2012-2016 Adopted Capital Improvement Program

Overview

Introduction

The purpose of the Storm Sewer System is to collect storm water separate from the Sanitary Sewer System, assure its quality through best management practices, and convey it to nearby creeks and rivers. Most of the water flows northward to the Guadalupe River or Coyote Creek. The 2012-2016 Adopted Capital Improvement Program (CIP) provides funding of \$33.1 million, of which \$15.5 million is allocated in 2011-2012.

This program is part of the Environmental and Utility Services City Service Area (CSA) and supports the Reliable Utility Infrastructure outcome.

Program Priorities and Objectives

In accordance with the City's General Plan, the goals of the Storm Sewer System Capital Program are to reduce the risk of drainagerelated surface damage and protect the quality of storm water runoff. This complies with the municipal storm sewer discharge permit issued to the City by the Regional Water Quality Control Board under the regulations mandated by the Environmental Protection Agency. The City of San José is responsible for constructing, as budgets and City Council priorities permit, facilities for conveying surface runoff in the City's Urban Service Area adjacent stream channels. Construction of flood control facilities and the modification and maintenance of stream channels are the responsibility of the Santa Clara Valley Water District and the U.S. Army Corps of Engineers. The City remains responsible for the maintenance protection of its facilities in the channels.

The existing storm sewer main system within the urban service boundary is approximately 1,000 miles long. San José's storm sewer system capacity in most areas can accommodate a three-year storm event. However, the storm system in certain areas can accommodate a one-year or less-intense storm. New and replacement storm drain pipelines must be designed to accommodate a ten-year storm.

Storm sewer systems in newly developed areas are primarily constructed by developers as a condition of development. The projects related to development in this CIP are located mainly in developed areas and enhance existing capacity, water quality, and improve operations and maintenance.

In previous years, the Storm Sewer System CIP had directed the majority of its resources toward the design and construction of storm sewer systems that serve large drainage basins. Only a modest portion of its resources had been allocated to the resolution of localized drainage problems, primarily in residential neighborhoods. The 2012-2016 Adopted CIP includes funding that will address local ponding and neighborhood drainage issues caused by displaced curbs and gutters, inadequate flow lines, and/or inefficient designs.

Sources of Funding

Revenue for the 2012-2016 Adopted CIP is derived from the following sources: transfers from the Storm Sewer Operating Fund (\$23.0 million), Storm Drainage Fees (\$530,000), interest earnings (\$141,000), and joint participation revenues (\$20,000).

The Storm Sewer Operating Fund provides funding for capital improvement projects, street sweeping, storm system maintenance, Storm Drain Management System (SDMS),

2012-2016 Adopted Capital Improvement Program

Overview

Sources of Funding (Cont'd.)

and compliance with the federally mandated Non-Point Source Discharge Elimination System and Municipal Regional Stormwater National Pollutant Discharge Elimination System (NPDES) Permit requirements through Storm Sewer Service Charge fees. These charges are assessed annually on properties and collected with real property taxes.

The transfers in the 2012-2016 Adopted CIP from the Storm Sewer Operating Fund (\$23.0 million) reflect a slight decrease of 1% compared to the \$23.3 million transfers programmed in the 2011-2015 Adopted CIP. This level of funding is reflective of a 3% Storm Sewer Service Charge increase that was approved for 2011-2012, and assumes increases between 3% and 5% in future years. These increases are also used to fund storm sewer system operating needs, including Stormwater NPDES Permit requirements.

The Storm Drainage Fee is charged as a connection fee to the owner/developer of any project that will discharge storm water, surface water, or ground water runoff into the City's storm drainage system. Revenues are projected to total \$530,000 over the five years of the 2012-2016 Adopted CIP, which represents a decrease of \$120,000 (18%) compared to the 2011-2015 Adopted CIP. decreased decrease is due to This development activity.

Program Highlights

As discussed above, a 3% rate increase in 2011-2012 is necessary to allow appropriate investments in capacity and neighborhood storm system improvements in this Adopted CIP. Projects budgeted in this Adopted CIP

include the installation of technology and/or infrastructure to improve the capacity of the storm drain collection system, the reliability of storm pump stations, and the quality of storm water runoff, and to minimize ponding in residential areas. The largest projects in this Adopted CIP include:

Storm Pump Station Rehabilitation and Replacement

The Department of Transportation has identified several aging storm pump stations in need of replacement or rehabilitation. In the 2012-2016 Adopted CIP, \$2.8 million is included for the replacement or rehabilitation of high-priority storm pump stations, with the majority of that amount (\$1.6 million) programmed in 2011-2012.

Minor Neighborhood Storm Sewer Improvements

Funding of \$2.7 million for various small neighborhood storm sewer improvement projects is included in this CIP. projects include the construction of new inlets, laterals, and flow-lines to provide relief of minor storm sewer problems. In addition, the allocation funds other activities, such as the videotaping of storm sewer pipelines to diagnose storm sewer problems, and the correction of improper inflow, such as storm sewer runoff misdirected to the sanitary sewer collection system. Individual projects are selected on an as-needed basis, reprioritized in response to observed or anticipated problems.

2012-2016 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

<u>Storm Sewer Improvements – Special</u> Corridors

This allocation provides for the investigation of ponding complaints and development of strategies to improve the local storm sewer systems along highly traveled pedestrian routes, such as near schools, libraries, community centers and other public facilities. The funding will also be used for the development of construction plans to address the above issues, and construction or reconstruction of curbs, gutters, and other infrastructure improvements. A total of \$3.8 million is allocated in the 2012-2016 Adopted CIP to address these needs.

Urgent Flood Prevention and Repair Projects

This provides allocation funding for engineering and construction projects that are determined during the course of the year, many of which are identified by the Transportation Department of maintenance activities. This allocation allows for the flexibility to identify, prioritize and address the most urgent needs during a given The Adopted 2012-2016 CIP fiscal year. provides \$3.2 million for Urgent Flood Prevention and Repair Projects.

Major Changes from the 2011-2015 Adopted CIP

Major changes from the 2011-2015 Adopted CIP include the following:

• Establish funding for the Lincoln-Parkinson Storm Sewer Improvement project (\$1.3 million) programmed in 2015-2016.

- Establish funding for the Alviso Storm Network Infiltration Control project (\$1.2 million).
- Establish funding for the Gold Street Storm Pump Station Force Main project (\$920,000).
- Establish funding for the Camden/Graystone Storm Sewer Improvement project (\$600,000).
- Increase funding for the Outfall Rehabilitation Capital allocation (\$491,000). This project had been initiated as a finite project in 2006-2007, and will now be programmed as an ongoing project due to newly-identified needs.
- Increase funding for the Storm Pump Station Rehabilitation and Replacement project (\$392,000).
- Establish funding for the Zanker and Charcot Storm Sewer Improvement project (\$300,000).
- Increase funding for the Lower Bird Avenue Storm Sewer Improvements project (\$314,000).

Operating Budget Impact

The Department of Transportation maintains the City's Storm Sewer System. There are no additional operating and maintenance costs associated with the projects in the 2012-2016 Adopted CIP.

2012-2016 Adopted Capital Improvement Program

Overview

Council-Approved Revisions to the Adopted Capital Improvement Program

During the June budget hearings, the City Council approved the rebudgeting of \$3.1 million for eleven projects: Improvements – Special Corridors (\$780,000), El Dorado Street Storm Sewer Improvements (\$465,000), Storm Sewer Master Plan – Citywide (\$400,000), Gold Street Storm Drainage Improvements (\$355,000), Urgent Flood Prevention and Repair Projects (\$350,000), Gateway East Storm Sewer Improvements (\$330,000), Storm/Sanitary Sewer Separation (\$88,000), (\$200,000), Public Art Infrastructure Management System (\$63,000), Summer/Dry Weather and First Flush Flow Diversion Pilot (\$36,000), and Flow Monitoring Program (\$20,000). The City Council also approved a decrease of \$13,000 to the Public Art appropriation in 2011-2012, and an additional \$21,000 over the remainder of the 5-year CIP, as a result of an additional review of the public art allocation. Further details can be found in Manager's Budget Addendum #40.

2012-2016 Adopted Capital Improvement Program **Detail of Construction Projects**

1. Alviso Storm Network Infiltration Control

CSA:

Environmental and Utility Services

Initial Start Date:

3rd Qtr. 2011

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

2nd Qtr. 2012

Department:

Public Works

Initial Completion Date:

Council District:

Revised Completion Date:

Location:

Alviso

Description:

This project will reduce infiltration from ground water sources into the Alviso Storm Sewer Network.

Justification:

This project will maximize the efficiency of the Alviso Storm Sewer Network by reducing the need for the Gold Street Pump Station to continuously pump infiltrated ground water into the Guadalupe River. This will extend the life of the pump station and increase the pipe capacity for actual

stormwater runoff.

2. Camden/Graystone Storm Sewer Improvement

CSA:

Environmental and Utility Services

Initial Start Date:

3rd Qtr. 2011

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

2nd Qtr. 2012

Initial Completion Date:

Council District:

Revised Completion Date:

Location:

Camden Avenue between Graystone Lane and

Bubblingwell Place

Description:

This project will install approximately 800 linear feet of 18-inch ductile iron pipe (DIP) storm main,

remove 200 linear feet of 12-inch storm main, and install 4 new inlets, laterals, and 2 manholes.

Justification:

The lone inlet adjacent to the intersection of Camden Avenue and Graystone Avenue is not sufficient

to support the storm runoff of the intersection and the runoff coming from Graystone Bridge.

6. Gold Street Storm Pump Station Force Main

CSA:

Environmental and Utility Services

Initial Start Date:

3rd Qtr. 2011

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

Initial Completion Date:

2nd Qtr. 2012

Council District:

Revised Completion Date:

Location:

From Gold Street Pump Station, along Elizabeth

Street and Hope Street, to Guadalupe River

Description:

This allocation funds the construction of a new force main connecting the Gold Street Pump Station

to the Guadalupe River.

Justification:

Gold Street Pump Station is the only outlet for the Alviso Storm Sewer Network. The existing force main connects the station to the Guadalupe River. The City has identified a number of necessary improvements, but access to the force main is very difficult and costly due to its alignment through numerous parcels located in an environmentally sensitive area. In addition, due to its size, the existing force main limits any structural upgrades to the Gold Street Pump Station. Construction of a new force main will maximize the performance of the pump station, extend its useful life, minimize maintenance requirements for the force main, and facilitate access for routine maintenance activities.

9. Outfall Rehabilitation - Capital

CSA:

Environmental and Utility Services

Initial Start Date:

Ongoing

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

Initial Completion Date:

Ongoing

Council District:

City-wide

Revised Completion Date:

Location:

City-wide

Description:

This allocation funds the construction or rehabilitation of storm drain outfalls at various locations throughout the City. The Department of Transportation (DOT) has identified more than 250 outfalls that are missing, unimproved or deteriorated. This ongoing allocation funds the most critical outfall construction based on priorities jointly established by DOT, the Department of Public Works and the

Santa Clara Valley Water District.

Justification:

This project will repair aging outfall structures, enhance erosion protection, and alleviate

maintenance operations.

Revised Completion Date:

Description:

This allocation funds the construction and administration of public art in the Storm Sewer Capital Program. In compliance with the City Council adoption of the revised Public Art Master Plan on March 13, 2007, one percent of all construction project funding is required to be allocated to public art, excluding funding for seismic and ADA retrofits, maintenance and operations, non-construction projects (such as studies), or affordable housing. Projects where public art allocations were previously programmed or appropriated are not subject to the revisions of the Public Art Master Plan. Expenditures in this allocation will be subject to the legal revenue restrictions for the use of this

funding on public art.

Justification:

This allocation is required to comply with the revisions to the Public Art Master Plan adopted by the

City Council on March 13, 2007.

11. Storm Pump Station Rehabilitation and Replacement

CSA:

Environmental and Utility Services

Initial Start Date:

Ongoing

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

Initial Completion Date:

Ongoing

Council District:

City-wide

Revised Completion Date:

Location:

City-wide

Description:

This allocation funds the rehabilitation, reconstruction, or replacement of aging pump stations that

require high maintenance.

Justification:

Rehabilitating, redesigning, and/or replacing aging pump stations will achieve cost savings, optimize

pump station performance, and enhance the efficiency of the storm system.

Ongoing

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

Initial Completion Date:

Ongoing

Council District:

City-wide

Revised Completion Date:

Location:

City-wide

Description:

This allocation funds: the investigation of ponding complaints; development of strategies to improve local drainage with the reconstruction of curbs, gutters, and other infrastructure; development of construction plans; and construction and associated management. This allocation will also provide for the Department of Public Works staff to document ponding problems that staff observes and reports, with a focus on areas with heavy pedestrian activity, such as school routes, and near community centers, libraries, and other public facilities.

Justification:

This project will help address storm water ponding within neighborhoods, which has the capacity to cause localized flooding problems and impede pedestrian accessibility.

15. Zanker and Charcot Storm Sewer Improvement

CSA:

Environmental and Utility Services

Initial Start Date:

3rd Qtr. 2011

CSA Outcome:

Reliable Utility Infrastructure

Revised Start Date:

Department:

Public Works

2nd Qtr. 2012

Council District:

Initial Completion Date:

Revised Completion Date:

Location:

Zanker Road between Charcot Avenue and

Brokaw Road

Description:

This allocation will fund the installation of approximately 400 feet of concrete pipe to cross connect

two manholes in order to optimize the efficiency of the storm sewer system in the area.

Justification:

Routine ponding at the intersection of Zanker Road and Brokaw Road will be reduced by connecting two drainage systems together. This will also reduce or eliminate the need for emergency pumping

operations conducted by the Department of Transportation during storm events.

18. Flow Monitoring Program

CSA:

Environmental and Utility Services

CSA Outcome:

Reliable Utility Infrastructure

Department:

Public Works

Description:

This allocation funds the installation of flow monitors and rain gauges to measure the actual amount of flow in the pipe at certain points in the storm sewer network based on a measured amount of rainfall. This information validates modeling and design assumptions by providing actual data in order to analyze the relationship between the amount of rainfall, the amount of stormwater runoff and

the type of storm drain (inlet, pipe, pump station, outfall, etc.).

STORM SEWER SYSTEM

SUMMARY OF PROJECTS THAT START AFTER 2011-2012

The Summary of Projects that Start after 2011-2012 includes those projects that have funding budgeted starting after 2011-2012. On the Use of Funds statement, the projects in these summaries are not numbered.

2012-2016 Adopted Capital Improvement Program

Summary of Projects that Start after 2011-2012

Project Name:

Lincoln-Parkinson Storm Sewer

Improvement

Initial Start Date: Revised Start Date: 3rd Qtr. 2015

5-Year CIP Budget:

\$1,300,000

Initial End Date: Revised End Date:

2nd Qtr. 2016

Total Budget: Council District: \$1,300,000

USGBC LEED:

Description:

N/A

This allocation funds the installation of approximately 1,200 linear feet of 12-inch to

30-inch diameter high-density polyethylene storm main, including construction of new inlets, storm laterals, manholes, and replacements of pavement, sidewalks, curbs and gutters. The storm drain improvements will direct stormwater runoff into drainage

facilities and prevent ponding in the area.

Project Name:

Ross-Guadalupe Storm Sewer

Initial Start Date:

3rd Qtr. 2010

5-Year CIP Budget:

Improvements \$579,000

Revised Start Date:

3rd Qtr. 2013

Total Budget:

\$579,000

Initial End Date: Revised End Date:

2nd Qtr. 2011 2nd Qtr. 2014

Council District: USGBC LEED:

9 N/A

This project includes the installation of approximately 700 feet of 42-inch reinforced

concrete storm drain pipe with the associated manholes, catch basins, and any necessary curbs and gutters. This project would improve drainage on Ross Avenue

in the vicinity of Ross Creek.

Project Name:

Description:

Upper Bird Avenue Storm Sewer

Initial Start Date:

3rd Qtr. 2013

Improvements 5-Year CIP Budget:

\$600,000

Revised Start Date:

3rd Qtr. 2012

Total Budget:

\$600,000

Initial End Date: Revised End Date: 2nd Qtr. 2014

Council District:

USGBC LEED:

N/A

Description:

This project upgrades the existing capacity of the storm drainage system to meet City

standards. This allocation will help to alleviate the drainage problem on Bird Avenue

caused by street, curb, and gutter settlement.

Project Name:

Willow Glen-Guadalupe, Phase III

Initial Start Date:

3rd Qtr. 2013

5-Year CIP Budget:

\$1,500,000

Revised Start Date:

2nd Qtr. 2015

Total Budget: Council District: \$1,500,000

Initial End Date: **Revised End Date:**

USGBC LEED:

Description:

6 N/A

This project will install approximately 2,800 linear feet of 24-inch to 42-inch diameter

reinforced concrete pipe, storm drain inlets, and storm manholes along various

streets in the Willow Glen neighborhood to relieve drainage problems in the area.
