

TRAIL COUNT

11th Annual Count of Trail Users in San José

2017

San José's **eleventh annual count** of trail users occurred on Wednesday, September 13 at six count stations.

The related survey results are published via the *Trail Count 2017 Summary Report*.

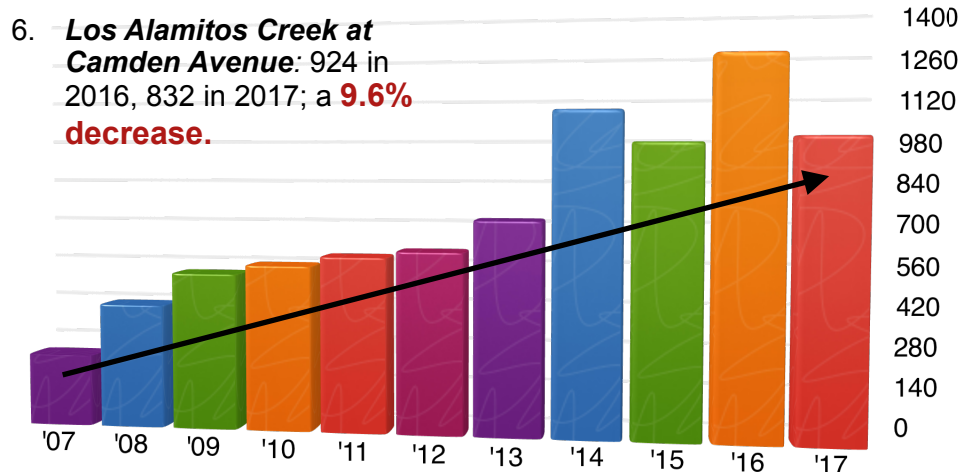

In general, we documented decreasing traffic, but in all instances, the drop was less than the substantial increases noted in 2016. The long-term trend line indicates increasing trail usage.

1. **Guadalupe River at Coleman Avenue:** 1,269 in 2016, 996 in 2017; a **21.5% decrease**. This station had recorded a 29.9% increase in 2016; a 1-day special event is believed to have increased traffic that year.
2. **Guadalupe River at Riverpark Towers (New station):** visited by 724 users.

3. **Guadalupe River at River Oaks Parkway:** 2,325 in 2016, 2,376 in 2017; a **2.2% increase**.
4. **Los Gatos Creek at Hamilton Avenue:** 1,380 in 2016, 1,135 in 2017; a **17.8% decrease**. This station had recorded a 21% increase in 2016.
5. **Los Gatos Creek at Auzerais Avenue:** 163 in 2016, 160 in 2017; a **1.8% decrease**. AM and PM counts only.

7. **NEW:** On-Street Bike lanes; San Fernando Street, used by 136 from 7:00-9:00am and 173 from 4:00-7:00pm. Fourth Street used by 43 in morning and 69 in evening. Eighty-four skateboarders were counted along both routes during the evening count.

Thank you to all the hardworking volunteers, advocates, agency partners & local companies like Callander Associates and Mark Thomas & Company.
