## ENVIRONMENTAL PROFESSIONALS' STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as established in Part 312.10 of Title 40 of the Code of Federal Regulations (40 CFR 312.10) and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Name Scott Allin, R.E.P.A.  
Title Principal Environmental Scientist

## EXECUTIVE SUMMARY

Farallon Consulting, L.L.C. (Farallon) has prepared this Phase I Environmental Site Assessment (Phase I ESA) Report for the property at 550 East Brokaw Road in San Jose, California (herein referred to as the Site). The Phase I ESA was conducted by Ms. Steffany Loeb and reviewed and approved by Mr. Scott Allin. Mr. Allin is an experienced Environmental Professionals in the field of Phase I ESAs and related environmental investigations.

This Phase I ESA Report was prepared for Caracol, LTD L.P. in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, 550 East Brokaw Road, San Jose, California dated January 14, 2020, from Messrs. Gavin Polite Fisco and Makdisi of Farallon to Mr. Pete Beritzhoff of Caracol, LTD L.P. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13). ASTM E1527-13 is intended to assist the user in satisfying one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

There were no deviations from ASTM E1527-13 during this Phase I ESA. Limiting conditions encountered during the Phase I ESA were the presence of vehicles parked on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site buildings that prevented Farallon from observing the entire interior floor surface. Farallon was not provided access to all portions of all tenant spaces. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on the Site or proximate to the Site that have caused and/or may cause an adverse environmental condition. This Phase I ESA Report provides the results of investigation into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice.

The Site consists of Santa Clara County Parcel No. 237-08-079, which totals approximately 19.701 acres of land developed with a two-story retail store and office building totaling approximately 283,200 square feet constructed in approximately 1967, with additional development in 1984. Two hydraulic elevators service the northern office portion of the Site building. Remaining areas of the Site consist of paved parking and landscaped areas. An empty 300,000-gallon water aboveground storage tank (AST) is on the northeastern portion of the paved parking area. Access to the Site is gained from East Brokaw Road, north of the Site, and Junction Avenue, west of the Site.

At the time of Farallon's site reconnaissance, the southeastern portion of the Site was occupied by a one-story Fry's Electronics retail store, and the northwestern portion by the two-story Fry's Electronics home office (i.e., headquarters) and the American Institute of Mathematics, which subleases a portion of the home office space. The southeastern portion of the Site was used as paved parking area for the retail store. Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from vehicles on the Site and surrounding the battery charging stations inside the Site building. Minor amounts of hazardous materials, including janitorial cleaning supplies, propane tanks, small quantity freon tanks, and building maintenance-related products, were observed to be properly labeled and stored in designated areas of the Site building. Three diesel ASTs associated with emergency generators were present on the western portion of the Site. No evidence of releases was observed in or around the containers or ASTs at the time of the site reconnaissance. Farallon observed damaged ceiling panels on the floor on the second story of the Site building, which indicated the potential for water intrusion.

Historically, the Site appeared to be undeveloped or developed for agricultural use from at least the late 1880s through at least the 1960s. The retail store portion of the Site building was developed in 1967, at which time the 300,000-gallon water AST on the southeastern portion of the paved parking area was installed for fire suppression purposes. The office portion on the second story of the Site building was added in 1984. Between 1993 and 1997, the paved parking area on the southeastern portion of the Site appeared graded. City directory listings for the Site addresses consisted of commercial businesses, including Levis Straus and Company from 1967 through 1976, TeleVideo Systems from 1987 to 1996, and Fry's Electronics from 2002 through the present. The potential presence of soil containing residual agricultural chemicals from historical agricultural use is considered a de minimis condition under the Site's current commercial use. Any soil exported from the Site may require evaluation.

Farallon was provided with the *Phase I Environmental Site Assessment at 550 East Brokaw Road, San Jose, California* dated January 20, 1995, prepared for the Site by Clayton Environmental Consultants (1995 Phase I Report); the *Limited Environmental Site Assessment, 550 600 East Brokaw Road, San Jose, California* dated December 17, 1997, prepared for the Site by C&C Environmental Group (1997 Phase I Report); and the *Phase I Environmental Site Assessment Report, 550 and 600 East Brokaw Road, San Jose, California* dated November 1, 2019, prepared for the Site by Farallon (2019 Phase I Report). The Site layout described in the 1995 Phase I Report was similar to that of the present; the occupant at the time was TeleVideo, a computer hardware company. The 1995 Phase I Report identified potential contamination associated with four adjacent properties with known leaking underground storage tanks (USTs) within 0.125 mile of the Site, hazardous materials storage, lead contamination associated with a wave solder machine, two diesel ASTs, and asbestos-containing materials used in building construction as recognized environmental conditions in connection with the Site. The wave solder machine was identified as a recognized environmental condition due to observed stains from a release of flux through the machine's duct wrapping. The Site layout and use described in the 1997 Phase I Report were also similar to those of the present, with the exception of a new vinyl floor tile covering the area where the former wave solder machine had been located. The 1997 Phase I Report did not identify recognized environmental conditions in connection with the Site and recommended an operations and maintenance program be developed based on the historical identification of suspect asbestos-

containing materials. Based on the described conditions and findings in the 1997 Phase I Report, former staining associated with the wave solder machine is considered a de minimis condition in connection with the Site. Findings for this Phase I ESA are consistent with findings from the 2019 Phase I Report.

Adjacent properties at the time of Farallon's site reconnaissance included commercial buildings to the north, a truck dealer to the northeast, a self-storage facility and commercial building to the south, and a tire shop and commercial buildings to the west. Interstate 880 is directly adjacent to the southeastern portion of the Site.

Historically, adjacent properties appeared to be undeveloped or developed for agricultural use from at least the late 1880s. According to aerial photographs reviewed, a farm associated with the agricultural land use was apparent northeast of the Site from at least the late 1930s through the late 1960s. The southeast-adjacent Interstate 880 appeared developed between 1948 and 1956. Commercial development at adjacent properties began in the 1960s and commercial infill continued until approximately 2005, when adjacent properties appeared similar to the present. City directory listings for adjacent properties consisted of commercial businesses, including Mission Valley Ford Truck Sales, America's Tire Co., Central U Storage, and home improvement stores.

The Environmental Risk Information Services (ERIS) *Database Report* prepared for the Site dated January 20, 2020 (ERIS Report) identified the Site addresses in several databases. The Site was identified as disposing of hazardous materials and as having three diesel ASTs associated with emergency generators at the Site, with no reported violations. Based on the information provided in the ERIS Report and the lack of current regulatory requirements applicable to the Site, these listings do not represent a recognized environmental condition in connection with the Site.

The ERIS Report identified adjacent facilities in several databases, including Velcon Filters at 1761 Junction Avenue, approximately 0.04 mile southwest of the Site and up-gradient with respect to the assumed groundwater flow direction. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste with permitted air emissions, several administrative violations, and several violations related to soil and groundwater contamination. According to the ERIS Report and the California State Water Resources Control Board online GeoTracker database (GeoTracker database), the facility operated as a fuel filter manufacturer for jet aircraft from the 1960s to 1993. Below are dates and listed incidents:

- The facility operated one 6,000-gallon and five 10,000-gallon jet fuel USTs during its operation from 1960 to 1993.
- Two large-volume releases from the USTs (7,000 and 4,000 gallons, respectively) were documented in 1975 and 1976.
- The USTs, a 500-gallon wastewater sump, and several ASTs and associated piping were removed from the facility between 1961 and 1994.
- Several spills were reported at the facility in the 1970s. The contaminants of concern at the facility include jet fuel and chlorinated solvents, including trichloroethene and its breakdown products.

- Investigation and remediation activities, including removal of ASTs and USTs, over-excavation of soil, a groundwater pump-and-treat system, dual-phase soil vapor and groundwater extraction, and ozone and enhanced in-situ bioremediation injections, were conducted between 1993 and 2016.
- A land use covenant dated April 26, 2011 was created that restricted future residential land use at the facility and several adjacent properties based on residual concentrations of chlorinated solvents left in-place.

Farallon's review of groundwater data for the property on the GeoTracker database indicates any potential chemical impact to groundwater beneath the Site would be de minimis. Based on the information provided in the ERIS Report and GeoTracker database, its current regulatory status, and the low residual concentrations of contaminants left in-place, this facility represents a de minimis condition in connection with the Site.

As part of this Phase I ESA, Farallon searched the California Department of Toxic Substances Control online EnviroStor database for records related to the Site but found no listings.

Based on review of the Site history, interviews with persons knowledgeable about the Site, reconnaissance of the Site and adjacent properties, and review of regulatory agency lists, this Phase I ESA did not identify recognized environmental conditions in connection with the Site.

## **1.0 INTRODUCTION**

This Phase I Environmental Site Assessment (Phase I ESA) Report was prepared by Farallon Consulting, L.L.C. (Farallon) for the property at 550 East Brokaw Road in San Jose, California (herein referred to as the Site) (Figure 1). This section discusses the project authorization, and the qualifications of the Environmental Professionals conducting and reviewing the Phase I ESA work. Also included in this section are the project purpose, objective, scope of services, deviations, limiting conditions, and data gaps.

### **1.1 PROJECT AUTHORIZATION**

This Phase I ESA Report was prepared for Caracol, LTD L.P. in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, 550 East Brokaw Road dated January 14, 2020, from Messrs. Gavin Polite Fisco and Richard Makdisi of Farallon to Mr. Pete Beritzhoff of Caracol, LTD L.P. The scope of work for this Phase I ESA is consistent with ASTM International Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13).

### **1.2 PROFESSIONAL QUALIFICATIONS**

The Phase I ESA was conducted by Ms. Steffany Loeb and reviewed and approved by Mr. Scott Allin. Mr. Allin has an understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions, and the ability to develop opinions regarding conditions indicative of a release or threatened release of hazardous substances and petroleum products. These Environmental Professionals have developed and performed all appropriate inquiry, in conformance with the standards and practices set forth in Part 312 of Title 40 of the Code of Federal Regulations. The professional qualifications of Mr. Allin are provided in Appendix A.

### **1.3 PROJECT PURPOSE AND OBJECTIVE**

The purpose of the Phase I ESA was to identify, as practicable, recognized environmental conditions on the Site and within the appropriate study area that have caused and/or may cause an adverse environmental impact. ASTM E1527-13 is intended to permit a user to satisfy one of the requirements to qualify for protection from potential liability under the Comprehensive Environmental Response, Compensation, and Liability Act as the innocent landowner, contiguous property owner, or bona fide prospective purchaser. ASTM E1527-13 constitutes “all appropriate inquiry” into the previous ownership, uses, and environmental conditions of a property consistent with good commercial or customary practice, as defined in Section 9601(35)(B) of Title 42 of the U.S. Code.

The objective of the Phase I ESA was to perform an appropriate inquiry into past and present ownership and uses of the Site, consistent with good commercial and/or customary practice. This Phase I ESA Report is to be used as a risk management tool to meet all appropriate inquiry

requirements and the Comprehensive Environmental Response, Compensation, and Liability Act liability defense. The Phase I ESA does not guarantee that there are no impacts to the Site.

For the purpose of this Phase I ESA Report, the term “recognized environmental condition” is defined as the presence or likely presence of any hazardous substance or petroleum product in, on, or at the Site due to releases to the environment, under conditions indicative of a release to the environment, or under conditions that pose a material threat of a future release to the environment. The term is not intended to include “de minimis conditions” that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the applicable governmental agencies.

The term “controlled recognized environmental condition” is defined as a recognized environmental condition resulting from a past release of a hazardous substance or petroleum product that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in-place subject to implementation of required controls.

The term “historical recognized environmental condition” is defined as a past release of any hazardous substance or petroleum product that has occurred in connection with the Site and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the Site to any required controls.

#### **1.4 PROJECT SCOPE OF SERVICES**

This Phase I ESA Report was prepared for Caracol, LTD L.P. in accordance with the letter regarding Proposal for Phase I Environmental Site Assessment, 550 East Brokaw Road dated January 14, 2020, from Messrs. Gavin Polite Fisco and Makdisi of Farallon to Mr. Beritzhoff of Caracol, LTD L.P. The scope of work for this Phase I ESA included a records review, literature research and review, a site reconnaissance, interviews with individuals familiar with the Site, interviews with local governmental officials, and preparation of this report.

#### **1.5 DEVIATIONS**

There were no deviations from ASTM E1527-13 during this Phase I ESA.

#### **1.6 LIMITING CONDITIONS**

Limiting conditions encountered during this Phase I ESA were the presence of vehicles parked on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site buildings that prevented Farallon from observing the entire interior floor surface. Farallon was not provided access to all tenant portions of all tenant spaces. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

## **1.7 DATA GAPS**

Data gaps may affect the ability to identify recognized environmental conditions and Farallon's ability to render opinions and conclusions for presentation in the Phase I ESA Report. Farallon did not identify significant data gaps during this Phase I ESA.

## **2.0 SITE OVERVIEW**

This section includes an overview of the Site location, improvements, and operations. A description of adjacent and surrounding land use also is provided.

### **2.1 SITE LOCATION**

The Site is at the intersection of East Brokaw Road and Junction Avenue in San Jose, Santa Clara County, California (Figure 1). The location is in a commercial area approximately 3.25 miles north of downtown San Jose with the nearest residential community approximately 0.3 mile east of the Site. The Site vicinity is shown on Figure 1.

### **2.2 SITE DESCRIPTION**

The Site consists of Santa Clara County Parcel No. 237-08-079, which totals approximately 19.701 acres of land developed with a two-story retail store and office building totaling approximately 283,200 square feet constructed in approximately 1967, with additional development in 1984. Two hydraulic elevators service the northern office portion of the Site building. Remaining areas of the Site consist of paved parking and landscaped areas. An empty 300,000-gallon water aboveground storage tank (AST) is on the northeastern portion of the paved parking area. Access to the Site is gained from East Brokaw Road, north of the Site, and Junction Avenue, west of the Site.

Figure 2 presents a plan map of the Site. Additional details pertaining to the Site are provided in Section 8.2, Site Reconnaissance Observations. Site photographs are presented in Appendix B.

### **2.3 SITE OPERATIONS**

According to the Santa Clara County Assessor's Office, the Site owner is Caracol LTD LP. At the time of Farallon's site reconnaissance, the southeastern portion of the Site building was occupied by a one-story Fry's Electronics retail store, and the northwestern portion by the two-story Fry's Electronics home office (i.e., headquarters) and the American Institute of Mathematics, which subleases a portion of the home office space. The southeastern portion of the Site was used as paved parking area for the retail store. A Site plan depicting the Site boundary and current features is provided as Figure 2.

### **2.4 ADJACENT AND SURROUNDING LAND USE**

Adjacent properties at the time of Farallon's site reconnaissance included commercial buildings to the north, a truck dealer to the northeast, a self-storage facility and commercial building to the south, and a tire shop and commercial buildings to the west. Interstate 880 is directly adjacent to the southeastern portion of the Site.

No visual evidence of recognized environmental conditions was observed on abutting or nearby properties during the site reconnaissance. Observations were restricted to areas readily observable from the Site.

## 3.0 PHYSICAL SETTING

The physical setting of the Site, including topography, geology, and hydrogeology, is described in this section. Farallon's assessment of sensitive receptors in the area also is discussed.

### 3.1 TOPOGRAPHY

Farallon reviewed the U.S. Geological Survey topographic map for Milpitas, California dated October 2, 2019 provided by Environmental Risk Information Services (ERIS). The map depicts the Site at an elevation of approximately 50 feet above mean sea level. The Site topography is relatively flat. Regional topography is generally flat, with a slight slope down to the northeast.

### 3.2 GEOLOGY AND HYDROGEOLOGY

The Site is in the Santa Clara Valley, a northwest-trending structural depression in the Coast Ranges Geomorphic Province area of California. The Santa Clara Valley is characterized by Quaternary-age alluvium and marine deposits overlaying the Jurassic- through Cretaceous-age Franciscan assemblage. The Santa Clara Groundwater Basin is the main water-bearing unit in the region. Due to various depositional environments, groundwater-bearing units are not generally continuous throughout the Santa Clara Valley and may be semi-confined in areas. According to the ERIS *Physical Setting Report* prepared for the Site dated October 3, 2019 (ERIS PSR), surface soil at the Site consists of Urban land-Elder complex, which consists primarily of fine sandy loam.

Shallow groundwater flow direction typically can be estimated by examination of surface topography or by nearby surface water bodies. Based on the topography of the Site and its vicinity, groundwater is expected to flow to the northeast toward Coyote Creek. Based on prior assessments of properties proximate to the Site obtained from the California State Water Resource Control Board GeoTracker database (GeoTracker database), groundwater has been documented to flow to the northwest (according to Velcon groundwater investigation data) and is encountered at depths between 10 and 15 feet below ground surface.

### 3.3 OIL AND GAS RECORDS

According to the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources Well Finder online database, there are no permitted oil or gas wells on the Site or adjacent properties.

### 3.4 SENSITIVE RECEPTORS

Farallon conducted a limited assessment of sensitive receptors on or in the vicinity of the Site that was confined to visually apparent features such as surface water bodies (e.g., low-lying wet areas, streams, ponds) and residential and recreational areas. Farallon's assessment of sensitive receptors included a review of readily ascertainable information relating to the presence of private, semiprivate, public, and industrial water supply wells.

According to the ERIS PSR, the western portion of the Site is in a 500-year flood plain and the eastern portion of the Site is in an area of undetermined flood hazards. According to the ERIS Report, wetlands are not present on the Site. The federally designated wetlands nearest the Site are more than 100 feet from the northeastern Site boundary. The main water bodies nearest the Site are Coyote Creek 0.1 mile east of the Site and the Guadalupe River 1.2 miles west of the Site. Four municipal water supply wells were identified approximately 0.5 mile north of the Site.

## **4.0 USER-PROVIDED INFORMATION**

Farallon understands that the user of this report, Caracol, LTD L.P., is seeking to follow the standards set forth in ASTM E1527-13 to complete an environmental assessment of the Site. The user has specific responsibilities for fulfilling ASTM E1527-13 requirements to help identify the possibility of recognized environmental conditions in connection with the Site. These responsibilities do not require the technical expertise of an Environmental Professional and were not performed by the Environmental Professional who conducted the Phase I ESA at the Site.

To facilitate fulfillment of the ASTM E1527-13 requirements identified below, Farallon provided Caracol, LTD L.P. with a copy of the *Phase I ESA User Questionnaire* (User Questionnaire) to complete. The User Questionnaire is provided in Appendix C of this Phase I ESA Report.

### **4.1 TITLE AND LIEN RECORDS**

Caracol, LTD L.P. indicated that it was not aware of environmental liens against the Site.

### **4.2 EXPERIENCE AND SPECIALIZED KNOWLEDGE**

Caracol, LTD L.P. indicated that it has no experience or specialized knowledge regarding the Site.

### **4.3 COMMONLY KNOWN INFORMATION**

Caracol, LTD L.P. indicated that it is not aware of commonly known information that would lead to identification of recognized environmental conditions in connection with the Site.

### **4.4 PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT USERS**

Caracol, LTD L.P. will rely on this Phase I ESA Report.

### **4.5 PREVIOUS ENVIRONMENTAL STUDIES**

Farallon was provided with the *Phase I Environmental Site Assessment at 550 East Brokaw Road, San Jose, California* dated January 20, 1995, prepared for the Site by Clayton Environmental Consultants (1995 Phase I Report); the *Limited Environmental Site Assessment, 550 600 East Brokaw Road, San Jose, California* dated December 17, 1997, prepared for the Site by C&C Environmental Group (1997 Phase I Report); and the *Phase I Environmental Site Assessment Report, 550 and 600 East Brokaw Road San Jose, California* dated November 1, 2019, prepared for the Site by Farallon Consulting, L.L.C (2019 Phase I Report).

The Site layout described in the 1995 Phase I Report was similar to that of the present; the occupant at the time was TeleVideo, a computer hardware company. The 1995 Phase I Report identified potential contamination associated with four adjacent properties with known leaking underground storage tanks (USTs) within 0.125 mile of the Site, hazardous materials storage, lead contamination associated with a wave solder machine, two diesel ASTs, and asbestos-containing

materials used in building construction as recognized environmental conditions in connection with the Site. The wave solder machine was identified as a recognized environmental condition due to observed stains from a release of flux through the machine's duct wrapping.

The Site layout and use described in the 1997 Phase I Report were also similar to those of the present, with the exception of a new vinyl floor tile covering the area where the former wave solder machine had been located. The 1997 Phase I Report did not identify recognized environmental conditions in connection with the Site and recommended an operations and maintenance program be developed based on the historical identification of asbestos-containing materials. Based on the described conditions and findings in the 1997 Phase I Report, former staining associated with the wave solder machine is considered a de minimis condition in connection with the Site.

The Site layout and use described in the 2019 Phase I Report is similar to those of the present. The 2019 Phase I Report did not identify recognized environmental conditions in connection with the Site.

## 5.0 SITE BACKGROUND AND HISTORY

Farallon reviewed the following historical sources as part of this Phase I ESA:

- Aerial photographs of the San Jose, California area dated 1939, 1948, 1956, 1960, 1968, 1974, 1982, 1993, 2005, 2006, 2009, 2010, 2012, 2014, 2016, and 2018 obtained from ERIS; and dated 1993, 1999, 2000, 2002 through 2007, and 2009 through 2019 obtained from Google Earth;
- Street Address, Haines, Polks, and Digital Business Directories of San Jose, California dated 1925, 1930, 1935, 1940, 1945, 1950, 1955, 1961, 1966, 1971, 1976, 1981, 1987, 1990, 1991, 1995, 1996, 1998, 2002, 2006, 2010, 2014, and 2018 obtained from ERIS; and
- U.S. Geological Survey topographic maps of San Jose, California dated 1889, 1897, 1899, 1953, and 1961; and of Milpitas, California dated 1953, 1961, 1968, 1973, 1980, and 2015 obtained from ERIS.

A search for fire insurance maps resulted in notification that there was no coverage for the Site.

Farallon is not responsible for the accuracy or completeness of the historical sources reviewed. The historical sources documented were reasonably ascertainable and practically reviewable during this Phase I ESA.

### 5.1 SITE

Historically, the Site appeared to be undeveloped or developed for agricultural use from at least the late 1880s through at least the 1960s. The retail store portion of the Site building was developed in 1967, at which time the 300,000-gallon water AST on the southeastern portion of the paved parking area was installed for fire suppression purposes. The office portion on the second story of the Site building was added in 1984. Between 1993 and 1997, the paved parking area on the southeastern portion of the Site appeared graded. City directory listings for the Site addresses consisted of commercial businesses, including Levis Straus and Company from 1967 through 1976, TeleVideo Systems from 1987 to 1996, and Fry's Electronics from 2002 through the present. The potential presence of soil containing residual agricultural chemicals from historical agricultural use is considered a de minimis condition under the Site's current commercial use. Any soil exported from the Site may require evaluation.

Additional information regarding the Site history is provided in Section 6.1, On-Site Listings, and Section 7.2, Interview with the Fire Department.

### 5.2 ADJACENT PROPERTIES

Historically, adjacent properties appeared to be undeveloped or developed for agricultural use from at least the late 1880s. A farm associated with the agricultural land use was apparent northeast of the Site from at last the late 1930s through the late 1960s. The southeast-adjacent Interstate 880 appeared developed between 1948 and 1956. Commercial development at adjacent properties

began in the 1960s and commercial infill continued until approximately 2005, when adjacent properties appeared similar to the present. City directory listings for adjacent properties consisted of commercial businesses, including Mission Valley Ford Truck Sales, America's Tire Co., Central U Storage, and home improvement stores.

## 6.0 REGULATORY REVIEW

ERIS conducted a review of environmental regulatory agency database listings to identify reported environmental issues related to the Site and facilities in the Site vicinity. Farallon used the greater of each approximate minimum search distance from the Site for each of the referenced federal and state environmental databases, as specified in ASTM E1527-13.

Farallon reviewed the results from the ERIS *Database Report* prepared for the Site dated January 20, 2020 (ERIS Report) to note reported facilities in the vicinity of the Site that were considered to have a potential to adversely impact the Site (i.e., are known to have resulted in or are expected to result in a recognized environmental condition). Reported facilities identified in the ERIS Report were evaluated with respect to the nature and extent of a given release, the distance of the reported facility from the Site, the stratigraphy of soil, the expected soil permeability, and the location of a reported facility with respect to known or expected local and/or regional groundwater flow direction.

The descriptions of the databases searched, the complete database names for the abbreviations used in this Phase I ESA Report, and the associated search distances from the Site are provided in the ERIS Report presented in Appendix D.

### 6.1 ON-SITE LISTINGS

**Fry's Electronics**, located on the Site at 600 East Brokaw Road, was identified in the CERS HAZ, SANTA CLARA CUPA, FINDS/FRS, SANJOSE HM, ICIS, and HAZNET databases. According to the ERIS Report, the facility was a generator and handler of hazardous materials, including alkaline solution without metals, oil-containing waste, and other organic solids, with no reported violations as of 2017. Three diesel ASTs with 250-, 700-, and 800-gallon capacities were identified on the western portion on the Site, with no reported violations as of 2017. Based on the information provided in the ERIS Report and its current regulatory status, these listings do not represent a recognized environmental condition in connection with the Site.

**550 E Brokaw Road**, located on the Site, was identified in the FINDS/FRS, HIST MANIFEST, HAZNET, and RCRA SQG databases. According to the ERIS Report, the facility was a generator and handler of hazardous materials, including polymeric resin waste, other inorganic waste, and halogenated solvents, with no reported violations as of 2014. Based on the information provided in the ERIS Report and its current regulatory status, these listings do not represent a recognized environmental condition in connection with the Site.

Farallon reviewed the GeoTracker database and the California Department of Toxic Substances Control EnviroStor database for records related to the Site, but found no listings.

### 6.2 ADJACENT AND OTHER FACILITY LISTINGS

Reported facilities within 0.25 mile up-gradient, 0.125 mile cross-gradient, or adjacent down-gradient of the Site with respect to the assumed groundwater flow direction are considered

to have a potential to have impacted the Site. Facilities that were listed in the ERIS Report but not identified as a reported facility (e.g., a facility listed as a hazardous waste generator but not as having had a release), and facilities that were listed as “Closed” were not considered to have a potential to have impacted the Site.

- **Mission Valley Ford** at 780 East Brokaw Road, northeast-adjacent to the Site and down-gradient with respect to the assumed groundwater flow direction, was identified in the ALT FUELS, CERS HAZ, SANTA CLARA CUPA, EMISSIONS, HHSS, SANJOSE HM, HIST TANK, SANTA CLARA LOP, HIST TANK, RCRA SQ, and LUST databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste, with no known violations as of 2019. According to the GeoTracker database, an unknown amount of waste was discovered leaking from a UST during its removal from the facility in January 1989. The UST was granted case closure on November 5, 1996 by the San Francisco Regional Water Quality Control Board (RWQCB). Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Various companies** at 1771 Junction Avenue, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, were identified in the SANTA CLARA CUPA, EMISSIONS, SAN JOSE HM, and HAZNET databases. According to the ERIS Report, the facility was a large quantity generator and handler of hazardous materials, with no reported violations. Based on the information provided in the ERIS Report and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Kamper Kits** at 1781 Junction Avenue, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the HHSS, HIST MANIFEST, HAZNET, Santa Clara LOP, HIST TANK, and LUST databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste. According to the GeoTracker database, an unknown amount of waste was discovered at the facility leaking from two USTs during their removal. The USTs were granted case closure in March 2000 by RWQCB. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **R & S Erection of SC** at 1789 Junction Avenue, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the CERS HAZ, SANTA CLARA CUPA, FINDS/FRS, SAN JOSE HM, and HAZNET databases. According to the ERIS Report, the facility was a generator and handler of hazardous materials, with no listed violations as of 2016. Based on the information provided in the ERIS Report and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.

- **Various companies** at 495 East Brokaw Road, west-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, were identified in the CERS HAZ, SANTA CLARA CUPA, DELISTED HAZ, EMISSIONS, SANJOSE HM, RCRA NONGEN, RCRA SQG, DEED, CDO/CAO, and CLEANUP SITES databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste, with no known violations as of 2018, with the exception noted below. According to the ERIS Report, the facility operated as an aluminum extrusion plant from 1960 to 1966 and a commercial logging equipment manufacturer from 1966 to 1988, and has been leased to several tenants through the present. In 1986, an environmental investigation was conducted at the facility that discovered high concentrations of volatile organic compounds in soil and groundwater. In 1987 and 1988, 1,200 cubic yards of impacted soil was excavated from the property. In 1999, remediation efforts began at the property. In 2005, RWQCB determined that additional monitoring for enhanced biodegradation parameters was no longer warranted due to the effectiveness of the biodegradation program. Based on the information provided in the ERIS Report and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Nestor Insulation** at 1792 Rogers, west-southwest-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, was identified in the LUST and SANTA CLARA LO databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste, with no known violations as of 2019, with the exception noted below. According to the GeoTracker database, an unknown amount of gasoline was discovered leaking from a UST during its removal from the facility in 1985. The UST was granted case closure in 2017 by RWQCB. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **1819 Junction**, west-northwest-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, was identified in RCRA NonGen and CLEANUP SITES databases. According to the GeoTracker database, soil and groundwater samples were collected from the property in 1989 during the removal of a UST. High concentrations of volatile organic compounds were detected in the soil and groundwater samples analyzed. In December 2018, a pilot test was conducted by injecting emulsified vegetable oil at eight borings. Post-remediation groundwater monitoring is being conducted at the time of this Phase I ESA. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Germain's Inc.** at 1787 Junction Avenue, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the HHSS and HIST TANK databases. According to the ERIS Report, the facility was a handler of hazardous materials and a tank of unknown size was used to store motor vehicle fuel on the property, with no reported violations. Based on the information provided in the ERIS Report and lack of reported violations, this facility does not represent a recognized environmental condition in connection with the Site.

- **Advantage Tire Service** at 1765 Junction Avenue, south-southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the Santa Clara LOP and LUST databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste. According to the GeoTracker database, an unknown amount of waste was discovered leaking from two USTs during their removal in 1993 from the facility. The USTs were granted case closure in October 1993 by RWQCB. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Velcon Filters** at 1761 Junction Avenue, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the CDO/CAO, EMISSIONS, HHSS, SANTA CLARA HSOL, HIST TANK, SANTA CLARA LOP, RCRA NonGen, RCRA SQG, DEED, CLEANUP SITES, and RCRA SQG databases. According to the ERIS Report, the facility was listed as having permitted air emissions and as being a chemical storage facility and a handler of hazardous waste with several reported administrative violations in addition to several violations related to soil and groundwater contamination as summarized below. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste with permitted air emissions, several administrative violations, and several violations related to soil and groundwater contamination. According to the ERIS Report and GeoTracker database, the facility operated as a fuel filter manufacturer for jet aircraft from the 1960s to 1993. The facility operated one 6,000-gallon and five 10,000-gallon jet fuel USTs. The USTs, a 500-gallon wastewater sump, and several ASTs and associated piping were removed from the facility between 1961 and 1994. Between this time, two large-volume releases from the USTs (7,000 and 4,000 gallons, respectively) were documented in 1975 and 1976. Several additional spills also were reported at the facility in the 1970s. The contaminants of concern at the facility include jet fuel and chlorinated solvents, including trichloroethene and its breakdown products. Investigation and remediation activities, including removal of ASTs and USTs, over-excavation of soil, a groundwater pump-and-treat system, dual-phase soil vapor and groundwater extraction, and ozone and enhanced in-situ bioremediation injections, were conducted between 1993 and 2016. On April 26, 2011, a land use covenant was created that restricted future residential land use at the facility and several adjacent properties based on residual concentrations of chlorinated solvents left in-place. Farallon's review of groundwater data for the property on the GeoTracker database indicates any potential chemical impact to groundwater beneath the Site would be de minimis. Based on the information provided in the ERIS Report and GeoTracker database, its current regulatory status, and the low residual concentrations of contaminants left in-place, this facility represents a de minimis condition in connection with the Site.
- **1757 Junction Avenue**, southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the EMISSIONS, CLEANUP SITES, and DEED databases. According to the ERIS Report, the facility had permitted air emissions in 2002 and 2003, with no known violations reported. According to the ERIS Report and GeoTracker database, chlorinated solvent concentrations were detected in soil

and groundwater samples collected during the removal of an oil-water separator in 1998. Investigation and remediation activities, including the operation of a soil vapor extraction system, were subsequently performed. In 2005, a request for closure was submitted to RWQCB. On May 15, 2005, a land use covenant was created that restricted future residential land use at the facility based on residual concentrations of chlorinated solvents left in-place. Based on the information provided in the ERIS Report and GeoTracker database, its current regulatory status, the distance from the Site, and the low residual concentrations of contaminants left in-place, this facility does not represent a recognized environmental condition in connection with the Site.

- **Various companies** at 1766 Junction Avenue, south-southwest-adjacent to the Site and up-gradient with respect to the assumed groundwater flow direction, was identified in the CERS HAZ, SANTA CLARA CUPA, DELISTED HAZ, SAN JOSE HM and HIST TANK databases. According to the ERIS Report, the facility was a chemical storage facility and a handler of hazardous waste, with no known violations as of 2016. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Phototron** at 524 Brokaw Road, southwest-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, was identified in the HIST TANK, HHSS, EMISSIONS, SANTA CLARA CUPA, SANTA CLARA LO, LUST, and RCRA SQG databases. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste. According to the GeoTracker database, a UST was granted case closure in January 2012 by RWQCB. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **Precision Roofing** at 510 Brokaw Road, west-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, was identified in the LUST database. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste. According to the GeoTracker database, a UST was granted case closure in October 2011 by RWQCB. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.
- **565 Brokaw Road**, northwest-adjacent to the Site and cross-gradient with respect to the assumed groundwater flow direction, was identified in the HAZNET and SANTA CLARA CUPA database. According to the ERIS Report, the facility generated laboratory waste chemicals during its use by Intel Corporation and Templex Technology Inc, with no reported violations. Based on the information provided in the ERIS Report and GeoTracker database and its current regulatory status, this facility does not represent a recognized environmental condition in connection with the Site.

### **6.3 UNMAPPABLE LISTINGS**

ERIS identified seven facilities as “unplottable” that ERIS was unable to map due to inaccurate or inadequate address information. Farallon located these unplottable facilities and, according to the addresses provided by ERIS, the facilities are not located within the respective search radii. The unplottable facilities located do not represent a recognized environmental condition in connection with the Site.

## 7.0 INTERVIEWS

Farallon conducted interviews with individuals familiar with the Site and contacted relevant local governmental agencies to obtain additional Site information. The responses from the parties contacted are provided below.

### 7.1 INTERVIEW WITH SITE REPRESENTATIVE

During the site reconnaissance, Farallon interviewed Mr. Kevin Robins, a representative of Fry's Electronics, the Site tenant, on January 21, 2020. The following information was obtained from this interview:

- Three known diesel ASTs of 250-, 700-, and 800-gallon capacities are present on the Site and are associated with emergency generators.
- An empty 300,000-gallon water AST is on the northeastern portion of the paved parking area. The tank originally was used for fire suppression purposes.
- Hazardous materials on the Site generally consist of janitorial cleaning supplies and building maintenance-related materials.
- Utilities are provided by the local municipality. There is no natural gas service at the Site.
- Two hydraulic elevators service the northern office portion of the Site building. The elevators are maintained on a regular basis and no major leaks have occurred.
- No reportable spills or releases have occurred on the Site.

Mr. Robins stated that he had not been made aware of any pending, threatened, or past:

- Litigation relevant to hazardous substances or petroleum products in, on, or from the Site;
- Administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or
- Notices from a governmental entity regarding violations of environmental laws or liability relating to hazardous substances or petroleum products.

### 7.2 INTERVIEW WITH FIRE DEPARTMENT

Farallon contacted the San Jose Fire Department on September 24, 2019 regarding previous and current ASTs and USTs at the Site. A representative of the San Jose Fire Department provided historical documents for the Site, including hazardous materials management plans, hazardous materials registration forms, and inspection records from the 1970s through the 1990s. The documents detailed several minor administrative violations that were later corrected. Based on the administrative nature of the violations, they are not expected to cause significant environmental impacts to the Site. No appreciable changes in Site use were identified during this Phase I ESA that warranted further regulatory review since the 2019 Phase I ESA.

### **7.3 INTERVIEW WITH CITY**

Farallon contacted the City of San Jose on September 24, 2019 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file, and regarding previous and current ASTs and USTs at the Site. A representative of the City of San Jose indicated that it had no records of storage tanks or spills associated with the Site.

### **7.4 INTERVIEW WITH HEALTH DEPARTMENT**

Farallon contacted the Santa Clara County Department of Environmental Health on September 24, 2019 to inquire whether notices of violations and/or reported hazardous spills at the Site were on file. A representative of the Santa Clara County Department of Environmental Health indicated that it had no records for the Site.

## 8.0 SITE RECONNAISSANCE

Farallon conducted a site reconnaissance on January 21, 2020 to observe the Site for physical evidence of recognized environmental conditions. The methodology used for the site reconnaissance and the observations made during the reconnaissance are discussed below. A description of the Site is provided in Section 2.2, Site Description. Photographs taken during the site reconnaissance are presented in Appendix B.

### 8.1 SITE RECONNAISSANCE METHODOLOGY

Farallon completed a walk around the entire perimeter of the Site and inspected accessible interior portions of the Site building. There were no deviations from ASTM E1527-13 during the Phase I ESA. Limiting conditions encountered during the Phase I ESA were the presence of vehicles on exterior portions of the Site that prevented Farallon from observing the entire ground surface of the Site, and the presence of furniture and equipment in the Site building that prevented Farallon from observing entire interior floor surfaces. In addition, Farallon was not provided access to all portions of the tenant spaces. Based on information obtained from the Site representative, these limiting conditions are not expected to hinder the conclusions of this report.

### 8.2 SITE RECONNAISSANCE OBSERVATIONS

Weather conditions at the time of the reconnaissance were sunny, with a temperature of approximately 55 degrees Fahrenheit. No weather-related Site-access restrictions were encountered during the reconnaissance.

The Site consists of Santa Clara County Parcel No. 237-08-079, which totals approximately 19.701 acres of land developed with a two-story retail store and office building totaling approximately 283,200 square feet constructed in approximately 1967, with additional development in 1984. Two hydraulic elevators service the northern office portion of the Site building. Remaining areas of the Site consist of paved parking and landscaped areas. An empty 300,000-gallon water AST is on the northeastern portion of the paved parking area. Access to the Site is gained from East Brokaw Road, north of the Site, and Junction Avenue, west of the Site.

#### 8.2.1 Interior Observations

Farallon's observations of the interior of the Site building during the site reconnaissance are documented in the table below. Comments pertaining to notable interior observations follow in Section 8.2.2. Photographs taken during the site reconnaissance are provided in Appendix B.

INTERIOR OBSERVATIONS	YES	NO
Odor		X
Heating/Cooling System	X	
Drain(s) and/or Sump(s)	X	

<b>INTERIOR OBSERVATIONS</b>	<b>YES</b>	<b>NO</b>
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), Fuel Port(s), and/or Fill Pipes		X
Clarifier(s)		X
Discharge Area		X
Drum(s) and/or Other Container(s)		X
Pool(s) of Liquid		X
Automobile Lift(s)		X
Monitoring Well(s)		X
Hazardous Material(s) and/or Petroleum Product(s)	X	
Hazardous Waste		X

## 8.2.2 Interior Observation Comments

### Heating/Cooling System

The Site building is heated with electrical heating systems. A freon-powered cooling unit is reportedly on the rooftop of the Site building.

### Drain(s) and/or Sump(s)

Farallon observed several floor drains in the bathrooms, maintenance rooms, and kitchen areas of the Site building. According to the Site representative, the floor drains are connected to the sanitary sewer. No significant staining was observed proximate to the floor drains.

### Staining and/or Corrosion

Farallon observed de minimis staining surrounding the battery charging stations.

### Hazardous Material(s) and/or Petroleum Product(s)

Farallon observed minor amounts of hazardous materials, including janitorial cleaning supplies, paint and hazardous material storage, and building maintenance-related products. The materials were observed to be properly labeled and stored in designated areas of the Site building. Several small quantity freon tanks and propane tanks were observed in the Site building, and according to the Site representative, are used by the Fry's Electronics café and kitchen area and the rooftop cooling unit. No evidence of releases was observed in or around the containers.

## 8.2.3 Exterior Observations

Farallon's observations of the exterior of the Site during the site reconnaissance are documented in the table below. Comments pertaining to notable exterior observations follow in Section 8.2.4. Photographs taken during the site reconnaissance are provided in Appendix B.

<b>EXTERIOR OBSERVATIONS</b>	<b>YES</b>	<b>NO</b>
Odor		X
Staining and/or Corrosion	X	
Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)	X	
Drum(s) and/or Other Container(s)	X	
Pool(s) of Liquid		X
Hazardous Material(s) and/or Petroleum Product(s)		X
Hazardous Waste		X
Pit(s), Pond(s), and/or Lagoon(s)		X
Stressed Vegetation		X
Solid (Non-Hazardous) Waste—Evidence of Dumping		X
Wastewater		X
Domestic Water	X	
Water Well(s)		X
Septic/Sewer System	X	
Stormwater	X	
Transformer(s)	X	
Significant Amount of Fill Material		X

## 8.2.4 Exterior Observation Comments

### Staining and/or Corrosion

Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from vehicles on the Site.

### Storage Tank(s), Vent Pipe(s), and/or Fuel Port(s)

Farallon observed three emergency generators with self-contained 250-, 750-, and 800-gallon diesel ASTs on the western exterior of the Site building, reportedly associated with Fry's Electronics retail store and home office operations. According to the Site representative, no reported spills or releases have occurred in connection with the ASTs. No evidence of releases was observed in or around the ASTs.

### Drum(s) and/or Other Container(s)

Farallon observed two 55-gallon drums used to store used cooking oil pending recycling on the western portion of the Site. The drums were observed to be properly labeled and stored in a

designated area. A 25-gallon plastic drum used to store a spill kit cleanup set was observed inside the Site building. No evidence of releases was observed in or around the containers.

### **Domestic Water**

Domestic water is supplied to the Site building by San Jose Municipal Water System.

### **Septic/Sewer System**

Sanitary sewage generated at the Site discharges to the municipal sanitary sewer system.

### **Stormwater**

Stormwater on the Site is directed into catch basins on the Site, which discharge to the municipal stormwater system.

### **Transformer(s)**

Farallon observed pad-mounted transformers throughout the Site. The transformers appeared to be in good condition, with no evidence of releases noted.

## 9.0 FINDINGS AND OPINIONS

Farallon observed de minimis petroleum staining throughout paved areas of the Site that appeared to be from vehicles on the Site and surrounding the battery charging stations inside the Site building.

Historically, the Site appeared to be undeveloped or developed for agricultural use from at least the late 1880s through at least the 1960s. The potential presence of soil containing residual agricultural chemicals from historical agricultural use is considered a de minimis condition under the Site's current commercial use. Any soil exported from the Site may require evaluation.

The 1995 Phase I Report identified staining associated with a wave solder machine as a recognized environmental condition in connection with the Site. These conditions were not described in the subsequent 1997 and 2019 Phase I Reports. Consequently, the former staining associated with the wave solder machine is considered a de minimis condition in connection with the Site.

The ERIS Report identified the Site addresses in several databases. The Site was identified as disposing of hazardous materials and as having three diesel ASTs associated with emergency generators at the Site, with no reported violations. Based on the information provided in the ERIS Report and the lack of current regulatory requirements applicable to the Site, these listings do not represent a recognized environmental condition in connection with the Site.

The ERIS Report identified adjacent facilities in several databases, including Velcon Filters at 1761 Junction Avenue, approximately 0.04 mile southwest of the Site and up-gradient with respect to the assumed groundwater flow direction. According to the ERIS Report, the facility was a chemical storage facility and handler of hazardous waste with permitted air emissions, several administrative violations, and several violations related to soil and groundwater contamination. According to the GeoTracker database, the facility operated as a fuel filter manufacturer for jet aircraft from the 1960s to 1993. The facility operated one 6,000-gallon and five 10,000-gallon jet fuel USTs, and two large-volume releases from the USTs (7,000 and 4,000 gallons, respectively) were documented in 1975 and 1976. The USTs, a 500-gallon wastewater sump, and several ASTs and associated piping were removed from the facility between 1961 and 1994. Several spills were reported at the facility in the 1970s. The contaminants of concern at the facility include jet fuel and chlorinated solvents, including trichloroethene and its breakdown products. Investigation and remediation activities, including removal of ASTs and USTs, over-excavation of soil, a groundwater pump-and-treat system, dual-phase soil vapor and groundwater extraction, and ozone and enhanced in-situ bioremediation injections, were conducted between 1993 and 2016. A land use covenant dated April 26, 2011 was created that restricted future residential land use at the facility and several adjacent properties based on residual concentrations of chlorinated solvents left in-place. Farallon's review of groundwater data for the property on the GeoTracker database indicates any potential chemical impact to groundwater beneath the Site would be de minimis. Based on the information provided in the ERIS Report and GeoTracker database, its current regulatory status, and the low residual concentrations of contaminants left in-place, this facility represents a de minimis condition in connection with the Site.

## **10.0 CONCLUSIONS**

Farallon conducted a Phase I ESA for the property at 550 East Brokaw Road in San Jose, California in conformance with the scope and limitations of ASTM E1527-13. Any exceptions to or deletions from this practice are described in Section 1.5, Deviations.

This assessment identified no evidence of recognized environmental conditions in connection with the Site.

## 12.0 LIMITATIONS

### 12.1 GENERAL LIMITATIONS

The conclusions contained in this report/assessment are based on professional opinions with regard to the subject matter. These opinions have been arrived at in accordance with currently accepted hydrogeologic and engineering standards and practices applicable to this location. The conclusions contained herein are subject to the following inherent limitations:

- **Accuracy of Information.** Farallon obtained, reviewed, and evaluated certain information used in this report/assessment from sources that were believed to be reliable. Farallon's conclusions, opinions, and recommendations are based in part on such information. Farallon's services did not include verification of its accuracy or authenticity. Should the information upon which Farallon relied prove to be inaccurate or unreliable, Farallon reserves the right to amend or revise its conclusions, opinions, and/or recommendations.
- **Reconnaissance and/or Characterization.** Farallon performed a reconnaissance and/or characterization of the Site that is the subject of this report/assessment to document current conditions. Farallon focused on areas deemed more likely to exhibit hazardous materials conditions. Contamination may exist in other areas of the Site that were not investigated or were inaccessible. Site activities beyond Farallon's control could change at any time after the completion of this report/assessment.

For the foregoing reasons, Farallon cannot and does not warrant or guarantee that the Site is free of hazardous or potentially hazardous substances or conditions, or that latent or undiscovered conditions will not become evident in the future. Farallon's observations, findings, and opinions can be considered valid only as of the date of the report.

This report/assessment has been prepared in accordance with the contract for services between Farallon and Caracol, LTD L.P., and currently accepted industry standards. No other warranties, representations, or certifications are made.

### 12.2 LIMITATION ON RELIANCE BY THIRD PARTIES

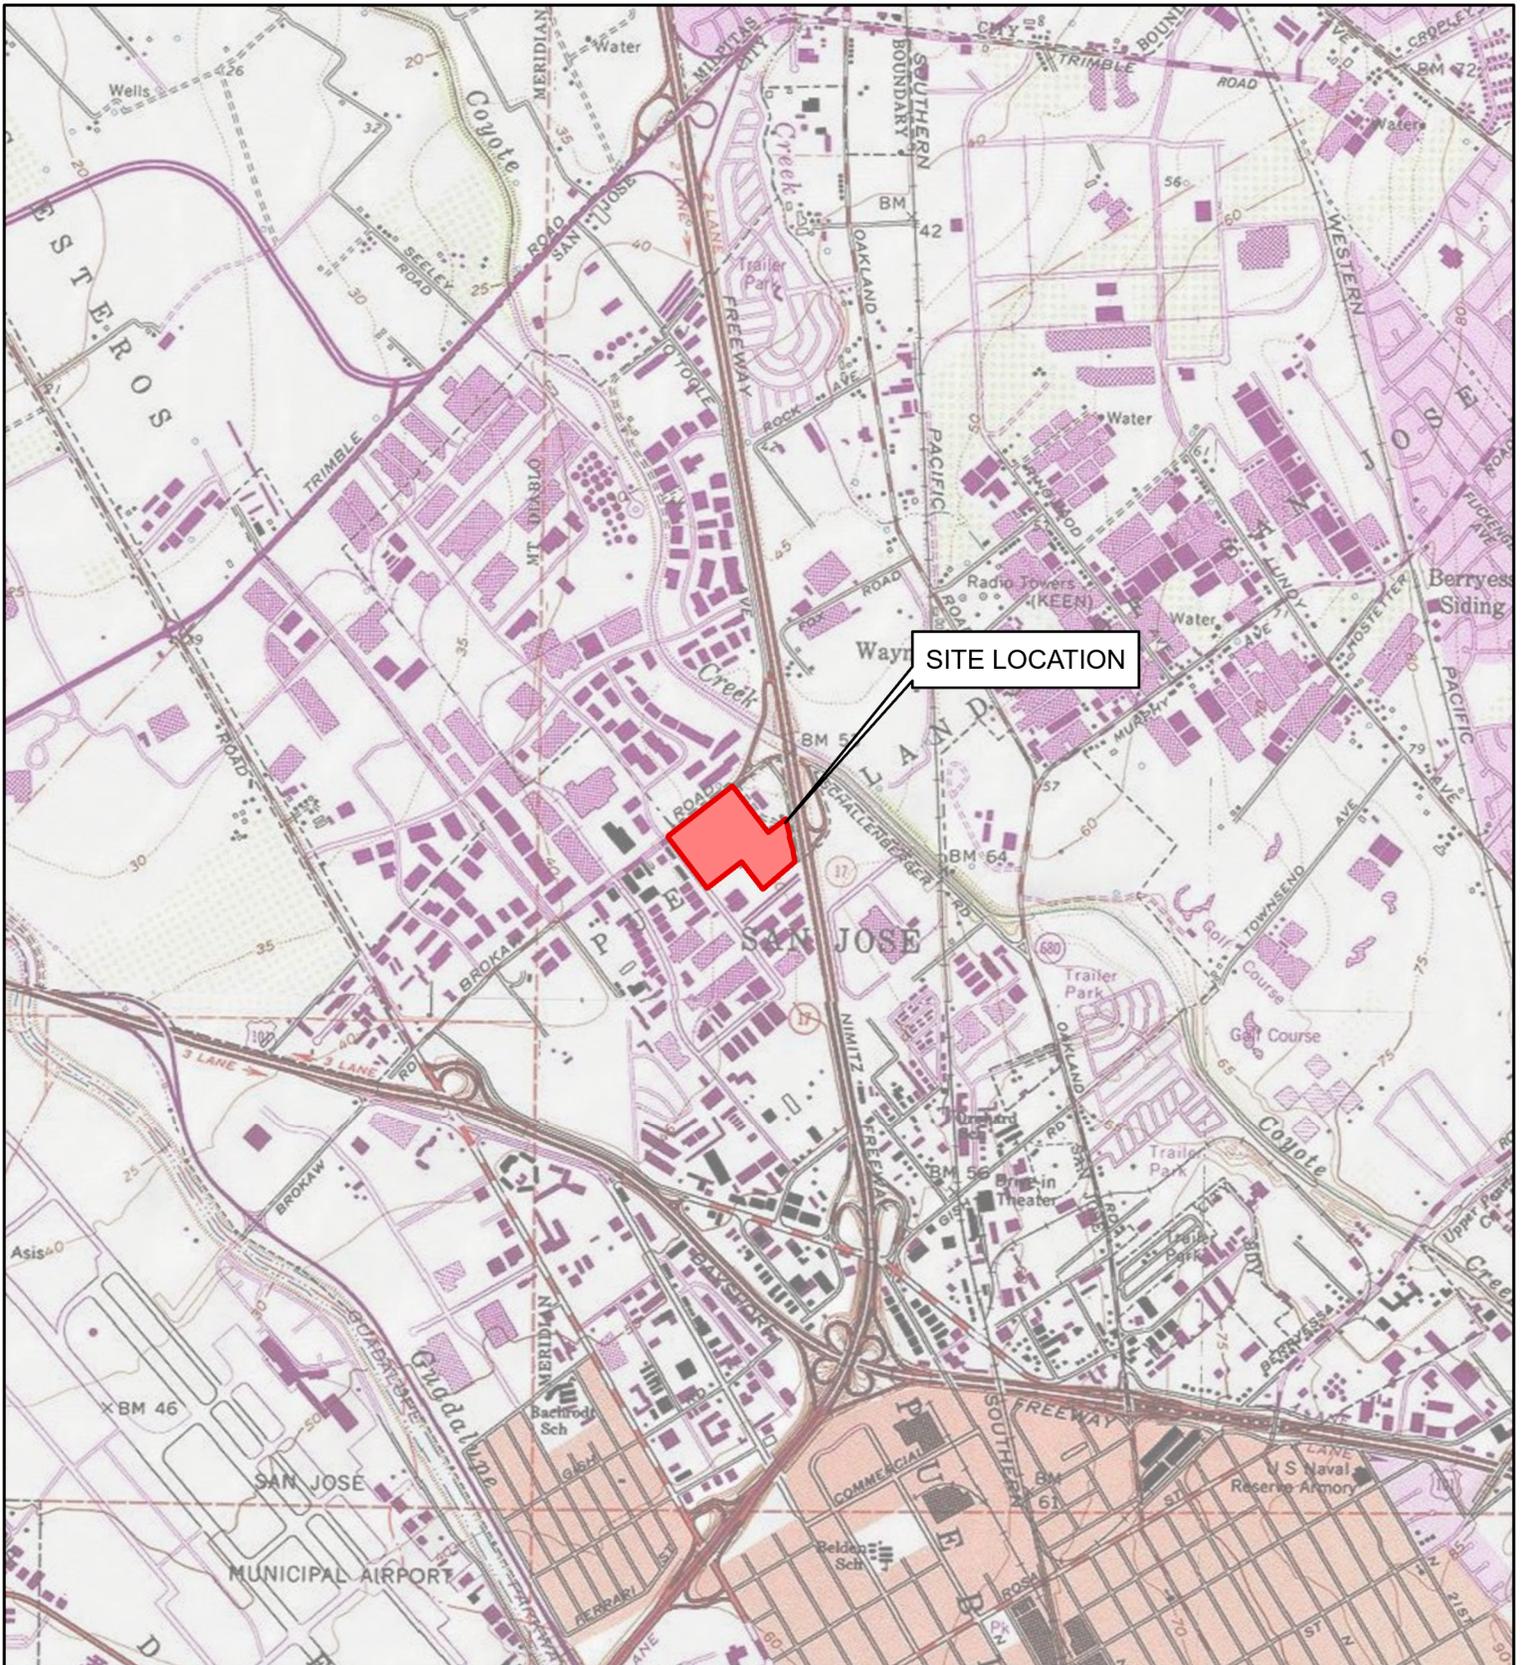

**Reliance by third parties is prohibited.** This report/assessment has been prepared for the exclusive use of Caracol, LTD L.P. to address the unique needs of Caracol, LTD L.P. at the Site at a specific point in time.

This is not a general grant of reliance. No one other than Caracol, LTD L.P. may rely on this report unless Farallon agrees in advance to such reliance in writing. Any unauthorized use, interpretation, or reliance on this report/assessment is at the sole risk of that party, and Farallon will have no liability for such unauthorized use, interpretation, or reliance.

San Jose, California

Farallon PN: 2332-004

**SCOTT ALLIN, R.E.P.A.**  
Principal Environmental Scientist

BS Physical Science (Hydrology)  
30 years experience

Mr. Allin has 30 years of project and program management experience in the evaluation and reporting of environmental liability associated with the sale or Brownfields redevelopment of impaired properties. He has supported the needs of developers and others in the acquisition of Cost Cap and Finite Risk environmental insurance to manage long-term environmental risks. He has provided clients with value-added due diligence services for single properties and large multimillion-dollar mixed-use portfolios, both nationally and internationally. Mr. Allin has provided guidance for evaluating environmental risks during complex mergers and acquisitions, and management services for implementation of remedial actions, asbestos abatement, environmental audit programs, and environmentally sensitive property improvements.

**USER QUESTIONNAIRE**

PHASE I  
ENVIRONMENTAL SITE ASSESSMENT REPORT  
550 East Brokaw Road  
San Jose, California

Farallon PN: 2332-004

## PHASE I ENVIRONMENTAL SITE ASSESSMENT USER QUESTIONNAIRE

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the Phase I Environmental Site Assessment (Phase I ESA) Report user must provide the following information (if available) to the environmental professional (Farallon Consulting, L.L.C.). Failure to provide this information could result in the determination that "all appropriate inquiry" has not been completed.

Date: January 24, 2020

### ■ PROJECT/SITE INFORMATION

Client Name: Caracol, Ltd. L.P. Client Telephone: (408) 680-4938

Client Address: 1725 South Bascom Avenue, Suite 1050

Asset #: Project/Site Name: 550 E Brokaw Rd

Project Street Address: 550 E Brokaw Road

City: San Jose County: Santa Clara State: CA Zip: 95112

Why is this Phase I ESA required?

Property Transaction:

Sale  Purchase  Exchange  Other

Comments:

### ■ PROPERTY USE & SPECIFICATIONS

Single-Family Residential  Vacant or Undeveloped Land

Multi-Family Residential #Units:  Agricultural (*Specify type*):

Commercial Office  Industrial (*Specify type*):

Commercial Retail  Other (*Specify type*):

Provide a general Site description: see provided documents

Legal description/plat plan/boundary survey available?  Yes  No  Already provided

Current Property Status:  Vacant  Occupied  Improved  Unimproved

Total Property Size: 19.701 acres Original Construction Date: 1967

Total # of Buildings: 1 Was Construction Phased?  Yes  No  Unknown

Total Sq. Ft. of Buildings: 283,200 Date(s) of Renovation(s)/Phases: 1984

Does Site have an undeveloped area equal to 1 acre or more?  Yes  No

Are any bodies of water on or immediately adjacent to the Site?  Yes  No If Yes, describe:  
Comments:

Potable water source at Site?  On-Site well  Utility (*Specify provider*) NA

Wastewater discharge at Site?  Septic Tank/Drainfield  Sanitary Sewer  Other (*Specify*):

Building plans available at the Site?  Yes  No  Unknown  Already provided

**■ OWNERS**

Current Owner(s): Caracol LTD LP

Previous Owner(s):

**■ OCCUPANTS/TENANTS**

Current Occupant(s)/Tenant(s) and operations: Frys Electronics, Frys Home Office, American Institute of Mathematics

Previous Occupant(s)/Tenant(s) and operations: Levis Straus, TeleVideo systems, and Nutronics

**■ PREVIOUS PROPERTY USES**

Describe previous use(s) of the Site: Warehouse, electronics store, storage for San Jose SaberCats equipment.

**■ PREVIOUS INVESTIGATIONS**

Has any previous environmental investigation been conducted at Site?  Yes  No  Unknown

If Yes, note type and describe:  Phase I ESA  Asbestos  Lead Paint  Lead in Water

Radon  Wetlands  Indoor Air  UST/AST  Other (*Specify type below*)

Comments:

See provided documents

**■ ON-SITE ENVIRONMENTAL CONDITIONS**

Are you aware of any of the following environmental conditions at the Site, either current or former?

Environmental Condition/Issue	Response	Comment if Yes Response
Aboveground Storage Tank	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided documents
Underground Storage Tank	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Hazardous/Toxic Substance	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided documents
Stored Chemical	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided documents
Chemical Spill/Release	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Dump Area/Landfill	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Waste Treatment System	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Wastewater Discharge	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Air Stack/Vent/Odor	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Indoor Air Quality Complaint	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA

Floor Drain/Sump	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Pit, Pond, Lagoon	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Stained Soil/Vegetation Impact	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA

Other specialized knowledge of an environmental condition or issue at the Site?  
NA

**■ ADDITIONAL ON-SITE ENVIRONMENTAL CONDITIONS**

Are you aware of any of the following environmental conditions on the Site, either current or former?

Environmental Condition/Issue	Response	Comment if Yes Response
Pesticide/Herbicide Use	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Polychlorinated Biphenyls	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Electrical Transformer	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided documents
Hydraulic Lift	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Elevator	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided document
Drycleaner Business	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Asbestos	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	See provided document
Lead Paint	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Lead Piping/Lead in Water	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Elevated Radon Level	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Fluorescent Light Fixture	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Wetland, Flooding	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Unique Wildlife Species	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Archeological Resource	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Historic/National Landmark	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Oil/Gas Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Water Well	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Environmental Cleanup	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA
Environmental Permit	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	NA

**■ OFF-SITE ENVIRONMENTAL CONDITIONS**

On adjoining property, are there any: Gasoline Stations?  Yes  No Drycleaners?  Yes  No

Are you aware of any other environmental conditions or concerns on adjacent or nearby properties?  
 Yes  No

Comments  
I am not aware of any other environmental conditions or concerns on adjacent or nearby properties.

**(1) Environmental cleanup liens that have been filed or recorded against the Site (Part 312.25 of Title 40 of the Code of Federal Regulations [40 CFR 312.25])**

Are you aware of any environmental cleanup liens against the Site that have been filed or recorded under federal, tribal, state, or local law?

I am not aware of any environmental cleanup liens against the Site.

**(2) Activity and land use limitations that are in place at the Site or that have been filed or recorded in a registry (40 CFR 312.26)**

Are you aware of any activity and land use limitation (such as engineering controls, land use restrictions, or institutional controls) that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

I am not aware of any activity and land use limitation.

**(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

As the user of the Phase I ESA Report, do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupant(s) of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No, I have no specialized knowledge of the Site.

**(4) Relationship of the purchase price to the fair market value of the Site if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

I have no knowledge of the purchase price being discounted for environmental conditions

**(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help Farallon Consulting, L.L.C. to identify conditions indicative of a chemical or other release or threatened release? For example, as user of the Phase I ESA Report:

Do you know the past use(s) of the Site? (If yes, please specify.) No.

Do you know of a specific chemical(s) present at the Site, or present at one time? (If yes, please specify.) No.

Do you know of a chemical and/or other spill(s) or release(s) that have taken place at the Site? (If yes, please specify.) No.

Do you know of any environmental cleanup(s) that have taken place at the Site? (If yes, please specify.) No.

**(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

As the user of the Phase I ESA Report, based on your knowledge and experience related to the Site, is there any obvious indicator(s) that point to the presence or likely presence of contamination at the Site? (If yes, please specify.)

No.

**Identify all parties who will rely on the Phase I ESA Report, including:**

Name of Business:

Name of Contact:

Address:

Telephone Number:

E-mail Address:

**Has any party that will rely on the Phase I ESA Report required services beyond the standard ASTM E1527-05? (For example, an asbestos, lead-based paint, lead in drinking water, or wetlands investigation) (If yes, please specify.)** No

**Who is the Site contact, and how can the contact be reached?**

Name of Business: Frys Electronics

Name of Contact: Kevin D. Robins

Address: 600 East Brokaw Road San Jose, CA 95112

Telephone Number: 408-487-4632

E-mail Address: kdr@i.frys.com

**Are there any special terms and conditions that must be agreed upon by Farallon Consulting, L.L.C.?**  
(If yes, please specify.)

No

Eval Date:	08/08/2016
Violations Found:	No
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval Notes:	

A HAZARDOUS MATERIALS BUSINESS PLAN INSPECTION WAS CONDUCTED WITH MR. JOHN MUNOZ OWNER. A FACILITY WALK THROUGH WAS CONDUCTED. ALL FUMIGATION CHEMICALS AND CHEMICAL IRRITANTS ARE STORED ON COMPANY WORK TRUCKS. NO INSIDE STORAGE OF CHEMICALS IS ALLOWED. A RECENT HAZARDOUS MATERIALS BUSINESS PLAN WAS SUBMITTED ELECTRONICALLY VIA THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM ON FEBRUARY 16, 2016 AND ACCEPTED ON AUGUST 4, 2016. THE CHEMICAL INVENTORY AND SITE FACILITY MAP WAS REVIEWED AS WELL AS THE EMERGENCY RESPONSE/CONTINGENCY PLAN. THE EMPLOYEE TRAINING PLAN WAS REVIEWED AND WAS FOUND SATISFACTORY. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Citation:</b>	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2		
<b>Violation Notes:</b>			

Returned to compliance on 02/02/2016. HMBP was last certified on 7/25/12. HMBP must be certified annually, and done so electronically on the California Environmental Reporting System (CERS). Within 30 days, complete and submit the following (sections): -Facility information/ownership page - Hazardous materials inventory/site map -Emergency response plan/training plan NOTES: -If you would like assistance with completing and submitting your HMBP, you may contact Hazardous Materials Technician Michelle Santos at (408) 918-1981 to set-up an appointment. -CERS website: <http://cers.calepa.ca.gov> \*\*Note: Many records provided by the department have a truncated [Violation Notes] field.

**Violation Description:**

Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

**Eval Notes:**

On-site to conduct a hazardous waste inspection. Facility houses grading vehicles and equipment. Periodic oil changes are performed on equipment and used oil is accumulated on-site in 1 x approximately 100 gallon metal bulk container located in a storage unit. Used oil filters are accumulated in 1 x 55 gallon drum in outdoor lot. NOTES: -CAL000326750 is active. -Used oil and used oil filters shipments occur approximately once per year. -Fire extinguishers were observed as maintained. -Spill control was available. -Email: normi@lyonsgen.com; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Waste Code Details**

Hazardous Waste Code: 151  
 Waste Code Description: Asbestos-containing waste

Hazardous Waste Code: F001  
 Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F037  
 Waste Code Description: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

<b>Violation Notes:</b>			

Returned to compliance on 06/21/2016. Facility information did not indicate over 1,320 gallons of petroleum storage in aboveground storage tanks. Please go into the California Environmental Reporting System and update your business activities and check "Yes" when asked if storing over 1,320 gallons of petroleum in tanks or containers. Following this update you will be required to complete a Spill Prevention Countermeasure Control Plan (SPCC Plan), your facility is a Tier 1 Qualified facility, please contact Jeffrey M. Higbee for a copy of a Tier 1 Template at 408-918-4785.

**Violation Description:**

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

**Violations**

<b>Violation Date:</b>	02/05/2016	<b>Violation Source:</b>	CERS

<b>Citation:</b>	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)		
<b>Violation Notes:</b>			

Returned to compliance on 06/21/2016. A hazardous waste tank assessment was not available for review during the inspection; please provide evidence of the waste oil tank assessment or conduct a new assessment.

**Violation Description:**

Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information:

- (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed;
- (2) Hazardous characteristics of the waste(s) to be handled;
- (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of:
  - (A) Factors affecting the potential for corrosion, including but not limited to:
    - 1. Soil moisture content;
    - 2. Soil pH;
    - 3. Soil sulfides level;
    - 4. Soil resistivity;
    - 5. Structure to soil potential;
    - 6. Influence of nearby underground metal structures (e.g., piping);
    - 7. Stray electric current; and
    - 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and
  - (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following:
    - 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic;
    - 2. Corrosion-resistant coating (such as epoxy or fiberglass) with cathodic protection (e.g., impressed current or sacrificial anodes); and
    - 3. Electrical isolation devices such as insulating joints and flanges;
  - (4) For underground tank system components that are likely to be affected by vehicular traffic, a determination of design or operational measures that will protect the tank system against potential damage; and
  - (5) Design considerations to ensure that:
    - (A) Tank foundations will maintain the load of a full tank;
    - (B) Tank systems will be anchored to prevent flotation or dislodgement where the tank system is placed in a saturated zone, or is located within a seismic fault zone;
    - (C) Tank systems will withstand the effects of frost heave; and
    - (D) The installation of a corrosion protection system that is field fabricated shall be supervised by an independent corrosion expert to ensure proper installation.

**Violations**

**Citation:** 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)

**Violation Notes:**

Returned to compliance on 06/21/2016. Facility is not maintaining written logs of daily tank inspections for the 500 gallon waste oil.

**Violation Description:**

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:

- 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
- 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
- 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
- 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
- 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

**Violations**

<b>Violation Date:</b>	02/05/2016	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HW	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31		
<b>Violation Notes:</b>			

Returned to compliance on 06/21/2016. Waste Oil and New Oil is present on the ground around the waste oil tanks and new oil tanks; keep these areas dry when spills occur.

**Violation Description:**

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..

**Evaluations**

<b>Eval Date:</b>	02/05/2016
<b>Violations Found:</b>	Yes
<b>Eval General Type:</b>	Compliance Evaluation Inspection
<b>Eval Type:</b>	Routine done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	HMRPP
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

HMBP threshold chemicals onsite today: 13 threshold chemicals accepted in CERS on 2/2/16. Facility maintains approximately 1700 gallons of petroleum in aboveground storage tanks (ASTs). Tier 1 SPCC plan template not available today for review. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Site History:**

This site consists of three separate adjoining parcels. 1761 Junction Avenue, 1759 Junction Avenue, and 1750 Rogers Avenue.

**Sites from GeoTracker Search - Cleanup Action Report (as of Oct 31, 2019)**

<b>Action Type:</b>	PUMP & TREAT (P&T) GROUNDWATER	<b>Begin Date:</b>	12/1/1995
<b>Phase:</b>	Water, Water	<b>End Date:</b>	
<b>Description:</b>			
<b>Contaminant Mass Removed:</b>	3,365 Pounds		
<b>Action Type:</b>	FREE PRODUCT REMOVAL	<b>Begin Date:</b>	8/3/1988
<b>Phase:</b>	Liquid Waste	<b>End Date:</b>	
<b>Description:</b>	In August 1988 after the discovery of jet fuel product floating on groundwater, Velcon began a floating product removal program from two monitoring wells in the jet fuel source area. Periodic pumping of jet fuel product continued through October 1991. Between March 1995 and June 1999, Velcon installed nine groundwater extraction wells on the site. Two more were added in 2001. The amount of fuel removed prior to 1995 isn't known. From 1995 - 2008 25 gallons of free product have been removed.		
<b>Contaminant Mass Removed:</b>	25 Gallons		
<b>Action Type:</b>	EXCAVATION	<b>Begin Date:</b>	6/3/1993
<b>Phase:</b>	Soil	<b>End Date:</b>	12/1/1994
<b>Description:</b>	In June 1993, Velcon removed two above-ground jet fuel/kerosene storage tanks, a resin tank, vapor degreaser, and associated above-ground piping at 1750 Rogers Avenue. In 1994, Velcon removed the six underground jet fuel storage tanks and sump at 1761 Junction Avenue. Approximately 680 cubic yards of pea gravel and 4 cubic yards		

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

of jet fuel saturated soil were removed from the tank pit excavation.

**Contaminant Mass Removed:**

**Title Description Comments:**

Phone call to 1761 Junction Avenue owner. In a telephone conversation with Frank Hamedi, the owner of 1761 Junction Avenue, I asked about the status of the deed restriction required by the Site Cleanup Requirements and the Regional Water Board letter of February 5, 2014, which named Mr. Hamedi as the responsible party for completion of the task requiring a deed restriction for 1761 Junction Avenue, and which required submittal of an

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

acceptable deed restriction by April 8, 2014. I informed Mr. Hamedy that the deed restriction was required to be submitted by April 8, 2014. Mr. Hamedy objected to submitting the deed restriction and asked that I email him the Site Cleanup Requirements with the language requiring a deed restriction highlighted. I told Mr. Hamedy that I would do so and that he was now in violation of the requirement in the February 5, 2014 letter to submit the deed restriction. Mr. Hamedy said that Velcon should provide a draft deed restriction. I pointed out that they already had and that Mr. Hamedy's lawyer had made some changes to the draft and submitted it to the Regional Water Board. We had replied in an October 13, 2011 letter that certain changes needed to be made and that the revised deed restriction was required by October 30, 2011. I informed Mr. Hamedy that he should make the changes we required and submit the deed restriction. If the deed restriction was not submitted the Regional Water Board would issue a notice of violation. Following the phone call I emailed Mr. Hamedy the Site Cleanup Requirements with the specific section and tasks for the deed restriction spelled out. It should be noted that Mr. Hamedy has had the Site Cleanup Requirements for years now.

**Title Description Comments:**

Meeting. Met with TRC to discuss the status of the groundwater cleanup. The latest sampling results were presented and discussed. The Regional Water Board plan to require indoor air sampling at the building immediately downgradient of 1761 Junction Avenue was discussed. The indoor air sampling requirement is to verify that there is not a vapor intrusion issue with methane from the EISB injections on 1761 Junction. The indoor air sampling would provide information that would also be useful for deciding if the proposed direct push EISB injections in Area C would present a risk for vapor intrusion of methane in buildings further downgradient. TRC presented their proposal for direct push EISB injections in Area C (offsite, downgradient). We also discussed the monitoring wells on the upgradient side of 1750 Rogers Avenue. Two potential ways to deal with TCE impacts here are to do EISB injections to lower concentrations (Water Board preference), or to do a risk assessment including indoor air sampling to determine if the current levels pose any risk.

Summary of Task 1a, Further Remedial Investigation

**Action Type:** Cleanup Action  
**Action Date:** 6/3/1993  
**Received Issue Date:**  
**Action:** Excavation  
**Doc Link:**  
**Title Description Comments:**

In June 1993, Velcon removed two above-ground jet fuel/kerosene storage tanks, a resin tank, vapor degreaser, and associated above-ground piping at 1750 Rogers Avenue. In 1994, Velcon removed the six underground jet fuel storage tanks and sump at 1761 Junction Avenue. Approximately 680 cubic yards of pea gravel and 4 cubic yards of jet fuel saturated soil were removed from the tank pit excavation.

Groundwater Monitoring Well Installation and Soil Sampling Report

**Action Type:** Cleanup Action  
**Action Date:** 8/3/1988  
**Received Issue Date:**  
**Action:** Free Product Removal  
**Doc Link:**

**Title Description Comments:**

In August 1988 after the discovery of jet fuel product floating on groundwater, Velcon began a floating product removal program from two monitoring wells in the jet fuel source area. Periodic pumping of jet fuel product continued through October 1991. Between March 1995 and June 1999, Velcon installed nine groundwater extraction wells on the site. Two more were added in 2001. The amount of fuel removed prior to 1995 isn't known. From 1995 - 2008 25 gallons of free product have been removed.

**Evaluations**

**Eval Date:** 01/22/2016  
**Violations Found:** No  
**Eval General Type:** Other/Unknown  
**Eval Type:** Other, not routine, done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a permit investigation due to unpaid permit fees in the amount of \$193.75 (IN1079134). Upon visiting this facility, it was confirmed that Advanced Tek had closed and is no longer operating business there. The Hazardous Waste Generator permit will be inactivated with our office.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Begin Date: 1980-02-17 00:00:00  
Lead Agency: SANTA CLARA COUNTY LOP  
Local Agency: SANTA CLARA COUNTY LOP  
CUF Case: YES

Potential COC: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline  
Tank Closure

How Discovered:  
Stop Method:  
Stop Description: UST removed in June 1987  
Case Worker: GOR  
File Location: All Files are on GeoTracker or in the Local Agency Database

Potential Media of Concern: Aquifer used for drinking water supply, Soil  
How Discovered Description: Report lists June 1987 as date of tank removal and assumed discovery of contamination.  
Calwater Watershed Name: Santa Clara - Coyote Creek (205.30)  
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)  
Disadvantaged Community:  
Site History:

The Site is located at 524 East Brokaw Road, San Jose, California. The Site is currently occupied by Bodystyle, an auto repair company that uses one commercial building. The building was formerly occupied by Phototron, a commercial film processing laboratory. The remaining portion of the site is two asphalt parking areas on the northwest and southeast sides of building, and two driveways. The site formerly had one 550-gallon UST located near the southeastern side of the building (Figure 2). The UST reportedly stored gasoline. The property is surrounded by commercial uses. 1987 The 550-gallon UST was removed from the site in June by West Coast Tank Testing, and confirmation soil sampling revealed soil samples collected from the tank pit contained 7,500 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPH-g) and 2,300 ppm total petroleum hydrocarbons as diesel (TPH-d). One groundwater sample was collected from the tank pit and results of analysis revealed concentrations of TPH-g at 310 ppm, TPH-d at 970 ppm, and benzene at 23 ppm. Additional over excavation was performed and approximately 80 cubic yards of gasoline and diesel impacted soil was removed from the former tank pit on June 24, 1987 and disposed of at Kettleman Hills landfill. In August, Argus Consulting Engineers installed monitoring well MW-1 adjacent to the former tank cavity. A groundwater sample collected from MW-1 revealed concentrations of TPH-g at 80 ppm and benzene at 6.5 ppm. In December 1987 three additional soil borings were drilled and three soil and one groundwater sample was collected. Analysis of these samples revealed low concentrations of petroleum hydrocarbons. 1991 Four monitoring wells, MW-2, MW-3, MW-4 and MW-5, were installed in December. 1992 In December, two additional monitoring wells MW-6 and MW-7 were installed. A review of laboratory analysis of the TPH-d results revealed the TPH-d was not characteristic of diesel fuel. The previous TPH-d detections were determined to be heavier components of

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

gasoline, (Clark & Witham, Inc. August 4, 1993), and TPH-d analysis of soil and groundwater samples was discontinued. Groundwater sampling was performed on all of the wells for two quarters in 1992, three quarters in 1995, one quarter in 1996, two quarters in 1997, one quarter in 1998, one quarter in 1999, and two quarters in 2001. 1997 Clark & Witham, Inc. prepared a Corrective Action Plan (CAP) in June recommending monitored natural degradation as the appropriate corrective action for the subject property. The Santa Clara Valley Water district concurred with the CAP recommendations and requested regular monitoring to gauge the progress of the natural attenuation. 2001 After reviewing the site investigation reports, Santa Clara Valley Water District issued a Monitoring and Reporting Program order requiring regular monitoring at the Site. The most recent groundwater sampling occurred in December 2001 and reported in January 2002 by PES Environmental Inc. (PES). According to the December, 2001 Quarterly Monitoring report significant decreases of benzene, toluene, ethylbenzene and xylenes (BTEX) concentrations had occurred at MW-1. PES also concluded that based on the absence of detectable concentrations of TPH-g and BTEX compounds at well MW-6, located cross-gradient to the source area, the presence of low concentrations of MTBE at well MW-6 may suggest an offsite source for this compound. 2009 In December the Santa Clara County Department of Environmental Health required one full year of quarterly monitoring. EIS redeveloped all wells and conducted quarterly groundwater monitoring sampling events in January, April, July, and October of 2010.

<b>Gndwater Monitoring Freque:</b>	# OF WELLS MONITORED - QUARTERLY : 7					
	REASONS FOR QUARTERLY OR MONTHLY OR OTHER GROUNDWATER MONITORING: Other - Site is out of compliance. Most recent groundwater sampling occurred in December 2001. Quarterly sampling was required. Requested one year of quarterly sampling after which the DEH will consider reducing sampling frequency.					
<b>Site History:</b>						
<p>The Site is located at 524 East Brokaw Road, San Jose, California. The Site is currently occupied by Bodystyle, an auto repair company that uses one commercial building. The building was formerly occupied by Phototron, a commercial film processing laboratory. The remaining portion of the site is two asphalt parking areas on the northwest and southeast sides of building, and two driveways. The site formerly had one 550-gallon UST located near the southeastern side of the building (Figure 2). The UST reportedly stored gasoline. The property is surrounded by commercial uses.</p>						
1987						
<p>The 550-gallon UST was removed from the site in June by West Coast Tank Testing, and confirmation soil sampling revealed soil samples collected from the tank pit contained 7,500 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPH-g) and 2,300 ppm total petroleum hydrocarbons as diesel (TPH-d). One groundwater sample was collected from the tank pit and results of analysis revealed concentrations of TPH-g at 310 ppm, TPH-d at 970 ppm, and benzene at 23 ppm. Additional over excavation was performed and approximately 80 cubic yards of gasoline and diesel impacted soil was removed from the former tank pit on June 24, 1987 and disposed of at Kettleman Hills landfill.</p>						
<p>In August, Argus Consulting Engineers installed monitoring well MW-1 adjacent to the former tank cavity. A groundwater sample collected from MW-1 revealed concentrations of TPH-g at 80 ppm and benzene at 6.5 ppm. In December 1987 three additional soil borings were drilled and three soil and one groundwater sample was collected. Analysis of these samples revealed low concentrations of petroleum hydrocarbons.</p>						
1991						
Four monitoring wells, MW-2, MW-3, MW-4 and MW-5, were installed in December.						
1992						
<p>In December, two additional monitoring wells MW-6 and MW-7 were installed. A review of laboratory analysis of the TPH-d results revealed the TPH-d was not characteristic of diesel fuel. The previous TPH-d detections were determined to be heavier components of gasoline, (Clark &amp; Witham, Inc. August 4, 1993), and TPH-d analysis of soil and groundwater samples was discontinued. Groundwater sampling was performed on all of the wells for two quarters in 1992, three quarters in 1995, one quarter in 1996, two quarters in 1997, one quarter in 1998, one quarter in 1999, and two quarters in 2001.</p>						
1997						
<p>Clark &amp; Witham, Inc. prepared a Corrective Action Plan (CAP) in June recommending monitored natural degradation as the appropriate corrective action for the subject property. The Santa Clara Valley Water district concurred with the CAP recommendations and requested regular monitoring to gauge the progress of the natural attenuation.</p>						
2001						
<p>After reviewing the site investigation reports, Santa Clara Valley Water District issued a Monitoring and Reporting Program order requiring regular monitoring at the Site. The most recent groundwater sampling occurred in December 2001 and reported in January 2002 by PES Environmental Inc.</p>

(PES). According to the December, 2001 Quarterly Monitoring report significant decreases of benzene, toluene, ethylbenzene and xylenes (BTEX) concentrations had occurred at MW-1. PES also concluded that based on the absence of detectable concentrations of TPH-g and BTEX compounds at well MW-6, located cross-gradient to the source area, the presence of low concentrations of MTBE at well MW-6 may suggest an offsite source for this compound.

2009

In December the Santa Clara County Department of Environmental Health required one full year of quarterly monitoring. EIS redeveloped all wells and conducted quarterly groundwater monitoring sampling events in January, April, July, and October of 2010.

**Site History:**

A Site history / investigation background from approximately 1985 through 1999 and from approximately 1999 to 2002 is presented in a previous work plan and report (Cypress Environmental, June 15, 2000 and October 2002, respectively) (the October 2002 report also contains information on adjacent / neighboring sites). Another previous report contains background information on the adjacent site at 524 East Brokaw Road, San Jose (Environmental Investigation Services, Inc., January 25, 2010). The following is a summary of background information obtained from these and other documents, including quarterly groundwater monitoring reports for monitoring and sampling events in 2010-2011. The site was previously leased by John De Martini to Precision Roofing. The 1,000 gallon gasoline UST, operated by Precision Roofing, had a leak circa 1985. During UST removal (circa 1986) a hole was discovered in the tank and a soil sample from the fill end of the excavation contained 1,215 ppm TPHg. In December 1988, a grab groundwater sample collected from the tank pit contained 26,000 ppb TPHg; 4,900 ppb benzene; 600 ppb toluene; and 5,100 ppb xylenes. It is assumed that the grab groundwater sample was from a "tank pit" well, described as 3-inch diameter black plastic, installed in the backfill, this well was not seen during 2010-2011 quarterly monitoring events and it is unknown if it still exists. Three groundwater monitoring wells (PR-1, PR-2, and PR-3) were installed in August 1991 and five groundwater monitoring and sampling events were performed in July, August and October 2000, and May and July 2002, by Cypress Environmental. During this 2000-2002 period, the highest detections in groundwater samples from the three monitoring wells were 3,500 ppb TPHg; 750 ppb Benzene; and 100 ppb MTBE (toluene, ethyl benzene, and xylenes were below ESLs). A request for closure was presented, and no further action was proposed, in the October 2002 report (Cypress Environmental, October 2002), based on the following: "The source of the gasoline and BTEX was removed approximately 16 to 17 years ago" (note: in 2010, approximately 25 years ago) "Free product has not been observed in Site monitoring wells" "Residual concentrations of BTEX in soil are well below the U.S. Environmental Protection Agency's Preliminary Remediation Goals for industrial sites" "TPHg and BTEX appear to be localized in close proximity to the former tank pit" "The Site does not appear to be a source of MtBE", and "Data from the nearby Velcon Filters, Kamper Kits, and Phototron sites indicate that conditions in the area are conducive to natural attenuation (biodegradation)". A review of the Santa Clara County Department of Environmental Health (SCCDEH) online files was performed for the Subject Site by E2C Inc (E2C) personnel on March 17, 2010 (Local Oversight Program Public Record Document Search, <http://lustop.sccgov.org/files/06S1E30M04f/>). In the Correspondence Files, a directive letter, dated November 23, 2003, was found from the Santa Clara Valley Water District (SCVWD), the former Local Oversight Agency for the Leaking Underground Storage Tank (LUST) Oversight Program. The November 23, 2003 letter acknowledged receipt of the October 2002 report, however, it did not concur with the request for case closure and proposal for no further action. Due to elevated levels of Total Petroleum Hydrocarbons as Gasoline (TPHg) and Benzene detected in groundwater samples from well PR-3, the letter recommended additional investigation in the vicinity of well PR-3 and continuing groundwater monitoring, and required submittal of a work plan to address these concerns. The files indicated that no assessment, investigation, cleanup, or monitoring activities occurred at the Site after July 18, 2002, the date of the last groundwater monitoring event. A directive letter dated August 11, 2009, from the SCCDEH required groundwater monitoring in January and July 2010. However, this letter was superseded by another SCCDEH directive letter dated January 13, 2010, requiring four consecutive quarterly groundwater monitoring events beginning with the First Quarter 2010, to be coordinated with the groundwater monitoring at the adjacent site at 524 East Brokaw Road. In March 2010, E2C Inc (E2C) was retained to perform the required quarterly groundwater monitoring. Due to coordination and scheduling conflicts with the adjacent 524 East Brokaw Road site, on March 5, 2010, the SCCDEH agreed that quarterly groundwater monitoring at the Subject Site may begin with the Second Quarter 2010. Four consecutive groundwater monitoring and sampling events were performed by E2C in April, July, and October 2010, and January 2011. During this 2010-2011 period, the highest detections in groundwater samples from the three monitoring wells were 260 ppb TPHg; 1.2 ppb Benzene; and toluene, ethyl benzene, xylenes and MTBE not detected or below ESLs. The report of the January 2011 groundwater monitoring and sampling event concluded the following. Historically, the primary constituents of concern (COC) were benzene and TPHg in cross-gradient well PR-2 and up-gradient well PR-3. The highest previous detections in groundwater samples from well PR-2 were 83 µg/L benzene (7/10/00) and 1,900 µg/L TPHG (5/2/02), and the highest previous detections in groundwater samples from well PR-3 were 750 µg/L benzene (7/12/02) and 3,500 µg/L TPHG (5/2/02). Note that historically (2000-2002), results of groundwater samples from down-gradient well PR-1 were almost all below detection limits with the exception of two trace level detections of TPHg. The current First Quarter (January) 2011, Fourth Quarter (October) 2010, Third Quarter (July) 2010 and Second Quarter (April) 2010 sample results are significantly below the previous detected concentrations from the years 2000 through 2002. The January 2011 results were almost all below method detection limits with the exception of a few very low trace level detections of TPHg, benzene and MTBE just slightly above detection limits; these traces were lower than both the corresponding Environmental Screening Level (ESL) (RWQCB, November 2007, Revised May 2008) and Maximum Contaminant Level (MCL) (CDPH, November 2008). The January 2011 groundwater monitoring event was the fourth of four consecutive quarterly events required by the Santa Clara County Department of Environmental Health (SCCDEH). Groundwater sample analytical results have mostly remained below detection limits, or at trace levels below or only slightly above screening levels, for the four consecutive quarterly monitoring events from April 2010 through January 2011. Sample results from the last of the four quarterly monitoring events (January 2011) were all below ESLs and MCLs. The available data indicates the following: - residual dissolved petroleum hydrocarbon concentrations in groundwater are mostly at non-detectable levels with some low to trace level concentrations (all below ESLs and MCLs in January 2011), - the "plume" is stable or shrinking, and - Natural attenuation is occurring or can be expected to occur over time.

<b>Site History:</b>			

A Site history / investigation background from approximately 1985 through 1999 and from approximately 1999 to 2002 is presented in a previous work plan and report (Cypress Environmental, June 15, 2000 and October 2002, respectively) (the October 2002 report also contains information on adjacent / neighboring sites). Another previous report contains background information on the adjacent site at 524 East Brokaw Road, San Jose (Environmental Investigation Services, Inc., January 25, 2010). The following is a summary of background information obtained from these and other documents, including quarterly groundwater monitoring reports for monitoring and sampling events in 2010-2011.

The site was previously leased by John De Martini to Precision Roofing. The 1,000 gallon gasoline UST, operated by Precision Roofing, had a leak circa 1985. During UST removal (circa 1986) a hole was discovered in the tank and a soil sample from the fill end of the excavation contained 1,215 ppm TPHg. In December 1988, a grab groundwater sample collected from the tank pit contained 26,000 ppb TPHg; 4,900 ppb benzene; 600 ppb toluene; and 5,100 ppb xylenes. It is assumed that the grab groundwater sample was from a "tank pit" well, described as 3-inch diameter black plastic, installed in the backfill, this well was not seen during 2010-2011 quarterly monitoring events and it is unknown if it still exists. Three groundwater monitoring wells (PR-1, PR-2, and PR-3) were installed in August 1991 and five groundwater monitoring and sampling events were performed in July, August and October 2000, and May and July 2002, by Cypress Environmental. During this 2000-2002 period, the highest detections in groundwater samples from the three monitoring wells were 3,500 ppb TPHg; 750 ppb Benzene; and 100 ppb MTBE (toluene, ethyl benzene, and xylenes were below ESLs).

A request for closure was presented, and no further action was proposed, in the October 2002 report (Cypress Environmental, October 2002), based on

<i>Map Key</i>	<i>Number of Records</i>	<i>Direction</i>	<i>Distance (mi/ft)</i>	<i>Elev/Diff (ft)</i>	<i>Site</i>	<i>DB</i>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

the following:

"The source of the gasoline and BTEX was removed approximately 16 to 17 years ago" (note: in 2010, approximately 25 years ago)  
 "Free product has not been observed in Site monitoring wells"  
 "Residual concentrations of BTEX in soil are well below the U.S. Environmental Protection Agency's Preliminary Remediation Goals for industrial sites"  
 "TPHg and BTEX appear to be localized in close proximity to the former tank pit"  
 "The Site does not appear to be a source of MtBE", and  
 "Data from the nearby Velcon Filters, Kamper Kits, and Phototron sites indicate that conditions in the area are conducive to natural attenuation (biodegradation)".

A review of the Santa Clara County Department of Environmental Health (SCCDEH) online files was performed for the Subject Site by E2C Inc (E2C) personnel on March 17, 2010 (Local Oversight Program Public Record Document Search, <http://lustop.sccgov.org/files/06S1E30M04f/>). In the Correspondence Files, a directive letter, dated November 23, 2003, was found from the Santa Clara Valley Water District (SCVWD), the former Local Oversight Agency for the Leaking Underground Storage Tank (LUST) Oversight Program. The November 23, 2003 letter acknowledged receipt of the October 2002 report, however, it did not concur with the request for case closure and proposal for no further action. Due to elevated levels of Total Petroleum Hydrocarbons as Gasoline (TPHg) and Benzene detected in groundwater samples from well PR-3, the letter recommended additional investigation in the vicinity of well PR-3 and continuing groundwater monitoring, and required submittal of a work plan to address these concerns. The files indicated that no assessment, investigation, cleanup, or monitoring activities occurred at the Site after July 18, 2002, the date of the last groundwater monitoring event.

A directive letter dated August 11, 2009, from the SCCDEH required groundwater monitoring in January and July 2010. However, this letter was superseded by another SCCDEH directive letter dated January 13, 2010, requiring four consecutive quarterly groundwater monitoring events beginning with the First Quarter 2010, to be coordinated with the groundwater monitoring at the adjacent site at 524 East Brokaw Road. In March 2010, E2C Inc (E2C) was retained to perform the required quarterly groundwater monitoring. Due to coordination and scheduling conflicts with the adjacent 524 East Brokaw Road site, on March 5, 2010, the SCCDEH agreed that quarterly groundwater monitoring at the Subject Site may begin with the Second Quarter 2010.

Four consecutive groundwater monitoring and sampling events were performed by E2C in April, July, and October 2010, and January 2011. During this 2010-2011 period, the highest detections in groundwater samples from the three monitoring wells were 260 ppb TPHg; 1.2 ppb Benzene; and toluene, ethyl benzene, xylenes and MTBE not detected or below ESLs. The report of the January 2011 groundwater monitoring and sampling event concluded the following.

Historically, the primary constituents of concern (COC) were benzene and TPHg in cross-gradient well PR-2 and up-gradient well PR-3. The highest previous detections in groundwater samples from well PR-2 were 83 µg/L benzene (7/10/00) and 1,900 µg/L TPHg (5/2/02), and the highest previous detections in groundwater samples from well PR-3 were 750 µg/L benzene (7/12/02) and 3,500 µg/L TPHg (5/2/02). Note that historically (2000-2002), results of groundwater samples from down-gradient well PR-1 were almost all below detection limits with the exception of two trace level detections of TPHg.

The current First Quarter (January) 2011, Fourth Quarter (October) 2010, Third Quarter (July) 2010 and Second Quarter (April) 2010 sample results are significantly below the previous detected concentrations from the years 2000 through 2002. The January 2011 results were almost all below method detection limits with the exception of a few very low trace level detections of TPHg, benzene and MTBE just slightly above detection limits; these traces were lower than both the corresponding Environmental Screening Level (ESL) (RWQCB, November 2007, Revised May 2008) and Maximum Contaminant Level (MCL) (CDPH, November 2008).

The January 2011 groundwater monitoring event was the fourth of four consecutive quarterly events required by the Santa Clara County Department of Environmental Health (SCCDEH). Groundwater sample analytical results have mostly remained below detection limits, or at trace levels below or only slightly above screening levels, for the four consecutive quarterly monitoring events from April 2010 through January 2011. Sample results from the last of the four quarterly monitoring events (January 2011) were all below ESLs and MCLs. The available data indicates the following:

- residual dissolved petroleum hydrocarbon concentrations in groundwater are mostly at non-detectable levels with some low to trace level concentrations (all below ESLs and MCLs in January 2011),
- the "plume" is stable or shrinking, and
- Natural attenuation is occurring or can be expected to occur over time.

El ID:	10644475	El Description:	Chemical Storage Facilities

**Violations**

Violation Date: 03/15/2016  
 Violation Program: HMRRP  
 Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)  
 Violation Source: CERS  
 Violation Division: Santa Clara County Environmental Health  
 Violation Notes:

Returned to compliance on 07/11/2016. Facility has failed to submit a complete Hazardous Materials Business Plan (HMBP). Please go to <http://cers.calepa.ca.gov> and enter your inventory, storage map/site plan, emergency information and training plans. Your CERS ID is #10644475. For assistance completing your submittals, contact Jeffrey M. Higbee at [jeffrey.higbee@deh.sccgov.org](mailto:jeffrey.higbee@deh.sccgov.org) or call 408-918-4785 \*\*Note: Many records provided by the department have a truncated [Violation Notes] field.

**Violation Description:**

Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

**Evaluations**

Eval Date: 03/15/2016  
 Violations Found: Yes  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Type: Routine done by local agency  
 Eval Division: Santa Clara County Environmental Health  
 Eval Program: HMRRP  
 Eval Source: CERS  
 Eval Notes:

HMBP threshold chemicals onsite today: 1. 55+ gallons of new coolant and coolant in machines (8 machines); Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 03/15/2016  
 Violations Found: No  
 Eval General Type: Compliance Evaluation Inspection  
 Eval Type: Routine done by local agency  
 Eval Division: Santa Clara County Environmental Health  
 Eval Program: HW  
 Eval Source: CERS  
 Eval Notes:

Facility has an active EPA ID number but has not accumulated any hazardous waste currently. Note: the coolant was changed out of the machines approximately a year ago. Only one machine is in operation currently according to Glenda Ruiz. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 10/29/2015  
 Violations Found: No

#### Violations

<b>Violation Date:</b>	10/18/2018	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HW	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
<b>Violation Notes:</b>			

Returned to compliance on 11/20/2018. Per the Hazardous Waste Tracking System, State ID: CAL000306134 is INACTIVE. Reactivate the EPA ID number via the electronic verification questionnaire (e-VQ) at <https://dtsc-web01.dtsc.ca.gov/eVQ/Home.aspx>.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

**Violation Description:**

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

**Violations**

**Violation Date:** 10/18/2018  
**Violation Program:** HW  
**Citation:** HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2  
**Violation Notes:**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health

Returned to compliance on 11/20/2018. Disposal records for 2017 were unavailable for review at the time of inspection. Obtain a copy of the receipt from 2017, and moving forward, retain all disposal records for 3 years.

**Violation Description:**

Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.

**Violations**

**Violation Date:** 10/18/2018  
**Violation Program:** HW  
**Citation:** 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33  
**Violation Notes:**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health

Returned to compliance on 11/09/2018. Observed that the fire extinguishers have not been annually maintained. Last service date: 7/18/2018. Within the next 30 days, have the fire extinguishers recharged.

**Violation Description:**

Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

**Violations**

**Violation Date:** 10/18/2018  
**Violation Program:** HW  
**Citation:** 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
**Violation Notes:**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health

Returned to compliance on 11/20/2018. Observed approx. 6 used oil filters on top of the 55 gal drum of used oil. Obtain a closed container with a complete hazardous waste label to transfer the filters to when they are done draining.

**Violation Description:**

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

**Violations**

**Violation Date:** 10/18/2018

**Violation Notes:**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health

Returned to compliance on 11/20/2018. Business is a tenant to Property Owner, Verity Properties, but has not provided written notification of its applicability and compliance with HMBP requirements. Template form provided.

**Violation Description:**

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Failure to provide a copy of the business plan to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent.

**Violations**

**Violation Date:** 10/18/2018  
**Violation Program:** HW  
**Citation:** 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)  
**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 10/29/2018. As evident by review of disposal records, the last pick-up of used oil occurred on 2/7/2017. Within the next 30 days, make arrangements to have the used oil picked up and retain all disposal documentation for 3 years. Note: Have the used oil picked up at least once a year.

**Violation Description:**

Failure to meet the following conditions of satellite accumulation regulations:

- Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator.
- Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.
- The generator complies with section 66265.171, 66265.172, and 66265.173(a).
- The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words "Hazardous Waste" including specified information
- Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a "90 day" accumulation area
- 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

**Violations**

**Violation Date:** 10/18/2018  
**Violation Program:** HW  
**Citation:** HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple  
**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 11/20/2018. 1 x 15 gal drum of used coolant was not marked with the date it was emptied. If there are no plans to generate used coolant, make arrangements to have this drum recycled or picked up within 1 year of the empty date.

**Violation Description:**

Hazardous Waste Generator Program - Operations/Maintenance - General

**Evaluations**

**Eval Date:** 11/20/2018  
**Violations Found:** No  
**Eval General Type:** Other/Unknown  
**Eval Type:** Other, not routine, done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

On-site to perform a permit investigation in response to owner Kuma Keneni notifying our office that he no longer stores used oil at 55 gallons or greater. Observed the following: - Used Oil: 1 x 30 gal drum - Disposal receipt retained. The 55 gal drum was picked up on 10/29/2018. Based on these observations, the facility's HMBP permit will be inactivated. The HMBP violation cited on the routine inspection conducted on 10/18/2018 will be closed.; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 10/18/2018  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HMRRP  
**Eval Source:** CERS  
**Eval Notes:**

On-site to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Per owner Kuma Keneni, there is very little work performed at Kuma Auto Repair Body & Paint. A walk-through of the facility was conducted with Mr. Keneni. The following hazardous materials were observed at or above HMBP State-reportable thresholds: 1) Used Oil: 1 x 55 gal drum + 1 x 15 gal roller There is no paint booth at this business. Mr. Keneni stated that he rarely does any painting or body work anymore. Welding gases were observed below HMBP quantities. Business last submitted a complete HMBP via Santa Clara County FrontCounter on 3/20/2018. Inventory and owner/operator information reported matches what was observed during today's inspection. At the time of the HMBP annual certification, Mr. Keneni reviews the information to satisfy the requirement of annual HMBP Emergency Response and safety procedures training. A template was provided for him to document this training [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 10/18/2018  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to perform a routine Hazardous Waste Generator inspection. Per owner Kuma Keneni, there is very little work performed at Kuma Auto Repair Body & Paint. A walk-through of the facility was conducted with Mr. Keneni. The following hazardous waste streams were observed: - Used Oil: 1 x 55 gal drum + 1 x 15 gal roller - Used Coolant: 1 x 15 gal drum (observed as empty) There is no paint booth at this business. Mr. Keneni stated that he rarely does any painting or body work anymore. Mr. Keneni also stated that he does not generate used paper filters. Observed approximately 7 used oil filters (metal-cased) actively draining into the used oil drum. Mr. Keneni was informed that if he generates used coolant, his Hazardous Waste Generator permit category will need to be adjusted. He stated that he will make arrangements to get rid of the drum. Observed current emergency information posted in the shop. Weekly inspections of the hazardous waste storage area are [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval Date:** 11/20/2018  
**Violations Found:** No  
**Eval General Type:** Other/Unknown  
**Eval Type:** Other, not routine, done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** HW  
**Eval Source:** CERS  
**Eval Notes:**

On-site to conduct a follow-up inspection to routine inspection conducted on 10/18/2018. Observed the following violations as corrected: > G002: INACTIVE ID NUMBER > G035: ACCUMULATION TIME: POINT OF GENERATION > G053: CONSOLIDATED MANIFESTING: RECEIPT RETENTION > G110: MAINTENANCE AND OPERATION OF FACILITY > G112: EMERGENCY EQUIPMENT TESTING > G405: CONTAINER MARKING: CONTAMINATED CONTAINERS No further action is required at this time. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Citation:** HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)  
**Violation Notes:**

Returned to compliance on 06/14/2016. Facility has not completed a hazardous materials business plan (HMBP). Please go to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov> and create a user account, obtain user access, then enter all your facility, inventory, map and plans information to have a complete HMBP submittal. Questions regarding this process or if you need more time, please contact Jeffrey M. Higbee at 408-918-4785 or [jeffrey.higbee@deh.sccgov.org](mailto:jeffrey.higbee@deh.sccgov.org) \*\*Note: Many records provided by the department have a truncated [Violation Notes] field.

**Violation Description:**

Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

**Violations**

**Violation Date:** 02/09/2016 **Violation Source:** CERS  
**Violation Program:** HW **Violation Division:** Santa Clara County Environmental Health  
**Citation:** 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174  
**Violation Notes:**

Returned to compliance on 06/14/2016. As evident by 3 containers in the back corner of hazardous waste accumulation area that are maintained onsite with unknown contents, weekly inspections are not being conducted. Please identify these containers and properly dispose of any hazardous wastes.

**Violation Description:**

Failure to inspect hazardous waste storage areas at least weekly.

Manifests verifying proper disposal of waste paints and paint booth filters were unavailable for review during inspection. Please provide the most recent verification of proper disposal of these wastes to this agency.

**Violation Description:**

Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

**Violations**

<b>Violation Date:</b>	02/09/2016	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	HW	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)		
<b>Violation Notes:</b>			

Returned to compliance on 06/14/2016. 1 x 55 gallon drum of hazardous waste in the waste accumulation area was marked but the detail information was illegible.

**Violation Description:**

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

**Evaluations**

<b>Eval Date:</b>	02/09/2016
<b>Violations Found:</b>	Yes
<b>Eval General Type:</b>	Compliance Evaluation Inspection
<b>Eval Type:</b>	Routine done by local agency
<b>Eval Division:</b>	Santa Clara County Environmental Health
<b>Eval Program:</b>	HW
<b>Eval Source:</b>	CERS
<b>Eval Notes:</b>	

The used oil dolly was marked today with details; also the ER plan was posted.; Note: data in [EVAL Notes] field for some records is truncated from the source.

<b>Eval Date:</b>	02/09/2016
<b>Violations Found:</b>	Yes

<b>Site History:</b>			

Soil samples collected in 1989 during the removal of an underground storage tank used to collect waste/rinse water from a painting operation contained elevated concentrations of TCE and other volatile organic compounds. This area is a suspected source of VOCs detected in groundwater samples collected at this site and the adjacent property, the former FMC site at 495 East Brokaw Road. The property owner of 1819 Junction Ave. is planning to collect soil and groundwater samples near a former underground storage tank (UST) to assess the presence of volatile organic chemicals in July 2015. In December 2018, a pilot injection test was conducted by injecting emulsified vegetable oil (EVO) at eight boring locations. Post-remediation groundwater monitoring is being conducted.

<b>Title Description Comments:</b>		Call Summary - with Terry McManus of GES. Terry indicated that they will likely need an extension for the Remedial Action Plan (RAP) that is currently due on October 30, 2017. Terry indicated that they are still of the opinion that the pollution on the Junction Oaks property was from the former FMC site. We briefly reviewed the soil quality data collected at the property boundary on the FMC site in 1989 and the Junction Oaks site in 2016-17 and that data did NOT point to a significant source of VOCs from the former FMC site. Based on the soil and groundwater data collected at the former underground storage and wash rack at the JO site, the Water Board considers this area as a source of VOCs. The Water Board would welcome any other data that would revise that interpretation. Terry indicated that he will reach out to FMC (Stephen Carlton) and try & coordinate a remedial effort for the sites. Terry will also request and extension for the RAP, likely till the end of November 2017.

<b>Lead Agency:</b>	SANTA CLARA COUNTY LOP	<b>Stop Description:</b>	
<b>Local Agency:</b>	SANTA CLARA COUNTY LOP	<b>Case Worker:</b>	TLF
<b>CUF Case:</b>	YES	<b>File Location:</b>	All Files are on GeoTracker or in the Local Agency Database

**Potential Media of Concern:** Other Groundwater (uses other than drinking water)  
**How Discovered Description:**  
**Calwater Watershed Name:** Santa Clara - Coyote Creek (205.30)  
**DWR GW Subbasin Name:** Santa Clara Valley - Santa Clara (2-009.02)  
**Disadvantaged Community:**  
**Site History:**

In 1985, a 500-gallon gasoline USt was removed from the site and reported 530 ppm TPHg in the soil. In 1994, 1 monitoring well (MW1) and 1 boring (B2) were advanced onsite. Maximum concentrations reported in soil were reported of 9,100 ppm TPHg, 61 ppm Benzene, 270 ppm Toluene, 94 ppm Ethylbenzene, and 540 ppm Xylenes. In 1995 - 2 wells (MW2 and MW3) were installed and were reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). In 1997, 3 borings (EB9 through EB11) were advanced on and offsite. Additionally, wells MW1 and MW2 were destroyed. Grab groundwater samples were collected from the 2 offsite borings and were not reported to have concentrations of the COCs above the laboratory reporting limits. In 2001, 5 soil borings (B21, B23, B28, B29, and B32) were advanced on and offsite to depths of 21-27ft bgs. The highest concentrations of TPHg (1,100 ppm) were reported for the sample collected from boring B28 at 20 ft bgs. In 2004, an extraction well (EW1) was installed to 25.4 ft bgs within the former UST excavation in order to remove free product (FP) from the site. FP had been reported in well MW1 prior to it's destruction. In 2007, 2 borings were advanced offsite. Soil samples were reported to have low to non-detectable concentrations of COCs. Only grab groundwater samples from boring B33 was reported to have detectable concentrations with maximum concentrations of 170 ppb TPHg, 2.4 ppb Benzene, 1.6 ppb Toluene, 1.3 ppb Ethylbenzene, and 3 ppb Xylenes. A geophysical survey was proposed and additional offsite investigation to delineate the plume.

**Regulatory Activity**

**Cleanup History Link:** [https://geotracker.waterboards.ca.gov/profile\\_report\\_include?global\\_id=T0608500977&tabname=regulatoryhistory](https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T0608500977&tabname=regulatoryhistory)  
**Potential Media of Concern:** OTHER GROUNDWATER (USES OTHER THAN DRINKING WATER)  
**User Defined Beneficial Use:**  
**DWR GW Sub Basin:** Santa Clara Valley - Santa Clara (2-009.02)  
**Calwater Watershed Name:** Santa Clara - Coyote Creek (205.30)  
**Post Closure Site Management:**  
**Future Land Use:**  
**Cleanup Oversight Agencies:** SANTA CLARA COUNTY LOP (LEAD) - CASE #: 06S1E30M02f  
CASEWORKER: TRAVIS L. FLORA  
SAN FRANCISCO BAY RWQCB (REGION 2) - CASE #: 10-058  
CASEWORKER: Regional Water Board  
**Gndwater Monitoring Freque:** # OF WELLS MONITORED - SEMI-ANNUALLY : 5  
**Site History:**

In 1985, a 500-gallon gasoline USt was removed from the site and reported 530 ppm TPHg in the soil. In 1994, 1 monitoring well (MW1) and 1 boring (B2) were advanced onsite. Maximum concentrations reported in soil were reported of 9,100 ppm TPHg, 61 ppm Benzene, 270 ppm Toluene, 94 ppm Ethylbenzene, and 540 ppm Xylenes. In 1995 - 2 wells (MW2 and MW3) were installed and were reported to have low to non-detectable concentrations of the Constituents of Concern (COCs).

In 1997, 3 borings (EB9 through EB11) were advanced on and offsite. Additionally, wells MW1 and MW2 were destroyed. Grab groundwater samples were collected from the 2 offsite borings and were not reported to have concentrations of the COCs above the laboratory reporting limits.

In 2001, 5 soil borings (B21, B23, B28, B29, and B32) were advanced on and offsite to depths of 21-27ft bgs. The highest concentrations of TPHg (1,100 ppm) were reported for the sample collected from boring B28 at 20 ft bgs.

In 2004, an extraction well (EW1) was installed to 25.4 ft bgs within the former UST excavation in order to remove free product (FP) from the site. FP had been reported in well MW1 prior to it's destruction.

In 2007, 2 borings were advanced offsite. Soil samples were reported to have low to non-detectable concentrations of COCs. Only grab groundwater samples from boring B33 was reported to have detecable concentrations with maximum concentrations of 170 ppb TPHg, 2.4 ppb Benzene, 1.6 ppb Toluene, 1.3 ppb Ethylbenzene, and 3 ppb Xylenes.

A geophysical survey was proposed and additional offsite investigation to delineate the plume.

The Site was agricultural land before 1960. An aluminum extrusion plant operated at the Site from 1960 to 1966, under several owners. FMC used the Site from 1966 through 1988 to manufacture commercial logging equipment and military ordnance. FMC purchased the Site in 1983, then sold the Site in 1987. The Site is currently owned by 495 East Brokaw Road, LLC, and leased by various tenants. FMC began environmental investigations at the Site in 1986 and identified high boilingpoint hydrocarbons and volatile organic compounds (VOCs) in the Site soil and groundwater. Approximately 1,200 cubic yards of impacted soils were excavated from specific sumps and pits at the Site in 1987 and 1988. In 1988, FMC conducted further investigations of soil and groundwater that confirmed that VOC impacts were still present in shallow soil and groundwater. FMC reported these results to the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) in the Comprehensive Site Assessment Report - Soil and Ground-Water Conditions, FMC Corporation, 495 East Brokaw Road, San Jose, California in 1989 (EMCON, 1989). In February 1990, the RWQCB adopted Order No. 90-032, Site Cleanup Requirements for: FMC Corporation Ground Systems Division and 495 East Brokaw Associates for the Property Located at: 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 1990) requiring completion of Site characterization. In response, FMC submitted an Additional Soil and Ground-Water Investigation Report, FMC Corporation, 495 East Brokaw Road, San Jose, California in April 1991 (EMCON, 1991a), and an Addendum to Additional Soil and Ground-Water Investigation Report, FMC Corporation, 495 East Brokaw Road, San Jose, California in June 1991 (EMCON, 1991b). Quarterly groundwater monitoring was conducted and reports were submitted in accordance with Order No. 90-032. Order No. 90-032 was amended by Order No. 92-053, Amending SCO 90-032, Site Cleanup Requirements for: FMC Corporation-Ground Systems Division and 495 East Brokaw Associates, 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 1992). Order No. 00-092, Final Site Cleanup Requirements and Recession of Orders Nos. 90-032 and 92-053 for: FMC Corporation and 495 East Brokaw Road, LLC for the property located at 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 2000) was adopted on August 16, 2000 and rescinded Orders No. 90-032 and 92-053. Site groundwater monitoring is now occurring in accordance with the revised Self-Monitoring Program (SMP) for the Site dated January 18, 2002 (RWQCB, 2002). The primary VOCs detected in shallow zone groundwater at the Site are trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), and vinyl chloride. The presence of cis-1,2- 1-3 DCE and vinyl chloride are attributable to reductive dehalogenation of TCE. The two areas primarily impacted at the Site are the northeast corner and the east side of the building in the vicinity of the storm sewer. The nature and extent of impacts are well defined and limited. Historical data indicate that VOC migration in groundwater is minimal. The A-level aquifer beneath the Site has not been impacted with VOCs. A pilot test was performed in 1999 to evaluate the effectiveness of Hydrogen Release Compound (HRC) to stimulate anaerobic biodegradation of VOCs in Site soil and groundwater. The Pilot Study Results Report and Full-Scale Implementation Workplan for In-Situ Bioremediation Using HRC Injection (Workplan) (HSI GeoTrans, 2000) presented the successful results of the pilot study and a work plan for full-scale implementation. As part of the pilot study four pilot wells were installed. Full-scale implementation of enhanced bioremediation began in May 2000. A total of 103 HRC points were drilled at the northeast corner of the property (and along the northern boundary) and approximately 13,300 pounds of HRC were injected into the subsurface during May 2000. Ninety additional injection points were drilled and approximately 4,500 pounds of HRC were injected in November 2001 in accordance with the Work Plan Addendum for Continued In-Situ Bioremediation Using a Second Application of HRC (GeoTrans, 2001). As presented in the Five-Year Status Report and Semi-Annual Monitoring Report, January through June 2005, Former FMC Corporation Facility, 495 East Brokaw Road, San Jose, Santa Clara County, California, sufficient groundwater data have been collected in the southern portion of the Site to thoroughly characterize Site conditions and monitor the initial effectiveness of the enhanced biodegradation program (Parsons 2005a, Parsons 2005b). Continued semi-annual monitoring would produce unwarranted replicate data and create an unnecessary financial burden for FMC. Therefore, FMC proposed to monitor Site wells W-1, W-4, W-5, W-6, W-10, and W-13 for VOCs on an annual basis. Upon approval, wells in the vicinity of the off-site investigation (W-2, W-8, W-9, W-35 and W-36) would continue to be sampled for VOCs semi-annually, consistent with the current Revised SMP found in the RWQCB Final Site Cleanup Requirements, Order No. 00-092 (RWQCB, 2000). Additionally, FMC completed the two years of semi-annual enhanced biodegradation monitoring as proposed in the Data Transmittal and Assessment Report submitted to the RWQCB in June 2003. The data indicates that additional monitoring for enhanced biodegradation parameters is no longer warranted. Therefore, FMC proposed to discontinue monitoring for enhanced biodegradation parameters.

**Calwater Watershed Name:** Santa Clara - Coyote Creek (205.30)

**Post Closure Site Management:** NO GROUNDWATER EXTRACTION AT ANY DEPTH WITHOUT APPROVAL

**Future Land Use:**

**Cleanup Oversight Agencies:** SAN FRANCISCO BAY RWQCB (REGION 2) (LEAD) - CASE #: 43S0262  
CASEWORKER: RON GOLOUBOW

**Site History:**

The Site was agricultural land before 1960. An aluminum extrusion plant operated at the Site from 1960 to 1966, under several owners. FMC used the Site from 1966 through 1988 to manufacture commercial logging equipment and military ordnance. FMC purchased the Site in 1983, then sold the Site in 1987. The Site is currently owned by 495 East Brokaw Road, LLC, and leased by various tenants. FMC began environmental investigations at the Site in 1986 and identified high boilingpoint hydrocarbons and volatile organic compounds (VOCs) in the Site soil and groundwater. Approximately 1,200 cubic yards of impacted soils were excavated from specific sumps and pits at the Site in 1987 and 1988. In 1988, FMC conducted further investigations of soil and groundwater that confirmed that VOC impacts were still present in shallow soil and groundwater. FMC reported these results to the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) in the Comprehensive Site Assessment Report - Soil and Ground-Water Conditions, FMC Corporation, 495 East Brokaw Road, San Jose, California in 1989 (EMCON, 1989). In February 1990, the RWQCB adopted Order No. 90-032, Site Cleanup Requirements for: FMC Corporation Ground Systems Division and 495 East Brokaw Associates for the Property Located at: 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 1990) requiring completion of Site characterization. In response, FMC submitted an Additional Soil and Ground-Water Investigation Report, FMC Corporation, 495 East Brokaw Road, San Jose, California in April 1991 (EMCON, 1991a), and an Addendum to Additional Soil and Ground-Water Investigation Report, FMC Corporation, 495 East Brokaw Road, San Jose, California in June 1991 (EMCON, 1991b). Quarterly groundwater monitoring was conducted and reports were submitted in accordance with Order No. 90-032. Order No. 90-032 was amended by Order No. 92-053, Amending SCO 90-032, Site Cleanup Requirements for: FMC Corporation-Ground Systems Division and 495 East Brokaw Associates, 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 1992). Order No. 00-092, Final Site Cleanup Requirements and Recession of Orders Nos. 90-032 and 92-053 for: FMC Corporation and 495 East Brokaw Road, LLC for the property located at 495 East Brokaw Road, San Jose, Santa Clara County (RWQCB, 2000) was adopted on August 16, 2000 and rescinded Orders No. 90-032 and 92-053. Site groundwater monitoring is now occurring in accordance with the revised Self-Monitoring Program (SMP) for the Site dated January 18, 2002 (RWQCB, 2002). The primary VOCs detected in shallow zone groundwater at the Site are trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), and vinyl chloride. The presence of cis-1,2- 1-3 DCE and vinyl chloride are attributable to reductive dehalogenation of TCE. The two areas primarily impacted at the Site are the northeast corner and the east side of the building in the vicinity of the storm sewer. The nature and extent of impacts are well defined and limited. Historical data indicate that VOC migration in groundwater is minimal. The A-level aquifer beneath the Site has not been impacted with VOCs. A pilot test was performed in 1999 to evaluate the effectiveness of Hydrogen Release Compound (HRC) to stimulate anaerobic biodegradation of VOCs in Site soil and groundwater. The Pilot Study Results Report and Full-Scale Implementation Workplan for In-Situ Bioremediation Using HRC Injection (Workplan) (HSI GeoTrans, 2000) presented the successful results of the pilot study and a work plan for full-scale implementation. As part of the pilot study four pilot wells were installed. Full-scale implementation of enhanced bioremediation began in May 2000. A total of 103 HRC points were drilled at the northeast corner of the property (and along the northern boundary) and approximately 13,300 pounds of HRC were injected into the subsurface during May 2000. Ninety additional injection points were drilled and approximately 4,500 pounds of HRC were injected in November 2001 in accordance with the Work Plan Addendum for Continued In-Situ Bioremediation Using a Second Application of HRC (GeoTrans, 2001). As presented in the Five-Year Status Report and Semi-Annual Monitoring Report, January through June 2005, Former FMC Corporation Facility, 495 East Brokaw Road, San Jose, Santa Clara County, California, sufficient groundwater data have been collected in the southern portion of the Site to thoroughly characterize Site conditions and monitor the initial effectiveness of the enhanced biodegradation program (Parsons 2005a, Parsons 2005b). Continued semi-annual monitoring would produce unwarranted replicate data and create an unnecessary financial burden for FMC. Therefore, FMC proposed to monitor Site wells W-1, W-4, W-5, W-6, W-10, and W-13 for VOCs on an annual basis. Upon approval, wells in the vicinity of the off-site investigation (W-2, W-8, W-9, W-35 and W-36) would continue to be sampled for VOCs semi-

annually, consistent with the current Revised SMP found in the RWQCB Final Site Cleanup Requirements, Order No. 00-092 (RWQCB, 2000). Additionally, FMC completed the two years of semi-annual enhanced biodegradation monitoring as proposed in the Data Transmittal and Assessment Report submitted to the RWQCB in June 2003. The data indicates that additional monitoring for enhanced biodegradation parameters is no longer warranted. Therefore, FMC proposed to discontinue monitoring for enhanced biodegradation parameters.

**Sites from GeoTracker Search - Cleanup Action Report (as of Oct 31, 2019)**

**Action Type:** IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE) **Begin Date:** 9/5/2006  
**Phase:** Water **End Date:** 9/22/2006  
**Description:** 91 In-situ chemical oxidation and 3 in-situ bioremediation/ZVI points where 500 gallons of water, 1983 pounds persulfate, 25 gallons of NAOH (36% by weight sodium persulfate solution) were injected to treat TCE and breakdown products in groundwater at off-site Smurfit-Stone and 1901 Junction Ave properties

**Contaminant Mass Removed:**

**Citation:** HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
**Violation Notes:**

Returned to compliance on 09/21/2016. The plan does not address the secondary containment for the drums of gasoline/oil stored in the hazardous waste storage area. Although these containers are "portable" only mobile refuelers and non-transportation tank trucks are exempt from providing appropriately sized containment (see 112.8(c)(11)).

**Violation Description:**

Failure to discuss in the SPCC Plan the appropriate containment, diversionary structures, or equipment to prevent a discharge, including typical failure mode and most likely quantity of discharge for the following: bulk storage containers, mobile/portable containers, oil-filled equipment, piping and related appurtenances, mobile refuels or non-transportation-related tank cars, and transfer areas, equipment and activities.

**Violations**

**Violation Date:** 09/11/2019  
**Violation Program:** HW  
**Citation:** HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9  
**Violation Notes:**

Observed an open cardboard box with approximately 20 closed plastic containers that have a pourable amount of tint product. The tint container had a Global Harmonization System (GHS) label for "Health Hazard" and "Corrosive" and the ingredient "Alcohols C10-16, ethoxylated" was listed. This facility has historically disposed of non-empty paint tint containers as non-RCRA hazardous waste according to Uniform Hazardous Waste Manifests until 2018. As per the "Paint Tint Collection and Recycling Program" procedure described on the outside of the paint tint collection box and confirmed by Madeline Mirza, the facility is currently disposing of all paint tint containers through a recycling program and using UPS/FedEx as a transporter. To demonstrate that the recycled tint wastes are exempt from hazardous waste requirements, provide the following: 1.) Name and contact information of the recycling center receiving the tint containers; 2.) Shipping papers/disposal records [Truncated] \*\*Note: Many records provided by the department have a truncated [Violation Notes] field.

**Violation Description:**

Failure to manage a recyclable material pursuant to HSC 6.5 25143.2(b), (c), or (d).

**Violations**

**Violation Date:** 09/11/2019  
**Violation Program:** APSA  
**Citation:** HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
**Violation Notes:**

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Facility failed to include spill reporting procedures (as presented in Appendix C of their SPCC) for the following items: 'that estimates the total quantity of discharge into a navigable waterway' (as described in 40 CFR 112.1(b)); 'any damages or injuries caused by the discharge'. Update this Appendix to include all required information.

**Violation Description:**

Failure to include in the SPCC Plan:

1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge
2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

**Violations**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Plan does not specify an industry standard for tank integrity testing procedures. Procedures observed on-site do not comply with any known industry standards. Plan does not specify the qualifications for the personnel performing tests and inspections for tank integrity.

**Violation Description:**

Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards:

1. On a regular schedule.
2. After material repairs are made.
3. By qualified personnel.
4. The frequency and type of testing and inspections based on container size, configuration, and design.

**Violations**

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 09/21/2016. Records demonstrating the routine testing of tank level sensing devices were not available except for 7/15/15. SPCC plan notes that Preventative Maintenance and testing will be conducted twice each year.

**Violation Description:**

Failure to regularly test liquid level sensing devices to ensure proper operation.

**Violations**

**Violation Date:** 09/11/2019  
**Violation Program:** HMRRP  
**Citation:** HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1

**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Facility operator, Anthony Cobos, was not aware of any HMBP property owner notification letter completed in the past. A property owner notification template was provided during the inspection.

**Violation Description:**

Failure to provide a copy of the business plan to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent.

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 09/21/2016. Containment structures for containers are not of sufficient size to contain 100% of the capacity of the container.

**Violation Description:**

Failure to provide adequate secondary containment for mobile or portable oil storage containers (excluding mobile refuelers and other non-transportation-related tank trucks) with sufficient capacity to contain the largest single compartment or container and sufficient freeboard to contain precipitation.

**Violations**

**Violation Date:** 09/11/2019  
**Violation Program:** HW  
**Citation:** HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

3 years of uniform manifest disposal records shows a regularly scheduled pickup of hazardous waste every 2-3 months. There was no record for the 227 days between 9/12/2018 and 4/26/2019. The hazardous waste disposal amount on 4/26/2019 was more than double the typical the historical amount for that month. Based on this information, the facility accumulated wastes on-site for longer than 180 days.

**Violation Description:**

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met:

- (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.
- (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f).
- (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

**Violation Source:** CERS  
**Violation Division:** Santa Clara County Environmental Health  
**Violation Notes:**

Returned to compliance on 09/21/2016. Records of routine weekly inspections of petroleum storage areas are incomplete. Noted records of weekly inspections on "Weekly FSA Checklist (10.15.2012)" up through November 2015. No records from Nov 2015 through Aug 2016. Additionally, form provided does not have space to specifically note those items outlined in the SPCC plan as being inspected weekly \*\*Note: Many records provided by the department have a truncated [Violation Notes] field.

<b>Violation Notes:</b>			

Facility failed to document a Designated Facility Response Coordinator Contact Phone Number that goes to a facility response coordinator. The number listed in the SPCC goes to an automated system. Additionally, facility included the incorrect State Emergency Response contact phone number. The listed number of 510-286-0895 was called and confirmed to no longer be a Spill Notification phone number. Update this number to 800-852-7550. Add Local CUPA contact phone number of 408-918-3400.

**Violation Description:**

Failure to include in the SPCC Plan:

1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge
2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

**Violations**

<b>Violation Date:</b>	08/22/2016	<b>Violation Source:</b>	CERS
<b>Violation Program:</b>	APSA	<b>Violation Division:</b>	Santa Clara County Environmental Health
<b>Citation:</b>	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)		
<b>Violation Notes:</b>			

Returned to compliance on 09/21/2016. Plan does not address spill prevention at the point of filling for the portable containers of gasoline/oil.

**Violation Description:**

Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

**Evaluations**

**Eval Date:** 09/16/2019  
**Violations Found:** Yes  
**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** APSA  
**Eval Source:** CERS  
**Eval Notes:**

Conducted an Aboveground Petroleum Storage Act (APSA) Routine Inspection walk-through with Robin Ward from Hazardous Materials Compliance Division on 9/10/2019 and the inspection was concluded on the date of this report. The facility has 1,500 gallons of diesel storage and is a Tier I Qualified Facility. Facility created a SPCC Plan that was last reviewed on 8/15/2015. SPCC Plan was provided by request via email prior to the inspection and a copy was available for review during the inspection on-site. The facility submitted an annual Tank Facility Statement via CERS (ID# 10355653) on 2/27/2019. The following required records were reviewed as a part of the inspection: - Tank inspection records; - Annual oil-handler training logs; - Annual Discharge Prevention Briefings. \*Action Items for Facility to address: 1.) Facility is eligible to follow Industry Standard STI SP001 to meet tank integrity testing requirements and periodic inspection requirements. [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Eval General Type:** Compliance Evaluation Inspection  
**Eval Type:** Routine done by local agency  
**Eval Division:** Santa Clara County Environmental Health  
**Eval Program:** APSA  
**Eval Source:** CERS  
**Eval Notes:**

Conducted walk through and paperwork review in support of review of SPCC plan dated 8/7/2009 (reviewed in DEH offices) as provided by B. Gadberry, Regional Environmental Compliance Coordinator. Site has 1500 gallon double walled AST holding diesel for emergency generator system, 400 gallon "oil filled electrical equipment" transformer, and 2x55 gallon drums for waste oil/gasoline. --Transformer is SPCC eligible and is addressed in plan as federally defined "oil filled Operational Equipment" with appropriate containment. Equipment is exempt from APSA regulation per 25270.2(a)(4). Annual inventory statement submitted via CERS as HMBP inventory 8/5/2016 AST is double walled UL Listed. Verified that SPCC plan is available via store's intranet with all signatures and certifications. Verified that overfill monitoring equipment has been inspected at least once. -- third party service by Bay City, noted -- only receipt available was 7/15/15 Training records are noted as [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

**Site History:**

Site History: The site is a news paper printing and hazardous waste facility. The facility also maintained a fleet of trucks and automobiles for deliveries and service. The property included the main press building, an automobile maintenance garage, a car wash, and a pumping station formerly supplied by eight underground storage tanks. The known release of fuel led to several soil and groundwater investigation at the site. In 1991, under the direction of the Santa Clara Valley Water District (SCVWD) all USTs were removed. Based on the results of the ongoing investigations and risk assessment, in January 1996, the Regional Water Quality Control Board (RWQCB) requested the facility to determine the plume stability followed by source removal and the evidence of passive remediation (natural attenuation) occurring in groundwater.

On July 22, 1993, San Jose Mercury News was authorized to manage hazardous waste under Permit by Rule. On December 16, 1996, facility submitted the Phase I Environmental Assessment identifying six areas of concern to be further investigated. On December 8, 1997, DTSC conducted a site inspection and concluded that further investigation is needed. A Corrective Action Consent Agreement was signed with the facility on May 26, 2000 to reimburse the oversight costs for the investigation. The facility investigated five of the six areas of concern and postponed one area of concern pending building renovation.

Project Description: Corrective action under Consent Agreement

CYANIDE (FREE), METALS

**Site History:**

California Electro-Plating Company (CEPCO) was located in suites B, C, and D (3 of 5 separate lease units, 9,500 square feet). The building is in an industrial area of San Jose. California Electro-Plating Company (CEPCO) was in operation at this site from 1974 to 1993. CEPCO's shop caught fire on July 1, 1993 and the business was destroyed. The U.S. EPA took jurisdiction of the containment and cleanup activities in conjunction with the City of San Jose Fire Department and Hazardous Materials Department. The City of San Jose, after conferring with the Fire Department and Hazardous Materials issued an occupancy permit after completion of the repairs. CEPCO did not return to the building after it was cleaned and repaired. A CERCLA Screening Site Inspection was done in 1991 with the recommendation of "No Further Action (NFA) based on sampling results very low metal (Cadmium, Chromium, Copper, Nickel, Zinc, Lead) concentrations below the concrete floor, the lack of potential impact on groundwater, and Environmental Protection Agency (EPA) and San Jose Fire Department study results". The site is listed under the EPA as an Archive (NFRAP) Site. Current occupant of suites C and D is Filtek Engineering and Black Bear Corporation, a Material Handling Equipment Supplier, occupies Suite B. The other occupants of this building area are as follows: In Suite A, TiSys Construction and Development, and Suite Suite E, A-1 Printing, Ruiz and Sons. During the drive-by , a drum of coolant, valcool, was visible outside the rollup door, and a drill press and lathe were visible inside the building. No other chemical or waste containers were visible. There are no known tenants currently at this site that either store or use hazardous materials.

**Status:** NO FURTHER ACTION  
**Program Type:** EVALUATION  
**CalEnviroScreen Score:** 51-55%

**Document Type:** Other Report  
**Date Completed:** 11/9/1993  
**Comments:** DTSC did not review this report when filed. Removal of 392 yards of debris and 6,600 gallons of process liquids and 2,400 gallons of wash water were disposed. Site was cleared of the fire debris and pressure washed . Soil sampling also occurred under the process equipment in the native dirt and analysed for chromium, copper, lead, nichel, zinc, total cyanide, and pH.

**Site History:**

Prior to use by Markovitz and Fox as a metal recycling operation, the site was a pear orchard. Markovitz and Fox purchased the site in 1957 and began operations in 1964. The facility ceased operations in March 2000. The on-site metal recycling operations included sorting, shredding, and compressing of ferrous and non-ferrous metals. In 1963, an area approximately 250 by 100 feet was excavated approximately 15 feet deep for a refuse pit in the northwest section of the site. The excavated area was backfilled with solid wastes, until approximately 1970. The landfill area is now currently paved over. Prior to the early 1980s, an incinerator was present in the northern portion of the site and west of the warehouse. The incinerator was used to burn wire insulation and recover the copper wire and melted lead. Markovitz and Fox recycled transformer casings and coils under contract with Pacific Gas and Electric. The transformers still contained some residual transformer fluid. Vehicle batteries were also recycled and stored on site. Battery recycling involved the removal of lead cores from the vehicle batteries. Three underground fuel storage tanks were previously located near the truck scale and another in the northwestern corner of the site. All four tanks were removed under the oversight of the San Jose Fire Department. In November 2001, all buildings and structures on the Site were demolished. The metal recycling operation has been discontinued and the site closed.

To accommodate the requirement of the new consolidation cell on the Brokaw Road Site, the property owners requested a lot line adjustment from the City of San Jose. The lot line adjustment was approved in December 2010. The reconfigured 1633 Oakland Road parcel now consists of approximately 16 acres from the previous approximately 18 acres parcel size.

<b>Document Type:</b>					Technical Report	
<b>Date Completed:</b>					12/18/2013	
<b>Comments:</b>					A former waste oil underground storage tank (UST) was encountered during grading activities that occurred on the site subsequent to DTSC's certification. Polychlorinated biphenyls were discovered in a sediment/sludge sample that was collected from the UST and analyzed. Because of the discovery of the PCBs, DTSC contacted US EPA, and the site was determined to be subject to regulation under the federal Toxic Substances Control Act. The Report was requested by US EPA to summarize the sampling and mitigation activities related to PCBs. Sampling showed that the residual PCB concentrations were below the 1.0 milligram per kilogram (mg/kg) cleanup objective established by DTSC for the Site, with the exception of one sample beneath the future street section, where PCBs were detected at 1.8 mg/kg. The 95 percent upper confidence limit of the arithmetic mean PCB concentrations was calculated to be 0.15 mg/kg; therefore, it was concluded the on sample exceeding the 1.0 mg/kg PCB cleanup objective would not be an environmental concern.

**Site History:**

Prior to use by Markovitz and Fox as a metal recycling operation, the site was a pear orchard. Markovitz and Fox purchased the site in 1957 and began operations in 1964. The facility ceased operations in March 2000. The on-site metal recycling operations included sorting, shredding, and compressing of ferrous and non-ferrous metals. In 1963, an area approximately 250 by 100 feet was excavated approximately 15 feet deep for a refuse pit in the northwest section of the site. The excavated area was backfilled with solid wastes, until approximately 1970. The landfill area is now currently paved over. Prior to the early 1980s, an incinerator was present in the northern portion of the site and west of the warehouse. The incinerator was used to burn wire insulation and recover the copper wire and melted lead. Markovitz and Fox recycled transformer casings and coils under contract with Pacific Gas and Electric. The transformers still contained some residual transformer fluid. Vehicle batteries were also recycled and stored on site. Battery recycling involved the removal of lead cores from the vehicle batteries. Three underground fuel storage tanks were previously located near the truck scale and another in the northwestern corner of the site. All four tanks were removed under the oversight of the San Jose Fire Department. In November 2001, all

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

buildings and structures on the Site were demolished. The metal recycling operation has been discontinued and the site closed.

To accommodate the requirement of the new consolidation cell on the Brokaw Road Site, the property owners requested a lot line adjustment from the City of San Jose. The lot line adjustment was approved in December 2010. The reconfigured 1633 Oakland Road parcel now consists of approximately 16 acres from the previous approximately 18 acres parcel size.

<b>Document Type:</b>					Voluntary Cleanup Agreement Termination Notification	
<b>Date Completed:</b>					4/19/2011	
<b>Comments:</b>					Based on the evaluation of the information provided in the Removal Action Work Plan Completion Report (2011) and the Interim Soil Removal Completion Report (2007); the Site no longer poses a significant risk to human health or the environment. Therefore, DTSC determined that no further action is necessary with respect to investigation and remediation of hazardous substances at the Site and hereby terminates the VCA.

<b>Sub Area Link:</b>						
<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					4/29/2010	
<b>Comments:</b>					Groundwater monitoring down-gradient of the former debris consolidation cell was conducted for four consecutive quarters. Concentrations of COCs (TPH and VOCs) were detected below the cleanup levels at all the groundwater monitoring wells except FCC-MW-3. The elevated concentrations detected at FCC-MW-3 are being contributed to residual groundwater contamination from other historical site operations and continued to be investigated as part of the long-term groundwater monitoring program.

**Sub Area Link:**

**Document Type:** Technical Report  
**Date Completed:** 12/18/2013  
**Comments:** A former waste oil underground storage tank (UST) was encountered during grading activities that occurred on the site subsequent to DTSC's certification. Polychlorinated biphenyls were discovered in a sediment/sludge sample that was collected from the UST and analyzed. Because of the discovery of the PCBs, DTSC contacted US EPA, and the site was determined to be subject to regulation under the federal Toxic Substances Control Act. The Report was requested by US EPA to summarize the sampling and mitigation activities related to PCBs. Sampling showed that the residual PCB concentrations were below the 1.0 milligram per kilogram (mg/kg) cleanup objective established by DTSC for the Site, with the exception of one sample beneath the future street section, where PCBs were detected at 1.8 mg/kg. The 95 percent upper confidence limit of the arithmetic mean PCB concentrations was calculated to be 0.15 mg/kg; therefore, it was concluded the on sample exceeding the 1.0 mg/kg PCB cleanup objective would not be an environmental concern.

**Site History:**

Prior to the purchase of the property by Markovits and Fox in 1957, the property consisted of a large pear orchard, extending from the Coyote Creek, north to present day Brokaw Road and bounded on the east and west by Oakland Road and the Union Pacific Railroad Right-of-Way, respectively.

In 1964, Markovits and Fox began the metal recycling operation, initially on the southern portion of the old pear orchard, near the creek and expanding north to present day Brokaw Road. Only the western most third of the site, near the railroad tracks, was included in the metal recycling operation. The eastern portion remained undeveloped and subleased out for agricultural production, mainly grass type crops such as grain and hay.

In the early 1980s, after the construction of Brokaw Road, the western portion of the property being used as part of the metal recycling operation was divided, with the northern portion being redeveloped into an office building (1040 Brokaw Road, parcel number 237-03-061) and the southern portion near the railroad spur remaining as part of the recycling operation. At this time the entire property (less the portion remaining as part the recycling operation) was graded for the potential for further commercial redevelopment of the property. The eastern portion of the property ceased to be used for grass production, but remained undeveloped.

In the late 1990s, the rest of the property was redeveloped into two more office buildings (1060 and 1080 Brokaw Road, parcel number 237-03-069). The portion of the site being used by the metal recycling operation was used for additional parking for the new buildings.

<b>Document Type:</b>		Technical Report				
<b>Date Completed:</b>		1/21/2014				
<b>Comments:</b>						
The report documents the disturbance and restoration of the consolidation cell cap during the installation of 21 new light poles and their foundations for the new parking lot being constructed over the consolidation cell. The light poles were installed and their foundations completed with concrete. Since the foundations are constructed with concrete, they are more than adequate to perform as cap material over the consolidation cell where the light poles were installed.

<b>Document Type:</b>			Operations and Maintenance Report			
<b>Date Completed:</b>			5/4/2015			
<b>Comments:</b>			An annual site visit was conducted on January 27, 2015 to: 1) observe the condition of pavements and Site improvements over Consolidation Cell B; 2) to observe the portion of the Site outside of the area of Consolidation Cell B for activities or conditions that appear to have potential to expose impacted soil; and 3) to document that Site use activities are in compliance with the Land Use Covenant. The Report documented that the cap over Consolidation Cell B was observed to be intact, no evidence of activities that may have breached the cap was observed, and no violations of the Land Use Covenant were noted. Recommendations were included in the Report to repair a storm drain inlet adjacent to an area of ponded water and to smooth and recompact the surface of the cap with vehicle track ruts. These repairs were subsequently performed.

**Site History:**

Prior to the purchase of the property by Markovits and Fox in 1957, the property consisted of a large pear orchard, extending from the Coyote Creek, north to present day Brokaw Road and bounded on the east and west by Oakland Road and the Union Pacific Railroad Right-of-Way, respectively.

In 1964, Markovits and Fox began the metal recycling operation, initially on the southern portion of the old pear orchard, near the creek and expanding north to present day Brokaw Road. Only the western most third of the site, near the railroad tracks, was included in the metal recycling operation. The eastern portion remained undeveloped and subleased out for agricultural production, mainly grass type crops such as grain and hay.

In the early 1980s, after the construction of Brokaw Road, the western portion of the property being used as part of the metal recycling operation was divided, with the northern portion being redeveloped into an office building (1040 Brokaw Road, parcel number 237-03-061) and the southern portion near the railroad spur remaining as part of the recycling operation. At this time the entire property (less the portion remaining as part the recycling operation) was graded for the potential for further commercial redevelopment of the property. The eastern portion of the property ceased to be used for grass production, but remained undeveloped.

In the late 1990s, the rest of the property was redeveloped into two more office buildings (1060 and 1080 Brokaw Road, parcel number 237-03-069).

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

The portion of the site being used by the metal recycling operation was used for additional parking for the new buildings.

<b>Document Type:</b>		Operations and Maintenance Report				
<b>Date Completed:</b>		5/4/2015				
<b>Comments:</b>		An annual site visit was conducted on January 27, 2015 to: 1) observe the condition of pavements and Site improvements over Consolidation Cell B; 2) to observe the portion of the Site outside of the area of Consolidation Cell B for activities or conditions that appear to have potential to expose impacted soil; and 3) to document that Site use activities are in compliance with the Land Use Covenant. The Report documented that the cap over Consolidation Cell B was observed to be intact, no evidence of activities that may have breached the cap was observed, and no violations of the Land Use Covenant were noted. Recommendations were included in the Report to repair a storm drain inlet adjacent to an area of ponded water and to smooth and recompact the surface of the cap with vehicle track ruts. These repairs were subsequently performed.

<b>Document Type:</b>		Monitoring Report				
<b>Date Completed:</b>		6/20/2014				
<b>Comments:</b>		The Report summarizes groundwater monitoring data collected during the fourth quarter 2013 and first quarter 2014 sampling events. Groundwater sampling results indicate concentrations of several contaminants of concern continue to be detected above the Site cleanup goals. Section 4.3 of the Report includes a monitoring schedule for the remainder of 2014. The monitoring wells will be sampled quarterly; however, analysis for some analytes will only occur annually. Reporting will continue to be performed on a semi-annual basis.

<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					3/25/2015	
<b>Comments:</b>					The Report summarizes groundwater monitoring data collected during sampling events on June 24 and September 11, 2014 from monitoring wells MW-1-CC, MW-2-CC, and MW-5-CCR. Additionally, the Report includes trend analysis of the concentrations of petroleum hydrocarbons, volatile organic compounds (VOCs), and arsenic detected in ground water during the fourteen monitoring events conducted from December 2010 to September 2014. The Report included a request to discontinue groundwater monitoring, which DTSC approved.

**Site History:**

Prior to the purchase of the property by Markovits and Fox in 1957, the property consisted of a large pear orchard, extending from the Coyote Creek,

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

north to present day Brokaw Road and bounded on the east and west by Oakland Road and the Union Pacific Railroad Right-of-Way, respectively.

In 1964, Markovits and Fox began the metal recycling operation, initially on the southern portion of the old pear orchard, near the creek and expanding north to present day Brokaw Road. Only the western most third of the site, near the railroad tracks, was included in the metal recycling operation. The eastern portion remained undeveloped and subleased out for agricultural production, mainly grass type crops such as grain and hay.

In the early 1980s, after the construction of Brokaw Road, the western portion of the property being used as part of the metal recycling operation was divided, with the northern portion being redeveloped into an office building (1040 Brokaw Road, parcel number 237-03-061) and the southern portion near the railroad spur remaining as part of the recycling operation. At this time the entire property (less the portion remaining as part the recycling operation) was graded for the potential for further commercial redevelopment of the property. The eastern portion of the property ceased to be used for grass production, but remained undeveloped.

In the late 1990s, the rest of the property was redeveloped into two more office buildings (1060 and 1080 Brokaw Road, parcel number 237-03-069). The portion of the site being used by the metal recycling operation was used for additional parking for the new buildings.

**Area Name:**  
**Area Link:**  
**Sub Area:**  
**Sub Area Link:**  
**Document Type:** Monitoring Report  
**Date Completed:** 6/20/2014  
**Comments:** The Report summarizes groundwater monitoring data collected during the fourth quarter 2013 and first quarter 2014 sampling events. Groundwater sampling results indicate concentrations of several contaminants of concern continue to be detected above the Site cleanup goals. Section 4.3 of the Report includes a monitoring schedule for the remainder of 2014. The monitoring wells will be sampled quarterly; however, analysis for some analytes will only occur annually. Reporting will continue to be performed on a semi-annual basis.

<b>Document Type:</b> Operations and Maintenance Report						
<b>Date Completed:</b> 5/4/2015						
<b>Comments:</b> An annual site visit was conducted on January 27, 2015 to: 1) observe the condition of pavements and Site						

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
					improvements over Consolidation Cell B; 2) to observe the portion of the Site outside of the area of Consolidation Cell B for activities or conditions that appear to have potential to expose impacted soil; and 3) to document that Site use activities are in compliance with the Land Use Covenant. The Report documented that the cap over Consolidation Cell B was observed to be intact, no evidence of activities that may have breached the cap was observed, and no violations of the Land Use Covenant were noted. Recommendations were included in the Report to repair a storm drain inlet adjacent to an area of ponded water and to smooth and recompact the surface of the cap with vehicle track ruts. These repairs were subsequently performed.

<b>Document Type:</b>					Operations and Maintenance Report	
<b>Date Completed:</b>					4/25/2016	
<b>Comments:</b>					The Annual Operation and Maintenance Observation Report presents the results of the annual inspection performed on April 16, 2016, which included checking the condition of the cap on Consolidation Cell CCB. The conditions of the site, where a new retail development was being constructed, are summarized in the report. The cap over Consolidation Cell CCB was observed to be intact, except for a utility trench on the north site that was excavated in accordance with an DTSC-approved Soil Management Plan.	
<b>Title:</b>					Soil Management Plan for Consolidation Cell Cap Penetration	
<b>Title Link:</b>					<a href="http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60000336&amp;doc_id=60394642">http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60000336&amp;doc_id=60394642</a>	
<b>Area Name:</b>

HALOGENATED SOLVENTS

**Site History:**

Contamination was discovered in soil and groundwater in September 2001. Perchloroethylene was detected in soil as high as 10 parts per million, and trichloroethylene was detected in groundwater as high as 180 parts per billion. Based on these data, DTSC conducted a responsible party search and issued a draft "Imminent and Substantial Endangerment Determination and Remedial Action Order" on August 5, 2002 to potentially responsible parties. Subsequent information submitted by the site owner to DTSC indicated that the San Francisco Bay Regional Water Quality Control Board (RWQCB) was actively working with the site owner to investigate groundwater contamination at the Eldo Drapery & Dry Cleaning site. In a letter to the site owner dated August 26, 2002, DTSC indicated that it would not issue an order as long as the site owner continued to comply with RWQCB requirements to investigate and cleanup the site. RWQCB is currently working with the Site owner to determine the extent of contamination at the Site.

**Site History:**

Ultra-Chem operated in the industrial complex space 425 from June 1980 until 1982. Space 460 was rented in 1981 to early 1983 when all operations moved to 1310 Old Bayshore (see Moyer Chemical Company). Ultra-Chem was a distributor of proprietary chemicals for commercial, industrial use (cleaners, deoxidizers, phosphates, and degreasers) and also had a lacquer thinner reclamation business at unit 460. Ultra-Chem submitted a closure plan in February 1983. Department of Health Services (DHS), predecessor to Department of Toxic Substances Control (DTSC) approved the plan in March 1983. Closure was completed by April 1983. DTSC certified the closure on April 28, 1983 and issued a No Further Action recommendation for the Ultra Chem 425-460 Reynolds Circle site on January 18, 2002. (Ultra-chem moved all its operations to 1310 Old Bayshore formerly occupied by Moyer Chemical) Details of ongoing site activities can be found at the second listing for ULTRA-CHEM (ID - 43280013).

**Status:** NO ACTION REQUIRED

**Comments:** DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require DTSC to pursue corrective actions. Schlage Lock Company - ADF was a tenant and operated a light manufacturing facility at the site from 1983 to 2001. Schlage Lock operated three hazardous waste treatment units under the Conditionally Authorized permitting tier, a primary treatment unit, filter press, and evaporator. Schlage Lock ceased operation and closed the facility in 2001. The company submitted a Post Closure Report to the Santa Clara County Department of Environmental Health, Hazardous Materials Division, who acknowledged closure of the treatment operation in a July 2, 2001 letter. A Facility Closure Report - Request for No Further Action Determination, dated July 6, 2001, was submitted to the Regional Water Quality Control Board (RWQCB) that summarized sampling and removal of petroleum hydrocarbon-impacted soil as part of the closure. RWQCB issued a no further action letter on February 8, 2002. DTSC concluded in the site screening that based on RWQCB's issuance of the no further action letter the site status in Envirostor should be "Refer: RWQCB".

**SITE HISTORY:**

On January 7, 2002, Orchard School District submitted a Draft PEA Workplan to further characterize soil and groundwater conditions at the property located at 1995 Old Oakland Road in San Jose, California. The subject property is an inactive maintenance and storage yard that was previously owned by Browning-Ferris Industries, Inc. (BFI) and is currently owned and operated by Allied Waste Industries, Inc. (Allied). The PEA workplan is intended to close data gaps identified from previous investigations conducted at the site.

On February 1, 2002, DTSC provided comments to the Draft PEA and on February 7, 2002, Response to DTSC comments were received. A Draft Final version nor a Final version of the document were received by DTSC.

On April 9, 2002, DTSC issued a Draft Environmental Oversight Agreement to Orchard School District (OSD) for their signature.

On May 16, 2003, DTSC issued a letter to OSD indicating that the site will be put on Inactive Status. OSD had indicated they wanted to put the site on hold.

HYDROCARBON SOLVENTS

**Site History:**

Prior to 1975, the site was used for agricultural purposes. Van Waters & Rogers (VW&R) was a commercial chemical storage, handling and distribution facility that has been in operation at the site since 1976. VW&R became Vopak USA Inc. (Vopak) on April 2, 2001. Vopak operates the site as a chemical distribution company.

HALOGENATED SOLVENTS

**Site History:**

Sanmina Corp. is a contract manufacturer serving the electronic manufacturing services market. This includes printed circuit board assemblies, wiring harnesses, and testing and assembly of electronic systems. This facility is specifically involved in the manufacturing of circuit boards using electrolytic techniques. Process equipment includes plating baths. Chemicals used in the process are primarily inorganic acids and bases, oxidizers and salts of copper and nickel. The aqueous waste is processed through a tiered permitted treatment plant before being released to a POTW. Solvents such as esopropanol, acetone, and methyl ethyl ketone are used in laboratory operations. Historically, local regional groundwater contamination by chlorinated solvents was found. The extent of contamination was investigated but no determinations as to the source of the contamination were made.

**Site History:**

Cascade Computer Coatings (CCC) is a manufacturer and distributor of custom coatings for use on metal and plastic parts manufactured for the high tech industry and for use on wood furniture. CCC custom blends urethanes, enamels, lacquers, varnishes, and sealers and sells off-the-shelf related products. Cascade stores small and large batches of liquid paint and large batches of custom made powder coatings. The facility is located in an area of light industry. The nearest residential area is at least 1/2 mile from the site.

CHROMIUM III, CHROMIUM VI, COPPER AND COMPOUNDS, LEAD

**Site History:**

The facility conducted metal plating from at least 1988 to 1996. Previous uses are unknown. The facility plan shows an underground storage tank (UST), wastewater treatment area, former concrete pads, chemical storage areas, and a sludge drying area outside the building. It also shows areas inside the buildings for plating and buffing, repair and storage, and sumps. The facility was a hazardous waste generator and small quantity treatment facility. No HMBP was on file at the San Jose Fire Department for this facility and details of chemicals used at the facility are unknown. The property at 1575 Terminal Ave is currently vacant and for sale, while the property at 1585 Terminal Ave is occupied by a construction company.

**Site History:**

The industrial building currently on the Site was built in 1984. The building has been occupied by light industrial businesses including QMS, a printed circuit board assembly business; Thermal Design Systems, business unknown; and Galaxy Microsystems, business unknown. As of 2012, Quantum Clean occupied both 1710 and 1712 Ringwood Avenue, but only used the 1710 Ringwood Avenue Address. The Site is not listed on the DTSC Tiered Permitting Database or the State Water Control Board's Geotracker Database. The Site has been the focus of several past environmental site assessments and investigations where groundwater and soil sampling have been conducted, beginning in 1990. The Regional Water Quality Control Board issued a No Further Action letter in 1994 based on a review of reports prepared for the site. No significant releases of hazardous substances at the Site were identified by these past environmental site assessments and investigations.

**Status:** NO FURTHER ACTION

Based on a review of the Subsurface Investigation Report and other reports prepared by Applied Geosciences, the Regional Water Quality Control Board issued a No Further Action letter to Union Bank in 1994. The site has been the focus of several past environmental site assessments and investigations where groundwater and soil sampling have been conducted and no significant releases of hazardous substances were identified.

**Site History:**

Moyer Chemical site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company. Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. Diamond Alkali Chemical Manufacturing (DACM) occupied the Site from 1959 to 1965. Activities conducted by DACM are not known. After 1965, the Site was occupied by Howard Electric until 1981. From 1981 to January 31, 2019, San Jose Concrete Transfer Company, Inc. occupied and managed the Site. On January 31, 2019, the property title was transferred to Old Bayshore South, LLC. The Site is currently being developed as a remote parking lot for commuter vans or similar vehicles.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is currently used for storage by the owner, San Jose Concrete Transfer Company. The Site contains warehouse buildings and open yard space for the storage of concrete pipes and equipment. The northern corner is paved with concrete and most of the southwestern portion of the Site is paved with asphalt. The southeast portion is also being used as storage for the neighboring tenant, American Drilling at 1300-1310 Old Bayshore Highway, which is accessed through an opening in the fence between the two sites. The southern portion of the Site where an office building is located is occupied by Romero Construction. All other structures at the Site are used for storage and are not enclosed structures.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 12 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt that extends to the top of the B-zone (a gravely sand unit) at approximately 40 to 55 ft bgs. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest with an average magnitude of 0.005. The B-zone appears to be confined from observations in B-zone wells at the neighboring Ultra-Chem facility with a relatively flat gradient to the west southwest with a magnitude of 0.001. Vertical hydraulic gradients between the A-zone and B-zone are characterized by the potential for downward flow from the A-zone to the B-zone.

Investigation activities conducted at the Site reported organochlorine pesticides (OCPs), petroleum volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and metal (cobalt) in soil at concentrations exceeding their applicable regulatory screening criteria.

OCPs were detected in shallow and deep soil (2-25 ft bgs) along the eastern and northern property boundaries with lower concentrations across the rest of the Site. OCP exceedances appear to align with areas designated as areas of concern during Moyer Chemical's operations. Petroleum VOCs, metals and TPH impacts were detected in deep soil (20-25 ft bgs) coinciding with the A-zone along the eastern property boundary bordering the railroad track.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Limited exceedances of TPH were also found in shallow soil (2-10 ft bgs) along the eastern property boundary. Cobalt impacts were observed in shallow soil along the northern property boundary.

Groundwater impacts at the Site include petroleum VOCs, OCPs, metal (arsenic) and TPH at concentrations exceeding their applicable regulatory screening criteria in A-zone groundwater. All analytical groups including VOCs, TPH, metals, and OCPs were detected in A-zone groundwater above regulatory screening criteria along the eastern property limits bordering the railroad track.

OCPs impacts were observed both along the eastern property boundary and in the western corner of the Site. Exceedances of metals in A-zone groundwater were found in the western and eastern corners of the Site. TPH was detected in A-zone groundwater above screening criteria across the Site. In addition, TPH impacts in A-zone ground water were observed in offsite samples to the north of the property and to the south of the property at 1300-1310 Old Bayshore Highway. There are no exceedances of any contaminants in B-zone groundwater samples.

2016 Removal Action Plan recommended as a remedy alternative the implementation of institutional control, engineering control, light non-aqueous phase liquid (LNAPL) removal and groundwater monitoring to protect human health and the environment and comply with the applicable or relevant and appropriate requirements.

Institutional control would include restrictions on land use and activities at the Site, property zoning restrictions, groundwater usage regulations and a site-specific Soil Management Plan. Engineering control will consist of the existing concrete and asphalt cap and new concrete cover above uncovered areas to minimize worker exposure to chemical of concerns (COCs) impacts in shallow soil and storm water infiltration through impacted soil to ground water. LNAPL, present in SJMW-4, will be removed using absorbent socks. In addition, groundwater monitoring will be performed within the A- and B-zones to assess the stability of the existing groundwater plume and monitor potential horizontal and downward vertical migration of COCs present in A-zone ground water.

Following the implementation of the 2016 RAW recommended remedy alternative, a Removal Action Implementation Report will be prepared to document the work activities conducted as part of recommended remedy alternative. In addition, a subsequent Operation and Maintenance (O&M) Plan will be prepared to provide long-term protection of human health and the environment. O&M activities will include long-term groundwater monitoring of the existing well network and the proposed sentinel well network, an evaluation of sentinel well analytical data, groundwater monitoring well maintenance activities, annual inspections and maintenance of the concrete and asphalt cover at the Site, and the preparation of five-year review reports.

<i>Document Type:</i>		Monitoring Report				
<i>Date Completed:</i>		7/6/2016				
<i>Comments:</i>		The report presents the results and findings of the February 2016 quarterly well sampling. A trend analysis was performed using the data from the February 2016 and past groundwater sampling events and showed the February 2016 results were consistent with the previous sampling events. Based on the trend analysis, DTSC concurred with the recommendation to reduce the groundwater sampling program from quarterly to semi-annual basis. The next semi-annual report will be due to DTSC in November 2016.

<b>Date Completed:</b>			3/6/2019			
<b>Comments:</b>			DTSC prepared the Revised CEQA Notice Exemption to address the more extensive installation of new asphalt pavement than was considered in the original Notice of Exemption. The project will not result in significant changes to any of the physical conditions (other than placing concrete/asphalt cover over areas where the existing paved surface needs repair and uncovered areas) within the area affected by the project, including land, air, water, minerals, flora, fauna, ambient noise and object of historic or aesthetic significance.

					Former Well MW-1 was destroyed by over-drilling to address the Santa Clara Valley Water District's request.	
					Sediments (mud) deposited on top of the Site's concrete/asphalt cover ("Cap") were consolidated on Site using a backhoe/bobcat. Sediments were handled per the approved Soil Management Plan. Sediments were stockpiled (approximately 130 cubic yards) and covered with heavy duty polyethylene sheeting. The stockpiled sediments have been sampled and will be disposed once lab results are available.

<b>Document Type:</b>					Remedial Investigation Report	
<b>Date Completed:</b>					12/10/2015	
<b>Comments:</b>					The Remedial Investigation (RI) Report was prepared pursuant to the Imminent and Substantial Endangerment and Remedial Action Order issued to the former Moyer Chemical Company (previous owner) and San Jose Concrete Transfer Company (current owner). The RI field activities were conducted between April 2014 and March 2015 which included soil, soil gas, and groundwater sampling. No volatile organic compounds (VOCs) were detected in soil vapor above any regulatory screening levels. In soil, petroleum, pesticides, and metals were found across the site. In groundwater, petroleum, arsenic and pesticides were detected primarily along the eastern property boundary with some exceedances along the western property boundary and northern central portion of the site. A Removal Action Workplan will be prepared to address the contamination at the site.

<b>Document Type:</b>					Phase 1	
<b>Date Completed:</b>					2/13/2012	
<b>Comments:</b>					The Phase I Environmental Site Assessment was performed on the property in January/February 2012. Operations have included Moyer Chemical and Diamond Alkali Chemical from 1953 through the mid 1960s as pesticide manufacturers, Howard Electric, Inc. from the mid 1960s to late 1980s, and San Jose Concrete Pipe Company from the late 1980s to present. From the file and record search and based upon the historical uses, the property may have contributed to the contamination to soil or groundwater in the surrounding area and the report recommended collection of soil and groundwater samples for the property.

**Document Type:** Site Characterization Workplan  
**Date Completed:** 2/26/2015  
**Comments:**

This second Addendum Workplan outlines additional investigation activities to address data gaps remaining after implementation of the Remedial Investigation Workplan and the first Addendum Workplan. The activities included in the second Addendum Workplan will determine the extent of total petroleum hydrocarbons and pesticide contamination in soil and the extent of the groundwater plume.

**Title:** Results of November 2015 Quarterly Monitoring Well Sampling  
**Title Link:** [http://www.envirostor.dtsc.ca.gov/public/final\\_documents2?global\\_id=60001663&doc\\_id=60397491](http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60001663&doc_id=60397491)  
**Area Name:**

**Sub Area Link:**  
**Document Type:** Monitoring Report  
**Date Completed:** 4/7/2016  
**Comments:**

The quarterly groundwater monitoring data were consistent with the previous quarters. However, an observation was made that there were constituents in the analytical results for well SJMW-4 that did not meet the Data Quality Objectives (screening values, e.g. benzene, ethylbenzene etc.). If the comparison criteria are not met during the next quarterly sampling, DTSC requested that a discussion be included in the quarterly monitoring report explaining why the comparison criteria were not met (e.g. interferences because of TPH products).

**Site History:**

Moyer Chemical site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company. Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. Diamond Alkali Chemical Manufacturing (DACM) occupied the Site from 1959 to 1965. Activities conducted by DACM are not known. After 1965, the Site was occupied by Howard Electric until 1981. From 1981 to January 31, 2019, San Jose Concrete Transfer Company, Inc. occupied and managed the Site. On January 31, 2019, the property title was transferred to Old Bayshore South, LLC. The Site is currently being developed as a remote parking lot for commuter vans or similar vehicles.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is currently used for storage by the owner, San Jose Concrete Transfer Company. The Site contains warehouse buildings and open yard space for the storage of concrete pipes and equipment. The northern corner is paved with concrete and most of the southwestern portion of the Site is paved with asphalt. The southeast portion is also being used as storage for the neighboring tenant, American Drilling at 1300-1310 Old Bayshore Highway, which is accessed through an opening in the fence between the two sites. The southern portion of the Site where an office building is located is occupied by Romero Construction. All other structures at the Site are used for storage and are not enclosed structures.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 12 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt that extends to the top of the B-zone (a gravely sand unit) at approximately 40 to 55 ft bgs. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest with an average magnitude of 0.005. The B-zone appears to be confined from observations in B-zone wells at the neighboring Ultra-Chem facility with a relatively flat gradient to the west southwest with a magnitude of 0.001. Vertical hydraulic gradients between the A-zone and B-zone are characterized by the potential for downward flow from the A-zone to the B-zone.

Investigation activities conducted at the Site reported organochlorine pesticides (OCPs), petroleum volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and metal (cobalt) in soil at concentrations exceeding their applicable regulatory screening criteria.

OCPs were detected in shallow and deep soil (2-25 ft bgs) along the eastern and northern property boundaries with lower concentrations across the rest of the Site. OCP exceedances appear to align with areas designated as areas of concern during Moyer Chemical's operations. Petroleum VOCs, metals and TPH impacts were detected in deep soil (20-25 ft bgs) coinciding with the A-zone along the eastern property boundary bordering the railroad track. Limited exceedances of TPH were also found in shallow soil (2-10 ft bgs) along the eastern property boundary. Cobalt impacts were observed in shallow soil along the northern property boundary.

Groundwater impacts at the Site include petroleum VOCs, OCPs, metal (arsenic) and TPH at concentrations exceeding their applicable regulatory screening criteria in A-zone groundwater. All analytical groups including VOCs, TPH, metals, and OCPs were detected in A-zone groundwater above regulatory screening criteria along the eastern property limits bordering the railroad track.

OCPs impacts were observed both along the eastern property boundary and in the western corner of the Site. Exceedances of metals in A-zone groundwater were found the western and eastern corners of the Site. TPH was detected in A-zone groundwater above screening criteria across the Site. In addition, TPH impacts in A-zone ground water were observed in offsite samples to the north of the property and to the south of the property at 1300-1310 Old Bayshore Highway. There are no exceedances of any contaminants in B-zone groundwater samples.

2016 Removal Action Plan recommended as a remedy alternative the implementation of institutional control, engineering control, light non-aqueous phase liquid (LNAPL) removal and groundwater monitoring to protect human health and the environment and comply with the applicable or relevant and appropriate requirements.

Institutional control would include restrictions on land use and activities at the Site, property zoning restrictions, groundwater usage regulations and a site-Specific Soil Management Plan. Engineering control will consist of the existing concrete and asphalt cap and new concrete cover above uncovered areas to minimize worker exposure to chemical of concerns (COCs) impacts in shallow soil and storm water infiltration through impacted soil to ground water. LNAPL, present in SJMW-4, will be removed using absorbent socks. In addition, groundwater monitoring will be performed within the A- and B-zones to assess the stability of the existing groundwater plume and monitor potential horizontal and downward vertical migration of COCs present in A-zone ground water.

Following the implementation of the 2016 RAW recommended remedy alternative, a Removal Action Implementation Report will be prepared to document the work activities conducted as part of recommended remedy alternative. In addition, a subsequent Operation and Maintenance (O&M) Plan will be prepared to provide long-term protection of human health and the environment. O&M activities will include long-term groundwater monitoring of the existing well network and the proposed sentinel well network, an evaluation of sentinel well analytical data, groundwater monitoring well maintenance activities, annual inspections and maintenance of the concrete and asphalt cover at the Site, and the preparation of five-year review reports.

**Sub Area Link:**  
**Document Type:** Fieldwork  
**Date Completed:** 2/9/2019  
**Comments:** Three sentinel wells (two in the A-zone and one in the B-zone) were installed and developed. Noted lithology and depth to ground water are similar to findings from previous investigations conducted at the Site.

Former Well MW-1 was destroyed by over-drilling to address the Santa Clara Valley Water District's request.

Sediments (mud) deposited on top of the Site's concrete/asphalt cover ("Cap") were consolidated on Site using a backhoe/bobcat. Sediments were handled per the approved Soil Management Plan. Sediments were stockpiled (approximately 130 cubic yards) and covered with heavy duty polyethylene sheeting. The stockpiled sediments have been sampled and will be disposed once lab results are available.

					soil vapor above any regulatory screening levels. In soil, petroleum, pesticides, and metals were found across the site. In groundwater, petroleum, arsenic and pesticides were detected primarily along the eastern property boundary with some exceedances along the western property boundary and northern central portion of the site. A Removal Action Workplan will be prepared to address the contamination at the site.

<b>Document Type:</b>					Monitoring Report	
<b>Date Completed:</b>					4/7/2016	
<b>Comments:</b>					The quarterly groundwater monitoring data were consistent with the previous quarters. However, an observation was made that there were constituents in the analytical results for well SJMW-4 that did not meet the Data Quality Objectives (screening values, e.g. benzene, ethylbenzene etc.). If the comparison criteria are not met during the next quarterly sampling, DTSC requested that a discussion be included in the quarterly monitoring report explaining why the comparison criteria were not met (e.g. interferences because of TPH products).

<b>Past Use that Caused Contam:</b>	PESTICIDE/INSECTIDE/RODENTICIDE STORAGE					
<b>Potential Media Affected:</b>	OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL					
<b>Potential Contaminant of Concern:</b>						

CHLORDANE, DDD, DDE, DDT

**Site History:**

Garden Valley Fertilizer Co. manufactured and distributed liquid fertilizer products for approximately 40 years at this Site. Chlordane and cadmium were detected in soil above U.S. EPA Region IX Preliminary Remediation Goals (PRG) for residential land use. However, neither chemical was detected above the PRG for commercial land use. Chlordane was detected in groundwater above its drinking water standard. Site data indicates that there may be a potential upgradient source for some of the chlordane detected. An environmental restriction has been recorded prohibiting the use of the site for sensitive land uses such as for residences, schools, day care facilities and hospitals and also prohibiting the use of shallow groundwater underlying the Site. Therefore, with the exception of compliance with the environmental restriction requirements, DTSC has determined that no further action is required.

<b>Status:</b>	CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

**Site History:**

**STATUS:**

The Department of Toxic Substances Control (DTSC) will meet with the Responsible Parties (RPs) in early 2008, to discuss implementation of a Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI). The RFI will be conducted to determine the extent of contamination at the site. A draft corrective action consent agreement (CACA) has recently been provided to the RPs for review. The CACA is signed by both the RPs and DTSC and describes what the investigation should entail and the associated costs involved in the State over-seeing investigation of the site.

**SITE HISTORY:**

The DTSC conducted a RCRA Facility Assessment (RFA) pursuant to the RCRA Corrective Action process. The purpose of the RFA is to identify Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs), collect existing information on contaminant releases, and evaluate site information to determine if further investigation is necessary. The report presents the results of the RFA, documents the process leading to its conclusions and recommendations, and consolidates pertinent information on the facility and its SWMUs and AOCs.

The subject property, located at 1300-1310 Old Bayshore Highway, has a history of commercial and industrial operations. Current operations demonstrate no evidence of release of hazardous materials to the environment. The thick concrete and asphalt cap currently in place prevents contaminant migration. Presently contamination is documented to be limited to near surface the soil; groundwater has reportedly not been impacted. The mobility of existing contamination is thought to be minimal because of the presence of the cap, and the presumed low solubility of suspected contaminants.

4/11/2018- Facility was issued a permit effective 09/30/1983 to 09/30/1988. According to CACA dated 03/27/2013, facility notified DHS that it was closing operations on February 1986. A letter dated 06/01/1988 and a memorandum of the Chronology of Events dated 07/17/1992 stated that closure was not completed and that facility will be referred to clean up. The facility is currently being handled under clean up as confirmed by Project Manager, Henry Chui.

**Site History:**

Ultra-Chem site (Site) was used for agricultural purposes through the late 1940s. In late 1947, the title to the Site was transferred to Moyer Chemical Company (Moyer). Moyer received raw chemicals and blended them into a variety of dry and liquid agricultural insecticides, fungicides, and weed killers for commercial distribution. According to historical documentation included in the Iris Site Conditions Report, chemicals potentially used and/or stored onsite may have included organochlorine, organophosphorus, and carbamate pesticides; petroleum hydrocarbons; solvents; metals and inorganic compounds; acids; and bases.

<b>Map Key</b>	<b>Number of Records</b>	<b>Direction</b>	<b>Distance (mi/ft)</b>	<b>Elev/Diff (ft)</b>	<b>Site</b>	<b>DB</b>
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

C. L. Scott Enterprises, Inc. doing business as Ultra-Chem and All-Chem (Ultra-Chem) reportedly leased a portion of the property in November 1982 and operated at the site from 1983 to 1986. At some point prior to Ultra-Chem beginning onsite operations, the parcel occupied by Moyer was split; Ultra-Chem and the subsequent owners occupied the southern portion of the split property. In September 1983, the Department of Health Services (DHS; now Department of Toxic Substances Control - DTSC) issued a permit to the Ultra-Chem Facility for storage of hazardous waste and treatment by distillation. Ultra-Chem operated as a transfer station collecting and storing hazardous wastes from hazardous waste generators before reportedly transferring the wastes to a disposal facility; solvents were reportedly reclaimed in an onsite distillation unit. The operations closed in February 1986 but the facility was never properly closed and never obtained a closure certification from the Department. Ultra-Chem. filed for bankruptcy in April 1986. Beginning in 1985, during Ultra-Chem's tenure at the site, Fitzpatrick Barricade and Safety Supply (Fitzpatrick) became a tenant. Fitzpatrick was reportedly a small-quantity generator of hazardous waste. Documentation regarding the specific wastes generated by Fitzpatrick is unavailable. Fitzpatrick remained a tenant at the site through at least 1989.

From 1986 to 2003, the property ownership title has changed several times. Most of the business that operated at the Site since 1986 are auto body shops. In 2003, Maxim I Properties (Maxim) acquired title to the Site from Enviro-Tech Business & Development, Inc. and Kamal S. Farshi. In 2012 the Santa Clara Superior Court entered a judgment of rescission in favor of Maxim, declaring the 2003 sale of the Site void from the date of the transaction. American Drilling Company (American Drilling) leased the northern portion of the Site from Maxim and began onsite operations in 2003 as a construction drilling contractor and is currently operating the Site. The southern portion of the Site is currently being leased by Santa Clara Dairy, and has been since 2005.

Review of historic documents show the area surrounding the Site as industrial since at least 1899, the oldest historical record reviewed. The current land use at the site is industrial, and the site is zoned as heavy industrial use and the immediate site vicinity is zoned as heavy industrial and light industrial use. There are four buildings onsite: three large warehouses along the eastern property line and an office building in the central-western portion of the site. The office building is the only building with daily occupants. The entire Site is capped with concrete. Previous investigations at the Site include soil vapor, soil, and groundwater investigations.

The Site is located in the Santa Clara Valley, which is characterized by alluvial deposits. The geologic units are relatively flat within the area of investigation, and appears laterally continuous to at least 100 feet (ft.) below ground surface (bgs). Below the surface to approximately 21 to 24 ft bgs is a low permeability fine grained layer consisting of silty clay or clayey silt. Beneath the low permeability fine grained layer is a 6 to 18 inches saturated zone (A-zone) consisting of a sand within a silty/clayey matrix. Immediately below the A-zone is a finer grained low permeability silty clay and clayey silt. Beneath this clay layer is a series of interbedded sand and gravel which constitute the second water bearing zone (B-zone) that begins at approximately 45 to 50 ft bgs and extends to a depth greater than 100 ft bgs, the greatest depth investigated at the site. The A-zone at the Site appears to be semi-confined and occurs consistently across the Site with a hydraulic gradient to the west southwest. The B-zone appears to be confined from observations in B-zone wells with a relatively flat gradient to the west southwest.

Soil vapor samples collected at the Site during previous site investigations indicated presence of chlorinated volatile organic compounds (VOCs) and petroleum-related VOCs in soil vapor at concentrations exceeding their applicable regulatory screening criteria. chlorinated VOCs were detected along the western Site boundary with lower concentrations across the rest of the Site. Concentrations of chlorinated VOCs were lower in shallow 5 ft bgs samples than deep 15 ft bgs samples. In addition, petroleum-related VOCs were detected along the eastern Site boundary behind and immediately south of the three warehouse buildings at the Site. Concentrations of petroleum-related VOCs were higher and more laterally extensive in shallow 5 ft bgs samples compared to deep 15 ft bgs samples.

Soil samples collected at the Site during previous site investigations indicated presence organochlorine and organophosphorus pesticides, chlorinated and petroleum-related VOCs, petroleum hydrocarbons, and metals (arsenic and cobalt) exceeding their applicable regulatory screening criteria. organochlorine pesticides were detected in shallow and deep soil (between 2 and 25 ft bgs) along the eastern property boundary, the southern property boundary, and the western property boundary. Organophosphorus pesticides exceeded their respective screening criteria only in shallow soil, five ft. or less, along the eastern property boundary behind the warehouses. In addition, petroleum-related VOCs were detected in shallow and deep soil along the eastern property boundary and southern property boundary. Chlorinated VOC exceedances were generally limited to shallow and deep soil in an isolated area on the western boundary of the site. Total petroleum hydrocarbons (TPHs) were generally detected in shallow and deep soil samples across the site. Metal impacts were observed in shallow soil along the eastern property boundary and in portions of the southern portion of the site.

Groundwater impacts at the site in A-zone ground water include organochlorine pesticides, chlorinated and petroleum-related VOCs, metal (antimony, arsenic, barium, beryllium, chromium, lead, mercury, and nickel if grab groundwater [high turbidity] results are considered; and only arsenic, if sole groundwater monitoring well sampling results are considered), and petroleum hydrocarbons at concentrations exceeding their applicable screening criteria. Groundwater exceedances in the B-zone include organochlorine pesticides, metals and TPHs and are generally limited to grab groundwater samples (high turbidity). All analytical groups including organochlorine pesticides, petroleum-related VOCs, metals (grab groundwater samples - high turbidity), and TPHs were detected in A-zone ground water above regulatory screening criteria along the eastern limits of the Site behind the warehouses and along the Site's southern boundary. Chlorinated VOCs were observed along the Site's western boundary. TPH was detected in A-zone ground water above screening criteria across the Site as well as upgradient of the Site to the north and downgradient of the Site to the south.

According to the 14th groundwater sampling event and 5th semiannual sampling event for the Site with the current network of monitoring wells, concentrations of pesticides, VOCs, semi-volatile organic compounds, petroleum, and metals observed in ground water were consistent with concentrations observed during previous sampling events, except where noted in the respective groundwater monitoring reports.

DTSC is currently reviewing the Draft Corrective Measures Study for the Site.

**Completed Activities**

**Title:** Site Inspection for Potential for Vapor Intrusion at the Former Ultra-Chem Facility  
**Title Link:** [http://www.envirostor.dtsc.ca.gov/public/final\\_documents2?global\\_id=80001847&doc\\_id=60461246](http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=80001847&doc_id=60461246)  
**Area Name:** PROJECT WIDE  
**Area Link:**  
**Sub Area:**  
**Sub Area Link:**  
**Document Type:** Technical Report  
**Date Completed:** 6/14/2019  
**Comments:** The Site Inspection for Potential for Vapor Intrusion Technical Report (Report) provides updated documentation of the main office building and an adjoining trailer containing overflow office space. The office building is described as "slab on grade". The utilities present include electrical as well as sanitary sewer connections to the kitchen and bathrooms. The adjoining trailer is elevated and is not directly located on the concrete slab. The Report states that the concrete slab surface appears intact and in good condition.

The layout of the southern portion of the site remains relatively unchanged since initially inspected during the 2016 RCRA Facility Investigation. There is a trailer office elevated several feet off the concrete surface that is located along the southeast edge of the property, but no other buildings.

<b>Document Type:</b>					RFI Report	
<b>Date Completed:</b>					4/28/2016	
<b>Comments:</b>					The RCRA Facility Investigation (RFI) report documents the results of an investigation that was performed to determine the nature and extent of releases of hazardous waste or constituents from formerly permitted units, solid waste management units, and other source areas. Soil and groundwater were found to be contaminated with pesticides, total petroleum hydrocarbon, volatile organic compounds (VOCs), and metals. VOCs in soil gas were found in limited areas of the Site. The data gathered during the RFI will be used to prepare a Corrective Measures Study report that will evaluate corrective measures alternatives for the Site.

**Site History:**

From 1964 to 1983, Moyer Chemical Company produced pesticides, fungicides, insecticides, and weed killers. From 1983 to 1986, Ultra-Chem operated as a hazardous waste treatment facility, a lacquer thinner reclamation facility, and distributed proprietary commercial and industrial chemicals. In 1986 Ultrachem declared bankruptcy and left the site without completing closure. From 1987 until 1993, National Auto Recovery Bureau occupied the site. Since 1993 the site has been the location of auto wrecking operations.

All future work is addressed under ULTRA-CHEM/ALL-CHEM/SCOTT ENTERPRISES (80001847)  
 DTSC will be proceeding with an Corrective Action Consent Order to cleanup the site. Please use the Ultra-Chem facility link.

# Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

## **Standard Environmental Record Sources**

### **Federal**

#### **National Priority List:**

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

**Government Publication Date: Nov 25, 2019**

#### **National Priority List - Proposed:**

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

**Government Publication Date: Nov 25, 2019**

#### **Deleted NPL:**

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**Government Publication Date: Nov 25, 2019**

#### **SEMS List 8R Active Site Inventory:**

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Nov 25, 2019**

#### **Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

#### **SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Nov 25, 2019**

**Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS:**

CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Nov 18, 2019**

**RCRA non-CORRACTS TSD Facilities:**

RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Nov 18, 2019**

**RCRA Generator List:**

RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Nov 18, 2019**

**RCRA Small Quantity Generators List:**

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Nov 18, 2019**

**RCRA Conditionally Exempt and Very Small Quantity Generators List:**

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Nov 18, 2019**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Nov 18, 2019**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jun 11, 2019**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Jun 11, 2019**

**Emergency Response Notification System:**

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1982-1986**

**Emergency Response Notification System:**

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1987-1989**

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Nov 25, 2019**

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Sep 3, 2019**

**FEMA Underground Storage Tank Listing:**

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date: Dec 31, 2017**

**Petroleum Refineries:**

REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date: Oct 8, 2019**

**Petroleum Product and Crude Oil Rail Terminals:**

BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date: Jan 18, 2019**

**LIEN on Property:**

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date: Nov 25, 2019**

**Superfund Decision Documents:**

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date: Oct 25, 2019**

**State**

**State Response Sites:**

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

**Government Publication Date: Oct 1, 2019**

**EnviroStor Database:**

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

**Government Publication Date: Oct 1, 2019**

**Delisted State Response Sites:**

DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

**Government Publication Date: Oct 1, 2019**

**Solid Waste Information System (SWIS):**

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

**Government Publication Date: Nov 13, 2019**

**EnviroStor Hazardous Waste Facilities:**

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

**Government Publication Date: Oct 1, 2019**

**Land Disposal Sites:**

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Nov 14, 2019

**Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:**

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

**Leaking Underground Fuel Tank Reports:**

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Nov 14, 2019

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Nov 14, 2019

**Permitted Underground Storage Tank (UST) in GeoTracker:**

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Nov 14, 2019

**Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:**

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

**Proposed Closure of Underground Storage Tank Cases:**

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Oct 8, 2019

**Historical Hazardous Substance Storage Information Database:**

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

**Aboveground Storage Tanks:**

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

**Delisted Storage Tanks:**

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Jan 7, 2020

**California Environmental Reporting System (CERS) Tanks:**

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:**

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 1, 2019

**Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:**

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Jan 13, 2020

**Deed Restrictions and Land Use Restrictions:**

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Nov 14, 2019

**Voluntary Cleanup Program:**

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 1, 2019

**GeoTracker Cleanup Program Sites:**

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Nov 14, 2019

**Delisted County Records:**

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Jan 14, 2020

**Delisted California Environmental Reporting System (CERS) Tanks:**

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Nov 18, 2019

**Historical Hazardous Substance Storage Container Information - Facility Summary:**

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

**Tribal**

**Leaking Underground Storage Tanks (LUSTs) on Indian Lands:**

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2019

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

**Government Publication Date: Apr 8, 2019**

**Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date: May 2, 2019**

**Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date: May 2, 2019**

**County**

**Santa Clara County - Historic Solvent Case Listing:**

SANTA CLARA HSOL

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

**Government Publication Date: Aug 22, 2016**

**Santa Clara County - Local Oversight Program Listing:**

SANTA CLARA LO

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

**Government Publication Date: Jun 14, 2017**

**Santa Clara County - Underground Storage Tanks:**

UST SANTA CLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

**Government Publication Date: Nov 15, 2019**

**Santa Clara County - CUPA Facilities List:**

SANTA CLARA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

**Government Publication Date: Oct 31, 2019**

**Santa Clara County - City of San Jose Hazardous Material Facilities:**

SANJOSE HM

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

**Government Publication Date: Jan 6, 2020**

**Santa Clara County - Gilroy City CUPA Facilities List:**

GILROY CUPA

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

**Government Publication Date: Nov 26, 2019**

**Santa Clara County - Sunnyvale City CUPA List:**

SUNNYVALE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

**Government Publication Date: Jul 16, 2019**

**Additional Environmental Record Sources**

## **Federal**

### **PFOA/PFOS Contaminated Sites:**

[PFAS NPL](#)

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

**Government Publication Date: Nov 15, 2019**

### **Facility Registry Service/Facility Index:**

[FINDS/FRS](#)

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

**Government Publication Date: Nov 6, 2019**

### **Toxics Release Inventory (TRI) Program:**

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date: Dec 31, 2017**

### **Perfluorinated Alkyl Substances (PFAS) Releases:**

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

**Government Publication Date: Dec 31, 2017**

### **Perfluorinated Alkyl Substances (PFAS) Water Contamination:**

[PFAS WATER CONTAM](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date: Dec 20, 2019**

### **Hazardous Materials Information Reporting System:**

[HMIRS](#)

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

**Government Publication Date: Jan 8, 2019**

### **National Clandestine Drug Labs:**

[NCDL](#)

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date: Sep 26, 2019**

### **Toxic Substances Control Act:**

[TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

**Government Publication Date: Jun 30, 2017**

### **Hist TSCA:**

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date: Dec 31, 2006**

**FTTS Administrative Case Listing:**

**FTTS ADMIN**

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**FTTS Inspection Case Listing:**

**FTTS INSP**

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**Potentially Responsible Parties List:**

**PRP**

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

**Government Publication Date: Oct 25, 2019**

**State Coalition for Remediation of Drycleaners Listing:**

**SCRD DRYCLEANER**

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

**Government Publication Date: Nov 08, 2017**

**Integrated Compliance Information System (ICIS):**

**ICIS**

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date: Nov 18, 2016**

**Drycleaner Facilities:**

**FED DRYCLEANERS**

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: May 29, 2018**

**Delisted Drycleaner Facilities:**

**DELISTED FED DRY**

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: May 29, 2018**

**Formerly Used Defense Sites:**

**FUDS**

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: Oct 23, 2018**

**Material Licensing Tracking System (MLTS):**

**MLTS**

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Historic Material Licensing Tracking System (MLTS) sites:**

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

**Mines Master Index File:**

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: May 3, 2019

**Alternative Fueling Stations:**

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 8, 2020

**Registered Pesticide Establishments:**

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: May 31, 2019

**Polychlorinated Biphenyl (PCB) Notifiers:**

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Oct 9, 2019

**State**

**Dry Cleaning Facilities:**

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Oct 25, 2019

**Delisted Drycleaners:**

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Oct 25, 2019

**Non-Toxic Dry Cleaning Incentive Program:**

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

**Per- and Polyfluoroalkyl Substances (PFAS):**

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 14, 2019

**PFOA/PFOS Groundwater:**

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

**Government Publication Date: Jan 15, 2020**

**Hazardous Waste and Substances Site List - Site Cleanup:**

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

**Government Publication Date: Nov 26, 2019**

**List of Hazardous Waste Facilities Subject to Corrective Action:**

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

**Government Publication Date: Jul 18, 2016**

**EnviroStor Inspection, Compliance, and Enforcement:**

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

**Government Publication Date: Jul 16, 2019**

**School Property Evaluation Program Sites:**

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

**Government Publication Date: Oct 1, 2019**

**California Hazardous Material Incident Report System (CHMIRS):**

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Oct 23, 2019**

**Hazardous Waste Manifest Data:**

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Oct 24, 2016**

**Historical California Hazardous Material Incident Report System (CHMIRS):**

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

**Government Publication Date: Jan 1, 1993**

**Historical Hazardous Waste Manifest Data:**

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

**Government Publication Date: Dec 31, 1992**

**Historical Cortese List:**

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

**Government Publication Date: Nov 13, 2008**

**Cease and Desist Orders and Cleanup and Abatement Orders:**

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

**Government Publication Date: Feb 16, 2012**

**California Environmental Reporting System (CERS) Hazardous Waste Sites:**

[CERS HAZ](#)

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

**Government Publication Date: Nov 18, 2019**

**Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:**

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

**Government Publication Date: Nov 29, 2018**

**Sites in GeoTracker:**

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

**Government Publication Date: Nov 14, 2019**

**Waste Discharge Requirements:**

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**Government Publication Date: Nov 14, 2019**

**Toxic Pollutant Emissions Facilities:**

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

**Government Publication Date: Dec 31, 2017**

**Clandestine Drug Lab Sites:**

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

**Government Publication Date: Jun 30, 2018**

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

**No County additional environmental databases were selected to be included in the search.**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
