Phase I Environmental Site Assessment
15, 17 and 19 South 4th Street
San Jose, California

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 15, 17 and 19 South 4th Street in San Jose, California (Site) as shown on Figures 1 and 2. This work was performed for Bayview Development Group, Incorporated (Bayview) in accordance with our May 24, 2019 Agreement (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, “Standards and Practices for All Appropriate Inquiries; Final Rule” (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Bayview intends to purchase the property for development of a hotel. We performed this Phase I ESA to support Bayview in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.
- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.

- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10; the terms and conditions of our Agreement are presented in Appendix A.

1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by Bayview, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Nicholas P. Brettner, P.G., and Christopher J. Heiny, P.G, Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the property, based on information provided by Bayview.

Table 1. Location and Ownership

Assessor’s Parcel No. (APN)	467-23-034
Reported Address/Location	15, 17 and 19 South 4 th Street, California 95112
Owner	Quangminh Pham and Diemcuc Nguyen Pham
Approximate Lot Size	4,100 square feet
Approximate Bldg. Size	1,450 square feet

2.2 CURRENT/PROPOSED USE OF THE PROPERTY

The current and proposed uses of the property are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	Ground floor restaurant (Agave Taqueria & Café), second floor one residential unit.
Proposed Use	Hotel

2.3 SITE SETTING AND ADJOINING SITE USE

Land use in the general Site vicinity appears to be primarily a mix of commercial and residential. Based on our Site vicinity reconnaissance, adjoining Site uses are summarized below in Table 3.

Table 3. Adjoining Site Uses

Northwest	Ground floor restaurant, retail, office and hair / nail salon, second floor residential apartments
Northeast	San Jose City Hall (across South 4 th Street)
Southwest	Ground floor restaurant and barbershop, second floor residential apartments
Southeast	Paved parking lot and multi-story residential apartments

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Bayview Development Group, Incorporated. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 CHAIN OF TITLE

A chain-of-title was not provided for our review.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances,

such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

Bayview provided Cornerstone with a preliminary title report dated May 20, 2019, prepared by Chicago Title Company for 17 South 4th Street (APN 467-23-034). Preliminary title reports frequently contain information on previous property transactions, although they may not be as complete as chain of title reports for identifying previous Site ownership. No environmental liens or records of ownership (including leases) indicative of significant hazardous materials use associated with the Site were listed in the preliminary title report. The title report is included in Appendix E.

3.3 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with Bayview, we understand that Bayview does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) of Shelton, Connecticut to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix B.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

The Site address 17 South 4th Street was identified in 1922 and 1925 as New Style French Laundry in EDR's Historical Cleaners database. This database contains listings gathered by EDR researchers from accessible business directories, that in EDR's opinion, may indicate the former presence of former cleaning, dry cleaning, laundry, laundromat cleaning/laundry, wash &

dry sites. No information related to a release was located in the EDR database report or other subsequent data sources researched.

The Site address 15 South 4th Street was identified in 1930 as Grigg G R JR / Automobile Repairing in EDR's Historical Auto database. This database contains listings gathered by EDR researchers from accessible business directories, that in EDR's opinion, may indicate the former presence of gas station, filling station, service station or automobile repair shop sites. No information related to a release was located in the EDR database report or other subsequent data sources researched.

The Site address 19 South 4th Street did not appear in regulatory agency databases or in the orphaned properties listings (orphan properties are those with poor location information).

4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents

Database listings for adjoining properties and nearby spill incidents are summarized in Table 4. Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

Chevron #9-4259	147 E Santa Clara Street	22	NW / 206 feet	LUST: Leak Reported 1983. Four USTs reportedly replaced in 1985. Case Closure 2010; Residual Gasoline, Oil and Grease, BTEX, MTBE present in soil; Residual Gasoline, Diesel, BTEX, TBA, Vinyl Chloride and DCA.

Note: Facility name, address, distance and direction from Site, and database listing were provided by EDR. Cornerstone did not verify the accuracy or completeness of this information.

Historic Adjoining Cleaners:

Save-U-Cleaners located at 144 East Santa Clara Street was listed on the EDR Historic Cleaner Database in 1960. This property is located approximately 74 feet to the north northwest of the Site. No information related to a release was located in the EDR database report or other subsequent data sources researched.

Hall G B located at 134 East Santa Clara Street was listed on the EDR Historic Cleaner Database in 1922. This property is located approximately 77 feet to the west northwest of the Site. No information related to a release was located in the EDR database report or other subsequent data sources researched.

Hop Sam located at 118 East Santa Clara Street was listed on the EDR Historic Cleaner Database in 1960. This property is located approximately 120 feet to the west of the Site. No information related to a release was located in the EDR database report or other subsequent data sources researched.

Nearby Spill / Release Incidents

Downtown Auto Express located at 154 East Santa Clara Street was identified on EDR's Historical Auto, Historical UST, SWEEPS UST, CUPA Listings, CERS, Historical CORTESE and the Leaking Underground Storage Tank (LUST) database which is listed on GeoTracker (GeoTracker is the California State Water Board Resources Control Board's [Water Board] data management system / database for sites that impact, or have the potential to impact, water quality in California, with an emphasis on groundwater). This property is located approximately 140 feet northeast of the Site across 4th Street and is currently developed as the City of San Jose City Hall.

Bank of Trade Building located at 100 East Santa Clara Street was identified on the Historical CORTESE, Historical LUST, CERS and the LUST database listed in GeoTracker. This property is located approximately 160 feet west of the Site and is currently developed with a hotel.

Chevron #9-4259 located at 147 East Santa Clara Street and other entities identified in reviewed databases at this address including Standard Stations Inc., Fourth and Santa Clara Chevron, Santa Clara Chevron Autotech, San Jose Smog Check and Save Money Auto were identified on the Historical CORTESE, EDR Historical Auto, UST, CUPA Listings, RCRA-SQG, EMI, San Jose HAZMAT, CERS, CERS HAZ WASTE, Historical LUST, SWEEPS UST, CERS Tanks and in the LUST database listed in GeoTracker. This property is located approximately 200 feet northwest of the Site.

4.1.3 Further Review of Database Listings

To obtain additional information regarding the identified former LUST cases previously discussed, a cursory review of readily available documents obtained from the state GeoTracker (<http://geotracker.waterboards.ca.gov>) database was performed. GeoTracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites. Brief summaries of the spill / release incidents are presented below; please refer to the original reports/documents referenced for complete details.

4.1.3.1. Downtown Auto Express located at 154 East Santa Clara Street

According to records reviewed including GeoTracker, EDR's Historical Auto database, historic Sanborn Fire Insurance Maps and historic aerial photographs, the Downtown Auto Express property (located approximately 140 feet northeast from the Site across South 4th Street) was developed with an automobile service station by 1948 and existed until the early 2000s when the property was redeveloped with the existing City of San Jose City Hall. The database files researched indicated that six underground storage tanks (USTs) were removed from the property in 1987.

Analysis of soil samples collected from the bottom of the UST excavations indicated that a release of total petroleum hydrocarbons as gasoline (TPHg) and BTEX (benzene, toluene, ethylbenzene and xylenes) had occurred. Approximately 16 cubic yards (CY) of soil was removed and a monitoring well was subsequently installed in 1987. TPHg and BTEX reportedly were detected in groundwater samples analyzed, with benzene concentrations exceeding its maximum contaminant level (MCLs). The Santa Clara Valley Water District (SCVWD) granted case closure in 1998 but stated that residual TPHg and benzene contamination remained in soil and groundwater and that appropriate risk mitigation measures should be implemented during future subsurface excavation activities. The property was subsequently redeveloped into the existing City of San Jose City Hall that included a below grade parking structure. The petroleum-impacted soil was presumably excavated during redevelopment, although documentation of any additional remedial work related to this redevelopment was not readily available for our review. Based on the documentation available for our review, impacts from the former Downtown Auto Express property do not appear likely.

4.1.3.2. Bank of Trade Building located at 100 East Santa Clara Street

One 1,200 gallon fuel oil tank was removed in 1989 at the Bank of Trade Building (located approximately 160 feet west of the Site). The UST reportedly was located in a subsurface vault beneath the sidewalk adjacent to South 3rd Street. The vault was concrete walled but did not have a concrete floor. Documents reviewed indicated that a large portion of the tank bottom was observed to be missing during removal. Liquid and semisolid sludge were observed within the UST excavation. The UST pit was excavated to a depth of approximately 16 feet and the excavated material reportedly was transported to a landfill for disposal. The day after removal, groundwater with approximately 1/8-inch of free product was observed within the excavation. Soil samples were collected from the excavation and stockpiles soil for laboratory analysis and TPH as diesel (TPHd) was detected at concentrations up to 1,800 milligrams per kilogram (mg/kg).

Four groundwater monitoring events were performed between 1993 and 1994; TPHd and BTEX reportedly were not detected (only analyses performed). The SCVWD granted closure in a letter dated November 22, 2000 stating that residual petroleum hydrocarbons are present in soil but appear to be below levels of regulatory concern. Further, the case documentation does not indicate that the impacts migrated past this property boundary. As such, impacts from this property do not appear likely.

4.1.3.3. Chevron #9-4259 located at 147 East Santa Clara Street

In 1983, a leak was reported in a gasoline product line and in 1984, a hole was discovered in a gasoline UST. The USTs reportedly were replaced in 1985. Groundwater monitoring was

conducted from 1984 to 2010. Analysis of groundwater samples initially detected TPHg (110,000 micrograms per Liter [$\mu\text{g/L}$]), TPHo (61,000 $\mu\text{g/L}$), benzene (4,200 $\mu\text{g/L}$), toluene (6,000 $\mu\text{g/L}$), ethylbenzene (2,000 $\mu\text{g/L}$) and xylenes (11,000 $\mu\text{g/L}$). Free product reportedly was encountered in monitoring well MW-6, which was located in the northwestern portion of the property. A groundwater extraction and treatment system operated between 1992 and 1996, which reportedly resulted in a reduction of contaminant concentrations. Subsequent remedial measures included the operation of a groundwater and soil vapor extraction system between 2004 and 2006.

In the final quarterly monitoring report (Third Quarter 2009), Stantec reported that the *“dissolved-phase petroleum hydrocarbon plume is generally stable and that conditions including available electron acceptors are favorable for intrinsic biodegradation...”* and *“...the plume is generally stable or decreasing in lateral extent of TPH-GRO (TPHg) benzene, and MTBE.”* Concentrations of TPHg remained above the Water Board Environmental Screening Level (ESL) of 100 $\mu\text{g/L}$. The County of Santa Clara Department of Environmental Health granted closure in a letter dated May 21, 2010 but stated that residual TPHg, total oil and grease, BTEX, MTBE and acetone remained in soil and TPHg, TPHd, BTEX, TBA, acetone, vinyl chloride and DCA remained in groundwater at concentrations that could pose an unacceptable risk to certain site development activities. The property continues to operate as a service station and no additional releases have been reported since case closure in 2010. Based on the closure status and no indication of an off-property release in the direction of the Site, impacts to the Site from this former leaking UST appear unlikely.

4.2 ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 15, 17 and 19 South 4th Street at the following public agencies: the City of San Jose Building Department (BD), City of San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH). The information reviewed is summarized in Table 5. A representative of the FD and DEH stated that they have no files pertaining to the Site. FD files were however, found in during review of the City of San Jose BD database.

Table 5. File Review Information

BD	17 S 4 th Street	2007	El Sabroso Restaurant	Permit to allow new lighting, windows, storefront doors and new electric openers for doors.

4.2.2 Radon

Elevated levels of radon in indoor air are a result of radon moving into buildings from the soil, either by diffusion or flow due to air pressure differences. The ultimate source of radon is the uranium that is naturally present in rock, soil, and water. Some types of rocks are known to have uranium concentrations greater than others and, consequently, there is an increased chance of elevated radon concentrations in soils and weathered bedrock where they are located. Areas down-slope which received sediments and/or surface and groundwater from rock units with above average uranium content also have an increased likelihood of elevated radon concentrations in soil gas. In California, bedrock that can contain above average uranium concentrations includes the Monterey formation, asphaltic rocks, marine phosphatic rocks, granitic rocks, felsic volcanic rocks, and certain metamorphic rocks.

The federal EPA has established an action level of 4 pCi/L, above which the EPA recommends taking action to reduce radon levels in structures. To help local, state, and federal agencies prioritize resources and implement radon-control building codes, the EPA published maps of radon hazards for each county in California (www.epa.gov/radon/zonemap/california.htm).

The Site is located in Santa Clara County, which is designated by the EPA as Zone 2 with a moderate potential (≥ 2 pCi/L and ≤ 4 pCi/L). It is important to note that EPA has identified structures with elevated levels of radon in all three zones, and the EPA recommends Site-specific testing in order to determine radon testing at a specific location.

Based on information present in the regulatory agency database report, radon screening results in the Site vicinity (zip code 95112) are summarized in Table 6.

Table 6. Reported Radon Screening Test Results

Agency	Zip Code	Number of Tests	Results (pCi/l)
State	95113	5	0 results >4 pCi/L
Federal	95113	95113	Average Activity: 1.363 pCi/L, measured within the first floor living area; 2.100 pCi/L, measured within the second floor living area; 2.300 pCi/L, measured within the basement.

4.2.3 Division of Oil, Gas and Geothermal Resources Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (<http://www.consrv.ca.gov/dog>) were reviewed.

No oil, gas, or geothermal wells were mapped within Township 07 South, Range 01 East, Section 8.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 2012 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 80 to 85 feet above mean sea level; topography in the vicinity of the Site slopes downward gently towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on our experience (and information presented in the California GeoTracker database pertaining to nearby properties), the shallow groundwater beneath the Site is likely present at depths of approximately 10 to 20 feet. Groundwater likely flows toward the northwest.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 7.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2016 obtained from EDR; copies of aerial photographs reviewed are presented in Appendix C.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980 and 2012; copies of historic topographic maps reviewed are presented in Appendix C.
- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1884, 1891, 1915, 1950, 1969 and 1984 obtained from EDR; copies of Sanborn maps are presented in Appendix C.
- **Local Street Directories:** We reviewed city directories obtained from EDR that were researched at approximately 5 year intervals between 1922 and 2014 to obtain information pertaining to past Site occupants. The city directory summary is presented in Appendix D.

Date	Source	Comment
1884	Sanborn map	What appears to be two stables and a shed is depicted on-Site.
1891	Sanborn map	A dwelling appears on-Site fronting South 4 th Street. A shed is depicted in the southwest corner of the Site.
1897 to 1980	Topographic map	Site is shown within the urban developed area of San Jose. Specific Site details are not depicted.
1915	Sanborn map	The Site appears to have been developed with a commercial building fronting South 4 th Street which was occupied by a French laundry business. A boiler also appears to have existed along southern boundary of the site within the commercial building. A stable appears to be located on the southwest boundary of the Site.
1939 to 2016	Aerial photograph	Site appears to be developed with existing commercial building fronting South 4 th Street.
1950 to 1984	Sanborn map	The existing structure fronting South 4 th Street appears on-Site and is occupied by a restaurant and a store separated into two tenant spaces.

6.1.1 City Directory Review

To obtain additional information regarding past tenants, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. A summary of the city directory listings is presented in Table 8; the acquired city directory report is presented in Appendix D.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 9 in Section 7.2. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Nicholas P. Brettner, P.G., visited the Site on June 27, 2019. The Site reconnaissance was conducted by walking representative areas of the Site, including the interior(s) of the on-Site structure(s), the periphery of the structure(s) and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing buildings and associated paved areas (typical of developed properties).

7.2 OBSERVATIONS

At the time of our visit, the Site was developed with a two-story building fronting South 4th Street with a single commercial tenant space on the ground floor and a single residential unit on the second floor. The commercial space was occupied by Agave Taqueria & Café restaurant with address 17 South 4th Street. The address 19 South 4th Street appeared to be associated with the second floor residence. Small quantities of janitorial supplies were kept in a storage area near the north interior wall of the building. A basement within the building was observed to be used for storage of restaurant supplies, other miscellaneous items and a walk-in refrigerator for food storage.

Except for common janitorial cleaning supplies, no hazardous materials were observed on-Site. Electricity and/or natural gas fuel sources appeared to be used for building heating and cooling purposes. Potable water appeared to be supplied by the local water service provider. The building presumably is connected to the publicly owned sanitary sewer system; no on-Site septic systems were obvious.

An asphalt-paved parking area for the on-Site business was observed on the western approximate half of the Site.

Cornerstone did not access the interiors of the on-Site residential unit.

SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to the Site owner. The completed questionnaire was not returned to us as of the date of this report.

8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance to ASTM E1527-13 to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site was developed by 1884 with what appears to have been a shed and two stables. By 1891, a dwelling and a shed was constructed on-Site fronting South 4th Street. By 1915, the Site was developed with a commercial building fronting South 4th Street which was occupied by a French laundry business as depicted on Figure 2. The Site address 17 South 4th Street was identified in 1922 and 1925 as New Style French Laundry in EDR's Historical Cleaners database. It also appears that a boiler associated with the French laundry existed within the same commercial building near the southern boundary of the Site. In 1930, Grigg G R Jr auto repair was identified at 15 South 4th Street in a city directory listing and was additionally identified as Grigg G R JR / Automobile Repairing in EDR's Historical Auto database for the same address.

In 1939, the City of San Jose BD issued a building permit for the new construction of the existing on-Site two-story building; addresses listed on the permit were 15, 17 and 19 South 4th Street. The ground floor was noted as a "business" and the second floor noted as a "residence" on the permit. Based on City directory listings and Sanborn maps, the ground floor level appeared to be split into two separate tenant spaces. City directory listings for 15 South 4th Street in 1940 through 2000 identified various restaurant and retail businesses. Between 1940 and 2006, city directory listings for 17 South 4th Street identified various beauty salon businesses, retail and restaurant businesses.

At the time of our Site visit, the ground floor of the on-Site building was no longer separated into two separate tenant spaces and is currently occupied by Agave Taqueria and Café. The second floor of the building appeared to remain a residential unit.

9.2 CHEMICAL STORAGE AND USE

At the time of our Site visit, small quantities of janitorial cleaning, paints and maintenance supplies were observed in storage areas on the ground floor level and basement level in Agave

Taqueria and Café. No significant quantities of hazardous materials or evidence of spills or leaks were observed during our Site visit.

New Style French Laundry was identified as a Site occupant as early as 1915 on Sanborn maps and later listed in the Historical Cleaners Database in 1922 and 1925. Laundry/Cleaner facilities of the that time may have used and/or stored hazardous materials including petroleum based solvents (e.g. Stoddard solvents) and/or organic solvents. Additionally, the 1915 Sanborn map depicted the presence of a boiler along the southern boundary of the Site. During this time period, boilers were commonly used to provide hot water and steam for laundry/cleaning works. Although no information was identified during this review describing what fuel was used to power the boiler and how that fuel was stored, there is a potential that fuel oil may have been used and if so, that fuel oil was likely stored in an AST(s) (above ground storage tank) or UST(s). During this review and our Site visit, no evidence of an AST(s) or UST(s) were identified, and no records were revealed that an AST(s) or UST(s) had been previously removed from the Site.

Grigg G R Jr auto repair was identified as a Site occupant in 1930 and may have used and/or stored hazardous materials at the Site such as petroleum products, petroleum based solvents and organic solvents.

Mitigation measures could be required prior to Site development if chemicals spills or leaks occurred during past Site use. As such, we recommend evaluating soil, soil vapor, and groundwater quality prior to purchasing the Site.

9.3 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Several facilities in the vicinity were reported as hazardous materials users and/or have past UST releases. Based on the information reviewed for these properties, impacts from these off-Site properties do not appear likely to have significantly impact the Site.

9.4 ABESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structure, building materials may contain asbestos. If demolition, renovation, or re-roofing of the building is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

9.5 LEAD-BASED PAINT

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the building, lead-based paint may be present. If demolition is planned, the removal of lead-based paint isn't required if it is bonded to the building materials. However, if the lead-based paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

The Residential Lead-Based Paint Hazard Reduction Act of 1992 recognizes that families have a right to know about lead-based paint and potential lead hazards in their homes. Congress directed EPA and HUD to work together to develop disclosure requirements for sales and

leases of older (pre-1978) housing. The disclosure of known lead paint hazards and distribution of a lead-based paint information pamphlet to prospective buyers or lessees is required. These and other applicable regulations should be followed if continued use of the structure for residential purposes is planned.

9.6 ENVIRONMENTAL ATTORNEY

Due to known Recognized Environmental Conditions at the Site, we recommend consulting with an environmental attorney regarding liabilities associated with acquiring the Site.

9.7 DATA GAPS

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider this data gap to be significant.
- The environmental questionnaire provided for completion by the Site owner was not returned to us as of the date of this report. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider this data gap to be significant.

9.8 DATA FAILURES

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data failures were identified:

- The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The earliest record obtained during this study was a Sanborn map from 1883 that shows the Site to have already been developed, mainly with residences. Although earlier records were not available, the Site's first developed use was likely similar to that shown on the 1883 Sanborn map. Thus, this data failure is not considered to be significant.

9.9 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 of 15, 17 and 19 South 4th Street, San Jose, California. This assessment identified the following Recognized Environmental Conditions.

- A French laundry business formerly occupied the Site until the 1920s. The Sanborn Maps indicate a boiler was present on-Site. Fuel oil may have been used to power the boiler which would have likely been stored on-Site in an AST(s) or UST(s). In addition, the laundry business may have used and/or stored hazardous materials including petroleum based solvents (e.g. Stoddard solvents) and organic solvents. Spills or leaks from any of these hazardous materials could impact the underlying soil, soil vapor and/or groundwater quality.
- The Grigg G R Jr auto repair may have used and/or stored hazardous materials at the Site, such as petroleum products, petroleum based solvents and organic solvents. If released at the Site, there is potential that underlying soil, soil vapor and/or groundwater quality may have been impacted.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions associated with the Site. Bayview Development Group, Inc. understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Bayview Development Group, Inc. understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Bayview Development Group, Inc. may have provided Cornerstone environmental documents prepared by others. Bayview Development Group, Inc. understands that Cornerstone reviewed

and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Bayview Development Group, Inc and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

APPENDIX A – TERMS AND CONDITIONS

**CORNERSTONE EARTH GROUP, INC.
TERMS AND CONDITIONS**

1. Agreement

- 1.1 Cornerstone Earth Group, Inc.'s ("Cornerstone") services are defined by and limited to (a) those services (the "Work") described in the attached proposal, which is incorporated herein by this reference, and (b) these Terms and Conditions of Agreement ("Terms and Conditions"). Together, the proposal and Terms and Conditions form the "Agreement." This Agreement represents the entire agreement between the Client and Cornerstone (collectively, the "Parties") and supersedes all prior negotiations, representations, or agreements, either written or oral. The Agreement can only be amended by a written instrument signed by both the Client and Cornerstone. In the event that the Client authorizes the Work by means of a purchase order or other writing ("Confirmation"), it is expressly agreed that these Terms and Conditions shall apply, and any terms, conditions or provisions appearing in the Confirmation are void and inapplicable except to the extent the Confirmation authorizes the Work and binds the Client to this Agreement.
- 1.2. Failure to immediately enforce any provision in this Agreement shall not constitute a waiver of the right to enforce that provision or any other provision. No waiver by the Parties of a breach of any term or covenant contained in this Agreement, whether by conduct or otherwise, in any one or more instances shall be deemed to be or construed as a further or continuing waiver of any such breach or as a waiver of a breach of any other term or covenant in this Agreement.

2. Scope of Services

- 2.1 Cornerstone will serve the Client by providing professional counsel and technical advice based on information furnished by the Client. The Client will make available to Cornerstone all known information regarding existing and proposed conditions of the site, and will immediately transmit any new information that becomes available or any change in plans. The Client and Cornerstone agree that Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for any claims, damages, costs, or losses arising from or in any way related to conditions not actually encountered during the course of Cornerstone's Work and Cornerstone shall not have any liability or responsibility for losses resulting from inaccurate or incomplete information supplied by the Client, and the Client agrees to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against claims, damages, costs or losses arising therefrom. Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for failing to discover any condition the discovery of which would reasonably require the performance of services not authorized by the Client.

3. Terms of Payment

- 3.1 The Client's obligation to pay for the Work is in no way dependent upon the Client's ability to obtain financing. The Client's obligation to pay for the Work is in no way dependent upon the Client's successful completion of the Client's project. No provision of this Agreement shall be construed to constitute a "Pay-When-Paid" clause or a "Pay-If-Paid" clause.
- 3.2 Payment for the Work shall be due and payable upon receipt of Cornerstone's invoice. To be recognized, any dispute over charges must be claimed in writing within thirty (30) calendar days of the billing date. Any dispute over an invoice amount shall not affect the Client's obligation to pay invoice amounts not in dispute. Amounts unpaid thirty (30) calendar days after the issue date of Cornerstone's invoice shall be assessed a service charge of 1 percent per month on balances outstanding.
- 3.3 Timely payment is a substantial condition of the Client's performance under this Agreement. Cornerstone may at its option withhold delivery of reports or other work product or suspend performance of the Work pending receipt of payments for all past due invoices and Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no liability to the Client for delay or damage caused because of such withholding or suspension. In the event that Cornerstone must take legal action to enforce this Agreement for payment for the Work performed and Cornerstone prevails, Cornerstone will be reimbursed by the Client for all expenses, including but not limited to reasonable attorney's fees and litigation costs.

4. Standard of Care

- 4.1 While performing the Work under this Agreement, Cornerstone shall exercise the degree of care and skill ordinarily exercised under similar circumstances by members of the environmental and geotechnical engineering consulting professions, as applicable, performing the kind of services to be performed hereunder and practicing in the same or similar locality at the same period of time.
- 4.2 Except for the express promise set forth in Subsection 4.1 herein, Cornerstone neither makes, nor offers, nor shall Cornerstone be liable to the Client for any express or implied warranties with respect to the performance of the Work.

5. Force Majeure

- 5.1 Cornerstone will diligently proceed with its services and will complete the Work in a timely manner, but it is expressly agreed to and understood by the Client that Cornerstone shall not be held responsible for delays occasioned by factors beyond its control, nor by factors which could not reasonably have been foreseen at the time of the execution of the Agreement between the parties.
- 5.2 Except for the obligation to pay for the Work performed and expenses incurred, neither Cornerstone nor the Client shall be liable for its failure to perform hereunder, in whole or in part, due to contingencies beyond its reasonable control, included, but not limited to, strikes or other concerted acts of workmen not in Cornerstone's employ, whether direct or indirect, riots, war, acts of terrorism, fire, floods, storms, washouts, acts of God or the public enemy, explosions, accidents, epidemics, breakdowns, injunctions, compliance with any law, regulation or order, whether valid or invalid, of the United States of America or any governmental body or any instrumentality thereof, whether now existing or hereafter created.

6. Effect of Delay or Impediment to Work

- 6.1 If any event occurs which causes or may cause Cornerstone: (a) to be impeded in its performance of the Services; or (b) to be delayed in the completion of the Work within the time provided in the attached proposal and/or in an applicable Change Order due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5 herein, Cornerstone shall notify the Client in writing within ten (10) business days of the date on which Cornerstone becomes aware of such event.
- 6.2 The Client shall notify Cornerstone in writing of the Client's agreement or disagreement with Cornerstone's claim of an impediment or delay to performance within five (5) business days after receipt of Cornerstone's notice under Subsection 6.1. If the Client agrees with Cornerstone's claim, the time for performance of such requirement may be extended as mutually agreed in writing by the parties as provided in Subsection 1.1. If the Client disputes Cornerstone's assertion of an impediment or delay, such dispute shall be resolved pursuant to Section 17.
- 6.3 Impediments or delays to performance, addressed pursuant to this Section, shall not (a) constitute a breach hereunder; (b) give rise to any special right to terminate this Agreement; or (c) give rise to a claim by the Client for damages or other relief, if and to the extent that such impediment or delay is due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5.

7. Right of Entry

- 7.1 Unless otherwise agreed in writing, the Client shall furnish and/or secure right of entry to the Site described in the proposal for Cornerstone personnel and equipment in order for Cornerstone to perform the Work. The Client shall waive any claim against Cornerstone, its officers, directors, employees, agents and/or subcontractors and agree to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any claims arising from entry onto the Site which is the subject of the Work.

7.2 The Parties acknowledge and agree that although Cornerstone will take reasonable precautions to minimize damage to property, including landscapes, hardscapes, crops and underground utilities, any and all damages, losses or expenses which could result from damage to such property due to Cornerstone's performance of the Work under this Agreement shall be the sole and exclusive responsibility of the Client provided that such damages, losses or expenses are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein. The Client shall indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any damages, losses or expenses including, without limitation, attorney's fees, sustained or incurred by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claims arising out of any damage to subsurface utilities due to Cornerstone's performance of the Work under this Agreement, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

8. Monitoring of Construction

8.1 The Client acknowledges and understands that unanticipated or changed conditions may be encountered during construction. There is a substantial risk to the Client and to Cornerstone if Cornerstone is not engaged to provide complete services, including but not limited to, construction observation services. Such risks include the increased likelihood of misinterpretation of Cornerstone's findings and conclusions and error in implementing recommendations by Cornerstone. If Client fails to retain Cornerstone to provide complete services, the Client agrees, notwithstanding any other provisions of this Agreement, to the fullest extent permitted by law, to indemnify and hold harmless Cornerstone, its officers, partners, employees and Cornerstones from and against any and all claims, suits, demands, liabilities, losses, damages or costs, including reasonable attorneys' fees and defense costs arising out of or in any way connected with the Work or arising out of implementing or interpreting Cornerstone's work product except when the Claim arises from the sole negligence of Cornerstone or where the Claim arises from the willful, wanton or reckless conduct of Cornerstone.

8.2 Cornerstone shall not be required to make exhaustive or continuous on-site observations to check the quality or quantity of the Work and shall not be responsible for any contractor's failure to carry out the work in accordance with the contract documents.

8.3 Cornerstone shall not be responsible for the acts or omissions of any contractor or subcontractor or any of the contractors' or subcontractors' agents or employees or other persons performing any work on the Project.

9. Changed Conditions

9.1 If, during the term of this Agreement, circumstances or conditions that were not originally contemplated by or known to Cornerstone are revealed, to the extent that they affect the scope of services, compensation, schedule, allocation of risks or other material terms of this Agreement, Cornerstone may call for renegotiation of appropriate portions of this Agreement. Cornerstone shall notify the Client of the changed conditions necessitating renegotiation, and Cornerstone and the Client shall promptly and in good faith enter into renegotiation of this Agreement to address the changed conditions. If terms cannot be agreed to, the parties agree that either party has the absolute right to terminate this Agreement, in accordance with the termination provision hereof.

10. Jobsite Safety

10.1 Neither the professional activities of Cornerstone nor the presence of Cornerstone or its employees, subconsultants and subcontractors shall relieve the Client or the Client's General Contractor of its obligations, duties and responsibilities, including, but not limited to, health and safety programs. Cornerstone and its personnel have no authority to exercise any control over the site or any construction contractor or its employees in connection with their work or any health or safety programs or procedures. The Client acknowledges and agrees that Cornerstone shall not be responsible for jobsite safety.

11. Hazardous Materials and Environmental Contamination

11.1 The Client hereby warrants that if it knows or has any reason to assume or suspect that hazardous or toxic substances, or any other type of environmental hazard, contamination or pollution may exist at the Site, the Client will immediately inform Cornerstone to the best of the Client's knowledge of such hazardous or toxic substances, environmental hazard, contamination or pollution's type, quantity and location.

11.2 Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no title to, ownership of, or legal responsibility and/or liability for any and all contamination at the Site, including, but not limited to, the groundwater thereunder. "Contamination at the Site" includes but is not limited to any hazardous or toxic substance, or any other type of environmental hazard, contamination or pollution present at or under the Site, including, but not limited to the ground water thereunder, which is not brought onto the Site by Cornerstone, its officers, directors, employees, agents and/or subcontractors.

11.3 Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may constitute a changed condition mandating renegotiation and/or termination of this Agreement. Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may make it necessary for Cornerstone to take immediate measures to protect the public health, safety and the environment. The Client agrees that Cornerstone may take any or all measures that in Cornerstone's professional opinion are justified to preserve and protect the health and safety of Cornerstone's personnel, the public and the environment, and the Client agrees to compensate Cornerstone for the cost of such services.

11.4 The Client agrees to indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all damages, losses or expenses, including, but not limited to, reasonable attorney's fees and legal costs connected therewith, liabilities, penalties and fines sustained by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claim with respect to and arising out of any and all Contamination at the Site, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

11.5 Subsurface sampling may result in unavoidable contamination of certain subsurface areas, as when a probe or boring is advanced or drilled through a contaminated area into a clean soil or water-bearing zone. Because of the risks posed by such work, and because subsurface sampling is often a necessary part of Cornerstone's Work, the Client hereby agrees to waive all claims against Cornerstone, its officers, directors, employees, agents and/or subcontractors with respect to and arising out of any and all subsurface sampling, including but not limited to claims relating to cross-contamination occurring because of such subsurface sampling, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

12. Disposal of Samples and Drill Cuttings

12.1 Unless mutually agreed in writing by the Parties as provided in Subsection 1.1 herein, Cornerstone shall hold samples collected during the performance of the Work no longer than thirty (30) calendar days after their date of collection. Drill cuttings and waste materials will be left on-Site. In the event that soil, rock, water, drill cuttings and/or other samples or materials are contaminated or are suspected to contain hazardous materials or other toxic substances hazardous or detrimental to public health, safety or the environment as defined by federal, state or local law, Cornerstone will, after completion of testing, notify the Client of the same in order for the Client to arrange for the disposal of the samples and/or materials. The Client recognizes and agrees that Cornerstone at no time assumes title to said samples and/or materials, and that the Client is responsible for the disposal of such samples and/or materials. The Client agrees to pay all costs associated with any storage, transport and/or disposal of samples and/or materials, and to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all claims arising out of or in any way related to the storage, transport and/or disposal of asbestos, hazardous or toxic substances, and/or pollutants, including but not limited to any samples and/or materials.

13. Use and Ownership of Documents

13.1 All reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and instruments prepared by Cornerstone as instruments of service shall remain the property of Cornerstone. Cornerstone shall retain all common law, statutory and other reserved rights, including copyright thereto. In the event the Client, the Client's contractors or subcontractors, or anyone for whom the Client is legally liable makes or permits to be made any changes to reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents prepared by Cornerstone without obtaining Cornerstone's prior written consent, the Client shall assume full responsibility for the results of such changes. Therefore, the Client agrees to waive any claim against Cornerstone and to release Cornerstone from any liability arising directly or indirectly from such changes. In addition, the Client agrees, to the

fullest extent permitted by law, to indemnify and hold harmless Cornerstone from any damages, liabilities or costs, including reasonable attorney’s fees and costs of defense, arising from such changes.

The Client agrees that all reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and other services furnished to the Client or its agents and/or employees by Cornerstone, which are not paid for, shall be immediately returned upon demand and may not be used by the Client for any purpose. Any reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinions provided by Cornerstone to the Client as part of the Work are provided for the sole and exclusive use of the Client for specific application to the Site detailed in this Agreement. Any third party use of any drafts, reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinion of Cornerstone is the sole responsibility of the Client.

14. Insurance

- 14.1 Cornerstone, its officers, directors, employees and agents have and shall maintain during the term of this Agreement insurance in the following types: (a) Worker’s Compensation Insurance; (b) Employer’s Liability Insurance; (c) Commercial General Liability Insurance (GLI); and (d) Professional Liability Insurance.
- 14.2 Cornerstone shall, at the Client’s request, provide the Client with a certificate of insurance or other satisfactory evidence that such insurance has been obtained and are maintained in force through the term of this Agreement. Any additional insurance policy or increase in the coverage of existing insurance required by the Client shall constitute an additional expense under this Agreement, and the Client shall reimburse Cornerstone for any additional premiums and costs incurred by Cornerstone in connection with obtaining such additional insurance.

15. Prevailing Wage Obligations

- 15.1 The Client shall notify Cornerstone in writing if the Work contemplated by this Agreement constitutes a “public work” under any and all federal, state and/or local prevailing wage laws, and/or living wage laws, including but not limited to the Davis-Bacon Act and the provisions of California Labor Code §§ 1720 *et seq.* In addition, the Client shall notify Cornerstone if Cornerstone is obligated by statute, any public contracting authority and/or a developer to pay prevailing wages and benefits and/or any predetermined wages or benefits (collectively, “prevailing wage obligations”). In the event that Cornerstone must adhere to federal, state and/or local prevailing wage obligations for the Work performed, the Client shall provide Cornerstone with any and all prevailing wage determinations applicable to the Work to be performed under this Agreement. Any prevailing wage obligations might affect the payment terms contemplated by this Agreement and thus constitute a changed condition mandating renegotiation and/or termination of this Agreement. The Client understands and agrees that Cornerstone will rely on the representations made by the Client with regard to prevailing wage obligations and the Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney’s fees and legal costs, arising from Cornerstone’s reliance upon the Client’s representations regarding prevailing wage obligations.

16. Limitations—THIS CLAUSE LIMITS CORNERSTONE’S LIABILITY

- 16.1 Cornerstone shall not be responsible for the validity or accuracy of data collected by others or for interpretations made by others.
- 16.2 Cornerstone’s relationship with the Client under this Agreement shall be that of an independent contractor. Nothing in this Agreement shall be construed to designate Cornerstone, its officers, directors, employees, agents and/or subcontractors as employees, agents, joint ventures or partners of the Client. Cornerstone shall have no authority to bind, commit or obligate the Client in any manner and shall not hold itself out to third parties as being capable of doing so.
- 16.3 The Client and Cornerstone have discussed the risks and rewards associated with this project, as well as Cornerstone’s fee for services. After negotiation, the Client and Cornerstone have expressly agreed to allocate certain of the risks so that, to the fullest extent permitted by law, the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third-parties is limited to \$50,000 or the amount of Cornerstone’s fee, whichever is greater, for any and all injuries, damages, claims, losses, expenses, or claim expenses (including attorney’s fees) arising out of this Agreement from any cause or causes. Such causes include but are not limited to Cornerstone’s negligence, errors, omissions, strict liability, breach of contract or breach of warranty. In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable in contract, tort, strict liability, warranty or otherwise, for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power.
- 16.4 Notwithstanding any other provision of this Agreement , the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third parties, including attorney’s fees awarded pursuant to this Agreement, for claims, damages or losses arising out of the treatment, transport, storage, discharge, dispersal or release of hazardous materials, shall be limited to \$50,000 or the amount of Cornerstone’s fee, whichever is greater and regardless of the legal theory under which liability is imposed.
- 16.5 For an additional 5% of Cornerstone’s total fee or \$500, whichever is greater, Cornerstone will raise the limitation of liability up to the amount that actually would be paid by Cornerstone’s insurance carriers if Client and Cornerstone initial below:

LIMITATION INCREASE: THE LIMITATION OF LIABILITY IS INCREASED TO THE ACTUAL AMOUNT PAID BY CORNERSTONE’S INSURANCE CARRIERS IN EXCHANGE FOR AN ADDITIONAL FEE OF 5% OF THE TOTAL SERVICE CHARGE OR \$500, WHICHEVER IS GREATER.

Client’s Initial	Date	Cornerstone’s Initial	Date

- 16.6 The Client shall indemnify, defend and hold harmless Cornerstone and its officers, directors, employees, agents and subcontractors from any and all damages, losses, or expenses, included but not limited to reasonable legal expenses and attorney’s fees connected therewith, sustained by Cornerstone, its officers, directors, employees, agents and subcontractors as a result of any and all claims, demands, suits, causes of action, proceedings, judgments and liabilities for property damage, statutory penalty and/or personal injury with respect to and arising out of the Client’s negligent acts, omissions or material breach of this Agreement. In the event a claim is the result of joint negligent acts or omissions of the Client and Cornerstone, the Client’s duty of indemnification shall be in proportion to its respective allocable share of the joint negligence.
- 16.7 Client acknowledges and agrees that in no event shall any action or proceeding be brought against Cornerstone or proceeding be brought against Cornerstone by Client or its assignees for any claim or cause of action arising from or in any way related to the Work or this Agreement unless such action or proceeding is commenced within three (3) years from the Date of Completion of Work provided by Cornerstone under this Agreement. The Date of Completion shall be the date of the final invoice for the Work performed under this Agreement.
- 16.8 If Client requests that Cornerstone’s work product be relied upon by a third party, including, but not limited to a lender, Client agrees to provide the third party with a copy of these terms and conditions, and Client agrees to require said third party to agree to limit Cornerstone’s total liability to Client and any third party as described in paragraph 16.4 and Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney’s fees and legal costs, arising from third party claims, damages, costs and losses arising out of or in any way related to Work.

17. Disputing Cornerstone’s Performance

- 17.1 Except as provided in Section 6 and Subsection 17.2 herein, if Cornerstone shall breach any provision herein, the Client shall notify Cornerstone within five (5) business days of the Client’s knowledge of such breach. Except as provided in Subsections 17.3 herein, upon receipt of the Client’s notice, Cornerstone shall have the option to take such corrective measures, if any, to remedy the breach, and shall notify the Client within five (5) business days after receipt of the

Client's notification of the corrective measures Cornerstone shall take and the estimated time period within which the corrective measures shall be taken. In no event shall Cornerstone be liable to the Client for any damages without being given a reasonable opportunity to remedy its breach as provided herein.

- 17.2 The Client shall make no claim for professional negligence unless the Client has first provided Cornerstone with a written certification executed by an independent Consultant currently practicing in the same discipline and locality as Cornerstone and licensed in the State of California. This certification shall (a) contain the name and license number of the certifier; (b) specify the acts or omissions that the certifier contends are not in conformance with the standard care for a Cornerstone performing professional services under similar circumstances; and (c) state in detail the basis for the certifier's opinion that such acts or omissions do not conform to the standard of care. This certificate shall be provided to Cornerstone no less than thirty (30) calendar days prior to the presentation of any claim or the institution of any mediation, arbitration or judicial proceeding.
- 17.3 Cornerstone agrees that upon receipt of written notice from the Client pursuant to Subsection 17.2 herein it will implement necessary corrections to the Work performed by Cornerstone that fails to conform to the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, as mutually agreed in writing by the Parties as provided in Subsection 1.1. herein, if such written notice is received within one (1) year of the performance of the Work failing to conform to Subsection 4.1. If Cornerstone has been paid by the Client for such Work, Cornerstone shall perform the corrections at its own expense. If Cornerstone has not been paid by the Client for such Work, and the Work is subsequently corrected to conform with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, the Client shall pay Cornerstone in accordance with Section 3 herein.
- 17.4 In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power, or any other incidental, special, indirect or consequential damages of any kind or nature whatsoever resulting from Cornerstone's performance or failure to perform the Work in accordance with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1.
- 18. Termination**
- 18.1 Cornerstone shall have the right to terminate this Agreement ten (10) business days after written notice is sent to the Client if (a) the Client fails to pay any of Cornerstone's undisputed invoices within sixty (60) days from the date of the invoice; or (b) Cornerstone's attached proposal and/or the Work was based upon misinformation, whether by the Client or a third party, or upon information not fully disclosed to Cornerstone, whether by the Client or a third party.
- 18.2 Except as provided for in Section 6, and after compliance with Section 17, the Client shall have the right to terminate this Agreement ten (10) business days after written notice is sent to Cornerstone if Cornerstone fails to comply in any material respect with any of the material provisions herein and subsequently fails to notify the Client pursuant to Subsections 17.1 and 17.3 of the corrective measures Cornerstone intends to take.
- 18.3 The termination of this Agreement by Cornerstone under Subsection 18.1 herein, or by the Client under Subsection 18.2 herein, shall not relieve the Client of its obligations to pay Cornerstone for any of the Work performed and expenses incurred as of the date of termination, and shall not constitute a waiver by Cornerstone or the Client of any cause of action for breach of this Agreement or any provision herein.
- 19. Miscellaneous Provisions.**
- 19.1 "Indemnity" Defined. The term "indemnify" shall mean indemnify, defend and hold harmless from and against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and all legal costs incurred on appeal, and all interest thereon, accruing or resulting to any and all persons, firms, or any other legal entities, on account of any damages or losses to property or persons, including death or economic losses, arising out of the item, matter, action or inaction specified in the specific provision.
- 19.2 Choice of Counsel. In any circumstance whereby Cornerstone is entitled to indemnification by the Client, Cornerstone shall have the right to select counsel of its choosing.
- 19.3 Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the Parties and their successors and assigns as provided herein. The Client shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of Cornerstone. Cornerstone shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of the Client. The Client hereby consents to the subcontracting of those portions of the Work as the attached proposal herein indicates are or will be subcontracted. Notwithstanding the above, Cornerstone shall have the right to assign monies due hereunder for the Work performed and expenses incurred.
- 19.4 Third Party Beneficiaries. The Parties agree that this Agreement is not intended by either Cornerstone or the Client to give any benefits, rights, privileges, actions or remedies to any person or entity, partnership, firm or corporation as a third party beneficiary or otherwise under any theory of law, that is not a signatory to this Agreement.
- 19.5 Survival. In order that the Parties may fully exercise their rights and perform their obligations arising from the performance of this Agreement, any provisions of this Agreement that are necessary to ensure such exercise or performance shall survive the termination of this Agreement.
- 19.6 Severability. If any part, term or provision of this Agreement shall be held illegal, unenforceable or in conflict with any federal, state or local law having jurisdiction over this Agreement, the validity of the remaining parts, terms or provisions of this Agreement shall not be affected thereby.
- 19.7 Choice of Law and Venue. This Agreement shall be governed by California law. The venue for any legal action brought pursuant to this Agreement shall be located within the County of Santa Clara, State of California.
- 19.8 Publicity. Unless otherwise mutually agreed in writing by the parties as provided in Subsection 1.1, Cornerstone may use and publish the Client's name and a general description of Cornerstone's services with respect to the Work in describing Cornerstone's experience and qualifications to other clients or prospective clients.
- 19.9 Signatories. Each undersigned representative of the Parties to this Agreement certifies that he or she is fully authorized to enter into the terms and conditions of this Agreement and to execute and legally bind such Party to this document.
- 19.10 Corporate Protection. It is intended by the parties to this Agreement that Cornerstone's services in connection with the Work shall not subject Cornerstone's individual employees, officers or directors to any personal legal exposure for the risks associated with this Project. Therefore, and notwithstanding anything to the contrary herein, the Client agrees that as the Client's sole and exclusive remedy, any claim, demand or suit shall be directed and/or asserted only against Cornerstone, a California Corporation, and not against any of Cornerstone's individual employees, officers or directors.
- 19.11 Code Compliance. Cornerstone shall exercise usual and customary professional care in its efforts to comply with applicable laws, codes and regulations as of the date of this Agreement.
- 19.12 Quotation. Unless stated in writing, this quotation shall not remain in effect after thirty (30) days of the Proposal date.
- 19.13 Contractors State License. Cornerstone maintains a General Engineering A license (No. 905816) with a Hazardous Substances Removal and Remedial Actions Certification with the State of California, which are regulated by the Contractors State License Board. Any questions concerning a contractor may be referred to the Registrar, Contractors State License Board, P.O. Box 26000, Sacramento, California 95826.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 15 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
 Site History: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional

monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History:

UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

 Potential Media Affected: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: * Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Sprits / Distillates
 Site History: Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 370

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<p>File Location: Potential Media Affected: Potential Contaminants of Concern: Site History:</p>	<p>Regional Board Other Groundwater (uses other than drinking water) Waste Oil / Motor / Hydraulic / Lubricating, * Metals The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.</p>

Potential Contaminants of Concern: Diesel, Gasoline
Site History: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to include determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

 File Location: All Files are on GeoTracker or in the Local Agency Database
 Local Case Number: 07S1E08F01f
 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Gasoline
 Site History: 1985 In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain 740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were

collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collected and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted. In November 2010, air sparge feasibility testing and vapor extraction feasibility testing was conducted. High concentrations were reported in the recovered soil vapor, which demonstrates mass is still present in areas near the building onsite. CAP to do SVE, AS and GWE at the site was approved 5/1/13. Delays have been encountered with obtaining necessary permits for the City of San Jose Building department. Proposed remedial action should be successful in reducing the mass remaining near and possibly under the onsite building.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Robin Ward of HMCD to conduct a routine APSA inspection. On facility's 2/28/18 CERS submittal, 20,240 gallons of diesel fuel, 1,100 gallons of hydraulic oil and 350 gallons of motor oil were reported. During inspection it was clarified that the 20,240 gallons of diesel fuel and 350 gallons of motor oil belong to DataPipe, a tenant in the same building. DataPipe has their own CERS ID# and facility information and is correctly permitted for APSA. 150 South First Street maintains control of 4 elevator rooms, each with one oil-containing hydraulic lift tank. Tank capacities are equal to 1,100 gallons, which is below SPCC and APSA thresholds. Facility's APSA permit will be inactivated.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site with Robin Ward of HMCD to conduct a follow up hazardous materials business plan inspection. Facility's HMBP submittal on 2/28/18 indicated that 8 reportable chemicals are located at this facility and that they are subject to APSA. Mr. Cabanayan indicated that some of the inventory items submitted on CERS actually belong to

HUGO GARAY- DATA CENTER CHIEF ENGINEER WITH DATAPIPE ON SEPTEMBER 14, 2017. A facility walk through was conducted and the two 10,000 gallon diesel fuel tanks were inspected. Both tanks have adequate secondary containment and are electronically monitored by a Veeder Root TLS-350 monitoring system. The last annual monitoring certification was conducted in April 10, 2017. The two 10,000 gallon diesel fuel tanks have overflow prevention monitoring alarms. Two bulk storage aboveground diesel fuel tanks were also inspected on the roof (one 100 gallon and one 228 Gallon diesel tanks). The facility also has three Step-down electrical transformers containing insulating oil for a total storage capacity of 3,777 gallons and three Single -walled elevator steel reservoirs containing hydraulic oil. The facility had a current Spill Prevention, Control and Countermeasures Plan (SPCC) that was dated July [Truncated]

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: ? accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator ? the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.

Violation Notes: Returned to compliance on 10/24/2017. Facility accumulated a 55 gallon drum of hazardous waste absorbent located in the diesel fuel polishing room for longer than a year. The accumulation start date was listed on the hazardous waste label as January 2001. Make arrangements for the immediate removal of the 55 gallon drum of hazardous waste absorbent in the diesel fuel polishing room. Do not store hazardous waste at the point of generator (i.e. satellite) accumulation for longer than a year.

A facility walk through was conducted and the two 10,000 gallon diesel fuel tanks were inspected. Both tanks have adequate secondary containment and are electronically monitored by a Veeder Root TLS-350 monitoring system. The last annual monitoring certification was conducted in April 10, 2017. The two 10,000 gallon diesel fuel tanks have overflow prevention monitoring alarms. Two bulk storage aboveground diesel fuel tanks were also inspected on the roof (one 100 gallon and one 228 Gallon diesel tanks). The facility also has three Step-down electrical transformers containing insulating oil for a total storage capacity of 3,777 gallons and three Single -walled elevator steel reservoirs containing hydraulic oil. The facility had a current Spill Prevention, Control and Countermeasures Plan (SPCC) that was dated July [Truncated]

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Site History: In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also

contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlyle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'. On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

 Potential Media Affect: Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Heating Oil / Fuel Oil
 Site History: Underground heating oil tank located within the basement of the building. In 1992, a water main/line ruptured near this building and flooded the basement. The flooding caused the product to come out of the tank. The tank was taken out of service and the tank was left in place. Subsurface investigation conducted in 2010 found soil and groundwater contamination. The UST will be properly closed in place.

Site History: The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegradation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Jarrod Cooke (certifications current) of Tanknology. The annular, sump, and under dispenser containment (UDC) sensors were tested in water and provided audible and visible alarms except as noted above. The sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI and provided audible and visible alarms and turbine shutdown. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill buckets are direct buried and passed a vacuum test at 30 inHg. The same issue noted in the 2015 inspection report with the L2 and L4 alarms not clearing occurred today. Eval Notes: On site with Ana Bui of HMCD to witness the annual monitoring system certification performed by Jarrod Cooke of Tanknology. Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Eval Notes: On site to witness the annual monitoring system certification and spill bucket test performed by Mr. Steve Willems (all certifications current) of Tanknology. The site's dispenser handles have been red-tagged by SCC Weights and Measures. Since the dispensers cannot be activated to verify positive shutdown, failsafe and the line leak detectors, the sensor testing will have to be done after the red tags have been properly removed by SCC Weights and Measures. Ensure sensor testing is performed by January 31, 2017 to remain in compliance with your testing schedule. Contact USTinspector@deh.sccgov.org to schedule the testing. The spill buckets are direct buried and were hydrostatically tested for one hour with no loss. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Leak detection well MW-1 was installed in 1985 as part of underground storage tank (UST) compliance requirements. Monitoring wells MW-2 through MW-4 were installed in April 1989, in response to an unauthorized release report filed in September 1988. The report was based on 15 gallons of fuel released due to line damage during an underground fueling system upgrade, and detection of liquid phase hydrocarbons (LPH) in well MW-1. Hydrocarbons in soil and groundwater were detected in MW-2, but not in MW-3 or MW-4. Wells MW-1 through MW-4 were tested for concurrent use as groundwater monitoring and soil vapor extraction (SVE) wells in July 1991. Dedicated SVE wells VW-1 and VW-2 and groundwater monitoring wells MW-5 and MW-6 were installed in November 1991. Vapor extraction testing conducted in January 1992 indicated a general SVE radius of influence of 20 feet. Monitoring wells MW-7 and MW-8 were installed and four soil borings (B-1 through B-4) were drilled in February 1992. Monitoring well MW-9

and sparge wells SP-1 and SP-2 were installed in December 1993. Five cone penetrometer points (CPT-1 through CPT-5) were advanced downgradient of the main plume area in December 1993. Samples collected from the cone penetrometer points did not contain dissolved hydrocarbons above laboratory reporting limits. An SVE system (including horizontal vapor extraction wells HVW-1 and HVW-2) was installed in August 1993, and was turned off in September 1994, after extracted vapor concentrations declined to stable minimum levels. Air sparging was done concurrently with SVE. Sparge testing performed in January 1994 indicated an approximate radius of influence of 15 feet. The SVE/air sparging system, wells MW-1, VW-1, VW-2, and (original) sparge wells SP-1 and SP-2 were removed in September 1995, during upgrade of the site fueling system and removal of 350 tons of soil from the hydrocarbon source area. Additional offsite assessment (soil borings B-1 through B-5, GP-1 through GP-6) performed in March and May 1999 indicated dissolved methyl-tert-butyl ether (MtBE) concentrations in the furthest downgradient grab water sample to be 256 micrograms per liter ("g/L) at 30 feet below ground surface (bgs). The 1999 assessment was conducted in conjunction with onsite injection of microbial/nutrient and oxygen-releasing compound slurry as an enhanced passive bioremediation measure. Quarterly monitoring data from January, April, and June 2000 indicated that dissolved nutrient levels showed evidence of reduction (via microbial consumption) over time, and that areas of relatively high heterotrophic microbial population density corresponded to areas of higher dissolved hydrocarbon and oxygenate levels. Dissolved MtBE levels showed evidence of decline in response to treatment measures, but did not yet comply with Santa Clara Valley Water District (SCVWD) remedial goals. Dissolved oxygen (DO) level increases observed just after treatment were not sustained. Based on these data, the SCVWD requested establishment of a groundwater monitoring grid at depths of 30 feet bgs, and initiation of further remediation. Monitoring wells MW-7A and MW-10 through MW-12 were installed in March 2001, to monitor vertical plume distribution and replace buried source area well MW-7. Sparge wells SP-1 through SP-6 (including new wells SP-1 and SP-2) were installed in March 2001, and an oxygen uptake study was conducted in conjunction with a vapor extraction test in April 2001, to demonstrate the feasibility of combined oxygen injection/SVE remediation at the site. In March 2003, periodic injection of oxygen into sparge wells began onsite. On August 13, 2003, two soil samples were collected from beneath each fuel dispenser. The soil samples did not contain concentrations of total petroleum hydrocarbons as gasoline (TPHg), benzene, toluene, ethylbenzene, and total xylenes (BTEX), MtBE, di-isopropyl ether(DIPE), tert-amylmethyl ether (TAME), ethyl-t-butyl ether (EtBE), tert-butyl alcohol (TBA), 1,2-dichloroethane (DCA) and 1,2-dibromoethane (EDB) above laboratory reporting limits. On November 17 through 19, 2004, SECOR supervised the installation of SP-7 through SP-10, SP-13, and tank pit well TP-1. Proposed oxygen injection wells SP-11 and SP-12 were not installed due to the inability to confirm or deny the presence of utilities in the proposed boring locations. Proposed monitoring wells MW-13 and MW-14 were not drilled due to the presence of fiber optic lines. On December 19-20, 2005, SECOR conducted a SVE test utilizing tank pit well TP-1 at the site. The purpose of the test was to determine if residual concentrations of TPHg, BTEX, or MtBE are present in the tank pit backfill. Soil vapor samples collected during the SVE test did not contain concentrations of TPHg, BTEX, or MtBE

above laboratory reporting limits. On January 3, 2006, SECOR supervised the installation of one offsite deep monitoring well, MW-13(D). Proposed oxygen injection wells SP-11 and SP-12 were not installed due to the presence of pea gravel in the proposed locations. The last oxygen injection occurred on 10/29/09.

Violation Description: Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/15/2014. Mechanical overflow prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats and all other mechanical components and reinstalled in the tank fill opening today. No permit or other corrective action is required.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: There was no hazardous waste accumulated at this location during the

inspection. Hazardous waste manifests for the past 3-yr were inspected and documented under the Natural Science building: FA0205225. Area employees receive annual training in conjunction with the site's Emergency Contingency Plan for emergency procedures, chemical handling & hazardous waste management. Below are violations that were corrected during the inspection and do not require further action: 22G114: EMERGENCY AISLE SPACE Observed blocked access to a fire extinguisher along the south wall of the building; boxes were moved and access to the fire extinguisher was regained. Notes: The 2-uniquely shaped black poly drums are used as a maintenance tools and will be marked as such by SJSU Central Plant personnel. These maintenance drums will be stored in a location other than on top of the drum containment while empty.

completed by Service Technician John Courant from CA UST Services. Mr. Courant held current ICC, Ronan and Franklin Fueling Systems certifications at the time of inspection. The tank annular was placed under 7-in of vacuum for 60-minutes with no loss of vacuum; PASS Piping sumps was filled to at least 1-inch over the highest point with the piping with water. The liquid level was tested with an Incon Sump Tester TS-ST5. All tests received a printout that indicated that all tests passed. Secondary Containment Piping: Supply & Return, see above. Provide a copy of today's test report by 9/8/18 and ensure a copy is available on-site for future inspection. For questions regarding this report, contact Ray Maiden at ray.maiden@cep.sccgov.org or at 408-918-1980 (mon-thur).

Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 09/15/2014. Mechanical overflow prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Eval Notes: ON SITE WITH JOHN COURANT A CALIFORNIA ICC CERTIFIED TECHNICIAN WITH CALIFORNIA UST SERVICES TO WITNESS THE ANNUAL MONITORING CERTIFICATION AND SB989 SECONDARY CONTAINMENT TESTING. MR. COURANT'S CERTIFICATIONS WERE VERIFIED TO BE CURRENT. THE FOLLOWING COMPONENTS WERE TESTED AND FOUND TO BE OPERABLE: -SPILL BUCKET WAS TESTED USING THE ACCELERATED INCON TEST. THE PASS PRINT OUT WILL BE INCLUDED IN THE MONITORING CERTIFICATION DOCUMENTATION -LIQUID SENSOR IN THE STP AND TANK ANNULAR TRIGGERED AN AUDIBLE AND VISUAL ALARM AT THE PANEL.

Eval Notes: On-site to witness the annual monitoring system certification conducted by California UST Services, technician John Courant. Mr. Courant held current ICC, Ronan and Franklin Fueling Systems certifications at the time of inspection. UST system is suction system for emergency generator with aboveground piping. The UST monitoring panel Ronan x76s has no printer. Audible and visual alarms noted when LS3 sensors located in the annular space and piping sump were tested in water. Spill bucket tested using the INCON Sump Test System (STS), passed 15-minute accelerated testing. Tank is fitted with ball float as overfill prevention and mechanical overfill (flapper valve) in the fuel drop tube. Sump dry and free of debris at the time of inspection. Aboveground piping is labeled with contents and flow direction. Observed liquid on the annular sensor when it was removed for testing. The service technician pumped out approximately 200ml of clear liquid with no odor [Truncated]

Eval Notes: All UST system leak detection equipment was tested today by UST Service Technician John Courant of California UST Services. Mr. Courant has current ICC UST Service Technician certification (exp. 8/9/2016) and Ronan X76 certification (exp. 9/20/2014). The Model LS3 sensors in the tank annular space and the tank top piping sump were tested using water to obtain audible and visual fuel alarms on the Ronan X76 monitoring panel. The UST fill spill bucket was hydrostatically tested using the Incon TS-STs accelerated hydrostatic test system. The bucket itself is liquid-tight, as confirmed by a test with the tank fill riser plugged, but the bucket drain valve had a slow leak. Valve was cleaned today and now seals liquid tight. Submit copies of the Monitoring System Certification form and spill bucket test report within 30 days. Notes: 1. Designated UST Operator monthly inspection records and list of trained facility employees are in order. 2. Records of visual [Truncated]

Eval Notes: There was no hazardous waste accumulated at this location during the inspection. Hazardous waste manifests for the past 3-yr were inspected and documented under the Natural Science building: FA0205225. Area employees receive annual training in conjunction with the site's Emergency Contingency Plan for emergency procedures, chemical handling & hazardous waste management. Below are violations that were corrected during the inspection and do not require further action: 22G114: EMERGENCY AISLE SPACE Observed blocked access to a fire extinguisher along the south wall of the building; boxes were moved and access to the fire extinguisher was regained. Notes: The 2-uniquely shaped black poly drums are used as a maintenance tools and will be marked as such by SJSU Central Plant personnel. These maintenance drums will be stored in a location other than on top of the drum containment while empty.

Eval Notes: On-site to observe UST secondary containment testing. All tests were completed by Service Technician John Courant from CA UST Services. Mr. Courant held current ICC, Ronan and Franklin Fueling Systems certifications at the time of inspection. The tank annular was placed under 7-in of vacuum for 60-minutes with no loss of vacuum; PASS Piping sumps was filled to at least 1-inch over the highest point with the piping with water. The liquid level was tested with an Incon Sump Tester TS-ST5. All tests received a printout that indicated that all tests passed. Secondary Containment Piping: Supply & Return, see above. Provide a copy of today's test report by 9/8/18 and ensure a copy is available on-site for future inspection. For questions regarding this report, contact Ray Maiden at ray.maiden@cep.sccgov.org or at 408-918-1980 (mon-thur).

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted an inspection of this area for Hazardous Materials Business Plan. Facility has created a uniform emergency procedures posting, which will replace current emergency procedures throughout the campus. All eyewash/safety shower inspection tags were current. Observed emergency spill kit & fire extinguisher near chemical storage areas. Areas employees receive annual training in conjunction with the site's Emergency Contingency Plan (emergency procedures, chemical handling & hazardous waste management).
