Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. Violation Description: 16, Section(s) 2641(a)
Failure to maintain secondary contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).

Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. The valve cores and plugs were removed today during this inspection. Ensure that the lines remain free to drain into monitored sumps when not undergoing triennial pressure testing.

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: The Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensor s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. However, ensure that the sensor remains in the proper location.

Secondary piping pressure test ports for supply line and return line in the tank top piping sump are pointed upwards. Brass compression fittings on the secondary piping for the flexible supply and return lines must be reoriented so that the test valve openings point downward. Have a qualified contractor perform this work. (Note: Original supply and return lines have been disconnected inside the tank top piping sump.)

Violation Notes: Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. small convenience store occupies the north portion of the Site and a remediation treatment plant occupies the east portion of the Site. Total petroleum hydrocarbons as gasoline (TPHg) and diesel fuel (TPHd) were initially detected in soil and groundwater beneath the Site during investigation activities in 1989. Since 1989, corrective action work including soil and groundwater investigations and remediation work has been performed under the direction of the local oversight agency (currently Santa Clara County Department of Environmental Health) and the Site has been assigned Fuel Leak Case No. 14-049. Investigation and remediation work completed to date include drilling of more than 40 soil borings, installation of 24 groundwater monitoring/extraction wells, and construction and operation of a remediation system. Investigative results indicate that the fuel leak originating from the Site contained a mixture of fuel-related compounds, including TPHg and methyl tertiary butyl ether (MTBE). While this mixture of dissolved TPHg and MTBE has advected down-gradient to the north-northeast, a TPHg plume without MTBE has been detected up- and cross-gradient to the southeast and east. The up- and cross-gradient TPHg contamination was attributed to Fuel Leak Case No. 14-049 and the local oversight agency required several stages of investigation work to characterize its lateral extent. At least six borings and nested wells MW-7A and MW-7B were installed southeast and east of the Site in order to characterize up- and cross-gradient contamination, and groundwater extraction well EW-4 was installed in order to control further migration of these cross-gradient contaminants. Possible Up-Gradient Source of Petroleum Hydrocarbon Contamination In 2004, Allterra hypothesized that the up- and cross-gradient hydrocarbon contamination did not originate from the Site, but from an unidentified leaking UST located somewhere east to southeast of the Site. To evaluate the hypothesis, Allterra performed a historical survey of the area immediately southeast of the Site, as documented in Allterras March 31, 2005 Corrective Action Plan. A brief description of the rationale for this hypothesis is as follows: Up- and Cross-Gradient Groundwater Data: The fuel oxygenate MTBE is listed as a chemical of concern for Fuel Leak Case No. 14-049. As expected, MTBE has been detected in borings and wells down-gradient of the Site (north to northeast). However, while the TPHg-MTBE plume has migrated down-gradient, analytical data for up- and cross-gradient samples indicate high levels of TPHg and non-detect levels of MTBE. A Gas Station Formerly Operated at 502 South Fourth Street: Interviews with residents in the surrounding neighborhood indicated that the apartment complex located at the east corner of the South Fourth Street and East William Street intersection (502 South Fourth Street) had been the former location of gasoline service station up until about 1960. The operation of a gas station at 502 South Fourth Street was verified after a review of (1) Polk Directories from 1940 and 1942 (Bob and Teds Station), (2) an 1954 aerial photograph, and (3) a 1950 Sanborn Map. Comparing the location of the former gas station at 502 South Fourth Street with the available groundwater data suggests that the TPHg contamination east and southeast of the Site originated from the former gas station. However, before proceeding with possible enforcement action, an additional stage of investigation was appropriate. Up-Gradient Source Investigation Activities The following is a discussion of investigation activities up-gradient of the Site, that included a series of five Geoprobe soil borings advanced through the sidewalk area along East William Street. The purpose of the investigation was

MAP FINDINGS

SPARTAN GAS STATION (Continued)

S104162848

to further characterize up- and cross-gradient hydrocarbon contamination that is suspected to be migrating from the former gas station located at 502 South Fourth Street. Rationale for Boring Locations Five Geoprobe borings, designated UB-1 through UB-5, were advanced through the sidewalk along the southeastern side of East William Street. The borings were aligned in a transect that began at the east corner of South Fourth and East William Streets and extended northeast toward South Fifth Street. Exact boring locations were determined in the field based on three considerations: 1) locations suspected to be directly down-gradient of the former gas station; 2) locations that would fill-in gaps in historical data; and 3) locations where drilling equipment was not constrained by physical barriers. An encroachment permit (Permit No. 3-16984) was obtained from the City of San Jose for installing borings in the public right-of-way. Soil and groundwater samples were submitted, under chain-of-custody protocol, for chemical analysis to McCampbell Analytical, Inc., of Pacheco, California, a state of California certified laboratory (ELAP #1644).

Violation Notes: Returned to compliance on 03/09/2017. Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General

Violation Notes: Returned to compliance on 04/10/2017. The facility's current practice is to rinse their 55 gallon drums that formerly contained a hazardous material (e.g. AC-200 Closed Loop Treatment, Brommax 7.1, BCP 1015) after use, dispose of the rinse waste to the sanitary sewer, and recycle/dispose of the drums. Rinsing containers that formerly held a hazardous material/waste constitutes "treatment" of hazardous waste as defined by HSC 25123.5(a) and cannot be conducted without authorization from HMCD. Immediately cease this treatment practice and properly dispose of the drums by either reconditioning, recycling, or reclaiming the drums for their scrap value on-site or shipping the container off-site, or by returning it to the supplier to be refilled [CCR 66261.7(f)]. Note that if being shipped off-site, the containers must be transported in accordance with US DOT Regulations. Otherwise, obtain a treatment permit from HMCD to continue to conduct this treatment practice.

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: All UST monitoring equipment was tested today by UST Service Technician Eddie Martinez of Advanced Fuel Services, Inc. and functioned properly. Mr. Martinez has current ICC California UST Service Technician certification (exp. 3/17/2016) and Veeder-Root Level 4 certification (exp. 8/11/2016). Model 794390-407 annular sensor and model 794380-208 tank top piping sump sensor were tested using water and triggered audible and visual alarms on Veeder-Root TLS-300C monitoring console. The UST fill spill bucket was hydrostatically tested for 1 hour and passed. Presence of mechanical overflow prevention valve in drop tube was visually confirmed. Submit a copy of the completed Monitoring System Certification form and spill bucket test report within 30 days. Notes: 1. Designated UST Operator monthly inspection and facility employee training records are in order. 2. No electronic reporting submittals have been made for this facility (CERSID #10125703).

Eval Notes: On site today to accompany State Water Resources Control Board (SWRCB) inspectors Tom Henderson and Rebecca Green as they performed an underground storage tank (UST) inspection as part of the SWRCB's Government-Owned Tanks initiative. Designated UST Operator Jim Ruble from Advanced Fuel Services, Inc. was on-site to provide access to the tank top sump and interstitial sensor riser. This visit also follows up on HMCD's annual UST compliance inspection that occurred on 1/13/2015. With respect to violation T590 cited on 1/13/2015, it appears that the tank top sump may be clad with an outer layer of fiberglass. It was agreed today that Advanced Fuel Services will dig down into the backfill material beside the sump to perform an inspection to confirm whether or not the sump exterior is clad with fiberglass and that photographs documenting the inspection results will be submitted to HMCD. If the inspection by the contractor confirms that the sump is protected from corrosion [Truncated]

Copies of those NOIs and the NOIs dated 1/15/2014 and 4/12/2012 were provided to Mr. Zivkovic today. Violation T024 cited in 1/13/2015 Official Notice of Inspection has been withdrawn since UST permit application states that permit should be issued to the UST Operator. Facility is now in compliance with Violation T870 noted on 1/15/2014. Inspections of the unburied fuel piping have been performed and documented since 1/16/2015. Continue to perform and document inspections each time the turbine (pump) operates, but no less often than monthly using the "Emergency Generator Tank System Unburied Piping Exemption Inspection Log" (UN-101). Violation Notes: Returned to compliance on 03/09/2017. As evidenced by the amount of diesel and diesel residue in the secondary containment for the piping run between the emergency generator day tank and the emergency generator, the employees lack of knowledge regarding the leak, and the lack of notation in the inspection records regarding the diesel leak, the piping run is not being inspected during the facility's daily EGTS unburied piping inspections. Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 04/10/2017. The facility's current practice is to rinse their 55 gallon drums that formerly contained a hazardous material (e.g. AC-200 Closed Loop Treatment, Brommax 7.1, BCP 1015) after use, dispose of the rinse waste to the sanitary sewer, and recycle/dispose of the drums. Rinsing containers that formerly held a hazardous material/waste constitutes "treatment" of hazardous waste as defined by HSC 25123.5(a) and cannot be conducted without authorization from HMCD. Immediately cease this treatment practice and properly dispose of the drums by either reconditioning, recycling, or reclaiming the drums for their scrap value on-site or shipping the container off-site, or by returning it to the supplier to be refilled [CCR 66261.7(f)]. Note that if being shipped off-site, the containers must be transported in accordance with US DOT Regulations. Otherwise, obtain a treatment permit from HMCD to continue to conduct this treatment practice.

Mr. Stromecki has a current ICC Service Technician Certification and Veeder-Root Level certification. The underground storage tank (UST) system is comprised of one 8,000 gallon, double-walled fiberglass tank, one 275 gallon emergency day tank (emergency generator room), one 250 gallon emergency fire pump day tank (fire pump room), and associated piping. The system contains diesel fuel and is used for emergency generator fueling. The tank has a reported installation date of 1/1/1988. Both day tanks are above-grade level. The tank annular space sensor (Veeder-Root (VR) 794390-407) and piping sump sensor (VR 794380-208) were tested with water, provided audible and visual alarms on the monitoring console, and passed functional testing. The fill spill bucket was filled with 5 gallons of water. The liquid level was measured [Truncated]

Mr. Stromecki held valid ICC and Franklin Fueling (Incon) certifications on date of testing. Site has one sump for piping, with both supply and return lines sharing one 4 inch secondary piping chase. Sump was filled with water to above the highest piping penetration. Tested using the Incon accelerated test. Test passed. Piping secondary was pressurized to 5 psi for one hour without loss. Tank annular had a vacuum or 10 in Hg drawn. The vacuum held for one hour without loss. Of note: - Piping sump has a second 4 inch pipe exiting the sump. Test was run with this pipe open to the sump. Determined that the pipe is capped underground between 6 and 9 inches after exiting sump. -supply and return lines enter building and are housed within a fabricated sheet metal box. Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 04/10/2017. The facility failed to demonstrate that they meet the definition of a conditionally exempt small quantity generator (CESQG) and generate less than 100kg of hazardous waste in a given month and are therefore authorize to dispose of their hazardous waste at a Household Hazardous Waste Collection Facility. The facility stated that they occasionally have enough hazardous waste generated at one time (e.g. a large quantity of off-specification/expired chemicals are determined to be wastes) that they have to transport the hazardous waste to a Santa Clara County Household Hazardous Waste Collection Facility through multiple trips in order to remain compliant with the quantity of hazardous waste an HHW can accept from a facility drop-off. Provide documentation that demonstrates that the facility does not generate more than 100kg of hazardous waste in a month and that the hazardous waste is authorized to be transported to an HHW facility [HSC 25218].

Violation Description: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated. Conduct daily visual inspections at least monthly. Maintain a log of inspection results for review by the CUPA.
Violation Notes: Returned to compliance on 03/09/2017. As evidenced by the amount of diesel and diesel residue in the secondary containment for the piping run between the emergency generator day tank and the emergency generator, the employees lack of knowledge regarding the leak, and the lack of notation in the inspection records regarding the diesel leak, the piping run is not being inspected during the facility's daily EGTS unburied piping inspections. Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: Returned to compliance on 03/09/2017. Wet diesel and significant amounts of diesel residue coat the entire bottom third of the secondary containment for the unburied fuel piping that runs from the emergency generator day tank to the generator itself. Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 04/10/2017. The facility's current practice is to rinse their 55 gallon drums that formerly contained a hazardous material (e.g. AC-200 Closed Loop Treatment, Brommax 7.1, BCP 1015) after use, dispose of the rinse waste to the sanitary sewer, and recycle/dispose of the drums. Rinsing containers that formerly held a hazardous material/waste constitutes "treatment" of hazardous waste as defined by HSC 25123.5(a) and cannot be conducted without authorization from HMCD. Immediately cease this treatment practice and properly dispose of the drums by either reconditioning, recycling, or reclaiming the drums for their scrap value on-site or shipping the container off-site, or by returning it to the supplier to be refilled [CCR 66261.7(f)]. Note that if being shipped off-site, the containers must be transported in accordance with US DOT Regulations. Otherwise, obtain a treatment permit from HMCD to continue to conduct this treatment practice.

Eval Notes: On site today to accompany State Water Resources Control Board (SWRCB) inspectors Tom Henderson and Rebecca Green as they performed an underground storage tank (UST) inspection as part of the SWRCB's Government-Owned Tanks initiative. Designated UST Operator Jim Ruble from Advanced Fuel Services, Inc. was on-site to provide access to the tank top sump and interstitial sensor riser. Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/15/2014. Mechanical overfill prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats and all other mechanical components and reinstalled in the tank fill opening today. No permit or other corrective action is required.

Mr. Courant held current ICC, Ronan and Franklin Fueling Systems certifications at the time of inspection. UST system is suction system for emergency generator with aboveground piping. The UST monitoring panel Ronan x76s has no printer. Audible and visual alarms noted when LS3 sensors located in the annular space and piping sump were tested in water. Spill bucket tested using the INCON Sump Test System (STS), passed 15-minute accelerated testing. Tank is fitted with ball float as overflow prevention and mechanical overflow (flapper valve) in the fuel drop tube. Sump dry and free of debris at the time of inspection. Aboveground piping is labeled with contents and flow direction.

Mr. Courant has current ICC UST Service Technician certification (exp. 8/9/2016) and Ronan X76 certification (exp. 9/20/2014). The Model LS3 sensors in the tank annular space and the tank top piping sump were tested using water to obtain audible and visual fuel alarms on the Ronan X76 monitoring panel. The UST fill spill bucket was hydrostatically tested using the Incon TS-STs accelerated hydrostatic test system. The bucket itself is liquid-tight, as confirmed by a test with the tank fill riser plugged, but the bucket drain valve had a slow leak. Valve was cleaned today and now seals liquid tight. Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/15/2014. Mechanical overfill prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Eval Type: Routine done by local agency
Eval Notes: Inspection conducted with Jon Blazo. Facility has the following reportable chemicals on-site: 500 gallon diesel fuel for back up generator Facility has two labs to prepare science demonstrations and activities for students. All chemicals are under reporting thresholds and include materials for flame tests, agar preparation, and basic endo and exothermic neutralization reactions involving baking soda and vinegar. Lab supervisors stated that no liquid wastes are created other than baking soda/vinegar combos and all biological agar/bacteria wastes are picked up by Stericycle. Facility was advised that while current wastes are likely non-hazardous, the raw materials (such as copper sulfate solutions for flame tests) would likely qualify as hazardous waste if they become expired or cannot be used for their current intended purposes. A hazardous waste generator's permit does not appear to be necessary at this time.

Site History: Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

 Potential Contaminants of Concern: Tetrachloroethylene (PCE), Diesel, Gasoline, Stoddard solvent / Mineral Spruits / Distillates, Total Petroleum Hydrocarbons (TPH)
 Site History: This case is associated with the following two cases: T10000008312 Expert Cleaners (Non-case) T0608502083 Griffin Property (closed) Case Closure/No Further Action: On January 20, 2016, the Regional Water Board required a site history report for Expert Cleaners located at the site address. The response received on January 26, 2016 indicated soil and groundwater investigations were conducted previously at the property under the case name Griffin property and a copy of the Regional Water Board case closure letter dated January 7, 2002 was provided. In April 2017, the Regional Water Board issued a rescission of the January 20, 2016 site history report request. See Expert Cleaners, Global ID # T10000008312, for the rescission letter. Site History: Expert Dry Cleaners operated at this site (724 South first street) for twenty years (1959-1979) . Orvill Griffin purchased the property (718 and 724 South First Street) in June 1979 and operated an auto parts and repair facility. The city of SJ Fire Dept required owner to remove the USTs (one gasoline and one stoddard solventand)

and associated piping (URF dated 08/29/1991). The owner discovered four more USTs during excavation. The owner removed all six USTs on July 9, 1991. The USTs are listed below: UST #1 1,500 Gallons diesel UST #2 250 Gallons stoddard solvent UST #3 500 Gallons stoddard solvent UST #4 250 Gallons stoddard solvent UST #5 100 Gallons stoddard solvent UST #6 200 Gallons stoddard solvent Approximately 600 tons of soil surrounding the USTs and beneath the former dry cleaner building was excavated and removed. The excavation was backfilled and the surface was paved for parking and storage. The main contaminants of concern detected in soil were TPHg, TPHd, and PCE. PCE or other VOCs were not detected in groundwater after USTs were removed in July 1991 and soil overexcavated in August 1991.

 Site History: The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground

level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

Site History:

The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegradation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled

Eval Notes: During today's underground storage tank repair inspection, a customer overfilled her car gas tank and spilled fuel on the pavement. Jonathan Ocker from Triton Construction cleaned up the spill using an absorbant pad. When the incident occurred, the only facility employee on-site was Tiffany Digiore, who had no idea how to respond to a spill and did not know if the facility has any hazardous waste containers. The saturated pad was given to Mr. Nguyen, who was called and arrived onsite in a short time. He placed the waste in a 55 gallon open head steel drum. Based on Mr. Nguyen's statements and multiple choice tests from Designated UST Operator (DUSTO) training, which were the only training records available at the facility, there were no personnel on-site today who have been trained within the past 12 months by the facility's DUSTO. Mr. Nguyen's last DUSTO test was dated 8/20/2015. Ms. Digiore's last DUSTO test was dated 7/30/2015. Neither the training video nor the used [Truncated]

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Based on information provided in the May 15, 2009, Quarterly Report #45, 2nd Quarter 2009 Discharge of Treated Groundwater to Storm Drain prepared by Western Geo-Engineers for the groundwater extraction and treatment system at the site; groundwater extraction commenced at the site in 1991, approximately 4 million gallons of groundwater have been treated, and approximately 37 gallons of TPHg have been removed. However, the system was shut down on May 7, 2009, due to the relatively low petroleum hydrocarbon mass removal rate; deactivation of the system was approved by SCCDEH in an April 21, 2009 letter. Groundwater sampling procedures consist of initially measuring and documenting the water level in the well and checking the well for the presence of separate-phase hydrocarbon (SPH) using an oil/water interface probe or a clear Teflon bailer. If the well did not contain SPH, it was purged a minimum of three casing volumes or until dry. During purging, well stabilization parameters (temperature, pH, and electrical conductivity) were monitored and recorded. After 80% recovery of the water level, groundwater samples were collected with a new disposable polyethylene bailer or pre-cleaned reusable Teflon

bailer and placed into the appropriate EPA-approved containers. Reusable sampling equipment was cleaned with trisodium phosphate solution and clean water between uses. The samples were labeled, logged onto chain-of-custody documents, and transported on ice to the laboratory using appropriate chain-of-custody documentation. Groundwater samples were submitted to a California state-certified laboratory, and analyzed for TPHg, benzene, toluene, ethylbenzene, xylenes (collectively BTEX), methyl tertiary butyl ether, and tertiary butanol EPA Method 8260B. The results of the current monitoring event indicate that since shut down of the groundwater extraction and treatment system, dissolved concentrations of petroleum hydrocarbons, MtBE and TBA remain relatively stable and/or within historic ranges, except at wells MW07 and MW08. Continued evaluation of the concentrations will be conducted during ensuing monitoring events; the next event is scheduled for the second half of 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

Potential Media Affected: Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor, Surface water

Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride, Other Petroleum

Site History: The area of the Site is approximately 13 acres, centered on Old West Julian Street, bounded on the west by the Guadalupe River, on the east by the Guadalupe Parkway (Route 87), on the north by the Union Pacific Railroad, and on the south by West Julian Street. The Site is under development by Sobrato Development Companies (SDC), the current owner. Two buildings and a parking structure have been completed. Construction on a third building was discontinued prior to completion due to economic reasons. FMC and predecessor companies occupied the Site from the early 1900s through 1986. Manufacturing operations, including production of agricultural machinery, food-processing equipment, and military tracked vehicles, occurred at the Site beginning in the early 1900s. Manufacturing operations at the Site ceased in 1986 and the facility was leased for warehousing and other storage purposes. In June 1998, FMC sold the property to SDC. FMC initiated environmental investigations at the Site in 1986. Soil sampling in former manufacturing and product storage areas revealed the presence of petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. Further investigations included the installation of groundwater monitoring wells that detected VOC constituents in two shallow water-bearing zones beneath the Site. Quarterly groundwater monitoring was conducted from the third quarter of 1989 through the first quarter of 2001. Semi-annual groundwater monitoring and reporting began in April 2001. On June 21, 1989, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Order Number 89-107, Site Cleanup Requirements for FMC Corporation-Ground Systems Division, 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 1989). On August 15, 1990, Order Number 90-122 (RWQCB, 1990) was adopted by the RWQCB, amending Order Number 89-107 with respect to the adoption of final Site cleanup levels. On January 21, 1998, Order Number 98-006 was adopted (RWQCB, 1998) for the Site, amending Orders 89-107 and 90-122 with respect to revising soil cleanup standards and adding additional tasks to protect groundwater and address risks associated with exposure to residual soil contamination. On March 21, 2001, Order No. 01-031, Final Site Cleanup Requirements and Rescission of Orders Nos. 89-107, 90-122, and 98-006 for FMC Corporation, for the property located at 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 2001) was adopted by the RWQCB. This annual compliance report is being submitted to the RWQCB as required by Order No. 01-031, Provision D.5. FMC implemented VOC source removal using a Soil Vapor Extraction system in the southwest portion of the Site from 1991 through March 1994. In addition, a groundwater extraction and treatment system for the A-level aquifer operated at the Site from March 1992 through January 1997, when it was discontinued due to changed groundwater flow directions, limited mass removal over time, and completion of effective source removal. Authorization to discontinue operation of the groundwater extraction and treatment system was given by the RWQCB in their letter to FMC, dated January 2, 1997 (RWQCB, 1997). The RWQCB documented the achievement of meeting the Site soil cleanup goals for chlorinated solvents in prior Order No. 98-006. FMC performed a natural attenuation evaluation in 2000 (HSI GeoTrans, 2000) to consider methods of remediating the residual VOCs present in Site groundwater. The evaluation concluded that VOC degradation could

be accelerated through the introduction of an electron donor that would enhance the biodegradation. Cheese whey was selected as the electron donor material, and, in accordance with Task C.2. of Order Number 01-031 and the Work Plan for In-Situ Bioremediation Using Cheese Whey Injection (Work Plan) dated May 30, 2001 (GeoTrans, 2001), cheese whey injection was conducted at ten Site monitoring wells and piezometers in July 2001 to enhance biodegradation of VOCs in groundwater. Additional cheese whey was injected at nine monitoring wells and piezometers in May 2003 to increase the in-situ reactive zone and further promote an environment for biodegradation. Groundwater sampling was conducted to evaluate the effectiveness of enhanced biodegradation on a monthly basis from September through December 2001, and on a semi-annual basis from March 2002 to March 2005. Discharger was urged to evaluate the site for case closure under the low threat closure criteria in February 2015.

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

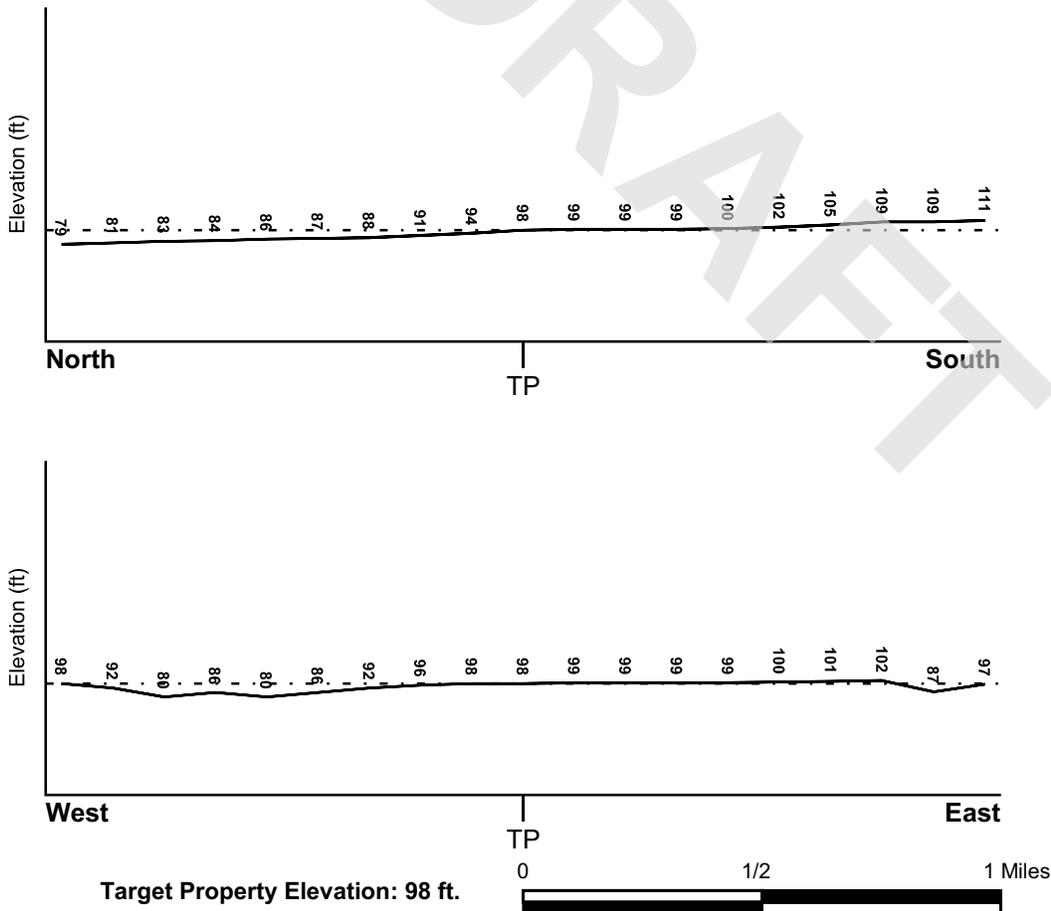

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

 - (a) resulting from the avoidance in whole or in part, or from a court order providing an alternative remedy, of any transfer of all or any part of the title to or any interest in the Land occurring prior to the transaction creating the lien of the Insured Mortgage because that prior transfer constituted a fraudulent or preferential transfer under federal bankruptcy, state insolvency, or similar creditors' rights laws; or

CONDITIONS

1. DEFINITION OF TERMS

The following terms when used in this policy mean:

(a) "Amount of Insurance": The amount stated in Schedule A, as may be increased or decreased by endorsement to this policy, increased by Section 8(b) or decreased by Section 10 of these Conditions.

(b) "Date of Policy": The date designated as "Date of Policy" in Schedule A.

(c) "Entity": A corporation, partnership, trust, limited liability company, or other similar legal entity.

(d) "Indebtedness": The obligation secured by the Insured Mortgage including one evidenced by electronic means authorized by law, and if that obligation is the payment of a debt, the Indebtedness is the sum of

(i) the amount of the principal disbursed as of Date of Policy;

(ii) the amount of the principal disbursed subsequent to Date of Policy;

(iii) the construction loan advances made subsequent to Date of Policy for the purpose of financing in whole or in part the construction of an improvement to the Land or related to the Land that the Insured was and continued to be obligated to advance at Date of Policy and at the date of the advance;

(iv) interest on the loan;

(v) the prepayment premiums, exit fees, and other similar fees or penalties allowed by law;

(vi) the expenses of foreclosure and any other costs of enforcement;

(vii) the amounts advanced to assure compliance with laws or to protect the lien or the priority of the lien of the Insured Mortgage before the acquisition of the estate or interest in the Title;

(viii) the amounts to pay taxes and insurance; and

(ix) the reasonable amounts expended to prevent deterioration of improvements; but the Indebtedness is reduced by the total of all payments and by any amount forgiven by an Insured.

(e) "Insured": The Insured named in Schedule A.

(i) The term "Insured" also includes

(A) the owner of the Indebtedness and each successor in ownership of the Indebtedness, whether the owner or successor owns the Indebtedness for its own account or as a trustee or other fiduciary, except a successor who is an obligor under the provisions of Section 12(c) of these Conditions;

(B) the person or Entity who has "control" of the "transferable record," if the Indebtedness is evidenced by a "transferable record," as these terms are defined by applicable electronic transactions law;

(C) successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization;

(D) successors to an Insured by its conversion to another kind of Entity;

(E) a grantee of an Insured under a deed delivered without payment of actual valuable consideration conveying the Title

(1) if the stock, shares, memberships, or other equity interests of the grantee are wholly-owned by the named Insured,

(2) if the grantee wholly owns the named Insured, or

(3) if the grantee is wholly-owned by an affiliated Entity of the named Insured, provided the affiliated Entity and the named Insured are both wholly-owned by the same person or Entity;

(F) any government agency or instrumentality that is an insurer or guarantor under an insurance contract or guaranty insuring or guaranteeing the Indebtedness secured by the Insured Mortgage, or any part of it, whether named as an Insured or not;

(ii) With regard to (A), (B), (C), (D), and (E) reserving, however, all rights and defenses as to any successor that the Company would have had against any predecessor Insured, unless the successor acquired the Indebtedness as a purchaser for value without Knowledge of the asserted defect, lien, encumbrance, or other matter insured against by this policy.

(f) "Insured Claimant": An Insured claiming loss or damage.

(g) "Insured Mortgage": The Mortgage described in paragraph 4 of Schedule A.

(h) "Knowledge" or "Known": Actual knowledge, not constructive knowledge or notice that may be imputed to an Insured by reason of the Public Records or any other records that impart constructive notice of matters affecting the Title.

(i) "Land": The land described in Schedule A, and affixed improvements that by law constitute real property. The term "Land" does not include any property beyond the lines of the area described in Schedule A, nor any right, title, interest, estate, or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways, but this does not modify or limit the extent that a right of access to and from the Land is insured by this policy.

(j) "Mortgage": Mortgage, deed of trust, trust deed, or other security instrument, including one evidenced by electronic means authorized by law.

(k) "Public Records": Records established under state statutes at Date of Policy for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without Knowledge. With respect to Covered Risk 5(d), "Public Records" shall also include environmental protection liens filed in the records of the clerk of the United States District Court for the district where the Land is located.

(l) "Title": The estate or interest described in Schedule A.

(m) "Unmarketable Title": Title affected by an alleged or apparent matter that would permit a prospective purchaser or lessee of the Title or lender on the Title or a prospective purchaser of the Insured Mortgage to be released from the obligation to purchase, lease, or lend if there is a contractual condition requiring the delivery of marketable title.

2. CONTINUATION OF INSURANCE

The coverage of this policy shall continue in force as of Date of Policy in favor of an Insured after acquisition of the Title by an Insured or after conveyance by an Insured, but only so long as the Insured retains an estate or interest in the Land, or holds an obligation secured by a purchase money Mortgage given by a purchaser from the Insured, or only so long as the Insured shall have liability by reason of warranties in any transfer or conveyance of the Title. This policy shall not continue in force in favor of any purchaser from the Insured of either (i) an estate or interest in the Land, or (ii) an obligation secured by a purchase money Mortgage given to the Insured.

3. NOTICE OF CLAIM TO BE GIVEN BY INSURED CLAIMANT

The Insured shall notify the Company promptly in writing (i) in case of any litigation as set forth in Section 5(a) of these Conditions, (ii) in case Knowledge shall come to an Insured of any claim of title or interest that is adverse to the Title or the lien of the Insured Mortgage, as insured, and that might cause loss or damage for which the Company may be liable by virtue of this policy, or (iii) if the Title or the lien of the Insured Mortgage, as insured, is rejected as Unmarketable Title. If the Company is prejudiced by the failure of the Insured Claimant to provide prompt notice, the Company's liability to the Insured Claimant under the policy shall be reduced to the extent of the prejudice.

4. PROOF OF LOSS

In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Insured Claimant furnish a

signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter insured against by this policy that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.

5. DEFENSE AND PROSECUTION OF ACTIONS

(a) Upon written request by the Insured, and subject to the options contained in Section 7 of these Conditions, the Company, at its own cost and without unreasonable delay, shall provide for the defense of an Insured in litigation in which any third party asserts a claim covered by this policy adverse to the Insured. This obligation is limited to only those stated causes of action alleging matters insured against by this policy. The Company shall have the right to select counsel of its choice (subject to the right of the Insured to object for reasonable cause) to represent the Insured as to those stated causes of action. It shall not be liable for and will not pay the fees of any other counsel. The Company will not pay any fees, costs, or expenses incurred by the Insured in the defense of those causes of action that allege matters not insured against by this policy.

(b) The Company shall have the right, in addition to the options contained in Section 7 of these Conditions, at its own cost, to institute and prosecute any action or proceeding or to do any other act that in its opinion may be necessary or desirable to establish the Title or the lien of the Insured Mortgage, as insured, or to prevent or reduce loss or damage to the Insured. The Company may take any appropriate action under the terms of this policy, whether or not it shall be liable to the Insured. The exercise of these rights shall not be an admission of liability or waiver of any provision of this policy. If the Company exercises its rights under this subsection, it must do so diligently.

(c) Whenever the Company brings an action or asserts a defense as required or permitted by this policy, the Company may pursue the litigation to a final determination by a court of competent jurisdiction, and it expressly reserves the right, in its sole discretion, to appeal from any adverse judgment or order.

6. DUTY OF INSURED CLAIMANT TO COOPERATE

(a) In all cases where this policy permits or requires the Company to prosecute or provide for the defense of any action or proceeding and any appeals, the Insured shall secure to the Company the right to so prosecute or provide defense in the action or proceeding, including the right to use, at its option, the name of the Insured for this purpose. Whenever requested by the Company, the Insured, at the Company's expense, shall give the Company all reasonable aid (i) in securing evidence, obtaining witnesses, prosecuting or defending the action or proceeding, or effecting settlement, and (ii) in any other lawful act that in the opinion of the Company may be necessary or desirable to establish the Title, the lien of the Insured Mortgage, or any other matter as insured. If the Company is prejudiced by the failure of the Insured to furnish the required cooperation, the Company's obligations to the Insured under the policy shall

terminate, including any liability or obligation to defend, prosecute, or continue any litigation, with regard to the matter or matters requiring such cooperation.

(b) The Company may reasonably require the Insured Claimant to submit to examination under oath by any authorized representative of the Company and to produce for examination, inspection, and copying, at such reasonable times and places as may be designated by the authorized representative of the Company, all records, in whatever medium maintained, including books, ledgers, checks, memoranda, correspondence, reports, e-mails, disks, tapes, and videos whether bearing a date before or after Date of Policy, that reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Insured Claimant shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect, and copy all of these records in the custody or control of a third party that reasonably pertain to the loss or damage. All information designated as confidential by the Insured Claimant provided to the Company pursuant to this Section shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Insured Claimant to submit for examination under oath, produce any reasonably requested information, or grant permission to secure reasonably necessary information from third parties as required in this subsection, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this policy as to that claim.

7. OPTIONS TO PAY OR OTHERWISE SETTLE CLAIMS; TERMINATION OF LIABILITY

In case of a claim under this policy, the Company shall have the following additional options:

(a) **To Pay or Tender Payment of the Amount of Insurance or to Purchase the Indebtedness.**

(i) To pay or tender payment of the Amount of Insurance under this policy together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay; or

(ii) To purchase the Indebtedness for the amount of the Indebtedness on the date of purchase, together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of purchase and that the Company is obligated to pay.

When the Company purchases the Indebtedness, the Insured shall transfer, assign, and convey to the Company the Indebtedness and the Insured Mortgage, together with any collateral security.

Upon the exercise by the Company of either of the options provided for in subsections (a)(i) or (ii), all liability and obligations of the Company to the Insured under this policy, other than to make the payment required in those subsections, shall

terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

(b) To Pay or Otherwise Settle With Parties Other Than the Insured or With the Insured Claimant.

(i) to pay or otherwise settle with other parties for or in the name of an Insured Claimant any claim insured against under this policy. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay; or

(ii) to pay or otherwise settle with the Insured Claimant the loss or damage provided for under this policy, together with any costs, attorneys' fees, and expenses incurred by the Insured Claimant that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in subsections (b)(i) or (ii), the Company's obligations to the Insured under this policy for the claimed loss or damage, other than the payments required to be made, shall terminate, including any liability or obligation to defend, prosecute, or continue any litigation.

8. DETERMINATION AND EXTENT OF LIABILITY

This policy is a contract of indemnity against actual monetary loss or damage sustained or incurred by the Insured Claimant who has suffered loss or damage by reason of matters insured against by this policy.

(a) The extent of liability of the Company for loss or damage under this policy shall not exceed the least of

(i) the Amount of Insurance,

(ii) the Indebtedness,

(iii) the difference between the value of the Title as insured and the value of the Title subject to the risk insured against by this policy, or

(iv) if a government agency or instrumentality is the Insured Claimant, the amount it paid in the acquisition of the Title or the Insured Mortgage in satisfaction of its insurance contract or guaranty.

(b) If the Company pursues its rights under Section 5 of these Conditions and is unsuccessful in establishing the Title or the lien of the Insured Mortgage, as insured,

(i) the Amount of Insurance shall be increased by 10%, and

(ii) the Insured Claimant shall have the right to have the loss or damage determined either as of the date the claim was made by the Insured Claimant or as of the date it is settled and paid.

(c) In the event the Insured has acquired the Title in the manner described in Section 2 of these Conditions or has conveyed the Title, then the extent of liability of the Company shall continue as set forth in Section 8(a) of these Conditions.

(d) In addition to the extent of liability under (a), (b), and (c), the Company will also pay those costs, attorneys' fees, and expenses incurred in accordance with Sections 5 and 7 of these Conditions.

9. LIMITATION OF LIABILITY

(a) If the Company establishes the Title, or removes the alleged defect, lien or encumbrance, or cures the lack of a right of access to or from the Land, or cures the claim of Unmarketable Title, or establishes the lien of the Insured Mortgage, all as insured, in a reasonably diligent manner by any method, including litigation and the completion of any appeals, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused to the Insured.

(b) In the event of any litigation, including litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals, adverse to the Title or to the lien of the Insured Mortgage, as insured.

(c) The Company shall not be liable for loss or damage to the Insured for liability voluntarily assumed by the Insured in settling any claim or suit without the prior written consent of the Company.

10. REDUCTION OF INSURANCE; REDUCTION OR TERMINATION OF LIABILITY

(a) All payments under this policy, except payments made for costs, attorneys' fees, and expenses, shall reduce the Amount of Insurance by the amount of the payment. However, any payments made prior to the acquisition of Title as provided in Section 2 of these Conditions shall not reduce the Amount of Insurance afforded under this policy except to the extent that the payments reduce the Indebtedness.

(b) The voluntary satisfaction or release of the Insured Mortgage shall terminate all liability of the Company except as provided in Section 2 of these Conditions.

11. PAYMENT OF LOSS

When liability and the extent of loss or damage have been definitely fixed in accordance with these Conditions, the payment shall be made within 30 days.

12. RIGHTS OF RECOVERY UPON PAYMENT OR SETTLEMENT

(a) The Company's Right to Recover

Whenever the Company shall have settled and paid a claim under this policy, it shall be subrogated and entitled to the rights of the Insured Claimant in the Title or Insured Mortgage and all other rights and remedies in respect to the claim that the Insured Claimant has against any person or property, to the extent of the amount of any loss, costs, attorneys' fees, and expenses paid by the Company. If requested by the Company, the Insured Claimant shall execute documents to evidence the transfer to the Company of these rights and remedies. The Insured Claimant shall permit the Company to sue, compromise, or settle in the name of the Insured Claimant and to use the name of the Insured Claimant in any transaction or litigation involving these rights and remedies.

If a payment on account of a claim does not fully cover the loss of the Insured Claimant, the Company shall defer the exercise of its right to recover until after the Insured Claimant shall have recovered its loss.

(b) The Insured's Rights and Limitations

(i) The owner of the Indebtedness may release or substitute the personal liability of any debtor or guarantor, extend or otherwise modify the terms of payment, release a portion of the Title from the lien of the Insured Mortgage, or release any collateral security for the Indebtedness, if it does not affect the enforceability or priority of the lien of the Insured Mortgage.

(ii) If the Insured exercises a right provided in (b)(i), but has Knowledge of any claim adverse to the Title or the lien of the Insured Mortgage insured against by this policy, the Company shall be required to pay only that part of any losses insured against by this policy that shall exceed the amount, if any, lost to the Company by reason of the impairment by the Insured Claimant of the Company's right of subrogation.

(c) The Company's Rights Against Noninsured Obligors

The Company's right of subrogation includes the Insured's rights against noninsured obligors including the rights of the Insured to indemnities, guaranties, other policies of insurance, or bonds, notwithstanding any terms or conditions contained in those instruments that address subrogation rights.

The Company's right of subrogation shall not be avoided by acquisition of the Insured Mortgage by an obligor (except an obligor described in Section 1(e)(i)(F) of these Conditions) who acquires the Insured Mortgage as a result of an indemnity, guaranty, other policy of insurance, or bond, and the obligor will not be an Insured under this policy.

13. ARBITRATION

Either the Company or the Insured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons.

Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Insured arising out of or relating to this policy, any service in connection with its issuance or the breach of a policy provision, or to any other controversy or claim arising out of the transaction giving rise to this policy. All arbitrable matters when the Amount of Insurance is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Insured. All arbitrable matters when the Amount of Insurance is in excess of \$2,000,000 shall be arbitrated only when agreed to by both the Company and the Insured. Arbitration pursuant to this policy and under the Rules shall be binding upon the parties. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

14. LIABILITY LIMITED TO THIS POLICY; POLICY ENTIRE CONTRACT

(a) This policy together with all endorsements, if any, attached to it by the Company is the entire policy and contract between the Insured and the Company. In interpreting any provision of this policy, this policy shall be construed as a whole.

(b) Any claim of loss or damage that arises out of the status of the Title or lien of the Insured

Mortgage or by any action asserting such claim shall be restricted to this policy.

(c) Any amendment of or endorsement to this policy must be in writing and authenticated by an authorized person, or expressly incorporated by Schedule A of this policy.

(d) Each endorsement to this policy issued at any time is made a part of this policy and is subject to all of its terms and provisions. Except as the endorsement expressly states, it does not (i) modify any of the terms and provisions of the policy, (ii) modify any prior endorsement, (iii) extend the Date of Policy, or (iv) increase the Amount of Insurance.

15. SEVERABILITY

In the event any provision of this policy, in whole or in part, is held invalid or unenforceable

under applicable law, the policy shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

16. CHOICE OF LAW; FORUM

(a) Choice of Law: The Insured acknowledges the Company has underwritten the risks covered by this policy and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of policies of title insurance of the jurisdiction where the Land is located.

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims against the Title or the lien of the Insured Mortgage that are

adverse to the Insured and to interpret and enforce the terms of this policy. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

(b) Choice of Forum: Any litigation or other proceeding brought by the Insured against the Company must be filed only in a state or federal court within the United States of America or its territories having appropriate jurisdiction.

17. NOTICES, WHERE SENT

Any notice of claim and any other notice or statement in writing required to be given to the Company under this policy must be given to the Company at Chicago Title Insurance Company, Attn: Claims Department, Post Office Box 45023, Jacksonville, Florida 32232-5023.
