 ppb of toluene, 2,200 ppb of ethylbenzene, 1,170 ppb of xylenes, 176 ppb of naphthalene, and 176 ppb of MTBE. No chlorinated VOCs were detected in the groundwater sample collected from HP-9, and the groundwater sample collected from BH-6 was not analyzed for chlorinated VOCs. Based on the measured direction of groundwater flow at this site and the relative distance from the subject property, the detected release of petroleum hydrocarbons in the groundwater is not expected to represent a significant environmental concern.</p>

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Botown Project LLC represented by Mr. Brady Coggins	January 12, 2021	Email	Not provided (for ownership entity)	Owner represented by acting Key Site Manager; see Interview Summary table below
Key Site Manager	Mr. Brady Coggins	January 12, 2021	Email and in person	2019	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	Yes	Yes
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	No	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No
Additional information provided:	Prior Phase I ESA, discussed in Section 6.3.	Prior Phase I ESA, discussed in Section 6.3.

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information of Botown Project LLC, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Patrick Kallas, Associate Project Manager, David J. Powers & Associates, Inc. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	Yes

Question	Response/ Comment
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	
<p>5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</p> <p>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:</p> <p>(a) Do you know the past uses of the property?</p> <p>(b) Do you know of specific chemicals that are present or once were present at the property?</p> <p>(c) Do you know of spills or other chemical releases that have taken place at the property?</p> <p>(d) Do you know of any environmental cleanups that have taken place at the property?</p>	No
<p>6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</p> <p>Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?</p>	No

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by Mr. Brady Coggins during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (409 and 425 South 2nd Street, San Jose, California), prepared by Cornerstone Earth Group (April 5, 2019)

This report describes the subject property generally consistent with current conditions. At the time of Cornerstone's visit, the subject property was developed with a single-story commercial building occupied by Bo Town Seafood Restaurant at 409 South 2nd Street. The restaurant had recently closed and the owners were in the process of vacating the building. A small two-story wood framed structure was observed at 425 South 2nd Street that consisted of storage space on the ground floor and an unoccupied residence on the 2nd floor. Retail products for the adjacent supermarket (located across South 2nd Street) were stored on the ground floor, as well as within a fenced area on the northwest side of the structure. The remainder of the subject property consisted of paved parking areas and vehicle drives. No hazardous materials were observed on-site.

Based on the information obtained during this study, Cornerstone noted that by the late 1800s, the subject property was developed with four dwellings and associated outbuildings (stables, a shed and a water tank house). By 1915, a commercial structure was constructed on the western corner of the subject property fronting East San Salvador Street; this structure was occupied by a used tire shop (1940), a glass installation business (1960) and door service business (1966). The commercial structure and three of the residences were removed by the late 1960s. The existing

restaurant building was constructed in approximately 1967 and has been occupied for restaurant use since its construction. The last remaining residence at 425 South 2nd Street was demolished following a fire in 1989.

The consultant did not comment on the significance of the tire shop from 1940, nor the lack of complete tenancy history of the related commercial building.

With respect to the Seaside Oil Company permit from 1930, the consultant stated that this address was developed with a residence from the late 1880s through the late 1960s. It appears that the source of this information may have been from topographic maps.* However it should be noted that it appears that the consultant actually encountered the same data gap as AEI and it was not mentioned in the report (see Section 1.6.1 of AEI's report for discussion).

The consultant stated that the auto repair listing suggested that either there was an auto repair operation present concurrent to the residential use or that it was indication of the residence's profession.

Cornerstone's assessment identified the following Recognized Environmental Conditions: "Soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. There is a potential that residual lead and pesticide concentrations could remain in on-Site soil resulting from existing and/or prior on-Site structures."

A copy of the report is included in the appendices.

Documentation was provided to AEI by David J. Powers & Associates during this assessment. A summary of this information follows:

BoTown Residential Universal Planning Application (409 & 425 South 2nd Street, San Jose CA 95113), prepared by James KM Cheng (November 16, 2020)

This planning application describes a mixed-use development project that comprises of a 29-store high rise with 520 residential units, approximately 10,284 sf residential amenities and 6,406 sf retail space on a 0.751 gross acre site. Four levels of below grade parking garage will accommodate approximately 194 parking stalls.

Copies of the plans are included in the appendices.

Note: As the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

*Note: AEI reviewed these topographic maps and the subject property/surrounded area was developed with structures, however due to the scale/level of detail on the map, differentiation between residential or commercial use was not possible.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	January 12, 2021
AEI Site Assessor(s)	Megan Salcido
Property Escort(s)/ Relationship(s) to Property	Mr. Brady Coggins, Key Site Manager
Units/Areas Observed	Representative interior portions of the building and exterior areas
Area(s) not accessed and reason(s)	Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	Refer to Section 1.5 for discussion of limiting condition(s).

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✓
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✓	✓
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other	✓	

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 DRAINS, SUMPS, AND CLARIFIERS

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.2 OTHER

Cleaning supplies and detergents are stored in the kitchen. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

The on-site kitchen drainage system is equipped with one abovegrade and one underground grease trap. According to an on-site employee, the trap is periodically cleaned and emptied for off-site disposal. Based on the non-hazardous nature of material entering the grease traps, and the periodic cleanout, they are not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Multiple subsurface transformers were observed on the adjoining sites during the site reconnaissance. Based on the subgrade nature, the condition of the features could not be evaluated.

7.2.2 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to David J. Powers & Associates, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has $\geq 1 \text{ mg/cm}^2$ (5,000 $\mu\text{g/g}$ or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm^2 to 2.0 mg/cm^2 . Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, six tests were conducted for radon levels in the subject property zip code (95113) in 2016. All of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the US EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the restaurant building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LORENTZ BARREL & DRU Cerclis ID:: 901287 EPA Id: CAD029295706	1515 S 10TH ST	ESE 1/2 - 1 (0.955 mi.)	0	27

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/28/2020 has revealed that there

EXECUTIVE SUMMARY

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 39 HIST LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 43 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	W 1/2 - 1 (0.850 mi.)	287	934

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 38 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: Underground heating oil tank located within the basement of the building. In 1992, a water main/line ruptured near this building and flooded the basement. The flooding caused the product to come out of the tank. The tank was taken out of service and the tank was left in place. Subsurface investigation conducted in 2010 found soil and groundwater contamination. The UST will be properly closed in place.

Summary Details:

Conditions at proposal October 15, 1984): Lorent Barrel Drum Co. recycles drums at a plant in San Jose, Santa Clara County, California. The 5-acre site is surrounded by residential, industrial, and business areas. On-site monitoring wells are contaminated with trichloroethane, trichloroethylene, 1,1-dichloroethylene, and tetrachloroethylene, according to analyses conducted by a consultant to Lorent. Contamination is believed to have resulted from overflowing sumps and spills. About 250,000 people obtain drinking water from wells within 3 miles of the site. Lorent is working with the California Regional Water Quality Control Board (CRWQCB) to determine the extent of ground water contamination. The board issued a Cleanup and Abatement Order to the company in August 1983. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. On March 25, 1981, EPA removed the facility as a treatment, storage, or disposal facility because it was not engaged in hazardous waste activities. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): In March 1985, EPA and the California Department of Health Services (CDHS) discovered over 300 drums containing phenols, methylene chloride, and PCBs stored on the Lorent property. In response to action by the Santa Clara District Attorney, the company removed the drums. CRWQCB is overseeing the Lorent investigation to determine the extent of ground water contamination. CDHS will oversee the investigation of soil contamination. On February 7, 1986, the Santa Clara County District Attorney filed a complaint against the company for violation of State hazardous waste laws. The facility has been shut down until procedures for compliance are developed. Status June 24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. The company is classified as a non-filer. Hence, it satisfies a component of EPA's NPL/RCRA policy. In July 1987, the owner of the Lorent site was ordered to shut it down permanently, sentenced to 2 years in jail, and fined 2.04 million. Recent sampling by CDHS consultants has shown extensive contamination in soil and ground water, both on- and off-site. In addition to the chlorinated

organics identified earlier, pesticides, metals, and PCBs are present. On December 1, 1987, EPA took over as lead agency for a remedial investigation/feasibility study RI/FS) at the site. In February 1988, CDHS completed an expedited response action consisting of excavating soil with high concentrations of PCBs. In March 1988, EPA and CDHS completed removal of 1,000 drums of hazardous materials. All materials were transported to regulated disposal facilities. The site was then graded and the surface sealed to control drainage. In May 1988, EPA completed an engineering evaluation cost analysis for systems to pump and treat shallow contaminated ground water. Status October 4, 1989): EPA has placed this site on the NPL. EPA completed the RI/FS. Following a period of public comment, a Record of Decision was signed in September 1988 finalizing the remedy as treatment of ground water with an on-site ultraviolet light oxidation system. EPA is currently designing an off-site extraction system and an on-site treatment facility. EPA is also investigating the extent of the contamination in soils and on structures and expects to complete an RI/FS for the overall site in early 1990.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 02/23/1987
Comments: DTSC issued RAO for soil and groundwater contamination resulting from drum reconditioning business.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on 10th Street Land Management property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/27/2004
Comments: Consent decree signed to recover DTSC response costs from the primary large quantity generators.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 05/23/1995
Comments: Administrative order on consent signed for de minimis settlement. The settlement pertains to 89 parties, each contributing less than 1% of the drums recycled at the facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/23/1996
Comments: Administrative consent order signed for the 2nd round of cost recovery de minimis settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/16/1997
Comments:

Administrative consent order signed for the 3rd round of the cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/23/2002
Comments:

DTSC signed Prospective Purchaser Agreement with 10th Street Land Management. Property will be used as a long-term storage yard for commercial and construction vehicles. Settling respondent to maintain site cap and enter into a land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Comments:

Not reported

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 03/06/2002
Comments:

Deed restriction recorded for property owned by 10th Street Land Management. Residences, hospitals, day care facilities, food cultivation, and groundwater extraction are prohibited at the site. Interference with site cap and remediation system are also prohibited.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 10/07/1992
Comments:

Seven respondents signed agreement to conduct a limited removal action at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/30/1989
Comments:

EPA issued a Consent Decree with 11 PRPs to implement the groundwater remediation recommended by the ROD. In May 1989, EPA conducted an investigation, identifying approximately 200 companies who had delivered drums and barrels to the former drum recycling facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 06/30/1987
Comments:

Determined noncompliance with the RAO issued in February 1987.

Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on Newark Group property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision - Amendment
Completed Date: 03/10/1998
Comments: US EPA approved a ROD amendment for groundwater treatment process.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 05/21/1998
Comments: US-EPA approved an ESD for soil remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/28/1998
Comments: Preliminary close-out report finalized. Report documents completion of construction activities for OU1 and OU2. Remaining response consists of operation and maintenance of groundwater treatment system, soil vapor extraction system, and cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Cap design completed. Design calls for 229,000 square feet of 3" asphalt concrete pavement with 6" layer of aggregate base.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Remedial design report approved. Report outlines plans for design, installation, and O&M of SVE system and asphalt cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/30/1994
Comments: EPA completed 3 separate removal actions: (1) Removal of 5 buildings and the process equipment and scrap within including 17 sumps, 7 tanks and several debris stockpiled. At the end of this RA, 1033 tons of industrial wastes, 15 tons of liquid hazardous was and 73 tons of solid hazardous waste was shipped off-site for disposal. (2) Removal of 1200 drums, 150 drums containing solvents, 350 drums containing debris, and 23 drums containing ash and liquids. Removal of tanks, vats, sumps, and process equipment. Removal of 1.18 tons of asbestos containing building materials. (3) Paving of previously and newly exposed surface soil resulting from the above removal actions. Paving used a chip seal material. Approximately 4-1/4 acres were sealed.

Completed Date: 03/30/1992
Comments: Shallow groundwater treatment system completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/28/1991
Comments: Remedial design for groundwater completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 09/30/1988
Comments: EPA issued a ROD for the shallow groundwater operable unit. The remedy includes extraction/treatment of shallow groundwater and discharge of treated water to the storm sewer.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 08/30/1988
Comments: Completed EE/CA for shallow groundwater expedited response action. Groundwater pump-and-treat system was determined to be an effective method for remediating the shallow groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/30/1988
Comments: Implemented an Expedited Response Action (ERA). The ERA consisted of the following activities: drum inventory; construction of decontamination facilities; removal of polychlorinated biphenyl (PCB) contaminated pits, which were later backfilled with clean soil and capped; removal, recycling, or treatment of thousands of gallons of processed plant liquids; removal of 15 tons of contaminated scrap; and design of a surface water control plan, which was submitted to EPA for implementation. EPA installed a chip seal over approximately

of shallow soil investigation on Recycled Fibers, Inc. property; update to the risk assessment for soils; results of the investigation of four conduits near the leading edge of the plume; results of soil sampling; results of installation and sampling of a monitoring well in the Zone C aquifer.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 08/01/2006
Comments: Soil investigation concluded that pesticides, PCE, TCE, and metals including arsenic were present in soil, however, all contaminants were present at concentrations below human health screening levels (or established background). The proposed design for the repairs includes removal of 1,424 square feet of concrete and asphalt, replacement of the cap in these areas with slab and AC over 12" of aggregate, and sealing of 4,000 linear feet of less severe cracks with joint sealant.

Completed Area Name: Shallow Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/27/2007
Comments: 2007 GW monitoring report reviewed by DTSC and found to be adequate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/21/2010
Comments: DTSC reviewed the 5-year report and did not have any comments and concurs with the USEPA recommendations in the report and the finding that the selected remedy continues to be protective in the short-term. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 07/30/2010
Comments: DTSC have reviewed the shallow groundwater treatment monitoring report and has no comments. This is a USEPA and WaterBoard lead site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Feasibility Study Workplan
Completed Date: 12/19/2011
Comments: The USEPA has approved the feasibility study workplan for Lorentz Barrel and Drum. The draft Sampling and Analysis Plan and the draft Quality Assurance Project Plan is due January 4th, 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/20/2011
Comments: Lorentz Barrel and Drum submitted the 2011 Annual Groundwater Monitoring Report No. 43.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/01/2015
Comments: The Fourth Five-Year Review Report identified as a remedy performance issue that the migration of 1,4-dioxane may not be controlled and there is continued diffusion of contamination from the A/B aquitard to Zone A soil vapor and Zone B groundwater. The remedies for OU-1 and OU-2 were determined to be protective of human health and the environment; however, in order for the remedies to be protective in the long-term, the Focused Feasibility Study needs to be completed in order to evaluate the current remedies for both OU-1 and OU-2 and make recommendations to modify the existing remedies or select new remedies for both OUs. .

Environmental Interest/Information System:

SUPERFUND NPL

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 9/23/2014
Citation: HSC 6.7 25299 - California Health and Safety Code, Chapter 6.7, Section(s) 25299

Violation Description: Failure to comply with one or more of the operating permit conditions.
Violation Notes: Returned to compliance on 09/22/2015. GSA violated condition #4 of the 5-year UST Permit to Operate by failing to notify HMCD within 30 days of the change in UST Operator from Brooks Range Contract Services to Zero Waste Solutions on 6/1/2014.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 148508
Site Name: ROBERT F PECKHAM FEDERAL BLDG
Violation Date: 7/31/2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/31/2019. Inspection of overfill prevention valves was due by 10/13/2018 and was not done until 1/17/2019. Schedule the next periodic inspection to occur no later than October of 2021 to reestablish the required inspection frequency.

Eval General Type: Compliance Evaluation Inspection
 Eval Date: 09-22-2015
 Violations Found: No
 Eval Type: Routine done by local agency
 Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Eddie Martinez (certifications current) of Advanced Fuel Services. Sump and day tank (piping) sensors tested and provided audible and visible alarms. Automatic Tank Gauge (ATG) used for tank monitoring was removed and functioned properly alarming for overfill, high, and low product. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill bucket is direct buried was hydrostatically tested for one hour with no loss. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports, aboveground piping inspection records, tank tightness testing records and maintenance documentation. Annual DUSTO training performed today. Tank and monitoring system information submitted to the California Environmental Reporting System (CERS) on 9/22/2015 is accurate as observed. Received return to compliance (RTC) paperwork for the [Truncated]

 Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
 Eval Date: 09-23-2014
 Violations Found: Yes
 Eval Type: Routine done by local agency
 Eval Notes: All UST monitoring equipment was tested today by UST Service Technician James Ruble of Advanced Fuel Services, Inc. and functioned properly. Mr. Ruble has current ICC California UST Service Technician certification (exp. 3/29/2015) and Franklin Fueling Systems (Incon) Level 1 & 2 certification (exp. 12/27/2014). All sensors were tested using water and triggered audible and visual alarms. ATG probe was visually inspected. The UST fill spill bucket was hydrostatically tested for 1 hour and passed. Presence of mechanical overfill prevention valve in drop tube was visually confirmed. Submit a copy of the completed Monitoring System Certification form and spill bucket test report within 30 days. Notes: 1. Designated UST operator monthly inspection records are in order. Records of visual inspections of unburied fuel piping monthly and each time the system is operated are in order. 2. Federal facilities are not required to demonstrate UST Financial Responsibility. Check [Truncated]

Service Technician certification (exp. 3/17/2016) and Franklin Fueling Systems (Incon Level 4) Sump test System (TS-STs) certification (exp. 2/25/2017). UST is a single-wall tank, so no annular space to test. Fuel supply and return line secondary containment piping were both pressure tested using nitrogen at 5.2 p.s.i.g. for 1 hour. Both lines passed. Gauges returned to zero when pressure was released at end of test. Tank top piping sump was tested using the Incon TS-STs accelerated hydrostatic testing apparatus and passed. Submit a copy of the UST secondary containment system test report within 30 days. Note: Next round of triennial secondary containment testing is due in May of 2018.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

Violations:

Site ID: 169711
Site Name: W.E. Harding Co
Violation Date: 10/24/2016
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Observed saturated rags and absorbent on the floor and on top of drums in the hazardous waste storage area. Observed free flowing amounts of used oil on top of used oil drums. Ensure that these areas are kept lean of any free flowing liquids and debris to prevent an unplanned release into the environment.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 169711
Site Name: W.E. Harding Co
Violation Date: 10/24/2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Observed 1 x55 gallon over pack drum in the back storage area with free flowing amounts of dark oil like liquid on top of the lid. Various auto parts were on top on and around the container. Per facility, they did not know what the contents of this container were. Make a hazardous waste determination for this container and its contents and if determined to be hazardous, manage accordingly.

Violation Description: 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Violation Notes: As evidenced by the nature and the number of violations, employee training has not been effective and employees are not thoroughly familiar with hazardous waste management. Provided facility with the County's free Hazardous Waste Management Class flyer.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 169711
Site Name: W.E. Harding Co
Violation Date: 10/24/2016
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22

Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.

Violation Notes: 1 x55 gallon drum of used oil filters and 1 x 15 gallon drum of used oil filters were open and missing lids during inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 169711
Site Name: W.E. Harding Co
Violation Date: 10/24/2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: The following containers were open during inspection: 3 x 55 gallon drums os used oil 1 x 90 gallon container of waste coolant 1 x 55 gallon drum of waste coolant

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 169711

Violation Source: CERS

Site ID: 64623
Site Name: SAN JOSE MARRIOTT
Violation Date: 3/20/2017
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: _____ The Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensorG s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. However, ensure that the sensor remains in the proper location.

Violation Description: 16, Section(s) 2641(a)
Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: This is an uncorrected Class I violation previously cited on 3/14/2018, 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line in the tank top piping sump are pointed upwards. Per the pipe manufacturer, the brass compression fittings on the secondary piping for the flexible supply and return lines cannot be rotated. [Note: Based on the discussion during this inspection on 3/27/2019, an acceptable corrective action to this violation would be to return to service the original supply and return lines (after verifying that they pass secondary containment testing) and disconnect the primary pipe for the Omega Flex lines, which were originally intended only for temporary service, inside the tank top piping sump and transition sump. The test valve openings for the in-service piping must point downward.]

Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.

Violation Notes: _____ Diesel was observed to be pooling the piping sump and pipe transition sump during today's inspection. In aggregate, approximately 0.5 gallons of diesel was removed from the piping sump and pipe transition pump. Diesel has previously been observed in the pipe transition sump during the 3/23/2015 and 3/22/2016 inspections and in the piping sump during the 3/23/2015 inspection. Per maintenance records and Ms. Walker's statements, no repairs or corrective actions have been taken to repair the piping. IMMEDIATELY begin investigating the source of the fuel leak and submit a work plan for any necessary repairs to HMCD for review. Depending on the scope of work necessary, a permit from HMCD may be required for the repairs. THIS IS A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS I VIOLATION FROM THE OFFICIAL NOTICE OF INSPECTION REPORT ISSUED ON 3/22/2016 AND A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS II VIOLATION THE [Truncated]

Violation Notes: This is an uncorrected violation. Permit application information submitted via CERS on 3/13/2018 still identifies the UST Operator as San Jose Marriott, which appears to be an unregistered fictitious business name, not the name of a legal entity. Property records identify the owner of the real estate on which the hotel is located as CWI 2 San Jose Hotel LP / Ryan LLC since 5/10/2013 when the property was purchased from PR SJM Hotel LLC. Correct and resubmit the UST Facility Information in CERS. Along with your written response to this Notice of Violation, include an explanation of the current and historic relationships between Marriott International Inc., CWI 2 San Jose Hotel LP, CWI 2 San Jose Hotel GP LLC, Ryan LLC, SP6 San Jose Hotel Owner LLC, SP6 San Jose Hotel Lessee LLC, and SP6 TRS LLC (i.e., parent/subsidiary and/or partnership relationships, and exactly who currently owns and operates the hotel and the UST).

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1, - 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Inspection of overfill prevention equipment was due by 10/13/2018 and was not done until 3/20/2019. The next every-36-month inspection is due no later than October of 2021. Recommend you schedule it to occur at the time of the March 2021 monitoring system certification testing.

Site Name: SAN JOSE MARRIOTT
Violation Date: 3/27/2019
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284

Violation Description: Failure to obtain a valid permit to operate from the UPA including but not limited to unpaid permit fees.

Violation Notes: This is an uncorrected violation. This facility's UST Permit to Operate cannot be issued until the facility is in compliance with UST requirements. Permit will be issued after all UST violations noted below have been corrected.

Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 64623
Site Name: SAN JOSE MARRIOTT
Violation Date: 3/14/2018
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.

Violation Notes: This is a violation originally cited on 3/20/2017, 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line have had their valve cores removed as required to allow drainage of the secondary lines into the monitored sump, but valves for both lines appeared to be in the closed position at the time of inspection, isolating them from the fuel in the UST. Ms. Walker stated during the inspection that repairs have been made, but no records are available to document any repairs. Submit documentation showing how, when, and by whom any repairs to these lines were made. (Note: No work

Violation Date: 3/27/2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: The 55 gallon drum in the Generator Room marked G Diesel 55 gallons 9-4-12G has been labeled in accordance with Hazardous Waste requirements and with an accumulation start date of 3/20/2017 (should be 9/4/2012) as of 3/27/2019 had not been shipped for recycling or disposal. As a small quantity generator your accumulation time limit is 180 days. Ship this hazardous waste for recycling/disposal as soon as possible and submit a copy of the hazardous waste transportation documentation with your response to this notice of violation.

Violation Date: 3/14/2018
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: This is an uncorrected Class I violation originally cited on 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line in the tank top piping sump are pointed upwards. Brass compression fittings on the secondary piping for the flexible supply and return lines must be reoriented so that the test valve openings point downward. Have a qualified contractor perform this work. (Note: Original supply and return lines have been disconnected inside the tank top piping sump.)

Violation Date: 3/24/2015
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).
Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. The valve cores and plugs were removed today during this inspection. Ensure that the lines remain free to drain into monitored sumps when not undergoing triennial pressure testing.

Eval Type: Routine done by local agency
Eval Notes: On site to witness the annual monitoring system certification performed by Robert Slunaker of Tank Tek Inc. Mr. Slunaker's certifications were verified and current. Inspection began on 3/10/2020 and concluded today with delivery of this report. 1 tank: Diesel The UST system's piping is a conventional suction system. Observed testing of the following components: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR 794380-208) - 1 Piping Transition Sump sensor (VR 794380-208) - 1 Pump Room sensor (VR 794380-208); except as noted above All sensors listed above provided audible and visual alarms when tested. The spill bucket was tested using at least 5 gallons of water for 60 minutes without loss. The diesel tank uses mechanical overfill prevention valve in the drop tube. The unburied fuel piping connected to the emergency generator tank system is visually inspected at least monthly and each time the system is operated. [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-14-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 3/13/2018 and finished today. On site yesterday with Greg Breshears of HMCD to witness the annual monitoring system certification performed by Brent Bowen of Tanknology Inc. Verified Mr. Bowen's ICC (#8211862, expires 6/23/19), and Veeder Root (#B48215, expires 4/26/19). 1 tank : Diesel The UST system's piping is a conventional suction system. Observed testing of the following components yesterday: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR 794380-208) - 1 Piping Transition Sump sensor (VR 794380-208) - 1 Pump Room sensor (VR 794380-208) All sensors listed above provided audible and visual alarms when tested. The spill bucket was tested using Tanknology's Vacuum testing apparatus. The spill bucket held at 30" water column for 60 seconds without loss. The diesel tank uses mechanical overfill prevention valve in the drop tube. The unburied fuel piping connected to the emergency generator tank [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to witness the annual monitoring system certification and spill bucket test performed by Mr. Michael Gathright (certifications current) of Petro-Analytical. UST is a conventional suction system for an emergency generator. The annular and 3 sump sensors (piping sump, transition sump from loading dock down to pump room and pump room floor containment) were tested in water and provided audible and visible alarms. The spill bucket was hydrostatically tested for one hour with no loss. Observed the schrader valves removed from all of

 Eval Type: Other, not routine, done by local agency
 Eval Notes: On-site to observe UST secondary containment testing. All tests were completed by Service Technician Justin Williams from Confidence UST Services, Inc. Mr. Williams' ICC Service Technician and Incon tester certifications were verified to be current. Annular Space Tests: The diesel tank (Joor) annular was placed under 10-in of vacuum for 60-minutes with no loss of vacuum; PASS. Piping Sump could not be tested due to a torn sump wall penetration fitting. The sump wall fitting must be repaired and the sump hydrostatically tested. Provided that the sump wall penetration fitting can be replaced from within the sump a UST Repair Permit is not required. Transition sump: The transition sump filled with water over the highest point of the secondary piping penetration. The liquid level was tested with a Incon TS-STs Sump Test System for 10-minutes with no loss of liquid; PASS. Secondary Containment Piping: All secondary containment piping (OMEGA & Enviroflex) were [Truncated]

CERS ID: 10354351
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 138958
Site Name: NOTRE DAME HIGH SCHOOL
Violation Date: 11/22/2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 12/01/2016. Per the biology teacher, BioCorporation specimens are packed in preservative liquid are rinsed off used specimens and discarded in the sink. The used specimens are shipped back to Biocorporation. Safety data sheets from BioCorporation's website show their "embalming fluid" to have 1.8% formalin and their "pail packing fluid" to contain 3% formalin. Facility is unsure which is used for their samples as safety data sheets for their specimens on site were not available for review. Make a hazardous waste determination for the waste fluids off specimens and if determined to be hazardous manage accordingly.

Site Name: NOTRE DAME HIGH SCHOOL
Violation Date: 11/22/2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 12/01/2016. 2 x 10 gallon containers of spent photo-processing chemicals was missing the accumulation start date and the generator information

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 138958
Site Name: NOTRE DAME HIGH SCHOOL
Violation Date: 11/22/2016
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: G accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator G the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste)

Violation Notes: of waste per process may be accumulated G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. Returned to compliance on 12/01/2016. The last disposal of photo-processing chemicals was 6/30/14. Per facility, photo-processing chemicals are disposed of every 2 years. Using point of generation rules, ensure that wastes are picked up at least once per year.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Areas inspected include the chemistry labs, biology labs, photo-processing lab, and the custodial storage area. Observed the following wastes on site: 2 x 5 gallon containers of zinc chloride containing wastes (point of generation) 2 x 10 gallon containers of spent photo-processing chemicals (point of generation) Fire extinguishers have had annual maintenance Spill kit is available on site Eye wash stations are located in the storage rooms for chemistry and biology labs Disposal records were reviewed and in good order EPA ID# CAR000117705 is active The following violations were corrected on site: 2 x 5 gallon containers of zinc chloride containing wastes were missing hazardous waste markings. Markings were added during inspection.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Notes: records for a minimum of three years.
Returned to compliance on 09/26/2016. No emergency response training logs were available at the time of inspection.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-07-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection conducted with Jon Blazo. Facility has the following reportable chemicals on-site: 500 gallon diesel fuel for back up generator Facility has two labs to prepare science demonstrations and activities for students. All chemicals are under reporting thresholds and include materials for flame tests, agar preparation, and basic endo and exothermic neutralization reactions involving baking soda and vinegar. Lab supervisors stated that no liquid wastes are created other than baking soda/vinegar combos and all biological agar/bacteria wastes are picked up by Stericycle. Facility was advised that while current wastes are likely non-hazardous, the raw materials (such as copper sulfate solutions for flame tests) would likely qualify as hazardous waste if they become expired or cannot be used for their current intended purposes. A hazardous waste generator's permit does not appear to be necessary at this time.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-20-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Note; 1) Within 30 days provide a list of employees that took part of the Emergency Evacuation Drill on September 19th 2019. 2) The hazardous materials stored at this site is; 500 gal., of diesel. This is currently what was last reported the HMBP submitted via Front Counter.

FAIRMONT HOTEL SAN JOSE (Continued)

S103946068

Violation Description: Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

Violation Notes: Plan does not include contacts for notification procedures for the local CUPA, regional water quality control board, or other local agencies.

Violation Division: Santa Clara County Environmental Health

Violation Program: APSA

Violation Source: CERS

Site ID: 29482

Site Name: FAIRMONT HOTEL SAN JOSE

Violation Date: 7/15/2015

Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General

Violation Notes: _____ Hazardous

waste containers must be inspected weekly when placed in the hazardous waste storage area (not in Point of Generation accumulation areas, where they are at or near the point of generation). Per discussion with Chief Engineer, weekly inspections have not been performed in the hazardous waste storage area on P1 Level when waste containers were stored there. However, monthly inspections have been performed. One container of spent DF2000 filters generated in 2014 was reportedly stored in this waste storage area prior to the 1/31/2015 waste pick up by Safety Kleen.

Violation Division: Santa Clara County Environmental Health

Violation Program: HW

Violation Source: CERS

Site ID: 29482

Site Name: FAIRMONT HOTEL SAN JOSE

Violation Date: 11/13/2018

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container.

Violation Notes: Tanks appear to rely on a fast response system for overfill prevention, but filling procedures are not properly detailed in the plan. If 4000 gallon diesel fuel tank remains in the plan, plan must accurately describe any overfill prevention mechanisms on the tank or specify how a procedure will be used to prevent overfill. ** In order for facility to determine liquid level of the tank to prevent overfilling, liquid level gage on the 4000 gallon diesel tank must be repaired.

Violation Date: 11/13/2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container's supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes: All tanks are subject to integrity testing in accordance with industry standard and current inspections do not appear to meet an industry standard. Begin conducting and documenting these tests. NOTE: Facility may use any applicable industry standard, including Steel Tank Institute SP001. Under STI SP001, all tanks are category 1 tanks and tank integrity testing may be satisfied by completing and AST record, 12 monthly inspections, and 1 annual inspection for each tank. All mentioned forms are available for free download online. Inspections may be conducted by any employee with sufficient knowledge to complete the forms.

Eval Notes: Facility last submitted their annual tank facility statement via CERS on 3/26/2018. SPCC Tier 1 Template plan for this facility was first created in 2015 and was certified by the Chief Engineer on 8/10/2015. Facility has the following bulk storage containers: 1x 496 gallon diesel fuel emergency generator belly tank. Tank appears to have no overfill prevention valve and relies on a high liquid level alarm and an attendant near the tank while fueling. Tank is double-walled and interstice is monitored by an electronic leak sensor. 1x 200 gallon diesel fuel emergency generator belly tank. Tank is located in a basement below grade and meets all requirements to be considered a G Tank in an underground areaG (TIUGA). Tank has no overfill prevention valve or high liquid level alarms and relies solely on a fast response system to prevent overfills. Qualitative dial gages are used to show liquid level. 1x 220 gallon diesel fuel fire pump tank (TIUGA-level P1). Tank has a [Truncated]

Eval Notes: Routine Aboveground Petroleum Storage Act Program inspection began on 7/9/2015 and concluded on 7/15/2015. Aboveground petroleum storage includes: -4,000 gallon diesel tank on P2 Level -200 gallon diesel tank on P2 Level -493 gallon diesel tank in a generator unit at the South Tower ground level *Note: The 4,000 gallon diesel tank on P2 level contains approximately 300 gallons according to the tank level measuring device. This tank was previously used to fuel boilers prior to switching to natural gas as a fuel. This tank is reportedly not in use at this time and has been disconnected from discharge piping. It is no longer capable of being used as originally designed. If this tank is emptied, cleaned and designated as "Permanently Closed", this facility will no longer be subject to APSA requirements.

Eval Notes: On-site to conduct a follow-up inspection to confirm that all hazardous materials/wastes generated as a result of the incident that occurred on 08/31/19 were properly managed by staff of The Fairmont Hotel. Spoke with Mr. Wick regarding incident occurred that occurred on Saturday, August 31, 2019 at the Fairmont Hotel. Mr. Wick informed me that emergency response units responded to this facility around 9:00-10:00am for unknown fumes coming from this facility. It was confirmed by the agencies that responded (San Jose Fire Dept., and San Jose Police Dept.,) that one person has died following a possible suicide attempt using unknown chemicals. Other news media indicated that as many as eight others were injured. Following the initial response, the hotel was evacuated as a precaution. Mr. Wick indicated that some of the Fairmont Hotel employees were taken to the hospital for minor exposure and were cleared. Mr. Wick indicated that the entire Floor 19 was out service until [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil
Potential Contaminants of Concern: Lead, Polynuclear aromatic hydrocarbons (PAHs), Total Petroleum Hydrocarbons (TPH)
Site History: 4 parcels located at 561, 577 and 599 S. Market Street and 60 Reed Street Closed LUFT case at 599 S. Market and USTs closed in place at 561 S. Market St. The Market Street parcels are developed commercially and the 60 Reed Street parcel is residential. All parcels are to be re-developed with commercial below with apartments above. Sampling reported the presence of elevated PAHs and Lead in soil.

LUST:

Name: SPARTAN GAS STATION
Address: 498 4TH
City,State,Zip: SAN JOSE, CA 95112
Lead Agency: SANTA CLARA COUNTY LOP
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501344
Global Id: T0608501344
Latitude: 37.3303788756706
Longitude: -121.881680488586
Status: Completed - Case Closed
Status Date: 12/23/2016
Case Worker: GOR
RB Case Number: 14-049
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E17B03f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History:

The Site is located at the north corner of the South Fourth Street and East William Street intersection within the City of San Jose . A small convenience store occupies the north portion of the Site and a remediation treatment plant occupies the east portion of the Site.

SPARTAN GAS STATION (Continued)

S104162848

Total petroleum hydrocarbons as gasoline (TPHg) and diesel fuel (TPHd) were initially detected in soil and groundwater beneath the Site during investigation activities in 1989. Since 1989, corrective action work including soil and groundwater investigations and remediation work has been performed under the direction of the local oversight agency (currently Santa Clara County Department of Environmental Health) and the Site has been assigned Fuel Leak Case No. 14-049. Investigation and remediation work completed to date include drilling of more than 40 soil borings, installation of 24 groundwater monitoring/extraction wells, and construction and operation of a remediation system. Investigative results indicate that the fuel leak originating from the Site contained a mixture of fuel-related compounds, including TPHg and methyl tertiary butyl ether (MTBE). While this mixture of dissolved TPHg and MTBE has advected down-gradient to the north-northeast, a TPHg plume without MTBE has been detected up- and cross-gradient to the southeast and east. The up- and cross-gradient TPHg contamination was attributed to Fuel Leak Case No. 14-049 and the local oversight agency required several stages of investigation work to characterize its lateral extent. At least six borings and nested wells MW-7A and MW-7B were installed southeast and east of the Site in order to characterize up- and cross-gradient contamination, and groundwater extraction well EW-4 was installed in order to control further migration of these cross-gradient contaminants. Possible Up-Gradient Source of Petroleum Hydrocarbon Contamination In 2004, Allterra hypothesized that the up- and cross-gradient hydrocarbon contamination did not originate from the Site, but from an unidentified leaking UST located somewhere east to southeast of the Site. To evaluate the hypothesis, Allterra performed a historical survey of the area immediately southeast of the Site, as documented in Allterra's March 31, 2005 Corrective Action Plan. A brief description of the rationale for this hypothesis is as follows: Up- and Cross-Gradient Groundwater Data: The fuel oxygenate MTBE is listed as a chemical of concern for Fuel Leak Case No. 14-049. As expected, MTBE has been detected in borings and wells down-gradient of the Site (north to northeast). However, while the TPHg-MTBE plume has migrated down-gradient, analytical data for up- and crossgradient samples indicate high levels of TPHg and non-detect levels of MTBE. A Gas Station Formerly Operated at 502 South Fourth Street: Interviews with residents in the surrounding neighborhood indicated that the apartment complex located at the east corner of the South Fourth Street and East William Street intersection (502 South Fourth Street) had been the former location of gasoline service station up until about 1960. The operation of a gas station at 502 South Fourth Street was verified after a review of (1) Polk Directories from 1940 and 1942 (Bob and Teds Station), (2) an 1954 aerial photograph, and (3) a 1950 Sanborn Map. Comparing the location of the former gas station at 502 South Fourth Street with the available groundwater data suggests that the TPHg contamination east and southeast of the Site originated from the former gas station. However, before proceeding with possible enforcement action, an additional stage of investigation was appropriate. Up-Gradient Source Investigation Activities The following is a discussion of investigation activities up-gradient of the Site, that included a series of five Geoprobe soil borings advanced through the sidewalk area along East William Street. The purpose of the investigation was to further characterize up- and cross-gradient hydrocarbon contamination that is suspected to be migrating from the former gas

station located at 502 South Fourth Street. Rationale for Boring Locations Five Geoprobe borings, designated UB-1 through UB-5, were advanced through the sidewalk along the southeastern side of East William Street. The borings were aligned in a transect that began at the east corner of South Fourth and East William Streets and extended northeast toward South Fifth Street. Exact boring locations were determined in the field based on three considerations: 1) locations suspected to be directly down-gradient of the former gas station; 2) locations that would fill-in gaps in historical data; and 3) locations where drilling equipment was not constrained by physical barriers. An encroachment permit (Permit No. 3-16984) was obtained from the City of San Jose for installing borings in the public right-of-way. Soil and groundwater samples were submitted, under chain-of-custody protocol, for chemical analysis to McCampbell Analytical, Inc., of Pacheco, California, a state of California certified laboratory (ELAP #1644).

Address: 150 S 1ST ST
City,State,Zip: SAN JOSE, CA 95113
Site ID: 269
CERS ID: 10416403
CERS Description: Chemical Storage Facilities

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-25-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site to conduct a routine hazardous materials business plan inspection CERS ID: 10416403 Facility's last HMBP submittal was via CERS 4/20/17 No reportable quantities of material were observed on site CERS submittal 4/20/17 included reportable quantities of material that belong to DataPipe located in Suite 100 of 150 South First Street. 150 South First Street does own 1 generator on site, located on the roof and accessed via ladder. A photograph was taken of the tank tag by Ron Cabanayan and it indicated that the generator capacity was 40 gallons. Facility no longer has reportable quantities of material. BP01 permit will be removed from facility.

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes:

On site with Robin Ward of HMCD to conduct a routine APSA inspection. On facility's 2/28/18 CERS submittal, 20,240 gallons of diesel fuel, 1,100 gallons of hydraulic oil and 350 gallons of motor oil were reported. During inspection it was clarified that the 20,240 gallons of diesel fuel and 350 gallons of motor oil belong to DataPipe, a tenant in the same building. DataPipe has their own CERS ID# and facility information and is correctly permitted for APSA. 150 South First Street maintains control of 4 elevator rooms, each with one oil-containing hydraulic lift tank. Tank capacities are equal to 1,100 gallons, which is below SPCC and APSA thresholds. Facility's APSA permit will be inactivated.

Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

On site with Robin Ward of HMCD to conduct a follow up hazardous materials business plan inspection. Facility's HMBP submittal on 2/28/18 indicated that 8 reportable chemicals are located at this facility and that they are subject to APSA. Mr. Cabanayan indicated that some of the inventory items submitted on CERS actually belong to DataPipe, which has their own CERS ID# and facility information. Observed the following reportable chemicals on site: 65 gallons of

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: G accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator G the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.

Violation Notes: Returned to compliance on 10/24/2017. Facility accumulated a 55 gallon drum of hazardous waste absorbent located in the diesel fuel polishing room for longer than a year. The accumulation start date was listed on the hazardous waste label as January 2001. Make arrangements for the immediate removal of the 55 gallon drum of hazardous waste absorbent in the diesel fuel polishing room. Do not store hazardous waste at the point of generator (i.e. satellite) accumulation for longer than a year.

Eval Notes: A ABOVEGROUND PETROLEUM STORAGE ACT INSPECTION WAS CONDUCTED WITH MR. HUGO GARAY- DATA CENTER CHIEF ENGINEER WITH DATAPIPE ON SEPTEMBER 14, 2017. A facility walk through was conducted and the two 10,000 gallon diesel fuel tanks were inspected. Both tanks have adequate secondary containment and are electronically monitored by a Veeder Root TLS-350 monitoring system. The last annual monitoring certification was conducted in April 10, 2017. The two 10,000 gallon diesel fuel tanks have overflow prevention monitoring alarms. Two bulk storage aboveground diesel fuel tanks were also inspected on the roof (one 100 gallon and one 228 Gallon diesel tanks). The facility also has three Step-down electrical transformers containing insulating oil for a total storage capacity of 3,777 gallons and three Single -walled elevator steel reservoirs containing hydraulic oil. The facility had a current Spill Prevention, Control and Countermeasures Plan (SPCC) that was dated July [Truncated]

LUST:

Name: FORMER TEXACO STATION
Address: 598 S. FIRST STREET
City,State,Zip: SAN JOSE, CA 95112
Lead Agency: SANTA CLARA COUNTY LOP
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501801
Global Id: T0608501801
Latitude: 37.3273333333333
Longitude: -121.8837
Status: Open - Site Assessment
Status Date: 02/21/2011
Case Worker: GOR
RB Case Number: 14-225
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E17G02f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The first soil borings were drilled onsite in may 1993. 5 soil borings (B1 through B5) were drilled near the former dispenser islands, gasoline USTs and the "unknown featur" at the reas of the building. Petroleum hydrocarbons were detected in both soil and groundwter samples from the soil borings. In August 1994, 7 additional soil borings (SB1 through SB7) were advanced onsite. 4 were completed as groundwater monitoring wells (MW1 through MW4). TPHg was reported in groundwater from well MW1 at 50,000 ppb. In July 1999, 9 geoprobe borings (GP1 through GP9) were advanced for the collection of soil and groundwater samples. In December 2000, 4 wells (MW5 through MW8) were installed on and offsite. In October 2004, a two-phase extraction system (TPET) was installed at the site. In the fourth quarter 2008, the TPET system was replaced with a new dual-phase extraction and treatment (DPET) system. Remediation and monitoring are ongoing.

water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Based on DO monthly records reviewed during this inspection. The Designated Underground Storage Tank Operator (DUSTO) has been writing on the DO monthly inspections since 11/06/2018 up until now that Overfill Prevention Inspection needs to be schedule. In some months the DUSTO has also written up the issue of finding liquid inside the spill bucket. In some reports Mr. John Stowe has signed Section VI but has not acknowledge any corrective actions in Section V. From now on ensure that all Compliance Issues addressed by the DO on Section III are followed by a written corrective action on Section V followed by a signature on Section VI.

Violation Date: 11/20/2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Based on today's inspection the overfill prevention inspection has not been conducted. This is a repeat violation from 11/26/18 inspection. Within 30 days schedule an Overfill Prevention Inspection and notify our Department of when this inspection is schedule for. Failure to schedule the required Overfill Prevention inspection could potentially lead into an enforcement action by our Department.

Eval Notes: On-site for an Annual Monitoring System Certification on 11/17/2016 performed by Services Station Systems, Inc. Service Technician Israel Santillan. Mr. Santillan has a current ICC Service Technician Certification (#8057571 exp. 10/2/2017) and Veeder-Root Level 4 certification (#B33310 Exp. 5/11/17). The underground storage tank (UST) system is comprised of one, 1,000 gallon, double-walled steel tank containing diesel fuel and is used for emergency generator fueling. The tank has a reported installation date of 10/15/1991. There is also a 250 gallon, double-walled, steel, below-grade tank in the Fire Pump Room, and one, single-walled, belly tank in the generator system on the roof. The UST system has a conventional suction piping system with double-walled underground piping and single-walled aboveground piping. Observed testing of the following components on 11/17/2016*: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR [Truncated])

Site ID: 64612
Site Name: SAN JOSE CONVENTION CENTER
Violation Date: 3/9/2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/10/2017. One yellow plastic bag labeled as "Hazardous Materials" "for temporary storage before disposal" was observed in the cooling tower refrigerant room. The bag was opened by Mr. Zivkovic and was confirmed to contain used absorbent that was used to clean up a diesel spill that was observed during an HMCD UST inspection on 12/6/2016. The bag was not labeled with any of the required information listed below.

S102416494

Violation Notes: Returned to compliance on 04/10/2017. The facility's current practice is to rinse their 55 gallon drums that formerly contained a hazardous material (e.g. AC-200 Closed Loop Treatment, Brommax 7.1, BCP 1015) after use, dispose of the rinse waste to the sanitary sewer, and recycle/dispose of the drums. Rinsing containers that formerly held a hazardous material/waste constitutes "treatment" of hazardous waste as defined by HSC 25123.5(a) and cannot be conducted without authorization from HMCD. Immediately cease this treatment practice and properly dispose of the drums by either reconditioning, recycling, or reclaiming the drums for their scrap value on-site or shipping the container off-site, or by returning it to the supplier to be refilled [CCR 66261.7(f)]. Note that if being shipped off-site, the containers must be transported in accordance with US DOT Regulations. Otherwise, obtain a treatment permit from HMCD to continue to conduct this treatment practice.

Violation Description: 6.95, Section(s) 25508(a)(1)
Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violation Notes: The Business Owner/Operator Identification page on CERS needs to be updated to include the change in facility personnel, Miroslav Mike Zivkovic- Chief Engineer is no longer employed at this facility. Mr. Zivkovic has not been employed with this facility since August, 2019. The information found on CERS as of 12/01/2018 must be updated to reflect the facility personnel change to; Bill Buchser- Chief Engineer and John McMannus- Assistant Chief Engineer. Request access on CERS for CERS ID#10125703 and update this information on CERS within 30 days.

SAN JOSE MCENERY CONVENTION CENTER (Continued)

S102416494

Violation Notes: Returned to compliance on 03/09/2017. As evidenced by the amount of diesel and diesel residue in the secondary containment for the piping run between the emergency generator day tank and the emergency generator, the employees lack of knowledge regarding the leak, and the lack of notation in the inspection records regarding the diesel leak, the piping run is not being inspected during the facility's daily EGTS unburied piping inspections. Ensure that all portions of the EGTS unburied piping are inspected as required.

Violation Date: 12/6/2016
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: Returned to compliance on 03/09/2017. Wet diesel and significant amounts of diesel residue coat the entire bottom third of the secondary containment for the unburied fuel piping that runs from the emergency generator day tank to the generator itself. It is also of note that degraded and aged-looking, contaminated absorbent pads were observed within the secondary containment, but it is unknown as to how long the absorbent pads have been there. Investigate the source of the leak and provide a scope of work plan to HMCD as to how the leak will be corrected. If a repair is needed, a retrofit permit from our office may be necessary.

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Returned to compliance on 04/10/2017. Metal fines with regulated metal content are generated from a polisher, grinder, and milling machine in the shop area. The facility recently acquired a vacuum system that will be used to clean up the metal fines and deposit them into a 55 gallon drum for accumulation. A hazardous waste determination must be conducted on the metal fines waste. If the fines are less than 100 microns in diameter, they must be collected and managed as hazardous waste. If they are greater than 100 microns in diameter, they can be recycled for their scrap metal value or managed as hazardous waste. Provide documentation of the hazardous waste determination to HMCD for review.

Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-19-2015
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On site today to accompany State Water Resources Control Board (SWRCB) inspectors Tom Henderson and Rebecca Green as they performed an underground storage tank (UST) inspection as part of the SWRCB's Government-Owned Tanks initiative. Designated UST Operator Jim Ruble from Advanced Fuel Services, Inc. was on-site to provide access to the tank top sump and interstitial sensor riser. This visit also follows up on HMCD's annual UST compliance inspection that occurred on 1/13/2015. With respect to violation T590 cited on 1/13/2015, it appears that the tank top sump may be clad with an outer layer of fiberglass. It was agreed today that Advanced Fuel Services will dig down into the backfill material beside the sump to perform an inspection to confirm whether or not the sump exterior is clad with fiberglass and that photographs documenting the inspection results will be submitted to HMCD. If the inspection by the contractor confirms that the sump is protected from corrosion [Truncated]

Eval Notes: INSPECTION BEGAN ON 1/13/2014 WITH UNDERGROUND STORAGE TANK (UST) MONITORING SYSTEM CERTIFICATION TESTING AND CONCLUDED TODAY WITH RECORDS REVIEW. ALL UST MONITORING EQUIPMENT WAS TESTED ON 1/13/2014 BY UST SERVICE TECHNICIAN EDDIE MARTINEZ OF ADVANCED FUEL S FUNCTIONED PROPERLY. MR. MARTINEZ HAS CURRENT ICC UST SERVICE TECHNICIAN CERTIFICATION (EXP. 3/29/2014) AND VEEDER-ROOT LEVEL 4 CERTIFICATION (EXP. 8/8/2014). SENSORS WERE TESTED USING WATER. UST FILL SPILL BUCKET WAS HYDROSTATICALLY TESTED FOR 1 HOUR AND PASSED. SUBMIT COPY OF MONITORING SYSTEM CERTIFICATION FORM AND SPILL BUCKET TEST REPORT WITHIN 30 DAYS. NOTE: SINCE UST SYSTEM IS AN EMERGENCY GENERATOR TANK SYSTEM, ABOVEGROUND PIPING BETWEEN UST AND DAY TANKS WILL BE EXEMPT FROM REGULATION AS UST PIPING PROVIDED THAT VISUAL INSPECTIONS ARE PERFORMED AND DOCUMENTED AT LEAST MONTHLY AND EACH TIME THE PUMP OPERATES.

THERE IS A 100% OR MORE INCREASE IN THE QUANTITY OF A HAZARDOUS MATERIAL THAT HAS BEEN REPORTED THAT THE HMBP BE AMENDED WITH THE NEW MAXIMUM THRESHOLD. On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed at or above HMBP-reportable thresholds: Cleaning Area/Warehouse: 1. StarBrite 25 Sealer Finish: 58 gallons (1 gallon maximum containers) 2. Universal Waste-Lamps: 500 pounds (cardboard boxes) Kitchen: 3. R408A Refrigerant: Confirmed to above reportable thresholds, but exact quantity was unable to be confirmed during inspection Loading Dock Area & ForkLifts: 4. Liquefied Petroleum Gas (Propane): 410 gallons (10 gallon maximum containers)* Kitchen & CUP: 5. Liquid Carbon Dioxide: 37.6 gallons (2.3612 gallons maximum)* CAP: 6. R134A [Truncated]

Eval Notes: Onsite to witness triennial UST secondary containment testing. Testing by Advanced Fuel Systems, technician Mike Stromecki. Mr. Stromecki held valid ICC and Franklin Fueling (Incon) certifications on date of testing. Site has one sump for piping, with both supply and return lines sharing one 4 inch secondary piping chase. Sump was filled with water to above the highest piping penetration. Tested using the Incon accelerated test. Test passed. Piping secondary was pressurized to 5 psi for one hour without loss. Tank annular had a vacuum or 10 in Hg drawn. The vacuum held for one hour without loss. Of note: - Piping sump has a second 4 inch pipe exiting the sump. Test was run with this pipe open to the sump. Determined that the pipe is capped underground between 6 and 9 inches after exiting sump. -supply and return lines enter building and are housed within a fabricated sheet metal box. This box is not monitored and the site has a log demonstrating daily visual [Truncated]

Eval Notes:

This report serves as follow up to 1/13/2015 and 2/19/2015 Official Notices of Inspection (NOI). Copies of those NOIs and the NOIs dated 1/15/2014 and 4/12/2012 were provided to Mr. Zivkovic today. Violation T024 cited in 1/13/2015 Official Notice of Inspection has been withdrawn since UST permit application states that permit should be issued to the UST Operator. Facility is now in compliance with Violation T870 noted on 1/15/2014. Inspections of the unburied fuel piping have been performed and documented since 1/16/2015. Continue to perform and document inspections each time the turbine (pump) operates, but no less often than monthly using the "Emergency Generator Tank System Unburied Piping Exemption Inspection Log" (UN-101). Annual UST monitoring system certification testing is due each year in December. Be sure to schedule next round of testing for December of this year.

Eval Notes:

This report serves as follow up to 1/15/2014 and 1/13/2015 Official Notices of Inspection (NOI). Copies of those NOIs were provided to Mr. Zivkovic today. Notes: 1. Violations B105 and B111 were corrected on 5/26/2015 upon electronic submittal via California Environmental Reporting System (CERS) website of updated Facility Information. However, departure of Mark Mullins about two weeks ago requires that this information be revised and resubmitted within 30 days of his departure. 2. To be in compliance with the requirement to certify your Hazardous Materials Business Plan (HMBP) annually, Team San Jose must also electronically submit current hazardous materials inventory information, storage map(s), and Emergency Response/Contingency Plan information to address requirements regarding emergency response plans and procedures and employee training.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 9/28/2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: The following elements are missing from the site map: - emergency evacuation assembly areas - utility shut off locations - emergency equipment locations - street names - storm drain areas
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Notes; 1) The most recent CERS submittal was done on 03/26/19 and the hazardous materials inventory is current. 2) Employee training is being documented on ICE Safety Solutions- Safety Training Program Roster. The last fire drill training conducted was on 07/20/2018 for the entire building. This was reviewed during this inspection. 3) Based on CERS and this inspection the ownership for this site has changed to; 50West San Fernando Owner, LLC C/O CBRE. Our records with our Department will be updated to reflect this change. 4) The property owner is the same entity as above. 5) A copy of the Return to Compliance (RTC) for inspection report on 09/28/2016 was received during this inspection.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-08-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Based on my observations during this inspection, this facility is no longer subject to the APSA program as the 950 gal. diesel tank was no longer observed. This tank was closed under City of San Jose Fire Department oversight. Mike Murtiff, Fire Inspector with the City of San Jose oversaw the closure of this tank. The APSA permit will be inactivated with our Department.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-28-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous materials business plan inspection. CERS ID: 10353421 Facility has 2 reportable chemicals 1,475 gallons diesel fuel (3 generator sizes: 950 gallons, 275 gallons, 250 gallons) 55 gallons latex paint Facility is correctly permitted at BP01 Documented annual training was reviewed on site

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Facility Status: Open - Inactive
Status Date: 09/15/2015
Global Id: SL0608548367
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.33481
Longitude: -121.888049
Case Type: Cleanup Program Site
Case Worker: UUU
Local Agency: Not reported
RB Case Number: 43S1109
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Sprits / Distillates

Site History: Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Successor Agency to the San Jose Redevelopment Agency.

Case Type: Cleanup Program Site
Case Worker: AVC
Local Agency: SAN JOSE, CITY OF
RB Case Number: 43S1110
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating, * Metals
Site History: The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint

MAP FINDINGS

BLOCK 2 CITY OF SAN JOSE PARKING LOT (Continued)

S108937591

shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 8/23/2016
Citation: 19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: The facility's Business Activities page marks "yes" to the question, "Does your facility generate hazardous waste?" This facility does not routinely generate hazardous waste and does not require a hazardous waste generator permit with HMCD. Mark "no" to the question regarding hazardous waste generation and re-submit the Facility Information page.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 123618

Violation Source: CERS

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 04-30-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: -ON SITE WITH MIKE LERMAN THE GENERAL MANAGER TO DISCUSS NEW OWNERSHIP CHANGE AND INVOICE INFORMATION. -MR. LERMAN WAS GIVEN THE GETTING STATED ON CERS TO UPLOAD THE HAZARDOUS MATERIALS BUSINESS PLAN VIA CERS. -SUBMIT THE HAZARDOUS MATERIALS BUSINESS PLAN WITHIN THE NEXT 30 DAYS -NEW OWNER IS WCP SAN JOSE I, LLC. -CARE OF: ACCOUNTING

Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-23-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The facility is a hotel that does not have a pool. The following hazardous materials are accumulated in quantities above HMBP reportable thresholds: 1. Diesel Fuel (Emergency Generator): 100 gallons NOTES: - CERS ID: 10351120 - Most recent HMBP Submittal 3/21/2016 - The business is the property owner. - The emergency generator is on the roof of the business. Maintenance employees inspect the generator daily for any leaks or deterioration and run the generator every other day to ensure proper operating ability. A more in-depth monthly inspection is also conducted. - Small quantities of paints, primers, carbon dioxide (for soda machine), cleaning products, and detergents are on-site, but below HMBP reportable thresholds. NOTES TO FACILITY: - It is recommended that a spill kit (i.e. kitty litter, absorbent pads, etc) be placed within closer proximity to the emergency generator in [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002837930

S111217095

Local Case Number: 07S1E08N03f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel
Site History: The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegradation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

Region: STATE
Facility Status: Completed - Case Closed
Status Date: 04/21/2017
Global Id: T0608591632
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number: Not reported
Latitude: 37.334588
Longitude: -121.889227
Case Type: Cleanup Program Site
Case Worker: UUU
Local Agency: Not reported
RB Case Number: 43S0322
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Diesel, Gasoline, Stoddard solvent / Mineral Spruits / Distillates, Total Petroleum Hydrocarbons (TPH)
Site History: This case is associated with the following two cases: T10000008312 Expert Cleaners (Non-case) T0608502083 Griffin Property (closed) Case Closure/No Further Action: On January 20, 2016, the Regional Water Board required a site history report for Expert Cleaners located at the site address. The response received on January 26, 2016 indicated soil and groundwater investigations were conducted previously at the property under the case name Griffin property and a copy of the Regional Water Board case closure letter dated January 7, 2002 was provided. In April 2017, the Regional Water Board issued a rescission of the January 20, 2016 site history report request. See Expert Cleaners, Global ID # T10000008312, for the rescission letter. Site History: Expert Dry Cleaners operated at this site (724 South first street) for twenty years (1959-1979) . Orvill Griffin purchased the property (718 and 724 South First Street) in June 1979 and operated an auto parts and repair facility. The city of SJ Fire Dept required owner to remove the USTs (one gasoline and one stoddard solvent) and associated piping (URF dated 08/29/1991). The owner discovered four more USTs during excavation. The owner removed all six USTs on July 9, 1991. The USTs are listed below: UST #1 1,500 Gallons diesel UST #2 250 Gallons stoddard solvent UST #3 500 Gallons stoddard solvent UST #4 250 Gallons stoddard solvent UST #5 100 Gallons stoddard solvent UST #6 200 Gallons stoddard solvent Approximatley 600 tons of soil surrounding the USTs and beneath the former dry cleaner building was excavated and removed. The excavation was backfilled and the surface was paved for parking and storage. The main contaminats of concern detected in soil were TPHg, TPHd, and PCE. PCE or other VOCs were not detected in groundwater after USTs were removed in July 1991 and soil overexcavated in August 1991.

Lead Agency Case Number: Not reported
Latitude: 37.3367598346785
Longitude: -121.889898777008
Case Type: Cleanup Program Site
Case Worker: MD
Local Agency: Not reported
RB Case Number: 43S0564
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Chlorinated Solvents - PCE
Site History: This site is an historical building in downtown San Jose. It was formerly a hotel that had a dry cleaning facility in the basement. There has been a release of tetrachloroethene (PCE), a solvent used in dry cleaning, to soil and groundwater. Soil and groundwater investigation is underway and a remedial action plan is required.

Status: Completed - Case Closed
Status Date: 05/21/2010
Case Worker: Not reported
RB Case Number: 01-038
Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E08L01f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA

assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

U001602681

Violation Date: 7/22/2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months."
Violation Notes: Returned to compliance on 07/22/2019. Testing of the spill containments (spill buckets) was conducted late in all 4 tanks. The last time these were tested were on 06/26/18 prior to today. Ensure that in the future all spill containments are tested every 12 months.
Violation Division: Santa Clara County Environmental Health

Violation Date: 7/22/2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Notes: The following spill container failures were observed during this inspection as follows; - Diesel spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the technician. - 91 spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the technician. - 87

spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the technician. All spill buckets above were measured by using a calibrated canister by the technician. All spill containment must have a minimum 5 gallon capacity in size. Replacement of the spill buckets will require a permit from our Department. Within 30 days notify our office in writing how this issue will be resolved.

Violation Date: 7/4/2017
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: Returned to compliance on 02/19/2019. OBSERVED 3- VR#208 SENSORS INSIDE THREE OF THE STP SUMPS FOR TANKS FOR 87, 91, AND DIESEL, WHERE THE SENSOR WAS NOT PLACED IN AN UPRIGHT POSITION BUT RATHER AT AN ANGLE (PHOTOGRAPHS WERE TAKEN). ALL SENSORS ARE LOCATED INSIDE A PVC SLEEVE. ENSURE THAT THE SLEEVE WITH THE SENSOR INSIDE IT'S REPOSITION TO AN UPRIGHT POSITION. THIS IS TO ENSURE THAT THE SENSOR IT'S ABLE TO DETECT A LEAK AT AN EARLIEST OPPORTUNITY. PROVIDE TO OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.

 Case Type: Cleanup Program Site
 Case Worker: AC
 Local Agency: SANTA CLARA COUNTY LOP
 RB Case Number: Not reported
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
 Potential Contaminants of Concern: Lead, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)
 Site History: Site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site. Please refer to the Soil and Groundwater Management Plan to review details of the reported contamination as well as the mitigation measures proposed to protect human health and the environment.

Local Case Number: 07S1E08M03f
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Trichloroethylene (TCE), Xylene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated

volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlyle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'. On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

PORTOLA CLEANERS (Continued)

S105194853

Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Potential Media Affected: Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water)
Site History: Portola Cleaners appears to have two address: 130 West Virginia St., San Jose and 805 State Street, San Jose. Dry cleaning solvents released from dry cleaning operations and the related UST. The SCVWD transferred the case to the Regional Water Board on April 1, 1996. SJ Fire Dept. recommended collecting samples from the tank slurry and soil, closing the UST by filling it in place. (MS) No soil, soil gas and groundwater sampling data in the file.
Begin Date: 1991-03-04 00:00:00

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E08G02f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, Gasoline
Site History: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to include determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 3/28/17 and ended today. Ngoc Nguyen is responsible for any hazardous waste generated from daily operations (i.e. waste absorbent from fuel spills or contaminated hosing stored on-site). Conducted a facility walk-through on 3/28/17 and observed only new absorbent. When Mr. Nguyen was asked how waste absorbent was managed and he answered that he did not know. -Fire extinguishers were observed as maintained -Spill control was available This inspection concludes today with issuance of this Official Notice of Inspection. NOTE: -Any hazardous generated as a result of testing or repairs of UST system is required to be managed by the UST system owner, Valero Marketing & Supply Company. This includes any fuel-contaminated test water generated from UST testing activities.

Eval General Type: Other/Unknown
Eval Date: 08-10-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: During today's underground storage tank repair inspection, a customer overfilled her car gas tank and spilled fuel on the pavement. Jonathan Ocker from Triton Construction cleaned up the spill using an absorbant pad. When the incident occurred, the only facility employee on-site was Tiffany Digiore, who had no idea how to respond to a spill and did not know if the facility has any hazardous waste containers. The saturated pad was given to Mr. Nguyen, who was called and arrived onsite in a short time. He placed the waste in a 55 gallon open head steel drum. Based on Mr. Nguyen's statements and multiple choice tests from Designated UST Operator (DUSTO) training, which were the only training records available at the facility, there were no personnel on-site today who have been trained within the past 12 months by the facility's DUSTO. Mr. Nguyen's last DUSTO test was dated 8/20/2015. Ms. Digiore's last DUSTO test was dated 7/30/2015. Neither the training video nor the used [Truncated]

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite to witness annual monitoring system certification. Conducted by UST Confidence, technician Aaron Perrigo. Mr. Perrigo has current ICC, Veeder Root Level 3, VMI, Veeder Root Red Jacket certifications. System provided audible and visual alarms with turbine shutdown for all STP sump sensors. System provided audible and visual alarms with turbine shutdown for all UDC sensors System audible and visual alarms for all annular/interstitial sensors Mechanical Line Leak detectors were able to recognize and restrict flow for simulated 3 gph, 10 psi leak. Tested at dispenser 9/10. Overfill prevention by audible external alarm. Probe flats were raised to calculated 90% height and each provided an alarm that was visible and audible at the point of fill. Spill buckets tested with water for one hour without loss. UDC are fitted with deflector plates. Reviewed information submitted on CERS (10158209) on 12/15/17. Operating permit application, monitoring plan response [Truncated]

Eval Notes: On-site to conduct a routine hazardous waste and hazardous materials business plan inspection. As the UST owner, this business has taken responsibility for the management and disposal of 1 x 55 gallon drum of fuel-contaminated test water and 1 x 55 gallon drum of fuel-contaminated hoses stored in a secured enclosure. WITHIN 30 DAYS PLEASE SPECIFY: 1) How hazardous waste manifests will be made accessible on-site for review? Will they be kept inside the UST compliance binder that is maintained by the gas station operator?
NOTES: -CAL000191509 is active. -Fire extinguishers and spill absorbent are available on-site. -Inspections are conducted by the station operator and the DUSTO. -REMINDER: Once the total amount of fuel-contaminated test water and fuel contaminated hoses stored on-site reaches 220 pounds it may be accumulated for a maximum of 180 days.

 RB Case Number: 06-030
 Local Agency: SANTA CLARA COUNTY LOP
 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: 07S1E17K01f
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: Based on information provided in the May 15, 2009, Quarterly Report #45, 2nd Quarter 2009 Discharge of Treated Groundwater to Storm Drain prepared by Western Geo-Engineers for the groundwater extraction and treatment system at the site; groundwater extraction commenced at the site in 1991, approximately 4 million gallons of groundwater have been treated, and approximately 37 gallons of TPHg have been removed. However, the system was shut down on May 7, 2009, due to the relatively low petroleum hydrocarbon mass removal rate; deactivation of the system was approved by SCCDEH in an April 21, 2009 letter. Groundwater sampling procedures consist of initially measuring and documenting the water level in the well and checking the well for the presence of separate-phase hydrocarbon (SPH) using an oil/water interface probe or a clear Teflon bailer. If the well did not contain SPH, it was purged a minimum of three casing volumes or until dry. During purging, well stabilization parameters (temperature, pH, and electrical conductivity) were monitored and recorded. After 80% recovery of the water level, groundwater samples were collected with a new disposable polyethylene bailer or pre-cleaned reusable Teflon bailer and placed into the appropriate EPA-approved containers. Reusable sampling equipment was cleaned with trisodium phosphate solution and clean water between uses. The samples were labeled, logged onto chain-of-custody documents, and transported on ice to the laboratory using appropriate chain-of-custody documentation. Groundwater samples were submitted to a California state-certified laboratory, and analyzed for TPHg, benzene, toluene, ethylbenzene, xylenes (collectively BTEX), methyl tertiary butyl ether, and tertiary butanol EPA Method 8260B. The results of the current monitoring event indicate that since shut down of the groundwater extraction and treatment system, dissolved concentrations of petroleum hydrocarbons, MtBE and TBA remain relatively stable and/or within historic ranges, except at wells MW07 and MW08. Continued evaluation of the concentrations will be conducted during ensuing monitoring events; the next event is scheduled for the second half of 2011.

Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

MAP FINDINGS

REDEVELOPEMENT AGENCY CITY OF SAN JOSE (Continued)

S112893570

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of

0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 01/15/2016.

Copies of

the past three years of manifests (005784227FLE 2013; 007613819FLE 2014; 007647623FLE, 008698709FLE 2015) were not available for review. Obtain copies of the manifests and ensure at least three years worth of manifests are able to be reviewed on-site.
